Approximate date of commencement of proposed sale to public: As soon as practicable after this Registration Statement is declared effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box. ☐

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input checked="" type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided to Section 7(a)(2)(B) of the Securities Act. ☐

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Proposed Maximum Aggregate Offering Price(1)(2)	Amount of Registration Fee(2)(3)
Common stock, \$0.001 par value per share	\$	\$

- (1) Estimated solely for the purpose of computing the amount of the registration fee pursuant to Rule 457(o) under the Securities Act of 1933, as amended (the "Securities Act").
- (2) Includes the additional shares that the underwriters have the option to purchase from the Registrant.
- (3) To be paid in connection with the initial filing of the registration statement.
- The Registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act, or until the registration statement shall become effective on such date as the Securities and Exchange Commission (the "SEC"), acting pursuant to said Section 8(a), may determine.

EXPLANATORY NOTE

Pursuant to General Instruction II.C. of Form S-1, we are omitting our consolidated financial statements for the year ended December 31, 2018 and for the nine months ended September 30, 2019 and 2020 because the omitted financial information relates to historical periods that we believe will not be required to be included in the prospectus at the time of the contemplated offering. We intend to amend this registration statement to include all financial information required by Regulation S-X at the date of such amendment before distributing a preliminary prospectus to investors.

The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

Subject to Completion
Preliminary Prospectus dated , 2021

PROSPECTUS

Shares

ALKAMI TECHNOLOGY, INC.

Common Stock

This is Alkami Technology, Inc.'s initial public offering. We are selling shares of our common stock. We expect the public offering price to be between \$ and \$ per share. Currently, no public market exists for our common stock. We intend to apply to list our common stock for trading on the under the symbol "ALKT."

We are an "emerging growth company" as defined under the federal securities laws and, as such, have elected to comply with certain reduced public company reporting requirements for this prospectus and future filings.

Investing in our common stock involves risks. See the [Risk Factors](#) section beginning on page 18 of this prospectus for factors you should consider before investing in our common stock.

	Per Share	Total
Public offering price	\$	\$
Underwriting discounts and commissions(1)	\$	\$
Proceeds, before expenses, to us	\$	\$

- (1) See "Underwriting" for additional disclosure regarding estimated underwriting discounts and commissions and estimated offering expenses payable by us.
- To the extent that the underwriters sell more than shares of our common stock, the underwriters have the option for a period of 30 days to purchase up to an additional shares of our common stock from us at the initial public offering price less underwriting discounts and commissions.

Neither the Securities and Exchange Commission nor any state securities commission has approved, or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver shares of our common stock against payment in New York, New York on , 2021.

Goldman Sachs & Co. LLC J.P. Morgan Barclays

The date of this prospectus is , 2021.

We and the underwriters have not authorized anyone to provide any information or to make any representations other than those contained in this prospectus or in any free writing prospectuses we have prepared or that have been prepared on our behalf, or to which we have referred you. We and the underwriters take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. This prospectus is an offer to sell only the shares offered by this prospectus, but only under circumstances and in jurisdictions where it is lawful to do so. The information contained in this prospectus is current only as of its date. Our business, financial condition, results of operations and prospects may have changed since that date.

For investors outside the United States: We have not, and the underwriters have not, done anything that would permit this offering or possession or distribution of this prospectus in any jurisdiction where action for that purpose is required, other than in the United States. Persons outside of the United States who come into possession of this prospectus must inform themselves about, and observe any restrictions relating to, the offering of the shares of our common stock and the distribution of this prospectus outside of the United States.

Through and including _____, 2021 (the 25th day after the commencement of this offering), all dealers that buy, sell or trade shares of our common stock, whether or not participating in this offering, may be required to deliver a prospectus. This delivery requirement is in addition to the dealers' obligation to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

MARKET AND INDUSTRY DATA

The market data and other statistical information used throughout this prospectus are based on independent industry publications, reports by market research firms or other published independent sources. Certain market, ranking and industry data included in this prospectus, including the size of certain markets, our size or position and the positions of our competitors within these markets, and our solutions relative to our competitors, are based on the estimates of our management. These estimates have been derived from our management's knowledge and experience in the markets in which we operate, as well as information obtained from surveys, reports by market research firms, trade and business organizations and other contacts in the markets in which we operate. Unless otherwise noted, all of our market share and market position information presented in this prospectus is an approximation based on management's knowledge. References herein to our being a leader in a market refer to our belief that we have a leading market share position in each such specified market, unless the context otherwise requires. In addition, the discussion herein regarding our various markets is based on how we define the markets for our solutions.

This prospectus includes industry data that we obtained from periodic industry publications. Such data includes materials published by FI Navigator. Industry publications generally state that the information contained therein has been obtained from sources believed to be reliable, but there can be no assurance as to the accuracy or completeness of included information. We have not independently verified any of the data from third-party sources, nor have we ascertained the underlying economic assumptions relied upon therein.

TRADEMARKS

We own or otherwise have rights to use a number of U.S. registered trademarks, trade names and service marks, including those mentioned in this prospectus, used in conjunction with the marketing and sale of our solutions. This prospectus includes trademarks, such as ALKAMI™ and ACH Alert™, which are protected under applicable intellectual property laws and are our property and/or the property of our subsidiaries. This prospectus also contains trademarks, trade names and service marks of other companies, which are the property of their respective owners. We do not intend our use or display of other companies' trademarks, service marks or trade names to imply a relationship with, or endorsement or sponsorship of us by, any other companies. Solely for convenience, our trademarks and trade names referred to in this prospectus may appear without the ® or ™ symbols, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the rights of the applicable licensor to these trademarks and trade names.

BASIS OF PRESENTATION

References herein to the "Company," "Registrant," "we," "us," "our" and "our company" refer to Alkami Technology, Inc., a Delaware corporation.

Certain monetary amounts, percentages and other figures included in this prospectus have been subject to rounding adjustments. Accordingly, figures shown as totals in certain tables or charts and figures expressed as percentages in the text may not total 100% or, as applicable, when aggregated may not be the arithmetic aggregation of the percentages that precede them.

NON-GAAP MEASURES AND OTHER DATA

We believe that our consolidated financial statements and the other financial data included in this prospectus have been prepared in a manner that complies, in all material respects, with generally accepted accounting principles in the United States ("GAAP") and the regulations published by the Securities and Exchange Commission ("SEC"). However, we use adjusted EBITDA, as described in "Prospectus Summary—Summary Consolidated Financial and Operating Information," and non-GAAP cost of subscription services and non-GAAP subscription gross margin, as described in "Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Business Metrics," in various places in this prospectus. These non-GAAP financial measures are presented as supplemental disclosure and should not be considered in isolation from, or as a substitute for, the financial information prepared in accordance with GAAP, and should be read in conjunction with the consolidated financial statements included elsewhere in this prospectus. Adjusted EBITDA, non-GAAP cost of subscription services and non-GAAP subscription gross margin, may differ from similarly titled measures presented by other companies.

See "Prospectus Summary—Summary Consolidated Financial and Operating Information" for a reconciliation of adjusted EBITDA to the most directly comparable financial measure calculated in accordance with GAAP, and a discussion of our management's use of adjusted EBITDA.

See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Business Metrics" for a reconciliation of non-GAAP cost of subscription services and non-GAAP subscription gross margin to the most directly comparable financial measures calculated in accordance with GAAP, and a discussion of our management's use of non-GAAP cost of subscription services and non-GAAP subscription gross margin.

Throughout this prospectus, we also provide a number of key business metrics used by management and typically used by our competitors in our industry. These and other key business metrics are discussed in more detail in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Business Metrics."

PROSPECTUS SUMMARY

This summary highlights selected information contained in greater detail elsewhere in this prospectus. This summary is not complete and does not contain all of the information you should consider in making your investment decision. Before investing in our common stock, you should carefully read this entire prospectus. You should carefully consider, among other things, the sections titled "Risk Factors," "Cautionary Note Regarding Forward-Looking Statements" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our consolidated financial statements and the related notes included elsewhere in this prospectus.

Mission

Our mission is to empower financial institutions to grow confidently, adapt quickly and build thriving digital communities.

Overview

Alkami is a cloud-based digital banking platform. We inspire and empower community, regional and super-regional financial institutions ("FIs") to compete with large, technologically advanced and well-resourced banks in the United States. Our solution, the Alkami Platform, allows FIs to onboard and engage new users, accelerate revenues and meaningfully improve operational efficiency, all with the support of a proprietary, true cloud-based, multi-tenant architecture. We cultivate deep relationships with our clients through long-term, subscription-based contractual arrangements, aligning our growth with our clients' success and generating an attractive unit economic model.

In the early 2000s digital engagement began revolutionizing industries overnight, forcing firms to invest and innovate or risk losing long-term relationships to well-resourced competitors. Within banking, many FIs were ill-equipped to compete with larger competitors, including the largest banks in the world, such as J.P. Morgan Chase, Bank of America, Citigroup and Wells Fargo (collectively, "megabanks"), primarily due to resource constraints and the resulting inability to keep pace, technologically, with evolving consumer preferences for digital engagement. This led to the first digital banking platforms.

The earliest versions of digital banking platforms, however, were focused on basic self-service functions that could be accomplished with a desktop computer via a single integration to the primary system of record. As the form factor of digital engagement evolved to include both desktop and mobile, FIs generally adopted disparate digital banking solutions as a matter of necessity. This served to only magnify the compounding and seemingly inescapable problem of layered and poorly integrated infrastructures, and today, many FIs continue to use disparate technology solutions for desktop, mobile, retail and business banking functions. On average, FIs require integration to more than 20 systems to enable customer self-service, according to management estimates. As consumer preferences quickly evolve, many FIs have found that their existing infrastructure lacks the uniformity and the ability to adapt to an increasingly digital and mobile world. Our technology provides a value proposition that solves this problem.

We founded Alkami to help level the playing field for FIs. Our vision was to create a platform that combined premium technology and fintech solutions in one integrated ecosystem, delivered as a SaaS solution and providing our clients' customers with a single point of

access to all things digital. We invested significant resources to build a technology stack that prioritized innovation velocity and speed-to-market given the importance of product depth and functionality in winning and retaining clients. The result of these investments is a premium platform that has enabled us to replace older, larger and better-funded incumbents in many of the FIs served (as of year-end 2020) by the Alkami Platform. Today, our clients can offer world-class experiences reflecting their individual digital strategies, reaching over _____ of our clients' customers, with an additional _____ of our clients' customers under implementation, as of year-end 2020.

Our domain expertise in retail and business banking has enabled us to develop a suite of products tailored to address key challenges faced by FIs. The key differentiators of the Alkami Platform include:

- **User experience:** Personalized and seamless digital experience across user interaction points, including mobile, chat and SMS, establishing durable connections between FIs and their customers.
- **Integrations:** Scalability and extensibility driven by _____ real-time integrations to back office systems and third-party fintech solutions as of year-end 2020, including core systems, payment cards, mortgages, bill pay, electronic documents, money movement, personal financial management and account opening.
- **Deep data capabilities:** Data synchronized and stored from back office systems and third-party fintech solutions and synthesized into meaningful insights, targeted content and other areas of monetization.

Our fully integrated, Amazon Web Services ("AWS")-based true cloud technology infrastructure delivers stability, extensibility and security and ultimately drives the pace at which we bring innovation to market. With a single code base, built on a multi-tenant infrastructure and combined with continuous software delivery, we are able to innovate and iterate quickly to roll out new products in a fraction of the time compared to many of the hosted, single-tenant infrastructures historically prevalent throughout the digital banking vendor space. The extensibility we offer further allows our clients to develop on top of our technology, providing our clients the freedom to modify the Alkami Platform to meet their strategic objectives.

The Alkami Platform offers an end-to-end set of software products. Our typical relationship with an FI begins with a set of core functional components, which can extend over time to include a rounded suite of products across account opening, card experience, financial wellness, fraud protection and marketing. Due to our architecture, adding products through our single code base is fast, simple and cost-effective, and we expect product penetration to continue to increase as we broaden our product suite. As of December 31, 2020, our clients used _____ of our _____ offered products, on average.

Our broad partner ecosystem is fundamental to our platform. We deeply integrate with each of the major core system vendors as well as best-of-breed third-party solution providers who contribute key products and functionality to our platform. These partnerships enable our clients to have a single point of integration to a customized suite of technology systems through the Alkami Platform. For these technology partners, the extensibility of our platform enables them to expand their product offerings and enhance their distribution, attracting even more partners to the platform as we grow.

Our target clients vary in size, generally ranging from approximately \$500 million to \$100 billion in assets and from approximately 10,000 customers to 2 million customers. This vast group of FIs, _____ of which were Alkami clients as of year-end 2020, had \$ _____ in assets on their balance

sheets as of year-end 2020. This reflects the strength and importance of these FIs to the economy and to the durability of the community and regional FI model more broadly. However, this group generally does not have the internal resources or capabilities to fully build and customize their own technology platforms to keep pace with the megabanks, challenger banks and other technology-enabled competitors. In a world where nearly two-thirds of U.S. consumers have expressed a willingness to utilize a financial product from a trusted technology brand, we allow our clients to keep pace with the level of digital experience and customer engagement that consumers have come to expect.

We go to market through an internal sales force. Given the long-term nature of our contracts, a typical sales cycle can range from approximately three to 12 months, with the subsequent implementation timeframe generally ranging from six to 12 months depending on the depth of integration. Over the last several years, we believe Alkami has outperformed the market in winning clients among FIs that emphasize retail banking, helping us to become one of the fastest-growing digital banking platforms in the United States.

As we have extended our capabilities, our value proposition has strengthened. Our new client contracts reflect deeper relationships, with the 2020 client cohort averaging _____ products across _____ minimum registered users, a _____ % and _____ % improvement from the 2018 cohort. In 2018 and 2019, we had 18 and 25 clients that each represented over \$1.0 million in annual recurring revenue ("ARR") respectively. As of September 30, 2020, we had 30 clients that each represented over \$1.0 million in ARR. Our existing client relationships have continued to deepen as a result of a dedicated cross-sell team that has executed _____ new add-on sales as of year-end 2020, representing over \$ _____ million in total contract value ("TCV"), since the team's formation in July 2019. Finally, our clients view us as a long-term strategic partner providing mission critical technology, as demonstrated by our strong client retention. Since inception, we have extended all but three clients who have come up for renewal, and across 2019 and 2020 we achieved an aggregate _____ % ARR uplift across _____ renewals.

Finally, we view our founder-led culture as a differentiating competitive advantage. Each of our employees, or Alkamists, participates in our equity compensation plan, which helps to ensure they are individually aligned with our success. More importantly, we believe that we have fostered a culture that encourages both entrepreneurship and teamwork. The contributions of our employees are openly valued, leading to what we believe is a rewarding experience which is ultimately driving company performance and employee retention. Thirty-five percent of our new hires in 2019 were from Alkamist referrals.

We derive our revenues almost entirely from multi-year contracts that had an average contract life since our inception of 69 months as of September 30, 2020. In 2020, our new multi-year contracts had an average term of _____ months. We predominantly employ a per-registered user pricing model, with incremental fees above certain contractual client minimum commitments for each licensed solution. Our pricing is tiered, with per-registered-user discounts applied as clients achieve higher levels of customer penetration, in turn incentivizing our clients to internally market our solution and promote digital engagement. Our ability to grow revenues through deeper client customer penetration and cross-sell allowed us to deliver a net dollar revenue retention rate of 115% as of September 30, 2020.

We have grown quickly since shifting our focus exclusively to digital banking in 2009. We served _____ million and 7.2 million registered users during 2020 and 2019, representing a _____ % growth rate for one of our key revenue drivers. Our total revenues were \$ _____ million, \$73.5 million and \$48.2 million for 2020, 2019 and 2018, representing

growth rates of % from 2019 to 2020 and 52.6% from 2018 to 2019. Our total revenues were \$78.8 million and \$51.9 million for the nine months ended September 30, 2020 and September 30, 2019, representing a growth rate of 51.9%. SaaS subscription services, as further described below, represented %, 91.5% and 90.8% of total revenues for 2020, 2019 and 2018. We incurred net losses of \$ million, \$41.9 million and \$41.6 million for 2020, 2019 and 2018, largely on the basis of significant continued investment in sales, marketing, product development and post-sales client activities. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations” for more information.

Our Industry

The United States banking industry is massive, with \$25 trillion in assets on the balance sheets of over 10,000 FIs (as of December 31, 2019). These FIs range from megabanks to significantly smaller local community banks and affinity credit unions. The United States banking industry generated over \$1.1 trillion in revenues in 2019, highlighting a significant market opportunity that drives intense competition and a magnitude of economic importance which requires considerable regulation, both locally and nationally.

However, banking is not a static industry, and over the last several decades technology has emerged as a differentiating factor among FIs, driving market share gains, operational efficiencies and improved regulatory compliance. While technology is involved in almost every function a bank performs, we typically see FIs’ technology spend increase in response to, or in preparation for, the following trends:

- **Heightened user expectations:** The digitization of everything from taxis, to food delivery, to commerce has conditioned consumers and businesses to maintain heightened user experience expectations that extend to financial services, particularly when it relates to everyday financial services such as banking services. Previously inconceivable, account opening, loan origination (and disbursement) and money transfer can now be executed within a matter of minutes, elevating digital user experience beyond branch location as the premier point of differentiation for our clients’ customers’ service and satisfaction.
- **Increasingly digital competitive landscape:** The competitive landscape within banking in the United States and globally is shifting. On one hand, approximately 51% of all new bank accounts opened in the second quarter of 2020 were with megabanks due at least in part to their massive technology and marketing budgets. On the other hand, a fragmented and emerging group of technology platforms and challenger banks are redefining what it means to be a bank, embedding basic banking services, such as checking accounts, within elegant user experiences and attracting tens of millions of registered users, all without a single physical branch. Each market trend is accelerating with the disappearance of geographical boundaries. As banking digitizes, the importance of a physical footprint and local presence is reduced, introducing regional and national competition to even the most insulated local markets.
- **Regulatory environment:** Banking regulation is continuously evolving and it is the responsibility of FIs to create an internal control environment capable of ensuring compliance with a framework of local, national and international rules. Emerging technologies are increasingly built to perform routinized tasks associated with this function, freeing up resources to be reinvested in growth.
- **Importance of efficiency:** The current low interest rate environment, which began as a monetary stimulus measure during the 2008–2009 global financial crisis and continues today, has put immense pressure on FI earnings, notably interest income spreads that FIs earn between taking deposits and providing loans. This is forcing FIs to seek additional revenue

streams, often in the form of fee income from payments processing and other non-credit products. This is also forcing FIs to seek opportunities to streamline operations, in many cases automating historically manual and labor intensive tasks with the benefit of process improvement at a markedly lower cost.

The heightened focus on technology and security in addressing the evolution of the banking industry has driven massive spend. The largest FIs in the United States spent a combined \$24 billion on technology in 2019, representing a 25% increase in total technology spend from 2016. While technology spend in banking is distributed across functions, we believe the following technology trends to be most impactful to the industry:

- **Shift to mobile:** Mobile is quickly redefining both retail and business banking. There were over 350 million digital bank user accounts in the United States as of September 30, 2020, and according to an industry source, 70% of consumers use a mobile device on a monthly basis to manage their bank account. Today, a consumer or business can open a bank account almost instantly and take out a loan or transfer money from a mobile device. These rapid advances are contributing to a substantial decline in bank physical branch traffic, a trend that meaningfully accelerated in 2020 as foot traffic remained down across all retail segments even after initial COVID-19-related shelter-in-place restrictions were eased, decreasing nearly 25% year-over-year for the week ended November 29, 2020, according to a retail analytics firm.
- **Shift to the cloud:** Today, many of the pillars serving as key differentiators across industries, including banking, stem from the benefits of cloud hosting and computing. Cloud-based, multi-tenant infrastructures that are securely delivered enable technology providers to broadly distribute capabilities historically reserved only for the best resourced. Premier technology architectures can also leverage data that can be collected into a warehouse and quickly synthesized for consumption by clients in the service of their customers. Finally, single-, low- and no-code architectures allow near same-day adaptability to evolving consumer needs or economic challenges. The COVID-19 pandemic provided a remarkable case study in the value of these advantages, as massive market share shifts are accruing to the benefit of innovative, cloud-based platforms across a variety of industries.
- **Proliferation of powerful, best-of-breed technology solutions:** Advances and investment in financial technology have led to a disaggregated network of point solutions designed to improve upon discrete tasks historically executed through a single vendor, enabling FIs to select the products that best fit their objectives, scale and budget. This proliferation of powerful technology solutions has served to reduce barriers to entry for providers of point solutions, encouraging innovation and underscoring the value of integration layers.
- **Increasing complexity of banking information technology architectures:** Due to the proliferation of technology solutions, the information technology taxonomy of FIs is becoming increasingly complex. Integration challenges of the past required connections to a small number of back office systems and point solutions. Today, connections are required to dozens of third parties and many core and back office systems. This complexity is magnified with many of the point solutions and core systems operating as single tenant models. Integrating user experiences across desktop, mobile and SMS platforms with proliferating point solutions and a myriad of core and back office systems is overly burdensome to most FIs. Consequently, the industry highly values platforms that mitigate much of this complexity with modern architectures that enable real-time integrations to all constituents of the digital banking ecosystem.
- **Focus on security:** The increasingly interconnected and digital nature of finance renders FIs particularly vulnerable to cybersecurity attacks given the attractive nature of FIs as protectors

of both capital and personal information. The modern bank robber is armed with no more than a computer and can attack from anywhere in the world, and consequently, FIs are constantly under threat. For this reason, FIs are making substantial technology investments in cybersecurity and security more broadly.

FIs take varying approaches to technological evolution, partially driven by philosophy, but predominantly driven by resources that are available to them. The largest FIs have the financial flexibility to make significant investments; the four largest banks in the United States spent a combined \$24 billion on technology in 2019, representing a 25% increase in total technology spend from 2016 and reflecting the commitment to protect and extend leadership through technology.

The vast majority of remaining FIs do not have the financial resources to match the technology advantage of megabanks. However, these FIs also have no choice but to keep up with the general pace of innovation given the alternative of losing market share to these large competitors, reinforcing the critical nature of third-party digital platforms in helping them overcome the limitations of finite discretionary budgets and resources. This is the essence of our value proposition and market opportunity.

Our Market Opportunity

Our market opportunity was born from the natural and sequential evolution of the technology underlying the banking system. Core banking systems, built to process daily banking transactions and maintain a financial record, increased in functionality through a proliferation of user interaction points, features, functions and associated back-office systems, creating massive integration requirements. This, in turn, created the need for a single platform to manage the back-end technical requirements of integration while concurrently creating a unified front-end-user experience. Finally, the data accumulating on disparate technology systems required aggregation. This fragmentation and increasing complexity created the market opportunity for unified, cloud-based digital banking platforms such as ours.

We have prioritized product depth since inception. We realized early on that we would never be able to replace an incumbent vendor without a superior product set. We therefore invested in a technology stack featuring multi-tenant architecture, a single code base and continuous delivery, facilitating speed-to-market and enabling us to rapidly innovate while consistently maintaining a set of integrations that underlies a broad set of configuration options today. This configurability represents a product depth which, when combined with an elegant user experience, underscores our competitive strengths.

We estimate that in 2015, we had an approximately \$3 billion addressable market, based on FI Navigator estimates of 110 million registered users as of September 2015. Today, we estimate that we have expanded our core addressable market opportunity to approximately \$6 billion, based on FI Navigator estimates of roughly 185 million registered users as of September 2020 and the revenue opportunities of the expanded features currently offered by the Alkami Platform and product set. We believe our core addressable market continues to have meaningful organic expansion potential, with digital banking penetration converging towards nearly 100% over time from an assumed 70% today, a trend towards client customers generally maintaining an account with more than one FI and growing revenue-per-registered-user opportunities as we continue to introduce new products. We further estimate the additional addressable market opportunity that we accessed through our recent acquisition of ACH Alert LLC ("ACH Alert") to be approximately \$750 million, resulting in an estimated

total addressable market of approximately \$7 billion. We expect that our total addressable market will also continue to grow organically and inorganically as we pursue adjacent product opportunities, such as fraud prevention which we accessed through our acquisition of ACH Alert, or longer term opportunities around account opening, security, data analytics, money movement and financial wellness, among others.

Our Platform and Ecosystem

The Alkami Platform is a multi-tenant, single code base, continuous delivery platform powered by a true cloud infrastructure. Our platform integrates with core system providers and other third-party fintech providers, and acts as the primary interaction point among consumers, businesses and FIs. The primary benefit of this model is to reduce the inefficiencies of traditional point-to-point integration strategies, instead offering a single point of integration allowing our clients' customers to navigate seamlessly across channels. We believe this is critical to FIs as their models shift from physical to digital, enabling the creation of a digital community in the image of their broader brands and aligned with their strategic objectives.

The Alkami Platform maintains over integrations to more than endpoints, as of year-end 2020. Our third-party partnerships and integrations are a crucial element of the Alkami Platform, enabling FIs to choose from, and connect with, a broad array of third-party service providers essential to the curation of a customized digital experience. This depth of product configurability and optionality is made possible by the software adapters we have built to standardize access to solutions offered by third-party vendors.

The Alkami Value Proposition

We have grown rapidly since 2009 by understanding our clients' objectives and pain points, including adding as of September 30, 2020 nearly 3.4 million registered users since year-end 2018. We have designed our solutions to improve our clients' ability to achieve their core objectives, including new client growth, customer engagement, increasing and holding deposits, making loans, facilitating money movement and lowering overall operating costs. Importantly, we make our clients more competitive against the megabanks, challenger banks and other technology-enabled competitors.

The technology that powers our platform is foundational to our success and ability to deliver a distinct value proposition to our clients, characterized by the following:

- **Premier user experience:** The Alkami Platform enables our clients to leverage technology to deliver a premier user experience. The experience we build, and that our clients deliver, is validated by our clients' market-leading app ratings, which are, on average, higher than each of our main competitors and reflect the level of customer satisfaction associated with leading technology brands.
- **Versatile platform:** Our product breadth, depth of integrations, partner network and configurability enable our clients to more precisely match our products to suit the objectives of their digital offering. For our clients, this allows a degree of flexibility that is critical to their pursuit of differentiation without the technical burden and higher cost of custom software. For our business, this approach is tremendously scalable, enabling us to serve large and smaller institutions alike from a single platform, with a full product suite across both retail and business banking operations.

- **Velocity of innovation:** Our ability to win and retain clients is a function of consistently striving to offer a platform with products and configurations that exceeds those of our competition. Our multi-tenant architecture, combined with continuous delivery, allows us to implement new and existing features in lockstep with our clients' evolving needs. This can be done with as little as a week's notice, as was demonstrated during COVID-19-related shelter-in-place restrictions, when we quickly implemented our skip-a-payment tool. Our technological infrastructure provides a speed-to-market advantage which often allows us to remain a step ahead of competitors who operate single-tenant or other legacy architecture.
- **Fraud mitigation:** Our clients seek to achieve a balance between convenience and safety that is required in a digital banking solution. Biometric and multi-factor authentication, combined with machine learning wrapped in a leading user experience, creates a more secure user experience. Platform security capabilities such as card management and true real-time alerts further help to mitigate fraud and develop a relationship of trust between our clients and their customers.

The Alkami Platform delivers tangible results to clients, including increased registered user growth, increased product usage, operational efficiencies and customer retention. Our clients grew their registered user bases at an annualized rate of 16% during the nine months ended September 30, 2020, roughly three times as fast as the 5% annualized growth rate achieved across the industry over the same period, according to data from FI Navigator.

Our Growth Strategies

We intend to continue to invest to grow our business and expand our addressable market by applying the following strategies:

- **Deepen existing client relationships:** We expect to continue to deepen our existing client relationships, increasing both the number of registered users and the number of products per client:
 - **Cross-sell:** We are constantly broadening our product set to address the needs of our client base. We offered nine products when we launched Alkami Business Banking in 2015, and as of September 30, 2020, 26 products were available through the Alkami Platform and our clients had purchased an average of nine products from us. We expect cross-sell to contribute meaningfully to our growth, particularly following the creation of a dedicated sales team focused on this effort in July 2019.
 - **Customer penetration:** While we recently surpassed 9.0 million registered digital banking users ("registered users"), we estimate this only represents 70% of our clients' total customers as of September 30, 2020. We believe we have a substantial opportunity to grow our registered user base within our existing clients as we continuously enhance our value proposition and more consumers adopt digital banking solutions.
- **Win new clients:** We believe the market remains underserved by legacy solutions, which will allow us to continue to gain market share. We are increasingly winning FIs with more sophisticated needs as we grow our market presence and product capabilities. As compared to the 2018 client cohort, our 2020 client cohort, on average, has more than twice as many registered users, has longer contract lengths and utilizes more products.
- **Broaden and enhance product suite:** We intend to invest to continue to enhance our product suite. In 2020 and 2019, we spent % and 44.5% of revenues on research and development, underlining our commitment to ongoing innovation. This includes maintaining a

constant pulse on the evolving needs of our clients and designing products accordingly, both on a proprietary basis and in collaboration with our platform partner network.

- **Select acquisitions:** We intend to selectively pursue acquisitions and other strategic transactions that accelerate our strategic objectives. Our acquisition of ACH Alert, which was completed in the fourth quarter of 2020, exemplifies our acquisition strategy, bringing an additional fraud prevention tool to our product suite while also providing access to 95 new clients.

Summary Risk Factors

Investing in our common stock involves substantial risk. Our ability to execute our strategy is also subject to certain risks. The risks described under the heading “Risk Factors” in this prospectus may cause us not to realize the full benefits of our strengths or may cause us to be unable to successfully execute all or part of our strategy. Some of the most significant challenges and risks we face include the following:

- Our limited operating history makes it difficult to evaluate our current business and future prospects, and our recent success may not be indicative of our future results of operations.
- We have a history of operating losses and may not achieve or maintain profitability in the future.
- Our business and operations have experienced rapid growth, and if we do not appropriately manage future growth, if any, or are unable to improve our systems and processes, our business, financial condition and results of operations will be adversely affected.
- If we are unable to attract new clients or continue to broaden our existing clients' use of our solutions, our business, financial condition and results of operations could be materially and adversely affected.
- Growth of our business will depend on a strong brand and any failure to maintain, protect and enhance our brand would hurt our ability to retain or expand our base of clients.
- We may not accurately predict the long-term rate of client subscription renewals or adoption of our solutions, or any resulting impact on our revenues or results of operations.
- We leverage third-party software, content and services for use with our solutions. Performance issues, errors and defects, or failure to successfully integrate or license necessary third-party software, content or services, could cause delays, errors or failures of our solutions, increases in our expenses and reductions in our sales, which could materially and adversely affect our business, financial condition and results of operations.
- If we are unable to effectively integrate our solutions with other systems used by our clients, or if there are performance issues with such third-party systems, our solutions will not operate effectively, and our business, financial condition and results of operations could be materially and adversely affected.
- We face intense competition and could lose market share to our competitors, which could adversely affect our business, financial condition and results of operations.
- We derive all of our revenues from clients in the financial services industry, and any downturn, consolidation or decrease in technology spend in the financial services industry could materially and adversely affect our business, financial condition and results of operations.

- A breach or other compromise of our security measures or those of third parties we rely on could result in unauthorized access to personal information about our clients' customers and other individuals and other data or disruptions to our systems or operations, which could materially and adversely impact our reputation, business, financial condition and results of operations.
- Our clients, as FIs, are highly regulated and subject to a number of challenges and risks. Our failure to comply with laws and regulations applicable to us as a technology service provider to FIs could materially and adversely affect our business, financial condition and results of operations, increase costs and impose constraints on the way we conduct our business.
- Privacy and data security concerns, data collection and transfer restrictions, contractual obligations and U.S. and foreign laws, regulations and industry standards related to data privacy, security and protection could limit the use and adoption of the Alkami Platform and materially and adversely affect our business, financial condition and results of operations.
- Our quarterly and annual results of operations are likely to fluctuate in future periods.
- Because we recognize revenues from our solution over the terms of our client agreements, the impact of changes in the subscriptions for our solution will not be immediately reflected in our operating results.
- Our sales cycle can be unpredictable, time-consuming and costly, which could materially and adversely affect our business, financial condition and results of operations.
- Because competition for key employees is intense, we may not be able to attract and retain the highly skilled employees we need to support our operations and future growth.
- Our intellectual property rights are valuable, and any inability to protect them could reduce the value of our products, services and brand.
- Claims by others that we infringe, misappropriate or otherwise violate their proprietary technology or other rights could have a material and adverse effect on our business, financial condition and results of operations.

Our Corporate Information

We were incorporated under the laws of the State of Delaware on August 18, 2011. Our principal executive offices are located at 5601 Granite Parkway, Suite 120, Plano, Texas 75024, and our telephone number is (877) 725-5264. Our corporate website address is www.alkami.com. Information contained on, or accessible through, our website shall not be deemed incorporated into and is not a part of this prospectus or the registration statement of which it forms a part. We have included our website in this prospectus solely as an inactive textual reference.

Implications of Being an Emerging Growth Company

We are an emerging growth company as defined in the Jumpstart Our Business Startups Act of 2012 (the "JOBS Act"). We will remain an emerging growth company until the earliest of (1) the last day of the fiscal year following the fifth anniversary of the consummation of this offering, (2) the last day of the fiscal year in which we have total annual gross revenues of at least \$1.07 billion, (3) the last day of the fiscal year in which we are deemed to be a "large accelerated filer" as defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), which would occur if the market value of our common stock held by non-affiliates exceeded \$700.0 million as of the last

business day of the second fiscal quarter of such year or (4) the date on which we have issued more than \$1.0 billion in non-convertible debt securities during the prior three-year period. An emerging growth company may take advantage of specified reduced reporting requirements and is relieved of certain other significant requirements that are otherwise generally applicable to public companies. As an emerging growth company:

- We will present in this prospectus only two years of audited consolidated financial statements, plus any required unaudited consolidated financial statements, and related management's discussion and analysis of financial condition and results of operations;
- We will avail ourselves of the exemption from the requirement to obtain an attestation and report from our auditors on the assessment of our internal control over financial reporting pursuant to the Sarbanes-Oxley Act of 2002;
- We will provide less extensive disclosure about our executive compensation arrangements; and
- We will not require stockholder non-binding advisory votes on executive compensation or golden parachute arrangements.

Accordingly, the information contained herein may be different than the information you receive from our competitors that are public companies or other public companies in which you hold stock.

In addition, the JOBS Act provides that an emerging growth company can take advantage of an extended transition period for complying with new or revised accounting standards. This provision allows an emerging growth company to delay the adoption of some accounting standards until those standards would otherwise apply to private companies. We have elected to avail ourselves of this exemption from new or revised accounting standards, and therefore we will not be subject to the same requirements to adopt new or revised accounting standards as other public companies that are not emerging growth companies.

The Offering

Common stock offered by us	shares (or shares if the underwriters exercise in full their option to purchase additional shares).
Common stock to be outstanding after this offering	shares (or shares if the underwriters exercise in full their option to purchase additional shares).
Option to purchase additional shares of common stock	The underwriters have an option to purchase up to an aggregate of additional shares of our common stock from us at the initial public offering price, less underwriting discounts and commissions. The underwriters can exercise this option at any time within 30 days from the date of this prospectus.
Use of proceeds	<p>We estimate that the net proceeds to us from the sale of the shares of our common stock in this offering will be approximately \$ million, based upon an initial public offering price of \$ per share, which is the midpoint of the price range set forth on the cover page of this prospectus, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us. If the underwriters exercise their option to purchase additional shares in this offering in full, we estimate that our net proceeds will be approximately \$ million, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us.</p> <p>We currently expect to use the net proceeds from this offering, together with our existing cash and cash equivalents, to finance our growth, develop new or enhanced products and fund capital expenditures. In connection with the completion of this offering, we also plan to pay an aggregate of \$ million in accumulated dividends payable to holders of our Series B redeemable convertible preferred stock (the "Series B Dividend"). As a result of the anticipated payment of the Series B Dividend, certain holders of 5% or more of our capital stock and their affiliated entities who are holders of our Series B redeemable convertible preferred stock are expected to receive approximately \$ million of the net proceeds of this</p>

	<p>offering. Mr. Todd Clark has served as President and Chief Executive Officer of CU Cooperative Systems, Inc. (“CU Cooperative”) since 2016, currently serves as a member of our board of directors and was designated to serve as a member of our board of directors by CU Cooperative. CU Cooperative is a holder of our Series B redeemable convertible preferred stock and, as a result of the anticipated payment of the Series B Dividend, is expected to receive approximately \$ million of the net proceeds of this offering.</p> <p>The remaining funds will be used for general corporate purposes, including working capital and operating expenses. We may also use a portion of the remaining net proceeds, if any, to acquire complementary businesses, products, services or technologies. However, we do not have agreements or commitments for any acquisitions at this time.</p> <p>See the section titled “Use of Proceeds” for additional information.</p>
Proposed stock exchange symbol	“ALKT.”
Risk factors	See “Risk Factors” for a discussion of factors you should carefully consider before deciding to invest in our common stock.
<p>The number of shares of our common stock to be outstanding after this offering reflected in the table above is based on shares of our common stock outstanding as of December 31, 2020 and excludes:</p> <ul style="list-style-type: none"> • shares of our common stock issuable upon the exercise of outstanding warrants, which includes our existing redeemable convertible preferred stock warrants that will convert into warrants exercisable for common stock immediately prior to the completion of this offering, as of December 31, 2020, with a weighted-average exercise price of \$ per share; • shares of our common stock issuable upon the exercise of outstanding stock options as of December 31, 2020, with a weighted-average exercise price of \$ per share; • shares of our common stock issuable upon the exercise of outstanding stock options granted subsequent to December 31, 2020, with a weighted-average exercise price of \$ per share; • additional shares of our common stock reserved for issuance pursuant to future awards under our 2011 Long-Term Incentive Plan (“2011 Plan”), which will become available for issuance under our 2021 Incentive Award Plan (“2021 Plan”) immediately prior to the completion of this offering; • shares of our common stock reserved for future issuance under our 2021 Plan, which will become effective on the date immediately prior to the date our registration statement 	

relating to this offering becomes effective, as well as any future increases in the number of shares of our common stock reserved for issuance under the 2021 Plan; and

- shares of our common stock reserved for future issuance under our 2021 Employee Stock Purchase Plan ("ESPP"), which will become effective on the date immediately prior to the date the registration statement relating to this offering becomes effective, as well as any future increases in the number of shares of our common stock reserved for issuance under the ESPP.

Unless otherwise indicated, all information contained in this prospectus, including the number of shares of our common stock that will be outstanding after this offering, assumes or gives effect to:

- the filing and effectiveness of our amended and restated certificate of incorporation immediately prior to the completion of this offering;
- the conversion of all the outstanding shares of our redeemable convertible preferred stock into an aggregate of _____ shares of our common stock, the conversion of which will occur immediately prior to the completion of this offering;
- no exercise of the outstanding warrants or options subsequent to December 31, 2020; and
- no exercise by the underwriters of their option to purchase up to _____ additional shares of our common stock.

Summary Consolidated Financial and Operating Information

The following tables set forth our summary historical consolidated financial information for the periods and dates indicated. The consolidated balance sheet data as of December 31, 2020 and the consolidated statements of operations for the years ended December 31, 2019 and 2020 have been derived from our audited consolidated financial statements included elsewhere in this prospectus. The statement of operations for the year ended December 31, 2018 has been derived from our financial statements not included in this prospectus. Our historical results are not necessarily indicative of the results to be expected in the future.

This data should be read in conjunction with, and is qualified in its entirety by reference to, the “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Capitalization” sections of this prospectus and our audited consolidated financial statements and notes thereto for the periods and dates indicated included elsewhere in this prospectus.

Consolidated Statements of Operations

	Year Ended December 31,		
	2018	2019	2020
(in thousands, except share and per share \$ amounts)			
Revenues	\$ 48,199	\$ 73,541	\$
Cost of revenues ⁽¹⁾	32,495	43,106	
Gross profit	15,704	30,435	
Operating expenses ⁽¹⁾ :			
Research and development	27,648	32,722	
Sales and marketing	11,202	15,328	
General and administrative	18,659	24,920	
Total operating expenses	57,509	72,970	
Loss from operations	(41,805)	(42,535)	
Non-operating income (expense):			
Interest income	135	267	
Interest expense	(103)	(110)	
Gain on financial instruments	125	509	
Loss before income tax expense	(41,648)	(41,869)	
Provision for income taxes	—	—	
Net loss	(41,648)	(41,869)	
Less: Cumulative dividends and adjustments to redeemable convertible preferred stock	(1,106)	(1,212)	
Net loss attributable to common stockholders	\$ (42,754)	\$ (43,081)	\$
Net loss per share:			
Basic and diluted ⁽²⁾	\$ (12.70)	\$ (9.91)	\$
Weighted average number of common shares outstanding:			
Basic and diluted ⁽²⁾	3,365,527	4,346,900	

- (1) Includes stock-based compensation expenses as follows:

(in thousands)	Year Ended December 31,		
	2018	2019	2020
Cost of revenues	\$111	\$ 219	\$
Research and development	306	323	
Sales and marketing	66	97	
General and administrative	318	611	
Total stock-based compensation expenses	<u>\$801</u>	<u>\$1,250</u>	<u>\$</u>

- (2) See Note 11 to our consolidated financial statements included elsewhere in this prospectus for an explanation of the calculations of our basic and diluted net loss per share and the weighted-average number of shares used in the computation of the per share amounts.

Consolidated Balance Sheet Data

The following table sets forth our consolidated balance sheet data as of December 31, 2020 on:

- an actual basis;
- a pro forma basis, to reflect: (i) the conversion of all of the outstanding shares of our redeemable convertible preferred stock as of December 31, 2020 into an aggregate of shares of our common stock immediately prior to the completion of this offering; (ii) the conversion of all of our outstanding warrants exercisable for redeemable convertible preferred stock as of December 31, 2020 into warrants exercisable for shares of our common stock immediately prior to the completion of this offering; and (iii) the filing and effectiveness of our amended and restated certificate of incorporation immediately prior to the completion of this offering; and
- a pro forma as adjusted basis, giving effect to the pro forma adjustments discussed above, and giving further effect to (i) the sale of shares of our common stock in this offering at an assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover page of this prospectus, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us and (ii) the payment in cash of the Series B Dividend in connection with the completion of this offering.

(in thousands)	As of December 31, 2020		
	Actual	Pro Forma	Pro Forma as Adjusted
Cash and cash equivalents	\$	\$	\$
Total assets			
Total liabilities			
Redeemable convertible preferred stock			
Total stockholders' equity (deficit)			

Reconciliation of Adjusted EBITDA to Net Loss

(in thousands)	Year Ended December 31,		
	2018	2019	2020
Net loss	\$ (41,648)	\$ (41,869)	\$
Provision for income taxes	—	—	
Gain on financial instruments	(125)	(509)	
Interest income, net	(32)	(157)	
Amortization of intangible assets	—	—	
Depreciation	2,139	2,226	
Stock-based compensation expense	801	1,250	
Expenses related to tender offer ⁽¹⁾	—	—	
Acquisition-related expenses	—	—	
Adjusted EBITDA ⁽²⁾	<u>\$ (38,865)</u>	<u>\$ (39,059)</u>	<u>\$</u>

- (1) On October 15, 2020, we offered to purchase for cash vested stock options or shares of common stock, representing up to 20% of each employee's holdings from employees employed by us on September 30, 2020. The expiration date of the tender offer was November 12, 2020. An aggregate of 1.1 million vested stock options and shares of common stock were tendered, resulting in total net payments of \$16.7 million.
- (2) Adjusted EBITDA is a non-GAAP financial measure and should not be considered an alternative to GAAP net loss as a measure of operating performance or as a measure of liquidity. We define adjusted EBITDA as net loss before provision for income taxes; gain on financial instruments; interest income, net; amortization of intangible assets; depreciation; stock-based compensation expense; tender offer-related costs; and acquisition-related costs. We believe adjusted EBITDA provides investors and other users of our financial information consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations. For additional information regarding adjusted EBITDA, see "Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Business Metrics."

RISK FACTORS

An investment in our common stock involves a high degree of risk. You should consider carefully the following risks, together with the information under the caption "Business—Our Competition," our financial statements and the related notes and the other information contained in this prospectus before you decide whether to buy our common stock. If any of the events contemplated by the following discussion of risks should occur, our business, results of operations and financial condition could be materially and adversely affected. As a result, the market price of our common stock could decline, and you may lose all or part of the money you paid to buy our common stock. The risks described below are those that we believe are the material risks that we face but other risks may arise from time to time. See "Cautionary Note Regarding Forward-Looking Statements" elsewhere in this prospectus.

Risks Relating to Our Business and Industry

Our limited operating history makes it difficult to evaluate our current business and future prospects, and our recent success may not be indicative of our future results of operations.

We began business in 2009 and, as a result, have only a limited operating history upon which to evaluate our business and future prospects. We have encountered and will continue to encounter risks and difficulties frequently experienced by rapidly growing companies in constantly evolving industries, including the risks described in this document. If we do not address these risks successfully, our business, financial condition and results of operations will be adversely affected and the market value of our common stock could decline. Further, because we have limited historical financial data and we operate in a rapidly evolving market, any predictions about our future revenues and expenses may not be as accurate as they would be if we had a longer operating history or operated in a more predictable market.

You should not consider our revenue growth rate in recent periods as indicative of our future performance. You should not rely on our revenues for any prior quarterly or annual periods as an indication of our future revenues or revenue growth. If we are unable to maintain revenue growth, it may be difficult for us to achieve and maintain profitability.

We have a history of operating losses and may not achieve or maintain profitability in the future.

We have incurred net losses since inception. For the years ended December 31, 2020 and 2019, we incurred net losses of \$ and \$41.9 million, respectively, and as of December 31, 2020, we had an accumulated deficit of \$.

Since inception, we have spent significant funds on organizational and start-up activities, to recruit key managers and employees, to develop our solutions and client support resources and for research and development. We will need to generate and sustain increased revenue levels in future periods in order to become profitable, and, even if we do increase our revenues, we may not be able to achieve, maintain or increase our profitability. We intend to continue to expend significant resources to support further growth and extend the functionality of our solutions, expand our sales and product development headcount and increase our marketing activities. We will also face increased costs associated with growth, the expansion of our client base and the costs of being a public company. Our efforts to grow our business may be more costly than we expect, and we may not be able to increase our revenues enough to offset our increased operating expenses. We expect to incur losses for the foreseeable future as we continue to invest in product development and marketing, and we cannot predict whether or when we will achieve or maintain profitability. If we are unable to achieve and

maintain profitability, the value of our business and common stock may significantly decrease and our business, financial condition and results of operations may be materially and adversely affected.

Our business and operations have experienced rapid growth, and if we do not appropriately manage future growth, if any, or are unable to improve our systems and processes, our business, financial condition and results of operations will be adversely affected.

We have experienced rapid growth in our headcount and operations and expect to continue to experience rapid growth in the future. This growth has placed, and may continue to place, significant demands on our management and our operational and financial infrastructure. Our ability to manage our growth effectively will require us to continue to expand our operational and financial infrastructure and to continue to retain, attract, train, motivate and manage our employees. Continued growth could strain our ability to develop and improve our operational, financial and management controls, enhance our reporting systems and procedures, recruit, train and retain highly skilled personnel and maintain client and brand satisfaction.

As we expand our business and operate as a public company, we may find it difficult to maintain our corporate culture while managing our employee growth. See “—Our corporate culture has contributed to our success, and if we cannot maintain it as we grow, we could lose the innovation, creativity and teamwork fostered by our culture, and our business may be adversely affected.” Additionally, our productivity and the quality of our offerings may be adversely affected if we do not integrate and train our new employees quickly and effectively. Failure to manage any future growth effectively could result in increased costs, negatively affect our clients’ satisfaction with our offerings and harm our results of operations. If we fail to achieve the necessary level of efficiency in our organization as we grow, our business, financial condition and results of operations could be harmed.

Additionally, if we do not effectively manage the growth of our business and operations, the quality of our solutions could suffer, which would negatively affect our brand, operating results and overall business. We may not be able to sustain the diversity and pace of improvements to our offerings successfully or implement systems, processes and controls in an efficient or timely manner or in a manner that does not negatively affect our results of operations. Our failure to improve our systems, processes and controls, or their failure to operate in the intended manner, may result in our inability to manage the growth of our business and to forecast our revenues and expenses accurately.

If we are unable to attract new clients or continue to broaden our existing clients’ use of our solutions, our business, financial condition and results of operations could be materially and adversely affected.

To increase our revenues, we will need to continue to attract new clients and succeed in having our current clients expand the use of our solutions across their institutions. In addition, for us to maintain or improve our results of operations, it is important that our clients renew their subscriptions with us on similar or more favorable terms to us when their existing subscription term expires. Our revenue growth rates may decline or fluctuate as a result of a number of factors, including client spending levels, client dissatisfaction with our solution, decreases in the number client customers, changes in the type and size of our clients, pricing changes, competitive conditions, the loss of our clients to other competitors and general economic conditions. We cannot assure you that our current clients will renew or expand their use of our solutions. If we are unable to attract new clients or retain or attract new business from current clients, our business, financial condition and results of operations may be materially and adversely affected. The growth of our business also depends on our ability to develop and maintain resale agreements for third-party solutions through our digital banking platform agreements. If we are unable to develop and maintain resale agreements, our business, financial condition and results of operations may be materially and adversely affected.

Growth of our business will depend on a strong brand and any failure to maintain, protect and enhance our brand would hurt our ability to retain or expand our base of clients.

We believe that a strong brand is necessary to continue to attract and retain clients. We need to maintain, protect and enhance our brand in order to expand our base of clients. This will depend largely on the effectiveness of our marketing efforts, our ability to provide reliable services that continue to meet the needs of our clients at competitive prices, our ability to maintain our clients' trust, our ability to continue to develop new functionality and use cases, and our ability to successfully differentiate our services and platform capabilities from competitive products and services, which we may not be able to do effectively. While we may choose to engage in a broader marketing campaign to further promote our brand, this effort may not be successful or cost effective. Our brand promotion activities may not generate customer awareness or yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we are unable to maintain or enhance client awareness in a cost-effective manner, our brand and our business, financial condition and results of operations could be materially and adversely affected.

Our corporate reputation is susceptible to damage by actions or statements made by adversaries in legal proceedings, current or former employees or clients, competitors and vendors, as well as members of the investment community and the media. There is a risk that negative information about our company, even if based on false rumor or misunderstanding, could adversely affect our business. In particular, damage to our reputation could be difficult and time-consuming to repair, could make potential or existing clients reluctant to select us for new engagements, resulting in a loss of business, and could adversely affect our employee recruitment and retention efforts. Damage to our reputation could also reduce the value and effectiveness of our brand name and could reduce investor confidence in us and materially and adversely affect our business, financial condition and results of operations.

We may not accurately predict the long-term rate of client subscription renewals or adoption of our solutions, or any resulting impact on our revenues or results of operations.

Our clients have no obligation to renew their subscriptions for our solutions after the expiration of the subscription term, and our clients, if they choose to renew at all, may renew for fewer products or on less favorable pricing terms. Since our client agreements had an average contract life since our inception of 69 months as of September 30, 2020, and since we only began operations in 2009, we have limited historical data with respect to rates of client subscription renewals and cannot be certain of anticipated renewal rates. Our renewal rates may decline or fluctuate as a result of a number of factors, including our clients' satisfaction with our pricing or our solutions or their ability to continue their operations or spending levels. As we sign more contracts, we will generally have an increasing amount of contracts coming up for renewal. If our clients do not renew their subscriptions for our solutions on similar pricing terms, our revenues may decline and it could have a material and adverse effect on our business, financial condition and results of operations.

Additionally, as the markets for our solutions continue to develop, we may be unable to attract new clients based on the same subscription model that we have used historically. Moreover, large or influential FI clients may demand more favorable pricing or other contract terms from us. As a result, in the past we have had, and expect to be required in the future, to change our pricing model, reduce our prices or accept other unfavorable contract terms, any of which could materially and adversely affect our business, financial condition and results of operations.

We leverage third-party software, content and services for use with our solutions. Performance issues, errors and defects, or failure to successfully integrate or license necessary third-party software, content or services, could cause delays, errors or failures of our solutions, increases

in our expenses and reductions in our sales, which could materially and adversely affect our business, financial condition and results of operations.

We use software and content licensed from, and services provided by, a variety of third parties in connection with the operation of our solutions. Any performance issues, errors, bugs or defects in third-party software, content or services could result in errors or a failure of our solutions, which could materially and adversely affect our business, financial condition and results of operations. In the future, we might need to license other software, content or services to enhance our solutions and meet evolving client demands and requirements. Any limitations in our ability to use third-party software, content or services could significantly increase our expenses and otherwise result in delays, a reduction in functionality or errors or failures of our solutions until equivalent technology or content is either developed by us or, if available, identified, obtained through purchase or licensed and integrated into our solutions. In addition, third-party licenses may expose us to increased risks, including risks associated with the integration of new technology, the diversion of resources from the development of our own proprietary technology and our inability to generate revenues from new technology sufficient to offset associated acquisition and maintenance costs, all of which may increase our expenses and materially and adversely affect our business, financial condition and results of operations.

If we are unable to effectively integrate our solutions with other systems used by our clients, or if there are performance issues with such third-party systems, our solutions will not operate effectively, and our business, financial condition and results of operations could be materially and adversely affected.

The Alkami Platform integrates with other third-party systems used by our clients, including core processing systems. We do not have formal arrangements with many of these third-party providers regarding our access to their application program interfaces to enable these client integrations. If we are unable to effectively integrate with third-party systems, our clients' operations may be disrupted, which could result in disputes with clients, negatively impact client satisfaction and materially and adversely affect our business, financial condition and results of operations. Additionally, if we are unable to address our clients' needs or preferences in a timely fashion or further develop and enhance our solutions, or if a client is not satisfied with the quality of work performed by us or with the technical support services rendered, we could incur additional costs to address the situation and our business may be impaired and clients' dissatisfaction with our solutions could damage our ability to maintain or expand our client base. If the software of such third-party providers has performance or other problems, such issues may reflect poorly on us and the adoption and renewal of our solutions, which could significantly harm our reputation. Moreover, any negative publicity related to our solutions, regardless of its accuracy or whether the ultimate cause of any poor performance actually results from our products or from the systems of our clients, may further damage our business by affecting our reputation and may materially and adversely affect our business, financial condition and results of operations.

We face intense competition and could lose market share to our competitors, which could adversely affect our business, financial condition and results of operations.

The market for digital solutions for financial service providers is intensely competitive and characterized by rapid changes in technology and frequent new product introductions and improvements. We anticipate continued challenges from current competitors, including point solution vendors and core processing vendors, many of whom are well-established and enjoy greater resources, as well as from new entrants into the industry, which could include well-established companies with distinct advantages, such as cloud providers, search providers, social media providers and large providers of software to businesses and consumers. If we are unable to anticipate or react to these competitive challenges, our competitive position could weaken, and we could experience a

decline in revenues that could adversely affect our business, financial condition and results of operations.

Many of our existing competitors have, and some of our potential competitors could have, substantial competitive advantages such as:

- greater name recognition and larger client bases;
- larger sales and marketing budgets and resources;
- greater client support resources;
- larger research and development budgets; and
- substantially greater financial, technical and other resources.

Potential clients may also prefer to continue their relationship with their existing partner rather than change to a new partner regardless of product performance or features. As a result, even if the features of the Alkami Platform are superior, clients may not purchase our solution. In addition, innovative start-up companies, and larger companies that are making significant investments in research and development, may develop similar or superior products and technologies that compete with our solutions. Our current and potential competitors may also establish cooperative relationships among themselves or with third parties that may further enhance their market position. As a result, our current or potential competitors might be able to adapt more quickly to new technologies and client customer needs, devote greater resources to the promotion or sale of their products and services, initiate or withstand substantial price competition, take advantage of acquisitions or other opportunities more readily, or develop and expand their product and service offerings more quickly than we can. Further, conditions in our industry could change rapidly and significantly as a result of technological advancements. These competitive pressures in our market or our failure to compete effectively may result in price reductions, reduced revenues and gross margins and loss of market share. If our clients do not renew their subscriptions for our solutions on similar or more favorable terms to us, our revenues may decline and it could have a material and adverse effect on our business, financial condition and results of operations.

We derive all of our revenues from clients in the financial services industry, and any downturn, consolidation or decrease in technology spend in the financial services industry could materially and adversely affect our business, financial condition and results of operations.

We derive all of our revenues from FIs, whose industry has experienced significant pressure in recent years due to economic uncertainty, low interest rates, liquidity concerns and increased regulation. In the recent past, FIs have experienced consolidation, distress and failure, and very few new FIs are being created. It is possible these conditions may continue into the future, and even if conditions improve for FIs, there can be no guarantee that these conditions will not reoccur. If any of our clients fail or merge with, or are acquired by, other entities, such as FIs that have internally developed banking technology solutions or that are not our clients or use our solutions less, our business, financial condition and results of operations could be materially and adversely affected. Additionally, changes in management of our clients could result in delays or cancelations of the implementation of our solutions. It is also possible that the larger FIs that result from business combinations could have greater leverage in negotiating price or other terms with us or could decide to replace some or all of the elements of our solutions.

Our business, financial condition and results of operations could also be materially and adversely affected by weak economic conditions in the financial services industry. Any downturn in the financial services industry may cause our clients to reduce their spending on technology or cloud-based banking

technology or to seek to terminate or renegotiate their contracts with us. Moreover, even if the overall economy is robust, economic fluctuations caused by things such as the U.S. Federal Reserve altering the federal funds target range may cause potential new clients and existing clients to become less profitable and therefore forego or delay purchasing our solutions or reduce the amount of spend with us, which could materially and adversely affect our business, financial condition and results of operations.

If the market for digital banking solutions develops more slowly than we expect or changes in a way that we fail to anticipate, our sales would suffer and our business, financial condition and results of operations could be materially and adversely affected.

Use of, and reliance on, digital banking solutions is still at a relatively early stage, and we do not know whether FIs will continue to adopt digital banking solutions such as ours in the future or whether the market will change in ways we do not anticipate. Many FIs have invested substantial personnel and financial resources in legacy software, and these institutions may be reluctant, unwilling or unable to convert from their existing systems to our solutions. Furthermore, these FIs may be reluctant, unwilling or unable to use digital banking solutions due to various concerns such as the security of their data and reliability of the delivery model. These concerns or other considerations may cause FIs to choose not to adopt our digital banking solutions or to adopt them more slowly than we anticipate, either of which would adversely affect our business, financial condition and results of operations. Our future success also depends on our ability to sell additional applications and functionality to our current and prospective clients. As we create new applications and enhance our existing solutions, these applications and enhancements may not be attractive to clients. In addition, promoting and selling new and enhanced functionality may require increasingly costly sales and marketing efforts, and if clients choose not to adopt this functionality, our business, financial condition and results of operations could be materially and adversely affected.

Our business, financial condition and results of operations could be materially and adversely affected if our clients are not satisfied with our digital banking solutions or our systems and infrastructure fail to meet their needs.

Our business depends on our ability to satisfy our clients and meet their digital banking needs. Our clients use a variety of network infrastructure, hardware and software and our digital banking solutions must support the specific configuration of our clients' existing systems, including in many cases the solutions of third-party providers. Our implementation expenses increase when clients have unexpected data, network infrastructure, hardware or software technology challenges, or complex or unanticipated business or regulatory requirements. In addition, our clients typically require complex acceptance testing related to the implementation of our solutions. Implementation delays may also require us to delay revenue recognition under the related sales agreement longer than expected. Further, because we do not fully control our clients' implementation schedules, if our clients do not allocate the internal resources necessary to meet implementation timelines or if there are unanticipated implementation delays or difficulties, our revenue recognition may be delayed.

Further, any failure of or delays in our systems could cause service interruptions or impaired system performance. Some of our client agreements require us to issue credits for downtime in excess of certain thresholds and in some instances give our clients the ability to terminate their agreements with us in the event of significant amounts of downtime. If sustained or repeated, these performance issues could reduce the attractiveness of our solutions to new and existing clients, cause us to lose clients, decrease our revenues and lower our renewal rates by existing clients, each of which could materially and adversely affect our business, financial condition and results of operations. In addition, negative publicity resulting from issues related to our client relationships, regardless of accuracy, may adversely affect our ability to attract new clients and maintain and expand our relationships with existing clients.

If the use of our digital banking solutions increases, or if our clients demand more advanced features from our solutions, we will need to devote additional resources to improving our solutions, and we also may need to expand our technical infrastructure at a more rapid pace than we have in the past. This would involve spending substantial amounts to increase our cloud services infrastructure, purchase or lease data center capacity and equipment, upgrade our technology and infrastructure and introduce new or enhanced solutions. It takes a significant amount of time to plan, develop and test changes to our infrastructure, and we may not be able to accurately forecast demand or predict the results we will realize from such improvements. There are inherent risks associated with changing, upgrading, improving and expanding our technical infrastructure. Any failure of our solutions to integrate effectively with future infrastructure and technologies could reduce the demand for our solutions, resulting in client dissatisfaction, which could materially and adversely affect our business, financial condition and results of operations. Also, any expansion of our infrastructure would likely require that we appropriately scale our internal business systems and services organization, including implementation and client support services, to serve our growing client base. If we are unable to respond to these changes or fully and effectively implement them in a cost-effective and timely manner, our service may become ineffective, we may lose clients and our business, financial condition and results of operations could be materially and adversely affected.

A breach or other compromise of our security measures or those of third parties we rely on could result in unauthorized access to personal information about our clients' customers and other individuals and other data, or disruptions to our systems or operations, which could materially and adversely impact our reputation, business, financial condition and results of operations.

Certain elements of our solutions process and store personal information ("PI"), including banking and payment data and other PI regarding our clients' customers, such as social security numbers, and we may also have access to PI during various stages of the implementation process or during the course of providing client support. We, like other organizations, particularly in the financial technology sector, routinely are subject to cybersecurity threats, privacy breaches, insider threats, data breaches or other incidents that may either result in threatened or actual exposure resulting in unauthorized access, disclosure and misuse of PI or other information regarding clients, client customers, vendors, employees, third-party providers, or our company and business, and our technologies, systems and networks have been subject to attempted cybersecurity attacks. Information security risks for banking and technology companies such as ours have significantly increased in recent years in part because of the proliferation of new technologies, the use of the internet and telecommunications technologies to conduct financial transactions, and the increased sophistication and activities of organized crime, hackers, terrorists and other external parties. Because of our position in the financial services industry, we believe that we are likely to continue to be a target of such threats and attacks. Additionally, geopolitical events and resulting government activity could also lead to information security threats and attacks by affected jurisdictions and their sympathizers.

We maintain policies, procedures and technological safeguards and have implemented policy, procedural, technical, physical and administrative controls designed to protect our information technology system and applications, and the confidentiality, integrity and availability of data, including PI. However, violations of such policies, procedures and safeguards have occurred in the past and, despite the security measures we have in place, there can be no assurance that our safety and security measures (and those of our third-party providers) will prevent damage to, or interruption or breach of, our information systems and operations. Given the unpredictability of the timing, nature and scope of cybersecurity attacks and other security-related incidents, our technology may fail to adequately secure the data and PI we maintain in our databases and we cannot entirely eliminate the risk of improper or unauthorized access to or disclosure of data or PI, other security events that impact the integrity or availability of data, PI or our systems and operations, and data contained in such

systems and operations, or the related costs we may incur to mitigate the consequences from such events. Additionally, we cannot guarantee that our insurance coverage would be sufficient to cover all losses. Further, the Alkami Platform involves flexible and complex software solutions and there is a risk that configurations of, or defects in, the solutions or errors in implementation could create vulnerabilities to security breaches or incidents. There may be, and have been in the past, unlawful attempts to disrupt or gain access to our information technology systems that may result in unauthorized access to or disclosure of client customer PI or other data and disrupt our or our clients' operations. We may be unable to anticipate or prevent techniques used to obtain unauthorized access or to sabotage systems, react in a timely manner or implement adequate preventative measures. Additionally, we and client customers integrate our solutions with certain third-party systems used by our clients which may have access to PI and other data about our clients. Our ability to monitor such third-parties' security measures is limited, and a vulnerability in a third-party system with which we integrate could result in unauthorized access to or disclosure, modification, misuse, loss or destruction of our clients' and client customers' PI and other data, including our business information. Any of the foregoing could result in a material adverse effect on our business, reputation, financial condition and results of operations.

In addition, because we leverage third-party providers, including cloud, software, data center and other critical technology vendors to deliver our solution to our clients and their customers, we rely heavily on the data security technology practices and policies adopted by these third-party providers. Such third-party providers have access to PI and other data about our clients and employees, and some of these providers in turn subcontract with other third-party providers. Our ability to monitor our third-party providers' data security is limited. A vulnerability in our third-party provider's software or systems, a failure of our third-party providers' safeguards, policies or procedures, or a breach of a third-party provider's software or systems could result in the compromise of the confidentiality, integrity or availability of our systems or the data housed in our third-party solutions. Through contractual provisions and third-party risk management processes, we take steps to require that our providers and their subcontractors protect our PI and other data. However, due to the size and complexity of our technology platform and services, the amount of PI and other data that we store and the number of clients, employees and third-party providers with access to PI and other data, we are potentially vulnerable to a variety of intentional and inadvertent cybersecurity attacks and other security-related incidents and threats, which could result in a material adverse effect on our business, financial condition and results of operations.

Cybersecurity attacks and other malicious internet-based activity continue to increase, evolve in nature and become more sophisticated, and providers of digital products and services have been and are expected to continue to be targeted. Threats to our computer systems and those of our third-party providers or clients may result from human error, fraud or malice on the part of employees or third parties, including state-sponsored organizations with significant financial and technological resources, or from accidental technological failure. In addition to traditional computer "hackers," malicious code (such as viruses and worms), phishing, ransomware, social engineering attacks, employee theft, unauthorized access or misuse and denial-of-service attacks, sophisticated criminal networks as well as nation-state and nation-state supported actors now engage in attacks, including advanced persistent threat intrusions. Current or future criminal capabilities, discovery of existing or new vulnerabilities and attempts to exploit those vulnerabilities or other developments, may compromise or breach our systems or solutions. In the event our or our third-party providers' protection efforts are unsuccessful and our systems or solutions are compromised, we could suffer substantial harm.

Any cybersecurity attacks, security breaches, phishing attacks, ransomware attacks, computer malware, computer viruses, computer hacking attacks, unauthorized access, coding or configuration errors or similar incidents experienced by us or our third-party providers could result in operational disruptions and the loss, compromise or corruption of client or client customer data (including PI) or

data we rely on to provide our solutions, including our analytics initiatives and offerings, and impair our ability to provide our solutions and meet our clients' requirements, resulting in decreased revenues and otherwise adversely affecting our business, financial condition and results of operations. Any such incidents may also result in regulatory investigations and orders, litigation, disputes, investigations, indemnity obligations, damages for contract breach or penalties for violation of applicable laws or regulations. Also, our reputation could suffer irreparable harm, causing our current and prospective clients to decline to use our solutions in the future. Further, we could be forced to expend significant financial and operational resources in response to a security breach, including repairing system damage, increasing security protection costs by deploying additional personnel and modifying or enhancing our protection technologies, investigating and remediating any information security vulnerabilities and defending against and resolving legal and regulatory claims, all of which could divert resources and the attention of our management and key personnel away from our business operations and materially and adversely affect our business, financial condition and results of operations.

Federal, state and international regulations may require us or our clients to notify governmental entities and individuals of data security incidents involving certain types of PI or information technology systems. Security compromises experienced by others in our industry, our clients, our third-party providers or us may lead to public disclosures and widespread negative publicity. Any security compromise in our industry, whether actual or perceived, could erode client confidence in the effectiveness of our security measures, negatively impact our ability to attract new clients, cause existing clients to elect not to renew or expand their use of our solutions or subject us to third-party lawsuits, regulatory fines or other actions or liabilities, which could materially and adversely affect our business, financial condition and results of operations.

If we are not able to detect and identify activity on our platform that might be nefarious in nature or design processes or systems to reduce the impact of similar activity at a third-party provider, our clients and/or client customers could suffer harm. In such cases, we could face exposure to legal claims, particularly if the client and/or client customer suffered actual harm. We cannot ensure that any limitations of liability provisions in our client and user agreements, contracts with third-party providers and other contracts for a security lapse or breach or other security-related matter would be enforceable or adequate or would otherwise protect us from any liabilities or damages with respect to any particular claim. We also cannot ensure that our existing insurance coverage will continue to be available on acceptable terms or will be available in sufficient amounts to cover one or more large claims related to a security incident or breach, or that the insurer will not deny coverage as to any future claim. The successful assertion of one or more large claims against us that exceed available insurance coverage, or the occurrence of changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could adversely affect our reputation and our business, financial condition and results of operations.

In addition, some of our clients contractually require notification of data security compromises and include representations and warranties in their contracts with us that our solutions comply with certain legal and technical standards related to data security and privacy and meet certain service levels. In our contracts, a data security compromise or operational disruption impacting us or one of our critical vendors, or system unavailability or damage due to other circumstances, may constitute a material breach and give rise to a client's right to terminate its contract with us. In these circumstances, it may be difficult or impossible to cure such a breach in order to prevent clients from potentially terminating their contracts with us. Furthermore, although our client contracts typically include limitations on our potential liability, we cannot ensure that such limitations of liability would be adequate. We also cannot be sure that our existing general liability insurance coverage and coverage for errors or omissions will be available on acceptable terms or will be available in sufficient amounts to cover one or more claims, or that our insurers will not deny or attempt to deny coverage as to any future claim. The successful assertion of one or more claims against us, the inadequacy or denial of coverage under our insurance

policies, litigation to pursue claims under our policies or the occurrence of changes in our insurance policies, including premium increases or the imposition of large deductible or coinsurance requirements, could materially and adversely affect our business, financial condition and results of operations.

Our clients, as FIs, are highly regulated and subject to a number of challenges and risks. Our failure to comply with laws and regulations applicable to us as a technology service provider to FIs could materially and adversely affect our business, financial condition and results of operations, increase costs and impose constraints on the way we conduct our business.

Our clients and prospective clients, as FIs, are highly regulated and are generally required to comply with stringent regulations in connection with performing business functions that our solutions address. As a provider of technology services to such FIs, we may in the future, be subject to examination by various federal and state regulatory agencies, including those agencies that comprise the Federal Financial Institutions Examination Council ("FFIEC") and we may also be required to review and perform due diligence on certain of our clients and third-party providers. Matters subject to review and examination by the FFIEC, federal and state regulatory agencies and external auditors include, but are not limited to, our internal information technology controls in connection with our performance of data processing services, the agreements giving rise to those processing activities and the design of our solutions, as well as our systems and technical infrastructure, management and financial condition. In addition, while we are not regulated by the National Credit Union Administration ("NCUA"), as a result of our registration as a Credit Union Service Organization ("CUSO"), we are subject to disclosure, annual reporting and other requirements imposed by the NCUA. While many of our operations are not directly subject to the same regulations applicable to FIs, we are legally and contractually obligated to our clients to provide software solutions and maintain internal systems and processes that comply with certain federal and state regulations applicable to them. For example, as a result of obligations under some of our client contracts, we are required to comply with certain provisions of the Gramm-Leach-Bliley Act ("GLBA") related to the privacy of consumer information and may be subject to other privacy and data security laws because of the solutions we provide to FIs. We may also be subject to other privacy and data security laws because of the solutions we provide to FIs. Any inability to satisfy regulatory expectations in connection with examinations and to comply with applicable regulations and guidance could subject us to regulatory actions, adversely affect our ability to conduct our business, including attracting and maintaining clients, require significant costs to correct and harm our reputation. Further, if we have to make changes to our internal processes and solutions as result of applicable regulations or guidance or findings from examinations, we could be required to invest substantial additional time and funds and divert time and resources from other corporate purposes to remedy any identified deficiency or gap.

The evolving, complex and often unpredictable regulatory environment in which our clients operate could result in our failure to provide compliant solutions, which could result in clients not purchasing our solutions or terminating their contracts with us or the imposition of fines or other liabilities for which we may be responsible. In addition, federal, state and/or foreign agencies may attempt to further regulate our activities in the future which could materially and adversely affect our business, financial condition and results of operations. For example, existing laws, regulations and guidance could be amended or interpreted differently by regulators in a manner that imposes additional costs and has a negative impact on our existing operations or that limits our future growth. In addition, new regulations could require costly changes in our processes, infrastructure or personnel. Finally, actions by regulatory authorities could influence both the decisions our clients make concerning the purchase of our solutions and the timing and implementation of these decisions. Substantial research and development and other corporate resources have been and will continue to be applied to adapt our solutions to this evolving, complex and often unpredictable regulatory environment.

Privacy and data security concerns, data collection and transfer restrictions, contractual obligations and U.S. and foreign laws, regulations and industry standards related to data privacy, security and protection could limit the use and adoption of the Alkami Platform and materially and adversely affect our business, financial condition and results of operations.

In operating our business and providing services and solutions to our clients, we collect, use, store, transmit and otherwise process sensitive employee and client data, including PI regarding client customers and other individuals, in and across multiple jurisdictions, including at times, across national borders. As a result, we are subject to a variety of laws and regulations in the United States, Europe and around the world, as well as contractual obligations and industry standards, regarding data privacy, security and protection. In many cases, these laws, regulations and industry standards apply not only to third-party transactions, but also to transfers of information between or among us, our subsidiaries and other parties with which we have commercial relationships.

Data privacy, information security, and data protection are significant issues in the United States and globally. The regulatory framework governing the collection, processing, storage, use and sharing of certain information, particularly financial and other PI, is rapidly evolving and is likely to continue to be subject to uncertainty and varying interpretations. The occurrence of unanticipated events and development of evolving technologies often rapidly drives the adoption of legislation or regulation affecting the use, collection or other processing of data and manner in which we conduct our business. We publicly post documentation regarding our practices concerning the collection, processing, use and disclosure of information. Although we endeavor to comply with our published policies and documentation, we may at times fail to do so or be alleged to have failed to do so. Any failure or perceived failure by us to comply with our privacy policies or any applicable privacy, security or data protection, information security or consumer protection-related laws, regulations, orders or industry standards in one or more jurisdictions could expose us to costly litigation, significant awards, fines or judgments, civil and/or criminal penalties or negative publicity, and could materially and adversely affect our business, financial condition and results of operations. The publication of our privacy policy and other documentation that provide promises and assurances about data privacy and security can subject us to potential global or U.S. state and federal action if they are found to be deceptive, unfair, or misrepresentative of our actual practices, which could materially and adversely affect our business, financial condition and results of operations.

We expect that there will continue to be new proposed and adopted laws, regulations and industry standards concerning privacy, data protection and information security in the United States and other jurisdictions in which we operate. For example, in the United States, we are subject to the rules and regulations promulgated under the authority of the Federal Trade Commission. Additionally, the GLBA (along with its implementing regulations) restricts certain collection, processing, storage, use and disclosure of personal information, requires notice to individuals of privacy practices and provides individuals with certain rights to prevent the use and disclosure of certain nonpublic or otherwise legally protected information. These rules also impose requirements for the safeguarding and proper destruction of personal information through the issuance of data security standards or guidelines.

In addition, many states in which we operate have laws that protect the privacy and security of sensitive and personal information. Certain U.S. state laws may be more stringent or broader in scope, or offer greater individual rights, with respect to sensitive and personal information than international, federal, or other state laws, and such laws may differ from each other, which may complicate compliance efforts. For example, California enacted the California Consumer Privacy Act of 2018 ("CCPA") which went into effect in January 2020 and became enforceable by the California Attorney General in July 2020, and which, among other things, requires companies covered by the legislation to provide new disclosures to California consumers and afford such consumers new rights, including the right to access and delete certain personal information, as well as the right to opt-out of certain sales of

personal information. The CCPA provides for civil penalties for violations, as well as a private right of action for certain data breaches that result in the loss of personal information. This private right of action may increase the likelihood of, and risks associated with, data breach litigation. Additionally, a new California ballot initiative, the California Privacy Rights Act ("CPRA"), was passed in November 2020. Effective beginning on January 1, 2023, the CPRA imposes additional obligations on companies covered by the legislation and will significantly modify the CCPA, including by expanding consumers' rights with respect to certain sensitive personal information. The CPRA also creates a new state agency that will be vested with authority to implement and enforce the CCPA and the CPRA. The effects of the CCPA and the CPRA are potentially significant and may require us to modify our data collection or processing practices and policies and to incur substantial costs and expenses in an effort to comply and increase our potential exposure to regulatory enforcement and/or litigation.

Certain other state laws impose similar privacy obligations and all 50 states have laws including obligations to provide notification of security breaches of computer databases that contain personal information to affected individuals, state officers and others. For example, the CCPA has prompted the enactment of several new state laws or amendments of existing state laws, such as in New York and Nevada. The CCPA has also prompted a number of proposals for new federal and state-level privacy legislation, such as in Washington, Maryland, New York, Illinois and Nebraska. This legislation may add additional complexity, variation in requirements, restrictions and potential legal risk, require additional investment of resources in compliance programs, impact strategies and the availability of previously useful data and could result in increased compliance costs and/or changes in business practices and policies.

Internationally, many jurisdictions have established their own data privacy and security legal framework with which we or our clients may need to comply as client customers travel outside of the United States, including, but not limited to, the European Union ("EU"). The EU's data protection landscape is currently evolving, resulting in possible significant operational costs for internal compliance and risk to our business. The EU has adopted the General Data Protection Regulation ("GDPR"), which went into effect in May 2018 and contains numerous requirements and changes from previously existing EU law, including more robust obligations on data processors and heavier documentation requirements for data protection compliance programs by companies. In particular, under the GDPR, fines of up to 20 million euros or up to 4% of the annual global revenues of the noncompliant company, whichever is greater, could be imposed for violations of certain of the GDPR's requirements. Such penalties are in addition to any civil litigation claims by clients and data subjects.

Because the interpretation and application of many data privacy and protection laws along with contractually imposed industry standards are uncertain, it is possible that these laws may be interpreted and applied in a manner that is inconsistent with our existing data management practices, solutions or platform capabilities. Any failure or perceived failure by us, or any third parties with which we do business, to comply with our posted privacy policies, changing consumer expectations, evolving laws, rules and regulations, industry standards, or contractual obligations to which we or such third parties are or may become subject, may result in actions or other claims against us by governmental entities or private actors, the expenditure of substantial costs, time and other resources or the incurrence of significant fines, penalties or other liabilities. In addition, any such action, particularly to the extent we were found to be guilty of violations or otherwise liable for damages, would damage our reputation and adversely affect our business, financial condition and results of operations.

We cannot yet fully determine the impact these or future laws, rules, regulations and industry standards may have on our business or operations. Any such laws, rules and regulations may be inconsistent among different jurisdictions, subject to differing interpretations or may conflict with our current or future practices. Additionally, our clients may be subject to differing privacy laws, rules and legislation, which may mean that they require us to be bound by varying contractual requirements

applicable to certain other jurisdictions. Adherence to such contractual requirements may impact our collection, use, processing, storage, sharing and disclosure of various types of information including financial information and other PI, and may mean we become bound by, or voluntarily comply with, self-regulatory or other industry standards relating to these matters that may further change as laws, rules and regulations evolve. Complying with these requirements and changing our policies and practices may be onerous and costly, and we may not be able to respond quickly or effectively to regulatory, legislative and other developments. These changes may in turn impair our ability to offer our existing or planned features, products and services and/or increase our cost of doing business. As we expand our client base, these requirements may vary from client to client, further increasing the cost of compliance and doing business.

Our quarterly and annual results of operations are likely to fluctuate in future periods.

We expect to experience quarterly or annual fluctuations in our results of operations due to a number of factors, many of which are outside of our control. This makes our future results difficult to predict and could cause our results of operations to fall below expectations or our predictions. Factors that might cause quarterly or annual fluctuations in our results of operations include:

- the timing of large subscriptions and client renewals or failure to renew;
- our ability to attract new clients and retain and grow revenues from existing clients;
- our ability to maintain, expand, train and achieve an acceptable level of production from our sales and marketing teams;
- our ability to find and nurture successful sales opportunities;
- the timing of our introduction of new solutions or updates to existing solutions;
- our ability to grow and maintain our relationships with our ecosystem of third-party partners, including integration partners and referral partners;
- the success of our clients' businesses;
- new government regulations;
- changes in our pricing policies or those of our competitors;
- the amount and timing of our expenses related to the expansion of our business, operations and infrastructure;
- any impairment of our intangible assets, capitalized software, long-lived assets and goodwill;
- future costs related to acquisitions of content, technologies or businesses and their integration;
- natural disasters, outbreaks of disease or public health crises, such as the COVID-19 pandemic; and
- general economic conditions.

Any one of the factors above, or the cumulative effect of some or all of the factors referred to above, may result in significant fluctuations in our quarterly and annual results of operations. This variability and unpredictability could result in our failure to meet or exceed our internal operating plan. In addition, a percentage of our operating expenses is fixed in nature and is based on forecasted financial performance. In the event of revenue shortfalls, we may not be able to mitigate the negative impact on our results of operations quickly enough to avoid short-term impacts.

Because we recognize revenues from our solution over the terms of our client agreements, the impact of changes in the subscriptions for our solution will not be immediately reflected in our operating results.

We generally recognize revenues from subscription fees paid by clients over their contractual term. As a result, the substantial majority of the revenues we report in each quarter is related to agreements entered into during previous quarters. Consequently, a change in the level of new client agreements or implementations in any quarter may have a small impact on our revenues in that quarter but will affect our revenues in future quarters. Accordingly, the effect of significant downturns in sales and market acceptance of our solutions, or changes in our rate of renewals, may not be fully reflected in our results of operations until future periods. Our subscription model also makes it difficult for us to rapidly increase our revenues through additional sales in any period, as we generally recognize subscription revenues from new clients over the applicable subscription terms.

Our sales cycle can be unpredictable, time-consuming and costly, which could materially and adversely affect our business, financial condition and results of operations.

Our sales process involves educating prospective clients and existing clients about the use, technical capabilities and benefits of our solutions and typically lasts from three to 12 months or longer. Prospective clients often undertake a prolonged evaluation process, which typically involves not only our solutions, but also those of our competitors. We may spend substantial time, effort and money on our sales and marketing efforts without any assurance that our efforts will produce any sales. It is also difficult to predict the level and timing of sales opportunities that come from our referral partners. Events affecting our clients' businesses may occur during the sales cycle that could affect the size or timing of a purchase, contributing to more unpredictability in our business and results of operations. As a result of these factors, we may face greater costs, longer sales cycles and less predictability in the future.

We depend on data centers operated by third parties and third-party internet hosting providers, principally Amazon Web Services and any disruption in the operation of these facilities or access to the internet could adversely affect our business.

We primarily serve our clients from third-party data center hosting facilities provided by Amazon Web Services ("AWS"). We rely upon AWS to operate certain aspects of our solutions and any disruption of or interference with our use of AWS could impair our ability to deliver our solutions to our clients, resulting in client dissatisfaction, damage to our reputation, loss of clients and harm to our business. We have architected our solutions and computer systems to use data processing, storage capabilities and other services provided by AWS. Given this, we cannot easily switch our AWS operations to another cloud provider, so any disruption of or interference with our use of AWS could increase our operating costs and materially and adversely affect our business, financial condition and results of operations, and we might not be able to secure service from an alternative provider on similar terms.

Our business requires the ongoing availability and uninterrupted operation of internal and external transaction processing systems and services. Our third-party providers of transaction processing and information technology-related functions are ultimately responsible for maintaining their own network security, disaster recovery and system management procedures, and our review processes for such providers may be insufficient to identify, prevent, or mitigate adverse events. The owners and operators of our current and future hosting facilities do not guarantee that our clients' access to our solutions will be uninterrupted, error-free or secure. We or our third-party providers may experience website disruptions, outages and other performance problems. These problems may be caused by a variety of factors, including infrastructure changes, human or software errors, viruses, security attacks,

fraud, spikes in client usage and denial of service issues. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. We do not control the operation of these data center facilities, and such facilities, as well as our own information technology systems, are vulnerable to damage or interruption from human error, intentional bad acts, power loss, hardware failures, telecommunications failures, improper operation, unauthorized entry, data loss, power loss, cybersecurity attacks, fires, wars, terrorist attacks, floods, earthquakes, hurricanes, tornadoes, natural disasters or similar catastrophic events. They also could be subject to break-ins, computer viruses, sabotage, intentional acts of vandalism and other misconduct. The occurrence of a natural disaster or an act of terrorism, a decision to close the facilities without adequate notice or terminate our hosting arrangement or other unanticipated problems could result in lengthy interruptions in the delivery of our solutions, cause system interruptions, prevent our clients' account holders from accessing their accounts online, reputational harm and loss of critical data, prevent us from supporting our solutions or cause us to incur additional expense in arranging for new facilities and support.

We also depend on third-party internet-hosting providers and continuous and uninterrupted access to the Internet through third-party bandwidth providers to operate our business. If we lose the services of one or more of our Internet-hosting or bandwidth providers for any reason or if their services are disrupted, for example due to viruses or denial of service or other attacks on their systems, or due to human error, intentional bad acts, power loss, hardware failures, telecommunications failures, fires, wars, terrorist attacks, floods, earthquakes, hurricanes, tornadoes or similar catastrophic events, we could experience disruption in our ability to offer our solutions and adverse perception of our solutions' reliability, or we could be required to retain the services of replacement providers, which could increase our operating costs and materially and adversely affect our business, financial condition and results of operations.

Furthermore, prolonged interruption in the availability, or reduction in the speed or other functionality, of our products or services could materially harm our reputation and business. Frequent or persistent interruptions in our products and services could cause clients to believe that our products and services are unreliable, leading them to switch to our competitors or to avoid our products and services, and could permanently harm our reputation and business.

Additionally, as our clients may use our products for critical transactions, any errors, defects or other infrastructure problems could result in damage to such clients' businesses. These clients could seek significant compensation from us for their losses and our insurance policies may be insufficient to cover a claim. Even if unsuccessful, this type of claim may be time consuming and costly for us. Any of the foregoing could have a material adverse effect on our business, financial condition and results of operations.

Defects, errors or other performance problems in the Alkami Platform could harm our reputation, result in significant costs to us, impair our ability to sell our solutions and subject us to substantial liability.

The Alkami Platform is complex and may contain defects or errors when implemented or when new functionality is released, as we may modify, enhance, upgrade and implement new systems, procedures and controls to reflect changes in our business, technological advancements and changing industry trends. Despite extensive testing, from time to time we have discovered and may in the future discover defects or errors in our solutions. Any performance problems or defects in our solutions could materially and adversely affect our business, financial condition and results of operations. Defects, errors or other similar performance problems or disruptions, whether in connection with day-to-day operations or otherwise, could be costly for us, damage our clients' businesses, harm our reputation and result in reduced sales or a loss of, or delay in, the market acceptance of our solutions. In addition,

if we have any such errors, defects or other performance problems, our clients could seek to terminate their contracts, elect not to renew their subscriptions, delay or withhold payment or make claims against us. Any of these actions could result in liability, lost business, increased insurance costs, difficulty in collecting accounts receivable, costly litigation or adverse publicity, which could materially and adversely affect our business, financial condition and results of operations. Additionally, our software utilizes open-source software and any defects or security vulnerabilities in such open-source software could materially and adversely affect our business, financial condition and results of operations.

We rely on our management team and other key employees, and the loss of one or more key employees could harm our business.

Our success and future growth depend upon the continued services of our management team, in particular Stephen Bohanon, our co-founder and Chief Strategy and Sales Officer, Michael Hansen, our Chief Executive Officer and other key employees, including in the areas of research and development, marketing, sales, services and general and administrative functions. From time to time, there may be changes in our management team resulting from the hiring or departure of executives, which could disrupt our business. We also are dependent on the continued service of our existing development professionals because of the complexity of our solutions, including complexity arising as a result of the regulatory requirements that are applicable to our clients and, to a lesser extent, us, and the pace of technology changes impacting our clients. We may terminate any employee's employment at any time, with or without cause, and any employee may resign at any time, with or without cause; however, our employment agreements with our named executive officers provide for the payment of severance under certain circumstances. We have also entered into employment agreements with our other executive officers which provide for the payment of severance under similar circumstances as in our named executive officers' employment agreements. The loss of one or more of our key employees could harm our business.

Because competition for key employees is intense, we may not be able to attract and retain the highly skilled employees we need to support our operations and future growth.

Competition for executive officers, software developers and other key employees in our industry is intense. In particular, we compete with many other companies for executive officers, for software developers with high levels of experience in designing, developing and managing software, as well as for skilled sales and operations professionals and knowledgeable customer support professionals, and we may not be successful in attracting the professionals we need. Competition for software development and engineering personnel is intense. We may have difficulty hiring and retaining suitably skilled personnel or expanding our research and development organization. In addition, job candidates and existing employees often consider the actual and potential value of the equity awards they receive as part of their overall compensation. Thus, if the perceived value or future value of our stock declines, our ability to attract and retain highly skilled employees may be adversely affected. In addition, many of our existing employees may exercise vested options and then sell our stock, which may make it more difficult for us to retain key employees. If we fail to attract and retain new employees, our business and future growth prospects could be harmed.

Our corporate culture has contributed to our success, and if we cannot maintain it as we grow, we could lose the innovation, creativity and teamwork fostered by our culture, and our business may be adversely affected.

We believe our corporate culture is one of our fundamental strengths, as we believe it enables us to attract and retain top talent and deliver superior results for our clients. As we grow and transition from a private company to a public company, we may find it difficult to preserve our corporate culture, which could reduce our ability to innovate and operate effectively. In turn, the failure to preserve our

culture could negatively affect our ability to attract, recruit, integrate and retain employees, continue to perform at current levels and effectively execute our business strategy, which could materially and adversely affect our business, financial condition and results of operations.

Uncertain or weakened economic conditions could materially and adversely affect our industry, business, financial condition and results of operations.

Our overall performance depends on economic conditions, which may be challenging at various times in the future. Financial developments seemingly unrelated to us or our industry could materially and adversely affect us. Domestic economies have, from time to time, been impacted by falling demand for a variety of goods and services, tariffs and other trade issues, threatened sovereign defaults and ratings downgrades, restricted credit, poor liquidity, reduced corporate profitability, volatility in credit and equity markets, bankruptcies and overall uncertainty. We cannot predict the timing, strength or duration of the current or any future potential economic slowdown in the United States. These conditions affect the rate of technology spending generally and could adversely affect our clients' ability or willingness to purchase and retain our solutions, delay prospective clients' purchasing decisions, reduce the value or duration of their subscriptions or affect renewal rates, any of which could materially and adversely affect our business, financial condition and results of operations.

If we fail to respond to evolving technological requirements or introduce adequate enhancements and new features, our digital banking solutions could become obsolete or less competitive.

The market for our solutions is characterized by rapid technological advancements, changes in client requirements and technologies, frequent new product introductions and enhancements and changing regulatory requirements. The life cycles of our solutions are difficult to estimate. Rapid technological changes and the introduction of new products and enhancements by new or existing competitors or large FIs could undermine our current market position. Other means of digital or digital banking may be developed or adopted in the future, and our solutions may not be compatible with these new technologies. In addition, the technological needs of and services provided by, FIs may change if they or their competitors offer new services to account holders. Maintaining adequate research and development resources to meet the demands of the market is essential. The process of developing new technologies and solutions is complex and expensive. The introduction of new solutions by our competitors, the market acceptance of competitive solutions based on new or alternative technologies or the emergence of new technologies or solutions in the broader financial services industry could render our solutions obsolete or less effective.

The success of any enhanced or new solution depends on several factors, including timely completion, adequate testing and market release and acceptance of the solution. Any new solutions that we develop or acquire may not be introduced in a timely or cost-effective manner, may contain defects or may not achieve the broad market acceptance necessary to generate significant revenues. If we are unable to anticipate client requirements or work with our clients successfully on implementing new solutions or features in a timely manner or enhance our existing solutions to meet our clients' requirements, our business, financial condition and results of operations could be materially and adversely affected.

As the number of clients that we serve increases, we may encounter implementation challenges, and we may have to delay revenue recognition for some complex engagements, which could materially and adversely affect our business, financial condition and results of operations.

We may face unexpected challenges related to the complexity of our clients' integration requirements. Our expenses increase when clients have unexpected data, hardware or software

technology challenges, or complex or unanticipated business requirements. In addition, our clients typically require complex acceptance testing related to the implementation of our solutions. Implementation delays may also require us to delay revenue recognition under the related client agreement longer than expected. Further, because we do not fully control our clients' implementation schedules, if our clients do not allocate the internal resources necessary to meet implementation timelines or if there are unanticipated implementation delays or difficulties, our revenue recognition may be delayed. Losses of registered users or any difficulties or delays in implementation processes could cause clients to delay or forego future purchases of our solutions, which could materially and adversely affect our business, financial condition and results of operations.

Shifts over time in the number of account holders and registered users of our solutions, their use of our solutions and our clients' implementation and client support needs could negatively affect our profit margins.

Our profit margins can vary depending on numerous factors, including the scope and complexity of our implementation efforts, the number of account holders and registered users on our solutions, the type, frequency and volume of their use of our solutions and the level of client support services required by our clients. For example, the third-party service offerings that we resell typically have a much higher cost of revenues than the service offerings that we have internally developed, so any increase in sales of third-party services as a proportion of our subscriptions would have an adverse effect on our overall gross margin and results of operations. If we are unable to increase the number of registered users and the number of transactions they perform on our solutions, the types of FIs that purchase our solutions change or the mix of solutions purchased by our clients changes, our profit margins could decrease and our business, financial condition and results of operations could be materially and adversely affected.

If we fail to provide high-quality client support, our business and reputation would suffer.

High-quality client support is important to the successful marketing and sale of our solutions and for the renewal of existing client agreements. Providing this level of support requires that our client support personnel have financial services knowledge and expertise, making it difficult for us to hire qualified personnel and scale our support operations. The demand on our client support organization will increase as we expand our business and pursue new clients, and such increased support requirements could require us to devote significant development services and support personnel, which could strain our team and infrastructure and reduce our profit margins. If we do not help our clients quickly resolve any post-implementation issues and provide effective ongoing client support, our ability to sell additional solutions to existing and future clients could suffer and our reputation and our business, financial condition and results of operations could be materially and adversely affected.

Our ability to raise capital in a timely manner if needed in the future may be limited, or such capital may be unavailable on acceptable terms, if at all. Our failure to raise capital if needed could materially and adversely affect our business, financial condition and results of operations, and any debt or equity issued to raise additional capital may reduce the value of our common stock.

We have funded our operations since inception primarily through equity financings and receipts generated from clients. We cannot be certain when or if our operations will generate sufficient cash to fund our ongoing operations or the growth of our business. We intend to continue to make investments to support our business and may require additional funds. Moreover, we do not expect to be profitable for the foreseeable future. Additional financing may not be available on favorable terms, if at all. If adequate funds are not available on acceptable terms, we may be unable to invest in future growth opportunities, which could adversely affect our business, financial condition and results of operations.

We also have incurred debt pursuant to our Credit Agreement (as defined below), and the lenders have rights senior to holders of common stock to make claims on our assets. The terms of our Credit Agreement could restrict our operations, and we may be unable to service or repay the debt.

Furthermore, if we issue additional equity securities, stockholders may experience dilution, and the new equity securities could have rights senior to those of our common stock. Because our decision to issue securities in a future offering will depend on numerous considerations, including factors beyond our control, we cannot predict or estimate the impact any future incurrence of debt or issuance of equity securities will have on us. Any future incurrence of debt or issuance of equity securities could adversely affect the value of our common stock.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

We have incurred substantial net operating losses ("NOLs") during our history. Under the rules of Sections 382 and 383 of the Internal Revenue Code of 1986, as amended (the "Code"), if a corporation undergoes an "ownership change," generally defined as a greater than 50 percentage point change (by value) in its equity ownership over a rolling three-year period, the corporation's ability to use its pre-change NOLs and other pre-change tax attributes to offset its post-change taxable income or taxes may be limited. The applicable rules generally operate by focusing on changes in ownership among stockholders considered by the rules as owning, directly or indirectly, 5% or more of the stock of a corporation, as well as changes in ownership arising from new issuances of stock by the corporation. If finalized, Treasury Regulations currently proposed under Section 382 of the Code may further limit our ability to utilize our pre-change NOLs or other pre-change tax attributes if we undergo a future ownership change. We may have experienced ownership changes in the past and could experience one or more ownership changes in the future, including in connection with this offering and as a result of future changes in our stock ownership, some of which changes may be outside our control. As a result, if we earn net taxable income, our ability to use our pre-change NOL carryforwards to offset post-change taxable income may be subject to limitations. For these reasons, we may not be able to utilize a material portion of our NOLs and other tax attributes, which could adversely affect our future cash flows.

The terms of our credit agreement require us to meet certain operating and financial covenants and place restrictions on our operating and financial flexibility. If we raise additional capital through debt financing, the terms of any new debt could further restrict our ability to operate our business.

On October 16, 2020, we entered into our senior secured credit facilities credit agreement with Silicon Valley Bank and KeyBank National Association (the "Credit Agreement"). The Credit Agreement provided us with a term loan facility of \$25.0 million and a revolving credit facility of up to \$25.0 million. Our payment obligations under the Credit Agreement reduce cash available to fund working capital, capital expenditures, research and development and other corporate purposes, and limit our ability to obtain additional financing for working capital, capital expenditures, expansion plans and other investments, which may in turn limit our ability to implement our business strategy, heighten our vulnerability to downturns in our business, the industry, or in the general economy, limit our flexibility in planning for, or reacting to, changes in our business and the industry and prevent us from taking advantage of business opportunities as they arise. In addition, indebtedness under the Credit Agreement bears interest at a variable rate, making us vulnerable to increases in market interest rates. If market rates increase, we will have to pay additional interest on this indebtedness, which would further reduce cash available for our other business needs.

We cannot assure you that our business will generate sufficient cash flow from operations or that future financing will be available to us in amounts sufficient to enable us to make required and timely payments on our indebtedness, or to fund our operations.

In addition, our obligations under the Credit Agreement are secured by substantially all of our assets. The security interest granted over our assets could limit our ability to obtain additional debt financing. Our Credit Agreement also contains, and any future indebtedness of ours would likely contain, a number of restrictive covenants that impose significant operating and financial restrictions on us subject to customary exceptions, including restricting our ability to:

- incur, assume or prepay debt or incur or assume liens;
- pay dividends or distributions or redeem or repurchase capital stock;
- dispose of certain property;
- enter into sale leaseback transactions;
- enter into a new line of business;
- make certain investments, capital expenditures above a certain amount in any fiscal year or acquisitions;
- complete a significant corporate transaction, such as a merger or sale of our company or its assets; and
- enter into agreements that prohibit the incurrence of liens or the payment by our subsidiaries of dividends and distributions.

In addition, the Credit Agreement includes a number of financial covenants relating to minimum recurring revenues and liquidity levels. Our failure to comply with these restrictions and the other terms and conditions under our Credit Agreement could result in an event of default, which would allow lenders to elect to accelerate our outstanding indebtedness under our Credit Agreement and exercise other remedies as set forth therein. If that were to happen, we may not be able to repay all of the amounts that would become due under our indebtedness or refinance our debt, which could materially harm our business and force us to seek bankruptcy protection.

Our outstanding indebtedness and any future indebtedness, combined with our other financial obligations, could increase our vulnerability to adverse changes in general economic, industry and market conditions, limit our flexibility in planning for, or reacting to, changes in our business and the industry and impose a competitive disadvantage compared to our competitors that have less debt or better debt servicing options.

Risks Related to Being a Public Company

We are an “emerging growth company” and we cannot be certain if the reduced disclosure requirements applicable to emerging growth companies will make our common stock less attractive to investors.

We are an “emerging growth company” as defined in the JOBS Act. Under the JOBS Act, emerging growth companies can delay adopting new or revised accounting standards until such time as those standards apply to private companies. We have elected to use this extended transition period for complying with new or revised accounting standards that have different effective dates for public and private companies until the earlier of the date we (i) are no longer an emerging growth company or (ii) affirmatively and irrevocably opt out of the extended transition period provided in the JOBS Act. As a result, our consolidated financial statements may not be comparable to companies that comply with

new or revised accounting pronouncements as of public company effective dates. We intend to utilize this extended transition period related to Financial Accounting Standards Board ("FASB") Accounting Standards Update ("ASU") No. 2016-02, "Leases". This standard amends several aspects of lease accounting, including requiring lessees to recognize operating leases with a term greater than one year on their balance sheet as a right-of-use asset, and a corresponding lease liability, measured at the present value of the future minimum lease payments. The standard is effective for public companies for fiscal years beginning after December 15, 2018, and after December 15, 2020 for all other companies, with early adoption permitted. We intend to adopt this standard effective January 1, 2021 using the modified retrospective transition method and therefore will not restate comparative periods. While we have not yet quantified the impact, resulting adjustments are expected to materially increase total assets and total liabilities relative to such amounts reported prior to adoption, but not have a material impact on the consolidated statements of comprehensive income (loss) or consolidated statements of cash flows. We also intend to utilize this extended transition period related to FASB ASU No. 2016-13, "*Financial Instruments—Credit Losses (Topic 326)*". This standard modifies the measurement of expected credit losses of certain financial instruments with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The effective date for adoption of the new standard was delayed until calendar years beginning after December 15, 2022, with early adoption permitted. We plan to adopt ASU 2016-13 effective January 1, 2021 using the modified-retrospective approach prior to the issuance of our audited financial statements for the years ended December 31, 2021. This ASU is not expected to have a material impact on our financial statements.

For as long as we continue to be an emerging growth company, we also intend to take advantage of certain other exemptions from various reporting requirements that are applicable to other public companies including, but not limited to, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a non-binding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. We cannot predict if investors will find our common stock less attractive because we will rely on these exemptions. If some investors find our common stock less attractive as a result, there may be a less active trading market for our common stock and our stock price may be more volatile.

We will remain an emerging growth company until the earliest of (i) the last day of the year in which we have total annual gross revenues of \$1.07 billion or more; (ii) the last day of the year following the fifth anniversary of the date of the consummation of this offering; (iii) the date on which we have issued more than \$1.0 billion in non-convertible debt during the previous three years; or (iv) the date on which we are deemed to be a large accelerated filer under the rules of the SEC.

Our management team has limited experience managing a public company.

Most members of our management team have limited experience managing a publicly traded company, interacting with public company investors and complying with the increasingly complex laws pertaining to public companies. Our management team may not successfully or efficiently manage our transition to being a public company that is subject to significant regulatory oversight and reporting obligations under the federal securities laws and the continuous scrutiny of securities analysts and investors. These new obligations and constituents will require significant attention from our senior management and could divert their attention away from the day-to-day management of our business, which could materially and adversely affect our business, financial condition and results of operations.

Risks Related to This Offering and Ownership of Our Common Stock

Substantial future sales of shares of our common stock could cause the market price of our common stock to decline.

Sales of a substantial number of shares of our common stock following the completion of this offering, particularly sales by our directors, executive officers and significant stockholders, or the perception that these sales might occur, could depress the market price of our common stock and could impair our ability to raise capital through the sale of additional equity securities. We are unable to predict the effect that such sales may have on the prevailing market price of our common stock.

All of our executive officers, directors and the holders of substantially all of our capital stock are subject to lock-up agreements that restrict their ability to transfer shares of our capital stock for _____ days from the date of this prospectus. Subject to certain exceptions, the lock-up agreements limit the number of shares of capital stock that may be sold immediately following this offering. Goldman Sachs & Co. LLC, J.P. Morgan Securities LLC and Barclays Capital Inc. may, in their sole discretion, permit our stockholders who are subject to these lock-up agreements to sell shares prior to the expiration of the lock-up agreements. Upon the completion of this offering, we will have _____ outstanding shares of our common stock, based on the number of shares outstanding as of December 31, 2020. This includes the shares included in this offering, which may be sold in the public market immediately without restriction or further registration under the Securities Act of 1933, as amended (the "Securities Act"), except for any shares held by our affiliates as defined in Rule 144 under the Securities Act.

Purchasers in this offering will experience immediate and substantial dilution in the net tangible book value of their investment.

The offering price of our common stock is substantially higher than the net tangible book value per share of our common stock, which after giving effect to this offering was \$ _____ per share of our common stock as of December 31, 2020. As a result, you will incur immediate and substantial dilution in net tangible book value when you buy our common stock in this offering. This means that you will pay a higher price per share than the amount of our total tangible assets, less our total liabilities, divided by the number of shares of all of our common stock outstanding. In addition, you may also experience additional dilution if rights to purchase our common stock that are outstanding or that we may issue in the future are exercised or converted or we issue additional shares of our common stock at prices lower than our net tangible book value at such time. See "Dilution."

We are currently restricted in our ability, and for the foreseeable future do not intend, to pay dividends on our common stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our common stock.

We currently intend to retain all available funds and any future earnings for use in the operation of our business and do not anticipate paying any dividends on our capital stock in the foreseeable future, other than an aggregate of \$ _____ million in accumulated dividends payable to holders of our Series B redeemable convertible preferred stock that we plan to pay in connection with the completion of this offering. Any determination to pay dividends in the future will be at the discretion of our board of directors, is currently restricted by our Credit Agreement and may be restricted by the terms of any future indebtedness we may incur. Consequently, your only opportunity to achieve a return on your investment in our company will be if the market price of our common stock appreciates and you sell your shares at a profit. There is no guarantee that the price of our common stock that will prevail in the market will ever exceed the price that you paid. Other than the Series B Dividend, we do not currently intend to pay any cash dividends on our capital stock for the foreseeable future.

The principal stockholders of Alkami will continue to have significant influence over the election of the board of directors and approval of any significant corporate actions.

Our executive officers, directors and other principal stockholders, in the aggregate, beneficially own a majority of the outstanding shares of Alkami as of December 31, 2020. These stockholders currently have, and likely will continue to have, significant influence with respect to the election of our board of directors and approval or disapproval of all significant corporate actions. The concentrated voting power of these stockholders could have the effect of delaying or preventing a significant corporate transaction, including an acquisition, divestiture, or merger. This influence over our affairs could, under some circumstances, be adverse to the interests of the other stockholders.

Anti-takeover provisions contained in our charter documents and Delaware law could prevent a takeover that stockholders consider favorable and could also reduce the market price of our stock.

Our amended and restated certificate of incorporation and our amended and restated bylaws will contain provisions that could delay or prevent a change in control of our company. These provisions could also make it more difficult for stockholders to elect directors and take other corporate actions. These provisions include:

- a classified board of directors with three-year staggered terms, which may delay the ability of stockholders to change the membership of a majority of our board of directors;
- no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- the exclusive right of our board of directors to elect a director to fill a vacancy created by the expansion of the board of directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;
- the ability of our board of directors to authorize the issuance of shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquiror;
- the ability of our board of directors to alter our amended and restated bylaws without obtaining stockholder approval;
- the required approval of at least 66 2/3% of the shares entitled to vote at an election of directors to adopt, amend or repeal our amended and restated bylaws or to repeal certain provisions of our amended and restated certificate of incorporation;
- a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;
- the requirement that a special meeting of stockholders may be called only by our board of directors, which may delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors; and
- advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of us.

These and other provisions in our amended and restated certificate of incorporation and our amended and restated bylaws and under Delaware law could discourage potential takeover attempts, reduce the price investors might be willing to pay in the future for shares of our common stock and

result in the market price of our common stock being lower than it would be without these provisions. For more information, see the sections of this prospectus captioned “Description of Capital Stock—Anti-Takeover Provisions of Delaware Law” and “Description of Capital Stock—Anti-Takeover Provisions of Our Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws.”

Our amended and restated certificate of incorporation and amended and restated bylaws will provide for an exclusive forum in the Court of Chancery of the State of Delaware for certain disputes between us and our stockholders, and that the federal district courts of the United States of America will be the exclusive forum for the resolution of any complaint asserting a cause of action under the Securities Act.

Our amended and restated certificate of incorporation and our amended and restated bylaws will provide that: (i) unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if such court does not have subject matter jurisdiction thereof, the federal district court of the State of Delaware) will, to the fullest extent permitted by law, be the sole and exclusive forum for: (A) any derivative action or proceeding brought on behalf of the Company, (B) any action asserting a claim for or based on a breach of a fiduciary duty owed by any of our current or former director, officer, other employee, agent or stockholder to the Company or our stockholders, including without limitation a claim alleging the aiding and abetting of such a breach of fiduciary duty, (C) any action asserting a claim against the Company or any of our current or former director, officer, employee, agent or stockholder arising pursuant to any provision of the Delaware General Corporation Law or our certificate of incorporation or bylaws or as to which the Delaware General Corporation Law confers jurisdiction on the Court of Chancery of the State of Delaware, or (D) any action asserting a claim related to or involving the Company that is governed by the internal affairs doctrine; (ii) unless we consent in writing to the selection of an alternative forum, the federal district courts of the United States of America will, to the fullest extent permitted by law, be the sole and exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act and the rules and regulations promulgated thereunder; (iii) any person or entity purchasing or otherwise acquiring or holding any interest in shares of capital stock of the Company will be deemed to have notice of and consented to these provisions; and (iv) failure to enforce the foregoing provisions would cause us irreparable harm, and we will be entitled to equitable relief, including injunctive relief and specific performance, to enforce the foregoing provisions. Nothing in our current certificate of incorporation or bylaws or our restated certificate of incorporation or amended and restated bylaws precludes stockholders that assert claims under the Exchange Act, from bringing such claims in federal court to the extent that the Exchange Act confers exclusive federal jurisdiction over such claims, subject to applicable law.

We believe these provisions may benefit us by providing increased consistency in the application of Delaware law and federal securities laws by chancellors and judges, as applicable, particularly experienced in resolving corporate disputes, efficient administration of cases on a more expedited schedule relative to other forums and protection against the burdens of multi-forum litigation. If a court were to find the choice of forum provision that will be contained in our amended restated certificate of incorporation or amended and restated bylaws to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could materially and adversely affect our business, financial condition and results of operations.

General Risk Factors

We may acquire or invest in companies, or pursue business partnerships, which may divert our management's attention or result in dilution to our stockholders, and we may be unable to integrate acquired businesses and technologies successfully or achieve the expected benefits of such acquisitions, investments or partnerships.

From time to time, we may consider potential strategic transactions, including acquisitions of, or investments in, businesses, technologies, services, solutions and other assets. For example, in October 2020, we closed an acquisition that added employees and increased our reach into the fraud prevention space. We also may enter into relationships with other businesses to expand our solutions, which could involve preferred or exclusive licenses, additional channels of distribution, discount pricing or investments in other companies. Negotiating these transactions can be time-consuming, difficult and expensive, and our ability to close these transactions may be subject to approvals that are beyond our control. In addition, we have limited experience in acquiring other businesses. If an acquired business fails to meet our expectations, our business, financial condition and results of operations could be materially and adversely affected. We may not be able to find and identify desirable acquisition targets, we may incorrectly estimate the value of an acquisition target and we may not be successful in entering into an agreement with any particular target. If we are successful in acquiring an additional business, we may not achieve the anticipated benefits from the acquired business due to a number of factors, including:

- our inability to integrate or benefit from acquired technologies or services;
- unanticipated costs or liabilities associated with the acquisition;
- incurrence of acquisition-related costs;
- difficulty integrating the technology, accounting systems, operations, control environments and personnel of the acquired business and integrating the acquired business or its employees into our culture;
- difficulties and additional expenses associated with supporting legacy solutions and infrastructure of the acquired business;
- difficulty converting the clients of the acquired business to our solutions and contract terms, including disparities in licensing terms;
- additional costs for the support of the professional services model of the acquired company;
- diversion of management's attention and other resources;
- adverse effects to our existing business relationships with business partners and clients;
- the issuance of additional equity securities that could dilute the ownership interests of our stockholders;
- incurrence of debt on terms unfavorable to us or that we are unable to repay;
- incurrence of substantial liabilities;
- difficulties retaining key employees of the acquired business; and
- adverse tax consequences, substantial depreciation or deferred compensation charges.

In addition, a significant portion of the purchase price of companies we acquire may be allocated to acquired goodwill and other intangible assets, which must be assessed for impairment at least annually. In the future, if our acquisitions do not yield expected returns, we may be required to take charges to our results of operations based on this impairment assessment process, which could materially and adversely affect our business, financial condition and results of operations.

Our intellectual property rights are valuable, and any inability to protect them could reduce the value of our products, services and brand.

Our trade secrets, trademarks, copyrights, patents and other intellectual property rights are important assets for us. We currently own three U.S. registered patents and one pending U.S. patent application related to automated clearing house transaction notifications and the facilitation of transaction disputes. We currently own the U.S. registered trademark for the word “Alkami” and certain variants thereof, as well as certain other U.S. registered trademarks relating to our products and services. We also rely on copyright laws to protect computer programs related to our platform and our proprietary technologies, although to date we have not registered for statutory copyright protection. We have registered numerous internet domain names in the United States related to our business. We rely on, and expect to continue to rely on, various agreements with our employees, independent contractors, consultants and third parties with whom we have relationships, as well as trademark, trade dress, domain name, copyright, patent and trade secret laws in the United States and internationally to protect our brand and other intellectual property rights. Such agreements and laws may be insufficient, breached, or otherwise fail to prevent unauthorized use or disclosure of our confidential information, intellectual property or technology, and may not provide an adequate remedy in the event of unauthorized use or disclosure of our confidential information, intellectual property or technology.

Additionally, various factors outside our control pose a threat to our intellectual property rights, as well as to our products, services and technologies. For example, we may fail to obtain effective intellectual property protection, or the efforts we have taken to protect our intellectual property rights may not be sufficient or effective, and any of our intellectual property rights may be challenged, which could result in them being narrowed in scope or declared invalid or unenforceable. Despite our efforts to protect our proprietary rights, there can be no assurance our intellectual property rights will be sufficient to protect against others offering products or services that are substantially similar to ours and compete with our business or that unauthorized parties may attempt to copy aspects of our technology and use information that we consider proprietary. For example, it is possible that third parties, including our competitors, may obtain patents relating to technologies that overlap or compete with our technology. If third parties obtain patent protection with respect to such technologies, they may assert, and have in the past asserted, that our technology infringes their patents and seek to charge us a licensing fee or otherwise preclude the use of our technology or file suit against us. Additionally, unauthorized third parties may try to copy or reverse engineer portions of our products or otherwise obtain and use our intellectual property and other information that we regard as proprietary to create products and services that compete with ours.

Any additional investment in protecting our intellectual property through additional trademark, patent or other intellectual property filings could be expensive or time-consuming. We may not be able to obtain protection for our technology and even if we are successful in obtaining effective patent, trademark, trade secret and copyright protection, it is expensive to maintain these rights, both in terms of application and maintenance costs, and the time and cost required to defend our rights could be substantial. Moreover, our failure to develop and properly manage and protect new intellectual property could hurt our market position and business opportunities. Furthermore, recent changes to U.S. intellectual property laws and possible future changes to U.S. or foreign intellectual property laws and regulations may jeopardize the enforceability and validity of our intellectual property portfolio and harm our ability to obtain patent protection, including for some of our unique business methods. We may be unable to obtain trademark protection for our products and brands, and our existing trademark registrations, and any trademarks that may be used in the future, may not provide us with competitive advantages or distinguish our products and services from those of our competitors. In addition, our trademarks may be contested or found to be unenforceable, weak or invalid, and we may not be able to prevent third parties from infringing or otherwise violating them.

We will not be able to protect our intellectual property rights if we are unable to enforce our rights or if we do not detect unauthorized use of our intellectual property rights. Additionally, effective intellectual property protection may not be available in every country in which we offer our products and services, and the laws of certain non-U.S. countries where we do business or may do business in the future may not recognize intellectual property rights or protect them to the same extent as do the laws of the United States. In addition, any changes in, or unexpected interpretations of, intellectual property laws may compromise our ability to enforce our trade secret and intellectual property rights. Failure to obtain or maintain protection of our trade secrets or other proprietary information could harm competitive position and materially and adversely affect our business, financial condition and results of operations.

In addition to registered intellectual property rights such as trademark registrations, we rely on non-registered proprietary information and technology, such as copyrights, trade secrets, confidential information, know-how and technical information. In order to protect our proprietary information and technology, we rely in part on non-disclosure and confidentiality agreements with parties who have access to them, including our employees, investors, independent contractors, corporate collaborators, advisors and other third parties, which place restrictions on the use and disclosure of this intellectual property. We also enter into confidentiality and invention assignment agreements with our employees and consultants. We cannot guarantee that we have entered into such agreements with each party that may have or have had access to our trade secrets or proprietary information or otherwise developed intellectual property for us, including our technology and processes. Individuals not subject to invention assignment agreements may make adverse ownership claims to our current and future intellectual property. Additionally, these agreements may be insufficient or breached, or this intellectual property, including trade secrets, may otherwise be disclosed or become known to our competitors, which could cause us to lose any competitive advantage resulting from this intellectual property. We may not be able to obtain adequate remedies for such breaches. Additionally, to the extent that our employees, independent contractors or other third parties with whom we do business use intellectual property owned by others in their work for us, disputes may arise as to the rights in related or resulting know-how and inventions. The loss of trade secret protection could make it easier for third parties to compete with our products and services by copying functionality.

To counter infringement or unauthorized use of our intellectual property, we may deem it necessary to file infringement claims, which can be expensive, time consuming and distracting to management. Our efforts to enforce our intellectual property rights in this manner may be met with defenses, counterclaims, and countersuits attacking the validity and enforceability of our intellectual property rights. An adverse result of such litigation could require us to pay monetary damages or enter into royalty and licensing agreements that we would not normally find acceptable, cause a delay to the development of our products and services, require us to stop selling all or a portion of our products and services, require us to redesign certain components of our platform using alternative non-infringing technology or practices, which could require significant effort and expense. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. An adverse outcome in such litigation or proceedings may expose us to a loss of our competitive position, expose us to significant liabilities or require us to seek licenses that may not be available on commercially acceptable terms, if at all.

Some of our products and services contain open source software, which may pose particular risks to our proprietary software, products and services in a manner that could have a material and adverse effect on our business, financial condition and results of operations.

We use open source software in our products and services and anticipate using open source software in the future. Some open source software licenses require those who distribute open source

software as part of their own software product to publicly disclose all or part of the source code to such software product or to make available any derivative works of the open source code on unfavorable terms or at no cost, and we may be subject to such terms. The terms of certain open source licenses to which we are subject have not been interpreted by U.S. or foreign courts, and there is a risk that open source software licenses could be construed in a manner that imposes unanticipated conditions or restrictions on our ability to provide, or distribute the products or services related to, the open source software subject to those licenses. While we use reasonable efforts to monitor our use of open source software and try to ensure that none is used in a manner that would require us to disclose our proprietary source code or that would otherwise breach the terms of an open source agreement, such use could inadvertently occur, or could be claimed to have occurred, in part because open source license terms are often ambiguous. Additionally, we could face claims from third parties claiming ownership of, or demanding release of, any open source software or derivative works that we have developed using such software, which could include proprietary source code, or otherwise seeking to enforce the terms of the applicable open source license. These claims could result in litigation and could require us to make our software source code freely available, purchase a costly license or cease offering the implicated products or services unless and until we can re-engineer such source code in a manner that avoids infringement. This re-engineering process could require us to expend significant additional research and development resources, and we may not be able to complete the re-engineering process successfully. In addition to risks related to license requirements, use of certain open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties or controls on the origin of software. There is little legal precedent in this area and any actual or claimed requirement to disclose our proprietary source code or pay damages for breach of contract could harm our business and could help third parties, including our competitors, develop products and services that are similar to or better than ours. Any of these risks could be difficult to eliminate or manage, and, if not addressed, could materially and adversely affect our business, financial condition and results of operations.

We may be obligated to disclose our proprietary source code to our clients, which may limit our ability to protect our intellectual property and proprietary rights and could reduce the renewals of our solutions.

Some of our client agreements contain provisions permitting the client to become a party to, or a beneficiary of, a source code escrow agreement under which we place the proprietary source code for certain of our products in escrow with a third party. Under these source code escrow agreements, our source code may be released to the client upon the occurrence of specified events, such as in situations of our bankruptcy or insolvency or our failure to support or maintain our products. Disclosing the content of our source code may limit the intellectual property protection we can obtain or maintain for our source code or our products containing that source code and may facilitate intellectual property infringement, misappropriation or other violation claims against us.

Following any such release, we cannot be certain that clients will comply with the restrictions on their use of the source code and we may be unable to monitor and prevent unauthorized disclosure of such source code by clients. Additionally, following any such release, clients may be able to create derivative works based on our source code and may own such derivative works. Any increase in the number of people familiar with our source code as a result of any such release may also increase the risk of a successful hacking attempt. Each of these could have a material adverse effect on our business, financial condition and results of operations.

Claims by others that we infringe, misappropriate or otherwise violate their proprietary technology or other rights could have a material and adverse effect on our business, financial condition and results of operations.

Technology companies frequently enter into litigation based on allegations of patent or trademark infringement or other violations of intellectual property rights. We may become involved in lawsuits to protect or enforce our intellectual property rights, and we may be subject to claims by third parties that we have infringed, misappropriated or otherwise violated their intellectual property. As we face increasing competition and gain an increasingly high profile, the possibility of intellectual property rights claims against us grows. This risk has been amplified by the increase in patent holding companies that seek to monetize patents they have purchased or otherwise obtained and whose sole or primary business is to assert such claims.

From time to time third parties may assert, and in the past have asserted, claims of infringement, misappropriation or other violation of intellectual property rights against us and FIs with whom we do business. Any claim of infringement, misappropriation or other violation of intellectual property rights by a third party, even those without merit and regardless of the outcome, could cause us to incur substantial costs defending against the claim, distract our management from our business, require us to redesign or cease use of such intellectual property, pay substantial amounts to satisfy judgments or settle claims or lawsuits, pay substantial royalty or licensing fees, or satisfy indemnification obligations that we have with certain parties with whom we have commercial relationships. The outcome of any allegation is often uncertain. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation.

If any of our technologies, products or services are found to infringe, misappropriate or violate a third party's intellectual property rights, we could be required to obtain a license from such third party to continue commercializing or using such technologies, products and services. However, we may not be able to obtain any required license on commercially reasonable terms or at all. Even if we were able to obtain a license, we could be required to make substantial licensing and royalty payments. We also could be forced, including by court order, to cease the commercialization or use of the violating technology, products or services. Accordingly, we may be forced to design around such violated intellectual property, which may be expensive, time-consuming or infeasible. In addition, we could be found liable for significant monetary damages, including treble damages and attorneys' fees, if we are found to have willfully infringed a patent or other intellectual property right. Claims that we have misappropriated the confidential information or trade secrets of third parties could similarly harm our business. If we are required to make substantial payments or undertake any of the other actions noted above as a result of any intellectual property infringement, misappropriation or violation claims against us, such payments, costs or actions could have a material adverse effect on our competitive position, business, financial condition and results of operations.

Additionally, in certain of our agreements with clients and licensors of software we use internally or license to our clients, we agree to indemnify them for losses related to, among other things, claims by third parties that our intellectual property infringes, misappropriates or violates the intellectual property of such third party. From time to time, clients or licensors have required, and may in the future require, us to indemnify them for such infringement, misappropriation or violation, breach of confidentiality or violation of applicable law, among other things. Although we normally seek to contractually limit our liability with respect to such obligations, some of these indemnity agreements may provide for uncapped liability and some indemnity provisions survive termination or expiration of the applicable agreement. Any legal claims from clients or other third parties could result in substantial liabilities, reputational harm, the delay or loss of market acceptance of our products, and could have adverse effects on our relationship with such clients and other third parties.

If we fail to comply with our obligations under license or technology agreements with third parties, we may be required to pay damages and we could lose license rights that are critical to our business.

We license certain intellectual property, including technologies, data, content and software from third parties, that is important to our business, and in the future we may enter into additional agreements that provide us with licenses to valuable intellectual property or technology. If we fail to comply with any of the obligations under our license agreements, we may be required to pay damages and the licensor may have the right to terminate the license. Termination by the licensor would cause us to lose valuable rights, and could prevent us from selling our products and services, or inhibit our ability to commercialize future products and services. Our business would suffer if any current or future licenses terminate, if the licensors fail to abide by the terms of the license, if the licensors fail to enforce licensed patents against infringing third parties, if the licensed intellectual property rights are found to be invalid or unenforceable, or if we are unable to enter into necessary licenses on acceptable terms. In addition, our rights to certain technologies are licensed to us on a non-exclusive basis. The owners of these non-exclusively licensed technologies are therefore free to license them to third parties, including our competitors, on terms that may be superior to those offered to us, which could place us at a competitive disadvantage. Moreover, our licensors may own or control intellectual property that has not been licensed to us and, as a result, we may be subject to claims, regardless of their merit, that we are infringing or otherwise violating the licensor's rights. In addition, the agreements under which we license intellectual property or technology from third parties are generally complex, and certain provisions in such agreements may be susceptible to multiple interpretations. The resolution of any contract interpretation disagreement that may arise could narrow what we believe to be the scope of our rights to the relevant intellectual property or technology, or increase what we believe to be our financial or other obligations under the relevant agreement. Any of the foregoing could have a material adverse effect on our competitive position, business, financial condition and results of operations.

If we cannot license rights to use technologies on reasonable terms, we may not be able to commercialize new products in the future.

In the future, we may identify additional third-party intellectual property we may need to license in order to engage in our business, including to develop or commercialize new products or services. However, such licenses may not be available on acceptable terms or at all. The licensing or acquisition of third-party intellectual property rights is a competitive area, and several more established companies may pursue strategies to license or acquire third-party intellectual property rights that we may consider attractive or necessary. These established companies may have a competitive advantage over us due to their size, capital resources and greater development or commercialization capabilities. In addition, companies that perceive us to be a competitor may be unwilling to assign or license rights to us. Even if such licenses are available, we may be required to pay the licensor substantial royalties based on sales of our products and services. Such royalties are a component of the cost of our products or services and may affect the margins on our products and services. In addition, such licenses may be non-exclusive, which could give our competitors access to the same intellectual property licensed to us. If we are unable to enter into the necessary licenses on acceptable terms or at all, if any necessary licenses are subsequently terminated, if our licensors fail to abide by the terms of the licenses, if our licensors fail to prevent infringement by third parties, or if the licensed intellectual property rights are found to be invalid or unenforceable, our business, financial condition, and results of operations could be materially and adversely affected. Further, third parties from whom we currently license intellectual property rights could refuse to renew our agreements upon their expiration or could impose additional terms and fees that we otherwise would not deem acceptable requiring us to obtain the intellectual property from another third party, if any is available, or to pay increased licensing fees or be subject to additional restrictions on our use of such third party intellectual property. Defense of any lawsuit or failure to obtain any of these licenses on favorable terms could prevent us from commercializing

products, which could have a material adverse effect on our competitive position, business, financial condition and results of operations.

Any future litigation against us could damage our reputation and be costly and time-consuming to defend.

We may become subject, from time to time, to legal proceedings and claims that arise in the ordinary course of business, such as claims brought by our clients in connection with commercial disputes or employment claims made by current or former employees. Litigation might result in reputational damage and substantial costs and may divert management's attention and resources, which could materially and adversely affect our business, financial condition and results of operations. Insurance might not cover such claims, might not provide sufficient payments to cover all the costs to resolve one or more such claims and might not continue to be available on terms acceptable to us. Moreover, any negative impact to our reputation will not be adequately covered by any insurance recovery. A claim brought against us that is uninsured or underinsured could result in unanticipated costs, thereby reducing our results of operations and leading analysts or potential investors to reduce their expectations of our performance, which could reduce the value of our common stock. While we currently are not aware of any material pending or threatened litigation against us, we cannot assure you that the same will continue to be true in the future.

The market data and forecasts included in this prospectus may prove to be inaccurate, and even if the markets in which we compete achieve the forecasted growth, we cannot assure you that our business will grow at similar rates, or at all.

The third-party market data and forecasts included in this prospectus, as well as our internal estimates and research, are subject to significant uncertainty and are based on assumptions and estimates that may not prove to be accurate, although we have no reason to believe such information is not correct and we are in any case responsible for the contents of this prospectus. If the forecasts of market growth, anticipated spending or predictions regarding market size prove to be inaccurate, our business, financial condition and results of operations could be materially and adversely affected. Even if all or some of the forecasted growth occurs, our business may not grow at a similar rate, or at all. Our future growth is subject to many factors, including our ability to successfully implement our business strategy, which itself is subject to many risks and uncertainties. The reports described in this prospectus speak as of their respective publication dates and the opinions expressed in such reports are subject to change. Accordingly, investors in our common stock are urged not to put undue reliance on such forecasts and market data.

Natural or man-made disasters and other similar events, including the COVID-19 pandemic, could significantly disrupt our business, and materially and adversely affect our business, financial condition and results of operations.

Any of our operating facilities or infrastructure may be harmed or rendered inoperable by natural or man-made disasters, including hurricanes, tornadoes, wildfires, floods, earthquakes, nuclear disasters, acts of terrorism or other criminal activities, infectious disease outbreaks or pandemic events, including the COVID-19 pandemic, power outages and other infrastructure failures, which may render it difficult or impossible for us to operate our business for some period of time. Our facilities would likely be costly to repair or replace, and any such efforts would likely require substantial time. Any disruptions in our operations could harm our reputation and materially and adversely affect our business, financial condition and results of operations. Moreover, although we have disaster recovery plans, they may prove inadequate. We may not carry sufficient business insurance to compensate for losses that may occur. Any such losses or damages could have a material adverse effect on our business and results of operations. In addition, the facilities of our third-party providers, including AWS,

may be harmed or rendered inoperable by such natural or man-made disasters, which could cause disruptions, difficulties or otherwise materially and adversely affect our business, financial condition and results of operations.

We are subject to risks related to public health crises such as the global pandemic associated with COVID-19. State, local and foreign jurisdictions have imposed “shelter-in-place” orders, quarantines, executive orders and similar government orders and restrictions for their residents to control the spread of COVID-19. The COVID-19 pandemic and resulting shelter-in-place orders and impacts on domestic and international economic conditions have negatively affected our clients’ and prospective clients’ operations. The ability of our existing clients to fulfil or renew their contractual commitments, or potential new clients’ ability and willingness to purchase our products, may also be impacted by the ongoing COVID-19 pandemic. These challenges will likely continue for the duration of the pandemic, which is uncertain, and the macro-economic effects of the pandemic will likely continue far beyond the duration of the pandemic.

The COVID-19 pandemic has resulted in, and may continue to result in, significant disruption of global financial markets, reducing our ability to access capital, which could in the future negatively affect our liquidity. In addition, a recession or market correction resulting from the spread of COVID-19 could materially and adversely affect our clients’ business and therefore our business, financial condition and results of operations. The COVID-19 pandemic has also resulted in a significant increase in unemployment in the United States which may continue even after the pandemic subsides. Additionally, to the extent the COVID-19 pandemic adversely affects our business and financial results, it may also have the effect of heightening many of the other risks described in this “Risk Factors” section, such as our ability to achieve profitability in the future, our ability to attract new clients or continue to broaden our existing clients’ use of our solutions and the impact of any decrease in technology spend by clients and potential clients in the financial services industry where we derive all of our revenues.

The price of our common stock may fluctuate significantly, and you could lose all or part of your investment.

The market price of our common stock is likely to be volatile and could be subject to wide fluctuations in response to many risk factors listed in this section, and others beyond our control, including:

- actual or anticipated fluctuations in our results of operations and financial condition;
- variance in our financial performance from expectations of securities analysts;
- changes in our subscription revenues;
- changes in our projected operating and financial results;
- changes in tax laws or regulations;
- announcements by us or our competitors of significant business developments, acquisitions or new offerings;
- our involvement in any litigation;
- our sale of our common stock or other securities in the future;
- changes in senior management or key personnel;
- the trading volume of our common stock;
- changes in the anticipated future size and growth rate of our market;

[Table of Contents](#)

- natural disasters, outbreaks of disease or public health crises, such as the COVID-19 pandemic; and
- general economic, regulatory and market conditions.

Recently, the stock markets have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. These fluctuations have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry fluctuations, as well as general economic, political, regulatory and market conditions, and developments related to the COVID-19 pandemic, may negatively impact the market price of our common stock. If the market price of our common stock after this offering does not exceed the public offering price, you may lose some or all of your investment. In the past, companies that have experienced volatility in the market price of their securities have been subject to securities class action litigation. We may be the target of this type of litigation in the future, which could result in substantial costs and divert our management's attention.

If securities or industry analysts do not publish or cease publishing research or reports about us, our business or our market, or if they change their recommendations regarding our common stock adversely, the trading price of our common stock and trading volume could decline.

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us or our business. We do not control these analysts. If any of the analysts who cover us downgrade our common stock or our industry, or the stock of any of our competitors, or publish inaccurate or unfavorable research about our business, the price of our common stock may decline. If analysts cease coverage of us or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause the price or trading volume of our common stock to decline and our common stock to be less liquid.

As a result of becoming a public company, we will be obligated to develop and maintain proper and effective internal control over financial reporting and any failure to maintain the adequacy of these internal controls may adversely affect investor confidence in our company and, as a result, the value of our common stock.

We will be required, pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, as amended (the "Sarbanes-Oxley Act"), to furnish a report by management on, among other things, the effectiveness of our internal control over financial reporting on an annual basis, beginning with our second annual report on Form 10-K. This assessment will need to include disclosure of any material weaknesses identified by our management in our internal control over financial reporting. Our independent registered public accounting firm will not be required to attest to the effectiveness of our internal control over financial reporting until our first annual report required to be filed with the SEC following the date we are no longer an "emerging growth company," as defined in the JOBS Act. We will be required to disclose significant changes made in our internal control procedures on a quarterly basis.

Our compliance with Section 404 will require that we incur substantial accounting expense and expend significant management efforts. We currently do not have an internal audit group, and we may need to hire additional accounting and financial staff with appropriate public company experience and technical accounting knowledge and compile the system and process documentation necessary to perform the evaluation needed to comply with Section 404.

During the evaluation and testing process of our internal controls, if we identify one or more material weaknesses in our internal control over financial reporting, we will be unable to assert that our

internal control over financial reporting is effective. We cannot assure you that there will not be material weaknesses in our internal control over financial reporting in the future. Any failure to maintain internal control over financial reporting could severely inhibit our ability to accurately report our financial condition and results of operations. If we are unable to conclude that our internal control over financial reporting is effective, or if our independent registered public accounting firm determines we have a material weakness in our internal control over financial reporting, we could lose investor confidence in the accuracy and completeness of our financial reports, the market price of our common stock could decline, and we could be subject to sanctions or investigations by the SEC or other regulatory authorities. Failure to remedy any material weakness or significant deficiency in our internal control over financial reporting, or to implement or maintain other effective control systems required of public companies, could also restrict our future access to the capital markets and could materially and adversely affect our business, financial condition and results of operations.

Changes in financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and affect our reported results of operations.

Financial accounting standards may change or their interpretation may change. A change in accounting standards or practices can have a significant effect on our reported results and may even affect our reporting of transactions completed before the change becomes effective. Changes to existing rules or the re-examining of current practices could materially and adversely affect our reported financial results or the way we conduct our business. Accounting for revenues from sales of our solutions is particularly complex, is often the subject of intense scrutiny by the Securities and Exchange Commission (“SEC”) and will evolve as the FASB continues to consider applicable accounting standards in this area.

The requirements of being a public company may strain our resources, divert management’s attention and affect our ability to attract and retain qualified board members.

As a public company, we will be subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), the listing requirements of the on which our common stock will be traded and other applicable securities rules and regulations. The SEC and other regulators have continued to adopt new rules and regulations and make additional changes to existing regulations that require our compliance. Stockholder activism, the current political environment and the current high level of government intervention and regulatory reform may lead to substantial new regulations and disclosure obligations, which may lead to additional compliance costs and impact, in ways we cannot currently anticipate, the manner in which we operate our business. We will need to institute a comprehensive compliance function and establish internal policies to ensure we have the ability to prepare consolidated financial statements that are fully compliant with all SEC reporting requirements on a timely basis and establish an investor relations function. Compliance with these rules and regulations may cause us to incur additional accounting, legal and other expenses that we did not incur as a private company. We also anticipate that we will incur costs associated with corporate governance requirements, including requirements under securities laws, as well as rules and regulations implemented by the SEC and the , particularly after we are no longer an “emerging growth company.” We expect these rules and regulations to increase our legal and financial compliance costs and to make some activities more time-consuming and costly, while also diverting some of management’s time and attention from revenue-generating activities. Furthermore, these rules and regulations could make it more difficult or more costly for us to obtain certain types of insurance, including director and officer liability insurance, and we may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. The impact of these requirements could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as executive officers. We are currently

evaluating and monitoring developments with respect to these rules and regulations, and we cannot predict or estimate the amount of additional costs we may incur or the timing of such costs.

There is no existing market for our common stock, and we do not know if one will develop to provide you with adequate liquidity to sell our common stock at prices equal to or greater than the price you paid in this offering.

Prior to this offering, there has been no public market for our common stock. We cannot predict the extent to which investor interest in our company will lead to the development of an active trading market or how liquid that market may become. If an active trading market does not develop, you may have difficulty selling any of our shares that you purchase. The initial public offering price of our common stock was determined by negotiation between us and the underwriters, and may not be indicative of prices that will prevail after the completion of this offering. The market price of our common stock may decline below the initial public offering price, and you may not be able to resell your shares at, or above, the initial public offering price.

We have broad discretion in how we may use the net proceeds from this offering, and we may not use them effectively.

Our management will have broad discretion in applying the net proceeds we receive from this offering. We may use the net proceeds for general corporate purposes, including working capital, operating expenses and capital expenditures. We may use a portion of the net proceeds to acquire complementary businesses, products, services or technologies. However, we do not have agreements or commitments to enter into any acquisitions at this time. We may also spend or invest these proceeds in a way with which our stockholders disagree. If our management fails to use these funds effectively, our business could be seriously harmed.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Any statements made in this prospectus that are not statements of historical fact, including statements about our beliefs and expectations, are forward-looking statements and should be evaluated as such. Forward-looking statements include information concerning possible or assumed future results of operations, including descriptions of our business plan and strategies. These statements often include words such as “anticipate,” “expect,” “suggests,” “plan,” “believe,” “intend,” “estimates,” “targets,” “projects,” “should,” “could,” “would,” “may,” “will,” “forecast” and other similar expressions. These forward-looking statements are contained throughout this prospectus, including the sections titled “Prospectus Summary,” “Risk Factors,” “Capitalization,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Business.” We base these forward-looking statements on our current expectations, plans and assumptions that we have made in light of our experience in the industry, as well as our perceptions of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances at such time. As you read and consider this prospectus, you should understand that these statements are not guarantees of future performance or results. The forward-looking statements are subject to and involve risks, uncertainties and assumptions, and you should not place undue reliance on these forward-looking statements. Although we believe that these forward-looking statements are based on reasonable assumptions at the time they are made, you should be aware that many factors could affect our actual results or results of operations and could cause actual results to differ materially from those expressed in the forward-looking statements. Factors that may materially affect such forward-looking statements include:

- Our limited operating history and history of operating losses;
- Our ability to manage future growth;
- Our ability to attract new clients and expand existing clients’ use of our solutions;
- Our ability to maintain, protect and enhance our brand;
- Our ability to accurately predict the long-term rate of client subscription renewals or adoption of our solutions;
- Our reliance on third-party software, content and services;
- Our ability to effectively integrate our solutions with other systems used by our clients;
- Intense competition in our industry;
- Any downturn, consolidation or decrease in technology spend in the financial services industry;
- Our ability and the ability of third parties on which we rely to prevent and identify breaches of security measures and resulting disruptions of our systems or operations and unauthorized access to client customer and other data;
- Our ability to comply with regulatory and legal requirements and developments;
- Our ability to attract and retain key employees;
- The political, economic and competitive conditions in the markets and jurisdictions where we operate, including the impact of COVID-19 and the various governmental, industry and consumer actions related thereto;
- Our ability to maintain, develop and protect our intellectual property;
- Our ability to respond to evolving technological requirements to develop or acquire new and enhanced products that achieve market acceptance in a timely manner;

[Table of Contents](#)

- Our ability to estimate our expenses, future revenues, capital requirements, our needs for additional financing and our ability to obtain additional capital; and
- Other factors disclosed in this prospectus.

These cautionary statements should not be construed by you to be exhaustive and are made only as of the date of this prospectus. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.

USE OF PROCEEDS

We estimate that the net proceeds to us from the sale of the shares of our common stock in this offering will be approximately \$ _____ million, based upon an initial public offering price of \$ _____ per share, which is the midpoint of the price range set forth on the cover page of this prospectus, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us. If the underwriters exercise their option to purchase additional shares in this offering in full, we estimate that our net proceeds will be approximately \$ _____ million, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us.

Each \$1.00 increase (decrease) in the assumed initial public offering price of \$ _____ per share would increase (decrease) the net proceeds that we receive from this offering by approximately \$ _____ million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. Similarly, each increase (decrease) of 1,000,000 shares in the number of shares of our common stock offered by us would increase (decrease) the net proceeds that we receive from this offering by approximately \$ _____ million, assuming the assumed initial public offering price remains the same, and after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us.

We currently expect to use the net proceeds from this offering, together with our existing cash and cash equivalents, to finance our growth, develop new or enhanced solutions and fund capital expenditures. In connection with the completion of this offering, we also plan to pay an aggregate of \$ _____ million in accumulated dividends payable to holders of our Series B redeemable convertible preferred stock. As a result of the anticipated payment of the Series B Dividend, certain holders of 5% or more of our capital stock and their affiliated entities who are holders of our Series B redeemable convertible preferred stock are expected to receive approximately \$ _____ million of the net proceeds of this offering. Mr. Todd Clark has served as President and Chief Executive Officer of CU Cooperative since 2016, currently serves as a member of our board of directors and was designated to serve as a member of our board of directors by CU Cooperative. CU Cooperative is a holder of our Series B redeemable convertible preferred stock and, as a result of the anticipated payment of the Series B Dividend, is expected to receive approximately \$ _____ million of the net proceeds of this offering.

The remaining funds will be used for general corporate purposes, including working capital and operating expenses. We may also use a portion of the remaining net proceeds, if any, to acquire complementary businesses, products, services or technologies. However, we do not have agreements or commitments for any acquisitions at this time.

This expected use of the net proceeds from this offering represents our intentions based on our current plans and business conditions, which could change in the future as our plans and business conditions evolve. Our management will have broad discretion over the use of the net proceeds from this offering, and our investors will be relying on the judgment of our management regarding the application of the net proceeds of this offering.

Pending the use of the net proceeds from this offering as described above, we intend to invest the net proceeds in a variety of capital preservation instruments, including short-term, interest-bearing obligations, investment-grade instruments, certificates of deposit or direct or guaranteed obligations of the U.S. government.

DIVIDEND POLICY

We have never declared or paid any cash dividends. In connection with the completion of this offering, we plan to pay an aggregate of \$ million in accumulated dividends payable to holders of our Series B redeemable convertible preferred stock. Following payment of these accumulated dividends to holders of our Series B redeemable convertible preferred stock, we do not currently intend to pay any cash dividends on our capital stock for the foreseeable future. We currently intend to retain all available funds and future earnings, if any, to fund the development and expansion of our business. Any future determination regarding the declaration and payment of dividends, if any, will be at the discretion of our board of directors and will depend on then-existing conditions, including our financial condition, operating results, contractual restrictions, capital requirements, business prospects and other factors our board of directors may deem relevant. Also, unless waived, the terms of our Credit Agreement generally prohibit us from declaring or paying any cash dividends. Our ability to pay cash dividends on our capital stock may also be limited by any future debt instruments or preferred securities.

CAPITALIZATION

The following table sets forth our cash and cash equivalents and our capitalization as of December 31, 2020 on:

- an actual basis;
- a pro forma basis, to reflect: (i) the conversion of all of the outstanding shares of our redeemable convertible preferred stock as of December 31, 2020 into an aggregate of shares of our common stock immediately prior to the completion of this offering; (ii) the conversion of all of our outstanding warrants exercisable for redeemable convertible preferred stock as of December 31, 2020 into warrants exercisable for shares of our common stock immediately prior to the completion of this offering; and (iii) the filing and effectiveness of our amended and restated certificate of incorporation immediately prior to the completion of this offering; and
- a pro forma as adjusted basis, giving effect to the pro forma adjustments discussed above, and giving further effect to (i) the sale of shares of our common stock in this offering at an assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover page of this prospectus, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us and (ii) the payment in cash of the Series B Dividend in connection with the completion of this offering.

You should read this table together with the sections titled “Selected Consolidated Financial and Operating Information,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and the related notes included elsewhere in this prospectus. The pro forma as adjusted information below is illustrative only and our capitalization following the completion of this offering will be adjusted based on the actual initial public offering price and other terms of this offering determined at pricing.

(in thousands, except share and per share amounts)	As of December 31, 2020		
	Actual	Pro Forma	Pro Forma as Adjusted ⁽¹⁾
Cash and cash equivalents	\$	\$	\$
Term loans, current and noncurrent			
Redeemable convertible preferred stock, par value \$0.001 per share; shares authorized, shares issued and outstanding, actual; no shares authorized, issued or outstanding, pro forma and pro forma as adjusted			
Stockholders’ equity (deficit):			
Preferred stock, par value \$0.001 per share; no shares authorized, issued and outstanding, actual; shares authorized, no shares issued or outstanding, pro forma and pro forma as adjusted			
Common stock, par value \$0.001 per share; shares authorized, shares issued and outstanding, actual; shares authorized and shares issued and outstanding, pro forma; shares authorized and shares issued and outstanding, pro forma as adjusted			
Additional paid-in capital			
Accumulated deficit			
Total stockholders’ equity (deficit)			
Total capitalization	\$	\$	\$

- (1) Each \$1.00 increase or decrease in the assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover page of this prospectus, would increase or decrease, as applicable, each of pro forma as adjusted cash and cash equivalents, additional paid-in capital, total stockholders' equity (deficit) and total capitalization by approximately \$ million, assuming that the number of shares of our common stock offered by us, as set forth on the cover page of this prospectus, remains the same, and after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us. Similarly, each increase or decrease of 1.0 million shares of our common stock offered by us would increase or decrease, as applicable, each of pro forma as adjusted cash and cash equivalents, additional paid-in capital, total stockholders' equity (deficit) and total capitalization by approximately \$ million, assuming that the assumed initial public offering price of \$ per share, the midpoint of the price range set forth on the cover page of this prospectus, remains the same, and after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us.

The number of shares of our common stock to be outstanding after this offering reflected in the table above is based on shares of our common stock outstanding as of December 31, 2020 and excludes:

- shares of our common stock issuable upon the exercise of outstanding warrants, which includes our existing redeemable convertible preferred stock warrants that will convert into warrants exercisable for common stock immediately prior to the completion of this offering, as of December 31, 2020, with a weighted-average exercise price of \$ per share;
- shares of our common stock issuable upon the exercise of outstanding stock options as of December 31, 2020, with a weighted-average exercise price of \$ per share;
- shares of our common stock issuable upon the exercise of outstanding stock options granted subsequent to December 31, 2020, with a weighted-average exercise price of \$ per share;
- additional shares of our common stock reserved for issuance pursuant to future awards under our 2011 Plan, which will become available for issuance under our 2021 Plan immediately prior to the completion of this offering;
- shares of our common stock reserved for future issuance under our 2021 Plan, which will become effective on the date immediately prior to the date our registration statement relating to this offering becomes effective, as well as any future increases in the number of shares of our common stock reserved for issuance under the 2021 Plan; and
- shares of our common stock reserved for future issuance under our ESPP, which will become effective on the date immediately prior to the date our registration statement relating to this offering becomes effective, as well as any future increases in the number of shares of our common stock reserved for issuance under the ESPP.

If the underwriters' option to purchase additional shares of our common stock from us were exercised in full, pro forma as adjusted cash and cash equivalents, additional paid-in capital, total stockholders' equity (deficit) and number of shares of our common stock outstanding would be \$ million, \$ million, \$ million and , respectively.

DILUTION

If you invest in our common stock in this offering, your ownership interest will be immediately diluted to the extent of the difference between the initial public offering price per share of our common stock and the pro forma as adjusted net tangible book value per share of our common stock after this offering. Dilution results from the fact that the per share public offering price of the common stock is substantially in excess of the book value per share of our common stock after this offering. Our net tangible book value as of December 31, 2020 was \$ _____ million, or \$ _____ per share of our common stock. Our net tangible book value is the amount of our total tangible assets less our total liabilities and redeemable convertible preferred stock, which is not included within our stockholders' equity (deficit). Net tangible book value per share represents net tangible book value divided by the total number of shares of our common stock outstanding.

Our pro forma net tangible book value as of December 31, 2020 was \$ _____ million, or \$ _____ per share of our common stock. Pro forma net tangible book value represents the amount of our total tangible assets less our total liabilities, after giving effect to the conversion of all of the outstanding shares of our redeemable convertible preferred stock as of December 31, 2020 into an aggregate of _____ shares of our common stock immediately prior to the completion of this offering. Pro forma net tangible book value per share represents our pro forma net tangible book value divided by the total number of shares outstanding as of December 31, 2020, after giving effect to the conversion of all of the outstanding shares of our redeemable convertible preferred stock as of December 31, 2020 into an aggregate of _____ shares of our common stock immediately prior to the completion of this offering.

After giving further effect to (a) the sale of _____ shares of our common stock that we are offering at an assumed initial public offering price of \$ _____ per share, which is the midpoint of the price range listed on the cover page of this prospectus, (b) the application of the proceeds from this offering as described in "Use of Proceeds," after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us, and (c) the payment in cash of the Series B Dividend in connection with the completion of this offering, as if each had occurred on December 31, 2020, our pro forma as adjusted net tangible book value as of December 31, 2020 would have been \$ _____ million, or \$ _____ per share of common stock. This amount represents an immediate increase in pro forma as adjusted net tangible book value of \$ _____ per share of common stock to our existing stockholders before this offering and an immediate and substantial dilution in pro forma as adjusted net tangible book value of \$ _____ per share of common stock to new investors purchasing shares of our common stock in this offering. We determine dilution by subtracting the pro forma as adjusted net tangible book value per share of common stock after this offering from the amount of cash that a new investor paid for a share of common stock in this offering. The following table illustrates this dilution, assuming the underwriters do not exercise their option to purchase additional shares of our common stock:

Assumed initial public offering price per share of common stock	\$ _____
Net tangible book value per share of as December 31, 2020	\$ _____
Pro forma increase in net tangible book value per share as of December 31, 2020	_____
Pro forma net tangible book value per share as of December 31, 2020	_____
Increase in pro forma as adjusted net tangible book value per share of common stock attributable to new investors in this offering	_____
Pro forma as adjusted net tangible book value per share of common stock immediately after this offering	_____
Dilution in pro forma as adjusted net tangible book value per share of common stock to new investors in this offering	\$ _____

[Table of Contents](#)

A \$1.00 increase or decrease in the assumed initial public offering price of \$ _____ per share, which is the midpoint of the price range listed on the cover page of this prospectus, would increase or decrease the pro forma as adjusted net tangible book value per share of common stock after this offering by approximately \$ _____, and the dilution in pro forma as adjusted net tangible book value per share of common stock to new investors by approximately \$ _____, assuming that the number of shares of our common stock offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. Similarly, each increase or decrease of _____ shares of our common stock in the number of shares offered by us would increase or decrease, as applicable, the pro forma as adjusted net tangible book value by \$ _____ per share of common stock and increase or decrease, as applicable, the dilution in pro forma as adjusted net tangible book value to new investors by \$ _____ per share of common stock, assuming the assumed initial public offering price remains the same, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

If the underwriters' option to purchase additional shares of our common stock is exercised in full, the pro forma as adjusted net tangible book value per share of common stock would be \$ _____ per share, and the dilution in pro forma as adjusted net tangible book value per share of common stock to new investors in this offering would be \$ _____ per share.

The following table summarizes, on an as adjusted basis as of December 31, 2020, the differences between the number of shares of our common stock purchased from us, the total consideration paid to us in cash and the average price per share that existing investors and new investors paid. The calculation below is based on an assumed initial public offering price of \$ _____ per share of common stock, which is the midpoint of the price range listed on the cover page of this prospectus, before deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

	Shares of Common Stock Purchased		Total Consideration		Average Price Per Share of Common Stock
	Number	Percent	Amount	Percent	
Existing stockholders		%	\$	%	\$
New investors					
Total		100.0%	\$	100.0%	

A \$1.00 increase (decrease) in the assumed initial offering price would increase (decrease) total consideration paid by new investors, total consideration paid by all stockholders and average price per share paid by all stockholders by \$ _____ million, \$ _____ million and \$ _____ per share, respectively. An increase (decrease) of _____ in the number of shares of our common stock offered by us in this offering would increase (decrease) total consideration paid by new investors, total consideration paid by all stockholders and average price per share paid by all stockholders by \$ _____ million, \$ _____ million and \$ _____ per share, respectively.

Except as otherwise indicated, the above discussion and tables assume no exercise of the underwriters' option to purchase additional shares of our common stock from us. If the underwriters' option to purchase additional shares of our common stock were exercised in full, our existing stockholders would own _____ % and our new investors would own _____ % of the total number of shares of our common stock outstanding upon completion of this offering.

SELECTED CONSOLIDATED FINANCIAL AND OPERATING INFORMATION

The following tables set forth our selected historical consolidated financial information for the periods and dates indicated. The consolidated balance sheet data as of December 31, 2020 and the consolidated statements of operations for the years ended December 31, 2019 and 2020 have been derived from our audited consolidated financial statements included elsewhere in this prospectus. The statement of operations for the year ended December 31, 2018 has been derived from our financial statements not included in this prospectus. Our historical results are not necessarily indicative of the results to be expected in the future.

This data should be read in conjunction with, and is qualified in its entirety by reference to, the “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Capitalization” sections of this prospectus and our audited consolidated financial statements and notes thereto for the periods and dates indicated included elsewhere in this prospectus.

Consolidated Statements of Operations

	Year Ended December 31,		
	2018	2019	2020
<i>(in thousands, except share and per share \$ amounts)</i>			
Revenues	\$ 48,199	\$ 73,541	\$
Cost of revenues ⁽¹⁾	32,495	43,106	
Gross profit	15,704	30,435	
Operating expenses ⁽¹⁾ :

Total stock-based compensation expenses	<u>\$801</u>	<u>\$1,250</u>	<u>\$</u>

- (2) See Note 11 to our consolidated financial statements included elsewhere in this prospectus for an explanation of the calculations of our basic and diluted net loss per share and the weighted-average number of shares used in the computation of the per share amounts.

Consolidated Balance Sheet Data

(in thousands)	As of December 31, 2019	As of December 31, 2020
Cash and cash equivalents	\$ 11,982	\$
Total assets	52,734	
Total liabilities	38,091	
Redeemable convertible preferred stock	210,033	
Total stockholders' equity (deficit)	(195,390)	

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with the consolidated financial statements and the related notes included elsewhere in this prospectus. In addition to historical financial information, the following discussion contains forward-looking statements that reflect our plans, estimates, beliefs and expectations that involve risks and uncertainties. Our actual results and the timing of events could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this prospectus, particularly in the sections of this prospectus titled "Risk Factors" and "Special Note Regarding Forward-Looking Statements."

Overview

Alkami is a cloud-based digital banking platform. We inspire and empower community, regional and super-regional FIs to compete with large, technologically advanced and well-resourced banks in the United States. Our solution, the Alkami Platform, allows FIs to onboard and engage new users, accelerate revenues and meaningfully improve operational efficiency, all with the support of a proprietary, true cloud-based, multi-tenant architecture. We cultivate deep relationships with our clients through long-term, subscription-based contractual arrangements, aligning our growth with our clients' success and generating an attractive unit economic model.

In the early 2000s digital engagement began revolutionizing industries overnight, forcing firms to invest and innovate or risk losing long-term relationships to well-resourced competitors. Within banking, many FIs were ill-equipped to compete with larger competitors, including megabanks, primarily due to resource constraints and the resulting inability to keep pace, technologically, with evolving consumer preferences for digital engagement. This led to the first digital banking platform.

The earliest versions of digital banking platforms, however, were focused on basic self-service functions that could be accomplished with a desktop computer via a single integration to the primary system of record. As the form factor of digital engagement evolved to include both desktop and mobile, FIs generally adopted disparate digital banking solutions as a matter of necessity. This served to only magnify the compounding and seemingly inescapable problem of layered and poorly integrated infrastructures, and today, many FIs continue to use disparate technology solutions for desktop, mobile, retail and business banking functions. On average, FIs require integration to more than 20 systems to enable customer self-service, according to management estimates. As consumer preferences quickly evolve, many FIs have found that their existing infrastructure lacks the uniformity and the agility to adapt to an increasingly digital and mobile world. Our technology provides a value proposition that solves this problem.

We founded Alkami to help level the playing field for FIs. Our vision was to create a platform that combined premium technology and fintech solutions in one integrated ecosystem, delivered as a SaaS solution and providing our clients' customers with a single point of access to all things digital. We invested significant resources to build a technology stack that prioritized innovation velocity and speed-to-market given the importance of product depth and functionality in winning and retaining clients. The result of these investments is a premium platform that has enabled us to replace older, larger and better-funded incumbents in many of the FIs served (as of year-end 2020) by the Alkami Platform. Today, our clients can offer world-class experiences reflecting their individual digital strategies, reaching over of our clients' customers, with an additional of our clients' customers under implementation, as of year-end 2020.

Our domain expertise in retail and business banking has enabled us to develop a suite of products tailored to address key challenges faced by FIs. The key differentiators of the Alkami Platform include:

- **User experience:** Personalized and seamless digital experience across user interaction points, including mobile, chat and SMS, establishing durable connections between FIs and their customers.
- **Integrations:** Scalability and extensibility driven by more than real-time integrations to back office systems and third-party fintech solutions as of year-end 2020, including core systems, payment cards, mortgages, bill pay, electronic documents, money movement, personal financial management and account opening.
- **Deep data capabilities:** Data synchronized and stored from back office systems and third-party fintech solutions and synthesized into meaningful insights, targeted content and other areas of monetization.

The Alkami Platform offers an end-to-end set of software products. Our typical relationship with an FI begins with a set of core functional components, which can extend over time to include a rounded suite of products across account opening, card experience, financial wellness, fraud protection and marketing. Due to our architecture, adding products through our single code base is fast, simple and cost-effective, and we expect product penetration to continue to increase as we broaden our product suite. As of December 31, 2020, our clients used of our offered products, on average.

Our target clients vary in size, generally ranging from approximately \$500 million to \$100 billion in assets and from approximately 10,000 customers to 2 million customers. This vast group of FIs, of which were Alkami clients as of year-end 2020, had \$ in assets on their balance sheets as of year-end 2020. However, this group generally does not have the internal resources or capabilities to fully build and customize their own technology platforms to keep pace with the megabanks, challenger banks and other technology-enabled competitors. As a result, many of these institutions are turning to technology providers to bridge the gap between the tools they need to compete in the marketplace and their internal infrastructures.

We go to market through an internal sales force. Given the long-term nature of our contracts, a typical sales cycle can range from approximately three to 12 months, with the subsequent implementation timeframe generally ranging from six to 12 months depending on the depth of integration. In March 2020, following COVID-19-related shelter-in-place orders, our client service organization, including our implementation team, shifted to remote execution and onboarded more than FIs and nearly new registered users during this period through the end of 2020.

We derive our revenues almost entirely from multi-year contracts that had an average contract life since our inception of 69 months as of September 30, 2020. We predominantly employ a per-registered-user pricing model, with incremental fees above certain contractual minimum commitments for each licensed solution. Our pricing is tiered, with per-registered-user discounts applied as clients achieve higher levels of customer penetration, in turn incentivizing our clients to internally market and promote digital engagement. Our ability to grow revenues through deeper client customer penetration and cross-sell allowed us to deliver a net dollar revenue retention rate of 115% as of September 30, 2020.

To support our growth and capitalize on our market opportunity, we have increased our operating expenses across all aspects of our business. In research and development, we continue to focus on innovation and bringing novel capabilities to our platform, extending our product depth. Similarly, we continue to expand our sales and marketing organization focusing on new client wins, cross-selling opportunities and client renewals.

We have invested in the growth of our business since our inception, have not generated a profit in any period and expect to continue to generate losses for the foreseeable future. As of December 31, 2020, we had an accumulated deficit of \$.

Our total revenues were \$ million, \$73.5 million and \$48.2 million for 2020, 2019 and 2018, representing growth rates of % from 2019 to 2020 and 52.6% from 2018 to 2019. Our total revenues were \$78.8 million and \$51.9 million for the nine months ended September 30, 2020 and September 30, 2019, representing a growth rate of 51.9%. SaaS subscription revenues, as further described below, represented %, 91.5% and 90.8% of total revenues for 2020, 2019 and 2018. We incurred net losses of \$ million, \$41.9 million and \$41.6 million for 2020, 2019 and 2018. largely on the basis of significant continued investment in sales, marketing, product development and post-sales client activities.

COVID-19 Impact

The shelter-in-place orders surrounding COVID-19 have impacted our business. We transitioned our employee base to work-from-home in March 2020, creating challenges in executing sales and implementations that have resurfaced due to renewed shelter-in-place requirements and may be exacerbated by prolonged shelter-in-place requirements. In terms of demand, while general economic headwinds have adversely impacted the technology budgets of certain clients, we believe shelter-in-place orders have served to highlight the criticality of our products, driving increased demand over time.

The full extent to which the ongoing COVID-19 pandemic affects our financial performance will depend on future developments, many of which are outside of our control, are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the pandemic, its severity, the effectiveness of actions to contain the virus or treat its impact and how quickly and to what extent normal economic and operating conditions can resume. The COVID-19 pandemic could also result in additional governmental restrictions and regulations, which could adversely affect our business and financial results. In addition, a recession, depression or other sustained adverse market impact resulting from COVID-19 could materially and adversely affect our business and our access to needed capital and liquidity. Even after the COVID-19 pandemic has lessened or subsided, we may continue to experience adverse impacts on our business and financial performance as a result of its global economic impact.

Factors Affecting our Operating Results

Growing our FI Client Base. A key part of our strategy is to grow our FI client base. As of December 31, 2020 we served FIs through the Alkami Platform (and an additional following our acquisition of ACH Alert), representing % annual client growth since year-end 2018. Each of our new client wins is a competitive takeaway, and as such, our historical ability to grow our client base has been a function of product depth, technological excellence and a sales and marketing function able to match our solutions with the strategic objectives of our clients. Our future success will significantly depend on our ability to continue to grow our FI client base through competitive wins.

Deepening Client Customer Penetration. We primarily generate revenues through a per-registered-user pricing model. Once we onboard a client, our ability to help drive incremental client customer digital adoption translates to additional revenues with very limited additional spend. Our FI clients are incentivized to market and encourage digital account sign-up based on identifiable improvement in customer engagement as well as discounts received based on certain levels of customer penetration. We expect to continue to support digital adoption by client customers through

continued investments in new products and platform enhancements. Our future success will depend on our ability to continue to deepen client customer penetration.

Expanding our Product Suite. Product depth is a key determinant in winning new clients. In a replacement market, we win based on our ability to bring a product suite to market that is superior to the incumbent, as well as to our broader competition. Of equal importance is the ability to cohesively deliver a deep product suite and with as little friction as possible to the client customer. The depth of our product suite is a function of technology and platform partnerships. Our platform model with over _____ integrations as of year-end 2020 enables us to deliver thousands of configurations aligned with the digital platform strategies adopted by our clients. We expect our future success in winning new clients to be partially driven by our ability to continue to develop and deliver new, innovative products to FI clients in a timely manner. Furthermore, expanding our product suite expands our RPU potential.

Client Renewals. Our model and the stability of our revenue base is, in part, driven by our ability to renew our clients. Since inception, we signed new contracts with all but three clients who have come up for renewal. In addition to extending existing relationships, renewals provide an opportunity to grow minimum contract value as over the course of a contract term our clients often grow or their needs evolve. Across the 2019 and 2020 renewal cohorts we achieved a _____ % ARR uplift. Client renewals are also an important lever in driving our long-term gross margin targets, as we generally achieve approximately 70% gross margin upon renewal. Combined with increasing registered users penetration and expanding RPU, our client renewals have expanded ARR for the cohort of clients going live before 2017 to 1.99x their initial contract minimums. We expect client renewal to continue to play a key role in our future success.

Continued Leadership in Innovation. Our ability to maintain a differentiated platform and offering is dependent upon our pace of innovation. In particular, our single code base, built on a multi-tenant infrastructure and combined with continuous software delivery enables us to bring new, innovative products to market quickly and positions us with what we believe is market leading breadth in terms of product offerings and feature set. We remain committed to investing in our platform, notably through our research and development spend, which was _____ % of our revenues in 2020. Our future success will depend on our continued leadership in innovation.

Key Business Metrics

Adjusted EBITDA. Adjusted EBITDA is a non-GAAP financial measure and should not be considered an alternative to GAAP net loss as a measure of operating performance or as a measure of liquidity. We define adjusted EBITDA as net loss before provision for income taxes; gain on financial instruments; interest income, net; amortization of intangible assets; depreciation; stock-based compensation expense; tender offer-related costs; and acquisition-related costs. We believe adjusted EBITDA provides investors and other users of our financial information consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations. Adjusted EBITDA was \$(20.6) million for the nine months ended September 30, 2020, \$(39.1) million for the year ended December 31, 2019 and \$(38.9) million for the year ended December 31, 2018. For additional information regarding adjusted EBITDA, including the reconciliation to net loss, the most directly comparable GAAP financial measure, see “Summary Consolidated Financial and Operating Information.”

Annual Recurring Revenue (ARR). We calculate ARR by aggregating annualized recurring revenue related to SaaS subscription services recognized in the last month of the reporting period as well as the next 12 months of expected implementation services revenues for all clients on the platform in the last month of the reporting period. We believe ARR provides important information about our

future revenue potential, our ability to acquire new clients, and our ability to maintain and expand our relationship with existing clients. ARR was \$113.9 million as of September 30, 2020, \$87.8 million as of December 31, 2019 and \$57.9 million as of December 31, 2018. The chart below shows cumulative growth in ARR for each cohort from first-year minimum contractual ARR through ARR as of September 30, 2020.

Registered Users. We define a registered user as an individual or business related to an account holder of an FI client on our digital banking platform who has registered to use one or more of our solutions and has current access to use those solutions as of the last day of the reporting period presented. We price our digital banking platform based on the number of registered users, so as the number of registered users of our digital banking platform increases, our ARR grows. We believe growth in the number of registered users provides important information about our ability to expand market adoption of our digital banking platform and its associated software products, and therefore to grow revenues over time. We had 9.0 million registered users as of September 30, 2020, 7.2 million as of December 31, 2019 and 5.6 million as of December 31, 2018.

Revenue per Registered User (RPU). We calculate RPU by dividing ARR for the reporting period by the number of registered users as of the last day of the reporting period. We believe RPU provides important information about our ability to grow the number of software products adopted by new clients over time, as well as our ability to expand the number of software products that our existing clients add to their contracts with us over time. RPU was \$12.60 as of September 30, 2020, \$12.23 as of December 31, 2019 and \$10.29 as of December 31, 2018.

Non-GAAP Cost of Subscription Services. Non-GAAP cost of subscription services is a non-GAAP financial measure and should not be considered an alternative to cost of revenue as a measure of operating performance. Non-GAAP cost of subscription services is comprised primarily of direct costs for bill-pay services and other third-party functionality integrated into our solutions and third-party cloud-based hosting services. In addition, non-GAAP cost of subscription services includes personnel-related costs associated with maintaining and releasing updates to our platform, client support and account management services, including salaries, employee benefits, bonus, travel and related costs and allocated general overhead. We define non-GAAP cost of subscription services as GAAP cost of revenues before the cost of our implementation organization, amortization of intangibles, depreciation and stock-based compensation expense that is included in cost of revenues. We believe non-GAAP cost of subscription services provides investors and other users of our financial information consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations. For a reconciliation of non-GAAP cost of subscription services to GAAP cost of revenues, the most directly comparable GAAP measure, see “— Reconciliation of GAAP to Non-GAAP Measures.”

Non-GAAP Subscription Gross Margin. Non-GAAP subscription gross margin is a non-GAAP financial measure and should not be considered an alternative to gross margin as a measure of operating performance. We define non-GAAP subscription gross margin as SaaS subscription services less non-GAAP cost of subscription services divided by SaaS subscription services. SaaS subscription services represents GAAP revenue before implementation and other services. See the table below and Note 4 to our consolidated financial statements included elsewhere in this prospectus for disaggregation of our revenues by major source. We believe non-GAAP gross margin provides investors and other users of our financial information consistency and comparability with our past financial performance and facilitates period-to-period comparisons of operations. For a reconciliation of non-GAAP subscription gross margin to GAAP gross margin, the most directly comparable GAAP measure, see “—Reconciliation of GAAP to Non-GAAP Measures.”

Components of Our Results of Operations

Revenues

Our client relationships are primarily based on multi-year contracts that have had an average contract life since inception of 69 months as of September 30, 2020. We derive the majority of our revenues from SaaS subscription services charged for the use of our digital banking solution. For each client, we invoice monthly a contractual minimum fee for each licensed solution. In addition, we invoice monthly an additional subscription fee for the number of registered users using each solution and the number of bill-pay and certain other transactions those registered users conduct through our digital banking platform in excess of their contractual minimum commitments. Our pricing is tiered, with per-registered-user discounts applied as clients achieve higher levels of customer penetration, in turn incentivizing our clients to internally market our products and promote digital engagement. Variable consideration earned for subscription fees in excess of contractual minimums are recognized as revenues in the month of actual usage. SaaS subscription services also include annual and monthly charges for maintenance and support services which are recognized on a straight-line basis over the contract term.

We receive implementation and other upfront fees for the implementation, configuration and integration of our digital banking platform. We typically invoice these services as a fixed price per contract. These fees are not distinct from the underlying licensed SaaS subscription services. As a result, we recognize the resulting revenues on a straight-line basis over the client's initial agreement term for its licensed SaaS solutions, commencing upon launch.

Occasionally, our clients request custom development and other professional services, which we provide. These are generally one-time in nature and involve unique, non-standard features, functions or integrations that are intended to enhance or modify their licensed SaaS solutions. We recognize revenues at the point in time the services are transferred to the client.

The following disaggregates the Company's revenues for the nine months ended September 30, 2020 by major source.

	Nine Months Ended September 30, 2020
(\$ in thousands)	
SaaS subscription services	\$ 73,723
Implementation services	3,741
Other services	1,353
Total revenues	<u>\$ 78,817</u>

See Note 4 to our consolidated financial statements included elsewhere in this prospectus for disaggregation of our revenues by major source.

Cost of Revenues and Gross Margins

Cost of revenues is comprised primarily of salaries and other personnel-related costs, including employee benefits, bonuses, stock-based compensation, travel and related costs for employees supporting our SaaS subscription, implementation and other services. This includes the costs of our implementation, client support and client success teams, development personnel responsible for maintaining and releasing updates to our platform, as well as third-party cloud-based hosting services. Cost of revenues also includes the direct costs of bill-pay and other third-party intellectual property included in our solutions, the amortization of acquired technology and depreciation.

We capitalize certain personnel costs directly related to the implementation of our solutions to the extent those costs are recoverable from future revenues. We amortize the costs for an implementation once revenue recognition commences. The amortization period is typically five to seven years which represents the expected period of client benefit. Other costs not directly recoverable from future revenues are expensed in the period incurred.

We intend to continue to increase our investments in our implementation, client support and client success teams and technology infrastructure to serve our clients and support our growth. We expect cost of revenues to continue to grow in absolute dollars as we grow our business but to vary as a percentage of revenues from period to period as a function of the utilization of implementation and support personnel and the extent we recognize fees from bill-pay services and other third-party functionality integrated into our solutions. Our gross margin for the nine months ended September 30, 2020 was 51.6%, while our non-GAAP subscription gross margin for the nine months ended September 30, 2020 was 59.7%.

Operating Expenses

Research and Development. Research and development costs consist primarily of personnel-related costs for our engineering, information technology and product, including salaries, bonus, commissions, other incentive-related compensation, employee benefits and stock-based compensation. In addition, we also include third-party contractor expenses, software development and testing tools, and other expenses related to developing new solutions and upgrading and enhancing existing solutions. We expect research and development cost to increase as we expand our platform with new features and functionality as well as enhance the existing Alkami Platform.

Sales and Marketing. Sales and marketing expenses consist primarily of personnel-related costs of our sales, marketing and a portion of account management employees, including salaries, bonus, commissions, other incentive-related compensation, employee benefits and stock-based compensation. Sales and marketing expenses also include travel and related costs, outside consulting fees and marketing programs, including lead generation, costs of our annual client conference, advertising, trade shows, other event expenses and amortization of acquired client relationships. We expect sales and marketing expenses will continue to increase as we expand our direct sales teams to pursue our market opportunity.

General and Administrative. General and administrative expenses consist primarily of personnel-related costs for our general and administrative teams including salaries, bonus, commissions, other incentive-related compensation, employee benefits and stock-based compensation associated with our executive, finance, legal, human resources, information technology, security and compliance as well as other administrative personnel. General and administrative expenses also

[Table of Contents](#)

include accounting, auditing and legal professional services fees, travel and other unallocated corporate-related expenses such as the cost of our facilities, employee relations, corporate telecommunication and software. We expect that general and administrative expenses will continue to increase as we scale our business and as we incur costs associated with being a publicly traded company, including legal, audit, business insurance and consulting fees.

Non-operating Income (Expense)

Non-operating income (expense) consists primarily of interest income from our cash balances, interest expense from borrowings under our revolving line of credit, amortization of deferred debt costs and changes in fair value of warrant and tranche rights.

Provision for (Benefit from) Income Taxes

We are subject to franchise, business and income taxes in several U.S. federal and state jurisdictions in which we conduct business. Such taxes, which are minimal, are reported within general and administrative expense in the consolidated statement of operations. Due to cumulative losses, we maintain a full valuation allowance against our net deferred tax assets. We consider all available evidence, both positive and negative, in assessing the extent to which a valuation allowance should be applied against our deferred tax assets. Realization of our U.S. deferred tax assets depends upon future earnings, the timing and amount of which are uncertain.

Results of Operations

The results of operations presented below should be reviewed in conjunction with the consolidated financial statements and notes included elsewhere in this prospectus. The following table presents our selected consolidated statement of operations data for 2019 and 2020 in both dollars and as a percentage of total revenues, except as noted.

	Year Ended December 31,	
	2019	2020
(in thousands, except share and per share \$ amounts)		
Revenues	\$ 73,541	\$
Cost of revenues ⁽¹⁾	43,106	
Gross profit	30,435	
Operating expenses ⁽¹⁾ :		
Research and development	32,722	
Sales and marketing	15,328	
General and administrative	24,920	
Total operating expenses	72,970	
Loss from operations	(42,535)	
Non-operating income (expense):		
Interest income	267	
Interest expense	(110)	
Gain on financial instruments	509	
Loss before income tax expense	(41,869)	
Provision for income taxes	—	
Net loss	(41,869)	

Table of Contents

	Year Ended December 31,	
	2019	2020
(in thousands, except share and per share \$ amounts)		
Less: Cumulative dividends and adjustments to redeemable convertible preferred stock	(1,212)	
Net loss attributable to common stockholders	\$ (43,081)	\$
Net loss per share:

Expenses related to tender offer	—	
Acquisition-related expenses(1)	—	
Adjusted EBITDA	\$(39,059)	\$

(1) On October 15, 2020, we offered to purchase for cash vested stock options or shares of common stock, representing up to 20% of each employee's holdings from employees employed by us on September 30, 2020. The expiration date of the tender offer was November 12, 2020. An aggregate of 1.1 million vested stock options and shares of common stock were tendered, resulting in total net payments of \$16.7 million.

Comparison of Years ended December 31, 2020 and 2019

Revenues

The following table presents our revenues for each of the periods indicated:

	Year Ended December 31,		Change	
	2019	2020	\$	%
(in thousands, except registered users and RPU)				
Revenues	\$73,541	\$	\$	%
Annual recurring revenue (ARR)	\$87,757	\$	\$	%
Registered users	7,176			%
Revenue per registered user (RPU)	\$ 12.23	\$	\$	%

Revenues increased \$ million, or % for 2020 compared to 2019. The increase in revenues was primarily due to registered user growth of million, driven by million in registered user growth from existing clients and million in registered users from new client wins. In addition, increased revenues were due to RPU growth of %. RPU growth was primarily driven by cross-sell activity to existing clients and new client average RPU of \$ as of December 31, 2020 which reflects new client adoption that is % higher than the aggregate RPU. An additional contributing factor to increased revenues in 2020 is the acquisition of ACH Alert completed on October 4, 2020, contributing \$ million to 2020 revenues.

Cost of Revenues and Gross Margin

The following table presents our cost of revenues for each of the periods indicated:

	Year Ended December 31,		Change	
	2019	2020	\$	%
(in thousands)				
Cost of revenues	\$43,106	\$	\$	%
Percentage of revenues	58.6%	%		

Cost of Revenues

Cost of revenues increased \$ million, or % for 2020 compared to 2019, generating a gross margin of % for 2020 compared to a gross margin of 41.4% for 2019. The increase in cost of revenues was primarily driven by \$ million higher third-party costs and \$ in hosting costs, both incurred from an increase in revenues derived from existing and new client growth. Personnel-related costs increased \$ million resulting from headcount increases supporting our growth in the following teams: site reliability engineering, client implementation and client support. We expect the cost of revenues will continue to increase as SaaS subscription services and the associated implementation services increase over time. However, we expect gross margin to continue to improve due to operational scaling.

Operating Expenses

	Year Ended December 31,		Change	
	2019	2020	\$	%
(in thousands)				
Research and development	\$32,722	\$	\$	%
Sales and marketing	15,328			%
General and administrative	24,920			%
Total operating expenses	<u>\$72,970</u>	<u>\$</u>	<u>\$</u>	<u>%</u>
Percentage of revenues	99.2%	%		

Research and Development

Research and development expenses increased \$ million, or %, for 2020 compared to 2019, primarily due to a \$ million increase in personnel-related costs resulting from headcount growth in our engineering, information technology and product teams dedicated to platform enhancements and innovation. In addition, we incurred an \$ million increase in client infrastructure and other costs due to continued growth from our install base and new client growth.

Sales and Marketing

Sales and marketing expenses increased \$ million, or % for 2020 compared to 2019, primarily due to a \$ million increase in personnel-related costs resulting from headcount growth in our sales and marketing teams and higher new sales productivity. These costs were offset by \$ million lower travel costs for the sales team as well as \$ million lower costs related to our annual client conference, industry conferences and tradeshows, all primarily due to the work-from-home business environment during the COVID-19 pandemic.

General and Administrative

General and administrative expenses increased \$ million, or % for 2020 compared to 2019, primarily due to a \$ million increase in personnel-related costs from increased headcount. In addition, we incurred a \$ million increase in software costs and a \$ million increase in facilities costs. These higher costs were the result of additional employees to support our growth initiatives as well as costs incurred to support the activities associated with being a publicly traded company. These costs were offset by \$ million less travel, employee-related costs and lower consulting costs, all primarily due to the work-from-home business environment during the COVID-19 pandemic.

Other

Non-operating Income (Expense)

Non-operating income (expense), net decreased \$ million, for 2020 compared to 2019, primarily due to \$ million in non-operating loss related to the increase in fair value of warrant and redeemable convertible preferred stock tranche right liabilities.

Provision for Income Taxes

Provision for income taxes for 2020 and 2019 is \$ and \$0, respectively. We file franchise, business and income tax returns in several state jurisdictions. Such taxes, which are minimal, are reported within general and administrative expense in the statement of operations. As a result of operating losses, no federal or state income taxes are owed.

Quarterly Results of Operations

The following table sets forth our unaudited quarterly consolidated statements of operations data for each of the periods presented. In management's opinion, the data below has been prepared on the same basis as the audited consolidated financial statements included elsewhere in this prospectus and reflects all necessary adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of this data. The results of historical periods are not necessarily indicative of the results to be expected for a full year or any future period. The following quarterly financial data should be read in conjunction with our audited consolidated financial statements and related notes included elsewhere in this prospectus.

We have experienced rapid growth in our business in recent periods and as a result, our revenues, margins and operating expenses have fluctuated for a variety of reasons. We expect quarterly fluctuations in our operating results to continue for the foreseeable future.

Our total revenues increased consecutively for all periods presented primarily due to increased SaaS subscription services from new clients and expansion within existing clients. Our gross margins have improved over the quarters presented as we benefited from growth in SaaS subscription services and the related higher gross margins.

Total operating expenses generally increased for all periods presented due primarily to increases in headcount and other related personnel costs, including stock-based compensation expenses, to support our growth quarter-over-quarter. During the third quarter of 2019, operating expenses declined quarter-over-quarter as a result of our client conference which is held annually in the second quarter. In the second quarter of 2020, we experienced lower operating expenses as a result of hosting our client conference virtually and experiencing lower employee-related costs from the work-from-home business environment during the COVID-19 pandemic. We plan to continue our investment in operating expenses as we continue to execute our growth strategy, expand our digital banking platform and incur additional infrastructure costs to support our growth as well as public company-related costs.

Reconciliation of GAAP to Non-GAAP Measures

The following table presents our reconciliation of GAAP net loss to adjusted EBITDA for the periods indicated. For additional information regarding adjusted EBITDA, see “—Key Business Metrics.”

(in thousands)	Three Months Ended							
	March 31, 2019	June 30, 2019	September 30, 2019	December 31, 2019	March 31, 2020	June 30, 2020	September 30, 2020	December 31, 2020
Net loss	\$ (11,501)	\$ (11,679)	\$ (9,051)	\$ (9,638)	\$ (10,255)	\$ (7,267)	\$ (21,050)	\$
Provision for income taxes	—	—	—	—	—	—	—	—
Gain on financial instruments	—	(311)	(197)	(1)	1	66	14,446	—
Interest income, net	(44)	(49)	(24)	(40)	75	90	14	—
Amortization of intangible assets	—	—	—	—	—	—	—	—

	Year Ended December 31,		Nine Months Ended September 30,
	2019	2020	2020
Gross margin	41.4%		50.6%
Non-GAAP gross margin	51.6%		59.7%

Liquidity and Capital Resources

As of December 31, 2020, we had \$ million in cash and cash equivalents, and an accumulated deficit of \$. Our net losses have been driven by our investments in developing our digital banking platform, expanding our sales, marketing and implementation organizations and scaling our administrative functions to support our rapid growth.

We have financed our operations primarily through the net proceeds we have received from the sales of our redeemable convertible preferred stock and common stock, cash generated from the sale of SaaS subscription services and borrowings under our Credit Agreement. Through December 31, 2020, we have raised \$ million in capital from redeemable convertible preferred and common stock issuances.

Our future capital requirements will depend on many factors, including revenue growth and costs incurred to support client usage and growth in our client base, increased research and development expenses to support the growth of our business and related infrastructure, increased general and administrative expenses to support publicly-traded company requirements, investments in office facilities and other capital expenditure requirements and any potential future acquisitions or other strategic transactions.

We believe that our existing cash resources (not including the net proceeds from this offering), will be sufficient to finance our continued operations, growth strategy, planned capital expenditures and the additional expenses we expect to incur as a public company for at least the next 12 months. We may from time to time seek to raise additional capital to support our growth. Any equity financing we may undertake could be dilutive to our existing stockholders, and any additional debt financing we may

[Table of Contents](#)

undertake could require debt service and financial and operational requirements that could adversely affect our business. There is no assurance we would be able to obtain future financing on acceptable terms or at all.

Cash Flows

The following table summarizes our cash flows for the periods indicated:

(in thousands)	Year Ended December 31,	
	2019	2020
Net cash (used in) provided by operating activities	\$(39,085)	\$
Net cash (used in) provided by investing activities	(3,689)	
Net cash (used in) provided by financing activities	30,194	

Cash Used in Operating Activities

During the year ended December 31, 2020, cash used in operating activities was \$ million, which consisted of a net loss of \$ million, adjusted by non-cash charges of \$ million and net cash outflows from the change in net operating assets and liabilities of \$ million. The non-cash charges were primarily comprised of non-operating loss related to the increase in fair value of warrant and tranche right liabilities of \$ million, depreciation expense of \$ million and stock compensation expense of \$ million. The net cash outflows from the change in our net operating assets and liabilities was primarily due to \$ million increase in deferred implementation costs and a \$ million increase in accounts receivable, offset by net \$ million in other balance sheet changes.

During the year ended December 31, 2019, cash used in operating activities was \$39.1 million, which consisted of a net loss of \$41.9 million, adjusted by non-cash charges of \$3.5 million and net cash outflows from the change in net operating assets and liabilities of \$0.4 million. Non-cash charges were primarily comprised of depreciation expense of \$2.2 million and stock-based compensation expense of \$1.3 million.

Cash Used in Investing Activities

During the year ended December 31, 2020, cash used in investing activities was \$ million, primarily consisting of capital expenditures related to the expansion of our corporate facilities of \$ million and computer equipment of \$ million.

During the year ended December 31, 2019, cash used in investing activities was \$3.7 million, primarily consisting of capital expenditures related to the expansion and updates to our corporate facilities of \$3.0 million and computer and other equipment of \$0.7 million.

Cash Provided by Financing Activities

For the year ended December 31, 2020, net cash provided by financing activities was \$ million, which was primarily due to the issuance of redeemable convertible preferred stock in an amount of \$ million. We also borrowed \$ million through our term loan under our Credit Agreement. Cash flows provided from investing activities were offset by the repurchase of \$ million of our common stock and costs associated with our redeemable convertible preferred equity and debt financing activities in the amount of \$ million.

During the year ended December 31, 2019, cash provided by financing activities was \$30.2 million, primarily consisting of net proceeds of \$30.0 million from the issuance of redeemable convertible preferred stock.

Credit Agreement

On October 16, 2020, we entered into our Credit Agreement with Silicon Valley Bank and KeyBank National Association. The Credit Agreement replaced our prior credit facility provided by Comerica Bank. The Credit Agreement matures on October 16, 2023, and is secured by a first priority lien on substantially all of our tangible and intangible personal property and the tangible and intangible personal property of our subsidiaries that are guarantors. In addition, the Credit Agreement includes the following:

- **Revolving Facility:** The Credit Agreement provides \$25.0 million in aggregate commitments for secured revolving loans, with sub-limits of \$10.0 million for the issuance of letters of credit and \$7.5 million for swingline loans ("Revolving Facility").
- **Term Loan:** A term loan of \$25.0 million ("Term Loan") was borrowed on October 16, 2020. The proceeds of the Term Loan were used to partially fund the acquisition of ACH Alert.
- **Accordion Feature:** The Credit Agreement also allows us, subject to certain conditions, to request additional revolving loan commitments in an aggregate principal amount of up to \$30.0 million.

Revolving Facility loans under the Credit Agreement may be voluntarily prepaid and re-borrowed. Principal payments on the Term Loan are due in quarterly installments equal to an initial amount of approximately \$0.3 million, which begin December 31, 2021 and continue through September 30, 2022 and increase to approximately \$0.6 million beginning on December 31, 2022 through the Credit Agreement maturity date. Once repaid or prepaid, the Term Loan may not be re-borrowed.

Borrowings under the Credit Agreement bear interest at a variable rate based upon, at our option, either the LIBOR rate or the base rate (in each case, as customarily defined) plus an applicable margin. The applicable margin for LIBOR rate loans ranges, based on an applicable recurring revenue leverage ratio, from 3.00% to 3.50% per annum, and the applicable margin for base rate loans ranges from 2.00 to 2.50% per annum. We are required to pay a commitment fee of 0.30% per annum on the undrawn portion available under the Revolving Facility, and variable fees on outstanding letters of credit.

All outstanding principal and accrued but unpaid interest is due, and the commitments for the Revolving Facility terminate, on the maturity date. The loans are subject to mandatory prepayment requirements in the event of certain asset sales or if certain insurance or condemnation events occur, subject to customary reinvestment provisions. We may prepay the Term Loan in whole or in part at any time without premium or penalty.

The Credit Agreement contains customary affirmative and negative covenants, as well as (i) an annual recurring revenue growth covenant requiring the loan parties to have recurring revenues in any four consecutive fiscal quarter period in an amount that is 10% greater than the recurring revenues for the corresponding four consecutive quarter period in the previous year and (ii) a liquidity (defined as the aggregate amount of cash in bank accounts subject to a control agreement plus availability under the revolving credit facility) covenant, requiring the loan parties to have liquidity, tested on the last day of each calendar month, of \$10.0 million or more. The Credit Agreement also contains customary events of default, which if they occur, could result in the termination of commitments under the Credit Agreement, the declaration that all outstanding loans are immediately due and payable in whole or in part, and the requirement to maintain cash collateral deposits in respect of outstanding letters of credit.

[Table of Contents](#)

Total interest expense, including commitment fees and unused line fees, for the years ended December 31, 2020 and 2019 was \$ and \$0.1 million. In conjunction with closing the Credit Agreement in 2020, we incurred issuance costs of \$ million which were deferred and will be amortized over the three-year term. Unamortized debt issuance costs totaled \$ and less than \$0.1 million as of December 31, 2020 and 2019. Amortization expense totaled \$ and less than \$0.1 million for the years ended December 31, 2020 and 2019.

Off-Balance Sheet Arrangements

We did not have during the periods presented, and we do not currently have, any off-balance sheet financing arrangements or any relationships with unconsolidated entities or financial partnerships, including entities sometimes referred to as structured finance or special purpose entities, that were established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Contractual Obligations and Commitments

We lease office space under an operating leases for our corporate headquarters in Plano, Texas under a 10-year lease agreement under which we lease approximately 125,000 square feet of office space with an initial term that expires on August 31, 2028, with the option to extend the lease for either two additional terms of five years each or one additional term of ten years. Rent expense under operating leases was \$ and \$3.8 million for the years ended December 31, 2020 and 2019. We have contractual commitments related to third-party products, hosting services and other service costs. We are party to several purchase commitments for third-party services that contain both a contractual minimum obligation and a variable obligation based upon usage or other factors which can change on a monthly basis. The estimated amounts for usage and other factors are not included within the table below.

The following table summarizes our contractual obligations as of December 31, 2020:

(in thousands)	Payments due by period				Total
	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	
Operating lease obligations	\$	\$	\$	\$	\$
Purchase commitments					
Long-term debt, including current maturities					
Interest on long-term debt					
Total	\$	\$	\$	\$	\$

Legal Proceedings

We have in the past and may in the future become party to various legal proceedings during the ordinary course of business. Defending such proceedings is costly and can impose a significant burden on management and employees, we may receive unfavorable preliminary or interim rulings in the course of litigation, and there can be no assurances that favorable final outcomes will be obtained. In addition, our industry is characterized by the existence of a large number of patents, copyrights, trademarks, trade secrets and other intellectual property and proprietary rights. Companies in our industry are often required to defend against litigation and other claims based on allegations of infringement, misappropriation or other violations of intellectual property or other proprietary rights.

Furthermore, our client agreements typically require us to indemnify our clients against liabilities incurred in connection with claims alleging that our solutions infringe the intellectual property rights of third parties. From time to time, we have been involved in disputes related to patent and other intellectual property rights of third parties, none of which have resulted in material liabilities. We expect these types of disputes may continue to arise in the future.

Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risks in the ordinary course of our business. Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our market risk exposure is primarily the result of fluctuations in interest rates.

Interest Rate Risk

We are subject to interest rate risk in connection with our Credit Agreement. Interest rate changes generally impact the amount of our interest payments and, therefore, our future net income and cash flows, assuming other factors held constant. Assuming the amounts outstanding under our Credit Agreement are fully drawn, a hypothetical 10% change in interest rates would not have a material impact on our consolidated financial statements.

Critical Accounting Policies and Estimates

We believe that the following accounting policies involve a high degree of judgment and complexity. Accordingly, these are the policies we believe are the most critical to aid in fully understanding and evaluating our consolidated financial condition and results of our operations. See Note 2 to our consolidated financial statements appearing elsewhere in this prospectus for a description of our other significant accounting policies. The preparation of our consolidated financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and judgments that affect the amounts reported in those consolidated financial statements and accompanying notes. Although we believe that the estimates we use are reasonable, due to the inherent uncertainty involved in making those estimates, actual results reported in future periods could differ from those estimates.

Revenue Recognition

We adopted FASB, Accounting Standards Codification ("ASC") Topic 606, Revenue from Contracts with Customers ("Topic 606"), effective for the annual reporting period ending December 31, 2019 using the full retrospective transition method of adoption. As such, the consolidated financial statements present revenues in accordance with Topic 606 for the period presented.

We derive the majority of our revenues from SaaS subscription services charged for the use of our digital banking solutions. SaaS subscription services are generally recognized as revenues over the term of the contract as a series of distinct SaaS services bundled into a single performance obligation. Clients are typically charged a one-time, upfront implementation fee and recurring annual and monthly access fees for the use of our digital banking solution. Implementation and integration of the digital banking platform is complex, and we have determined that the one-time, upfront services do not transfer a promised service to the client. As these services are not distinct, they are bundled into the SaaS series of services and the associated fees are recognized on a straight-line basis over the subscription term.

Our performance obligation for the SaaS series of services includes standing ready over the term of the contract to provide access to all the clients' customers and process any transactions initiated by

those customers. We invoice clients each month for the contracted minimum number of registered users with an additional amount for registered users in excess of those minimums. We recognize variable consideration related to registered user counts in excess of the contractual minimum amounts each month. SaaS subscription revenues also includes annual and monthly charges for maintenance and support services which are recognized on a straight-line basis over the subscription term.

During the term of the contract, clients may purchase additional professional services to modify or enhance their licensed SaaS solutions. These services are distinct performance obligations recognized when control of the enhancement is transferred to the client.

Stock-based Compensation

Stock options are accounted for using the grant date fair value method. Under this method, stock-based compensation expense is measured by the estimated fair value of the granted stock options at the date of grant using the Black-Scholes option pricing model and recognized over the vesting period with a corresponding increase to additional paid-in capital.

Determining the fair value of stock-based awards at the grant date requires significant judgement. The determination of the grant date fair value of stock-based awards using the Black-Scholes option-pricing model is affected by our estimated common stock fair value as well as other subjective assumptions including the volatility, risk-free interest rate, dividends, weighted average expected life and estimated forfeiture rate. The assumptions used in our option-pricing model represent management's best estimates. These assumptions and estimates are as follows:

Fair Value of Common Stock. Given the absence of an active market for our shares of common stock prior to our initial public offering, the fair value of the shares of common stock underlying our stock options was determined by our board of directors.

Our board of directors intends all options to be exercisable at the fair value of our shares of common stock on the grant date. Such estimates will not be necessary once the underlying shares begin trading. The assumptions used in the valuation models were based on future expectations and management judgment. We used three methods to determine fair value of our common stock as follows:

- **Discounted Cash Flow Method:** the value of the business is estimated on the basis of forecasted cash flows, discounted to present value using an appropriate risk-adjusted discount rate.
- **Guideline Public Company Method:** the value of the business is estimated through the application of multiples observed for public companies engaged in businesses and/or industries that are considered comparable to us.
- **Recent Transactions Method:** the value of the business is estimated through the application of multiples observed for M&A transactions involving target companies engaged in businesses and/or industries that are considered comparable to us.

Under a hybrid method, the per share values calculated under each exit scenario are probability-weighted to determine the fair value of our shares of common stock.

Volatility. As we do not have trading history for our common stock, the selected volatility used is representative of expected future volatility. We base expected future volatility on the historical and implied volatility of comparable publicly traded companies over a similar expected term.

Risk-Free Interest Rate. We base the risk-free interest rate on the rate for a U.S. Treasury zero-coupon issue with a term that closely approximates the expected life of the option grant at the date nearest the option grant date.

Dividends. We have never declared or paid any cash dividends. In connection with the completion of this offering, we plan to pay an aggregate of \$ million in accumulated dividends payable to holders of our Series B redeemable convertible preferred stock. Following payment of these accumulated dividends to holders of our Series B redeemable convertible preferred stock, we do not presently intend to pay cash dividends on our capital stock in the foreseeable future. In addition, our Credit Agreement contains a restrictive covenant that restricts our ability to pay dividends or distributions or redeem or repurchase capital stock. As a result, we used a dividends assumption of zero.

Weighted Average Expected Life in Years. The expected term of employee stock options reflects the period for which we believe the option will remain outstanding. To determine the expected term, we generally apply the simplified approach in which the expected term of an award is presumed to be the mid-point between the vesting date and the expiration date of the award.

Estimated Forfeiture Rate. Our forfeiture rate is based on an analysis of our actual forfeitures. We will continue to evaluate the appropriateness of the forfeiture rate based on actual forfeiture experience, analysis of employee turnover and other factors. We have not made a change in our forfeiture rate in recent years; however, changes in the estimated forfeiture rate can have a significant impact on our stock-based compensation expense as the cumulative effect of adjusting the rate is recognized in the period the forfeiture rate is revised. If a revised forfeiture rate is higher than the previously estimated forfeiture rate, an adjustment is made that will result in a decrease to the stock-based compensation expense recognized in the consolidated financial statements. If a revised forfeiture rate is lower than the previously estimated forfeiture rate, an adjustment is made that will result in an increase to the stock-based compensation expense recognized in the consolidated financial statements.

The Black-Scholes option-pricing model requires the input of highly subjective assumptions. We continue to assess the assumptions and methodologies used to calculate the established fair value of stock-based compensation. Circumstances may change and additional data may become available over time, which could result in changes to these assumptions and methodologies, which could materially impact the fair value determinations.

Deferred Costs to Obtain Client Contracts

We capitalize certain commissions as incremental costs of obtaining a client contracts if we anticipate that the costs will be recoverable under the contract. Costs include commissions including benefits and stock-based compensation earned by sales teams and leaders due to the execution of client contracts along with associated employer taxes. Capitalized amounts do not include commissions which are contingent on continued employment over a substantive service period. Contingent commissions are accrued as liabilities and expensed over the requisite employment service period. Deferred commissions are amortized over the benefit period of the client relationship, typically between five and seven years. Determining the benefit period over which to amortize deferred commissions requires significant judgment. We determine the period of benefit by considering factors such as the length of the initial SaaS contract, the likelihood of renewal and the estimated useful life of the underlying technology.

Deferred Implementation Costs

We capitalize certain costs to fulfill client contracts such as employee salaries, benefits, and associated payroll taxes that are directly related to the implementation of our solutions and some third-party costs, such as third-party licenses and maintenance. We only capitalize implementation costs that we anticipate will be recoverable under the contract. We begin amortizing deferred implementation costs ratably over the expected period of client benefit once access to our SaaS solution is transferred

to the client. Deferred costs are amortized over the benefit period of the client relationship, typically between five and seven years. Determining the benefit period over which to amortize deferred costs requires significant judgment. We determine the period of benefit by considering factors such as the length of the initial SaaS contract, the likelihood of renewal and the estimated useful life of the underlying technology.

Business Combinations

Our acquisitions are accounted for using the acquisition method of business combinations accounting. We recognize the consideration transferred (i.e. purchase price) in a business combination as well as the acquired business' identifiable assets, liabilities, and non-controlling interests at their acquisition date fair value. The excess of the consideration transferred over the fair value of the identifiable assets, liabilities, and non-controlling interest, is recorded as goodwill in our consolidated financial statements. Several valuation methods may be used to determine the fair value of assets acquired and liabilities assumed. We use our best estimates and assumptions to assign fair value to the tangible and intangible assets acquired and liabilities assumed at the acquisition date. Our estimates are inherently uncertain and subject to refinement. Determining the useful life of an intangible asset also requires judgment as different types of intangible assets will have different useful lives and certain assets may even be considered to have indefinite useful lives. During the measurement period, which may be up to one year from the acquisition date, we may record adjustments to the fair value of these tangible and intangible assets acquired and liabilities assumed, with the corresponding offset to goodwill. In addition, uncertain tax positions and tax-related valuation allowances are initially recorded in connection with a business combination as of the acquisition date. We continue to collect information and reevaluate these estimates and assumptions quarterly and record any adjustments to our preliminary estimates to goodwill provided that we are within the measurement period. Upon the conclusion of the measurement period or final determination of the fair value of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to our consolidated statements of operations.

For acquisitions involving additional consideration to be transferred to the selling parties in the event certain future events occur or conditions are met ("contingent consideration"), we recognize the acquisition-date fair value of contingent consideration as part of the consideration transferred in exchange for the business combination. Contingent consideration meeting the criteria to be classified as equity in the consolidated balance sheets is not remeasured, and its subsequent settlement is recorded within stockholders' equity (deficit). Contingent consideration classified as a liability is remeasured to fair value at each reporting date until the contingency is resolved, with any changes in fair value recognized in our consolidated statements of operations.

Recent Accounting Pronouncements

See Note 2 to our consolidated financial statements included elsewhere in this prospectus for recently adopted accounting pronouncements and recently issued accounting pronouncements not yet adopted as of the date of this prospectus.

Emerging Growth Company Status

We are an "emerging growth company," as defined in the JOBS Act. Under the JOBS Act, emerging growth companies can delay adopting new or revised accounting standards issued subsequent to the enactment of the JOBS Act until such time as those standards apply to private companies. We have elected to use this extended transition period to enable us to comply with new or revised accounting standards that have different effective dates for public and private companies until

the earlier of the date we (1) are no longer an emerging growth company or (2) affirmatively and irrevocably opt out of the extended transition period provided in the JOBS Act. As a result, our consolidated financial statements may not be comparable to companies that comply with new or revised accounting pronouncements as of public company effective dates.

BUSINESS

Mission

Our mission is to empower financial institutions to grow confidently, adapt quickly and build thriving digital communities.

Overview

Alkami is a cloud-based digital banking platform. We inspire and empower community, regional and super-regional FIs to compete with large, technologically advanced and well-resourced banks in the United States. Our solution, the Alkami Platform, allows FIs to onboard and engage new registered users, accelerate revenues and meaningfully improve operational efficiency, all with the support of a proprietary, true cloud-based, multi-tenant architecture. We cultivate deep relationships with our clients through long-term, subscription-based contractual arrangements, aligning our growth with our clients' success and generating an attractive unit economic model.

In the early 2000s digital engagement began revolutionizing industries overnight, forcing firms to invest and innovate or risk losing long-term relationships to well-resourced competitors. Within banking, many FIs were ill-equipped to compete with larger competitors, including megabanks, primarily due to resource constraints and the resulting inability to keep pace, technologically, with evolving consumer preferences for digital engagement. This led to the first digital banking platforms.

The earliest versions of digital banking platforms, however, were focused on basic self-service functions that could be accomplished with a desktop computer via a single integration to the primary system of record. As the form factor of digital engagement evolved to include both desktop and mobile, FIs generally adopted disparate digital banking solutions as a matter of necessity. This served to only magnify the compounding and seemingly inescapable problem of layered and poorly integrated infrastructures, and today, many FIs continue to use disparate technology solutions for desktop, mobile, retail and business banking functions. On average, FIs require integration to more than 20 systems to enable customer self-service, according to management estimates. As consumer preferences quickly evolve, many FIs have found that their existing infrastructure lacks the uniformity and the agility to adapt to an increasingly digital and mobile world. Our technology provides a value proposition that solves this problem.

We founded Alkami to help level the playing field for FIs. Our vision was to create a platform that combined premium technology and fintech solutions in one integrated ecosystem, delivered as a SaaS solution and providing our clients' customers with a single point of access to all things digital. We invested significant resources to build a technology stack that prioritized innovation velocity and speed-to-market given the importance of product depth and functionality in winning and retaining clients. The result of these investments is a premium platform that has enabled us to replace older, larger and better-funded incumbents in many of the FIs served (as of year-end 2020) by the Alkami Platform. Today, our clients can offer world-class experiences reflecting their individual digital strategies, reaching over of our clients' customers, with an additional of our clients' customers under implementation as of year-end 2020.

Our domain expertise in retail and business banking has enabled us to develop a suite of products tailored to address key challenges faced by FIs. The key differentiators of the Alkami Platform include:

- **User experience:** Personalized and seamless digital experience across user interaction points, including mobile, chat and SMS, establishing durable connections between FIs and their customers.

[Table of Contents](#)

- **Integrations:** Scalability and extensibility driven by more than real-time integrations to back office systems and third-party fintech solutions as of year-end 2020, including core systems, payment cards, mortgages, bill pay, electronic documents, money movement, personal financial management and account opening.
- **Deep data capabilities:** Data synchronized and stored from back office systems and third-party fintech solutions and synthesized into meaningful insights, targeted content and other areas of monetization.

Our fully integrated, AWS-based true cloud technology infrastructure delivers stability, extensibility and security and ultimately drives the pace at which we bring innovation to market. With a single code base, built on a multi-tenant infrastructure and combined with continuous software delivery, we are able to innovate and iterate quickly to roll out new products in a fraction of the time compared to many of the hosted, single-tenant infrastructures historically prevalent throughout the digital banking vendor space. The extensibility we offer further allows our clients to develop on top of our technology, providing our clients the freedom to modify the Alkami Platform to meet their strategic objectives.

The Alkami Platform offers an end-to-end set of software products. Our typical relationship with an FI begins with a set of core functional components, which can extend over time to include a rounded suite of products across account opening, card experience, financial wellness, fraud protection and marketing. Due to our architecture, adding products through our single code base is fast, simple and cost-effective, and we expect product penetration to continue to increase as we broaden our product suite. As of December 31, 2020, our clients used of our offered products, on average.

Our broad partner ecosystem is fundamental to our platform. We deeply integrate with each of the major core system vendors as well as best-of-breed third-party solution providers who contribute key products and functionality to our platform. These partnerships enable our clients to have a single point of integration to a customized suite of technology systems through the Alkami Platform. For these technology partners, the extensibility of our platform enables them to expand their product offerings and enhance their distribution, attracting even more partners to the platform as we grow.

Our target clients vary in size, generally ranging from approximately \$500 million to \$100 billion in assets and from approximately 10,000 customers to 2 million customers. This vast group of FIs, of which were Alkami clients as of year-end 2020, had \$ in assets on their balance sheets as of year-end 2020. This reflects the strength and importance of these FIs to the economy and to the durability of the community and regional FI model more broadly. However, this group generally does not have the internal resources or capabilities to fully build and customize their own technology platforms to keep pace with the megabanks, challenger banks and other technology-enabled competitors. In a world where nearly two-thirds of U.S. consumers have expressed a willingness to utilize a financial product from a trusted technology brand, we allow our clients to keep pace with the level of digital experience and customer engagement that consumers have come to expect.

We go to market through an internal sales force. Given the long-term nature of our contracts, a typical sales cycle can range from approximately three to 12 months, with the subsequent implementation timeframe generally ranging from six to 12 months depending on the depth of integration. Over the last several years, we believe Alkami has outperformed the market in winning clients among FIs that emphasize retail banking, helping us to become one of the fastest-growing digital banking platforms in the United States.

As we have extended our capabilities, our value proposition has strengthened. Our new client contracts reflect deeper relationships, with the 2020 client cohort averaging products across

minimum registered users, a % and % improvement from the 2018 cohort. As of September 30, 2020, December 31, 2019 and December 31, 2018, we had 147, 118 and 88 live clients. As of September 30, 2020, December 31, 2019 and December 31, 2018, we had 30, 25 and 18 clients that each represented over \$1.0 million in ARR. Our existing client relationships have continued to deepen as a result of a dedicated cross-sell team that has executed new add-on sales as of year-end 2020, representing over \$ million in TCV, since the team's formation in July 2019. Finally, our clients view us as a long-term strategic partner providing mission critical technology, as demonstrated by our strong client retention. Since inception, we have extended all but three clients who have come up for renewal, and across 2019 and 2020 we achieved an aggregate % ARR uplift across renewals.

Finally, we view our founder-led culture as a differentiating competitive advantage. Each of our employees, or Alkamists, participates in our equity compensation plan, which helps to ensure they are individually aligned with our success. More importantly, we believe that we have fostered a culture that encourages both entrepreneurship and teamwork. The contributions of our employees are openly valued, leading to what we believe is a rewarding experience which is ultimately driving company performance and employee retention. Thirty-five percent of our new hires in 2019 were from Alkamist referrals.

We derive our revenues almost entirely from multi-year contracts that had an average contract life since inception of 69 months as of September 30, 2020. In 2020, our new multi-year contracts had an average term of months. We predominantly employ a per-registered-user pricing model, with incremental fees above certain contractual client minimum commitments for each licensed solution. Our pricing is tiered, with per-registered-user discounts applied as clients achieve higher levels of customer penetration, in turn incentivizing our clients to internally market our solutions and promote digital engagement. Our ability to grow revenues through deeper client customer penetration and cross-sell allowed us to deliver a net dollar revenue retention rate of 115% as of September 30, 2020.

We have grown quickly since shifting our focus exclusively to digital banking in 2009. We served million and 7.2 million registered users during 2020 and 2019, representing a % growth rate for one of our key revenue drivers. Our total revenues Our total revenues were \$ million, \$74 million and \$48 million for 2020, 2019 and 2018, representing growth rates of % from 2019 to 2020 and 52.6% from 2018 to 2019. Our total revenues were \$78.8 million and \$51.9 million for the nine months ended September 30, 2020 and September 30, 2019, representing a growth rate of 51.9%. SaaS subscription revenues, as further described below, represented %, 91.5% and 90.8% of total revenues for 2020, 2019 and 2018. We incurred net losses of \$ million, \$41.9 million and \$41.6 million for 2020, 2019 and 2018, largely on the basis of significant continued investment in sales, marketing, product development and post-sales client activities. See "Management's Discussion and Analysis of Financial Condition and Results of Operations" for more information.

Our Industry

The United States banking industry is massive, with \$25 trillion in assets on the balance sheets of over 10,000 FIs (as of December 31, 2019). These FIs range from megabanks to significantly smaller local community banks and affinity credit unions. The United States banking industry generated over \$1.1 trillion in revenues in 2019, highlighting a significant market opportunity that drives intense competition and a magnitude of economic importance which requires considerable regulation, both locally and nationally.

However, banking is not a static industry, and over the last several decades technology has emerged as a differentiating factor among FIs, driving market share gains, operational efficiencies and improved regulatory compliance. While technology is involved in almost every function a bank performs, we typically see FIs' technology spend increase in response to, or in preparation for, the following trends:

- **Heightened user expectations:** The digitization of everything from taxis, to food delivery, to commerce has conditioned consumers and businesses to maintain heightened user experience

expectations that extend to financial services, particularly when it relates to everyday financial services such as banking services. Previously inconceivable, account opening, loan origination (and disbursement) and money transfer can now be executed within a matter of minutes, elevating digital user experience beyond branch location as the premier point of differentiation for our clients' customers' service and satisfaction.

- **Increasingly digital competitive landscape:** The competitive landscape within banking in the United States and globally is shifting. On one hand, approximately 51% of all new bank accounts opened in the second quarter of 2020 were with megabanks, due at least in part to their massive technology and marketing budgets. On the other hand, a fragmented and emerging group of technology platforms and challenger banks are redefining what it means to be a bank, embedding basic banking services, such as checking accounts, within elegant user experiences and attracting tens of millions of registered users, all without a single physical branch. Each market trend is accelerating with the disappearance of geographical boundaries. As banking digitizes, the importance of a physical footprint and local presence is reduced, introducing regional and national competition to even the most insulated local markets.
- **Regulatory environment:** Banking regulation is continuously evolving and it is the responsibility of FIs to create an internal control environment capable of ensuring compliance with a framework of local, national and international rules. Emerging technologies are increasingly built to perform routinized tasks associated with this function, freeing up resources to be reinvested in growth.
- **Importance of efficiency:** The current low interest rate environment, which began as a monetary stimulus measure during the 2008–2009 global financial crisis and continues today, has put immense pressure on FI earnings, notably interest income spreads that FIs earn between taking deposits and providing loans. This is forcing FIs to seek additional revenue streams, often in the form of fee income from payments processing and other non-credit products. This is also forcing FIs to seek opportunities to streamline operations, in many cases automating historically manual and labor-intensive tasks with the benefit of process improvement at a markedly lower cost.

The heightened focus on technology and security in addressing the evolution of the banking industry has driven massive spend. The four largest banks in the United States spent a combined \$24 billion on technology in 2019, representing a 25% increase in total technology spend from 2016. While technology spend in banking is distributed across functions, we believe the following technology trends to be most impactful to the industry:

- **Shift to mobile:** Mobile is quickly redefining both retail and business banking. There were over 350 million digital bank user accounts in the United States as of September 30, 2020, and according to an industry source, 70% of consumers use a mobile device on a monthly basis to manage their bank account. Today, a consumer or business can open a bank account almost instantly and take out a loan or transfer money from a mobile device. These rapid advances are contributing to a substantial decline in bank physical branch traffic, a trend that meaningfully accelerated in 2020 as foot traffic remained down across all retail segments even after initial COVID-19-related shelter-in-place restrictions were eased, decreasing nearly 25% year-over-year for the week ended November 29, 2020, according to a retail analytics firm.
- **Shift to the cloud:** Today, many of the pillars serving as key differentiators across industries, including banking, stem from the benefits of cloud hosting and computing. Cloud-based, multi-tenant infrastructures that are securely delivered enable technology providers to broadly distribute capabilities historically reserved only for the best resourced. Premier technology architectures can also leverage data that can be collected into a warehouse and quickly synthesized for consumption by clients in the service of their customers. Finally, single-, low- and no-code architectures allow near same-day adaptability to evolving consumer needs or

economic challenges. The COVID-19 pandemic provided a remarkable case study in the value of these advantages, as massive market share shifts are accruing to the benefit of innovative, cloud-based platforms across a variety of industries.

- **Proliferation of powerful, best-of-breed technology solutions:** Advances and investment in financial technology have led to a disaggregated network of point solutions designed to improve upon discrete tasks historically executed through a single vendor, enabling FIs to select the products that best fit their objectives, scale and budget. This proliferation of powerful technology solutions has served to reduce barriers to entry for providers of point solutions, encouraging innovation and underscoring the value of integration layers.
- **Increasing complexity of banking information technology architectures:** Due to the proliferation of technology solutions, the information technology taxonomy of FIs is becoming increasingly complex. Integration challenges of the past required connections to a small number of back office systems and point solutions. Today, connections are required to dozens of third parties and many core and back office systems. This complexity is magnified with many of the point solutions and core systems operating as single tenant models. Integrating user experiences across desktop, mobile and SMS platforms with proliferating point solutions and a myriad of core and back office systems is overly burdensome to most FIs. Consequently, the industry highly values platforms that mitigate much of this complexity with modern architectures that enable real-time integrations to all constituents of the digital banking ecosystem.
- **Focus on security:** The increasingly interconnected and digital nature of finance renders FIs particularly vulnerable to cybersecurity attacks given the attractive nature of FIs as protectors of both capital and personal information. The modern bank robber is armed with no more than a computer and can attack from anywhere in the world, and consequently, FIs are constantly under threat. For this reason, FIs are making substantial technology investments in cybersecurity and security more broadly.

FIs take varying approaches to technological evolution, partially driven by philosophy, but predominantly driven by resources that are available to them. The largest FIs have the financial flexibility to make significant investments; the four largest banks in the United States spent a combined \$24 billion on technology in 2019, representing a 25% increase in total technology spend from 2016 and reflecting the commitment to protect and extend leadership through technology.

The vast majority of remaining FIs do not have the financial resources to match the technology advantage of megabanks. However, these FIs also have no choice but to keep up with the general pace of innovation given the alternative of losing market share to these large competitors, reinforcing the critical nature of third-party digital platforms in helping them overcome the limitations of finite discretionary budgets and resources. This is the essence of our value proposition and market opportunity.

Our Market Opportunity

Our market opportunity was born from the natural and sequential evolution of the technology underlying the banking system. Core banking systems, built to process daily banking transactions and maintain a financial record, increased in functionality through a proliferation of user interaction points, features, functions and associated back-office systems, creating massive integration requirements. This, in turn, created the need for a single platform to manage the back-end technical requirements of integration while concurrently creating a unified front-end-user experience. Finally, the data accumulating on disparate technology systems required aggregation. This fragmentation and increasing complexity created the market opportunity for unified, cloud-based digital banking platforms such as ours.

We have prioritized product depth since inception. We realized early on that we would never be able to replace an incumbent vendor without a superior product set. We therefore invested in a technology stack featuring multi-tenant architecture, a single code base and continuous delivery, facilitating speed-to-market and enabling us to rapidly innovate while consistently maintaining a set of integrations that underlies a broad set of configuration options today. This configurability represents a product depth which, when combined with an elegant user experience, underscores our competitive strengths.

We estimate that in 2015, we had an approximately \$3 billion addressable market, based on FI Navigator estimates of 110 million registered users as of September 2015. Today, we estimate that we have expanded our core addressable market opportunity to approximately \$6 billion, based on FI Navigator estimates of roughly 185 million registered users as of September 2020 and the revenue opportunities of the expanded features currently offered by the Alkami Platform and product set. We believe our core addressable market continues to have meaningful organic expansion potential, with digital banking penetration converging towards nearly 100% over time from an assumed 70% today, a trend towards client customers generally maintaining an account with more than one FI and growing revenue-per-registered-user opportunities as we continue to introduce new products. We further estimate the additional addressable market opportunity that we accessed through our recent acquisition of ACH Alert to be approximately \$750 million, resulting in an estimated total addressable market of approximately \$7 billion. We expect that our total addressable market will continue to grow organically and inorganically as we pursue adjacent product opportunities, such as fraud prevention which we accessed through our acquisition of ACH Alert, or longer term opportunities around account opening, security, data analytics, money movement and financial wellness, among others.

Our Platform and Ecosystem

The Alkami Platform is a multi-tenant, single code base, continuous delivery platform powered by a true cloud infrastructure. Our platform integrates with core system providers and other third-party fintech providers, and acts as the primary interaction point among consumers, businesses and FIs. The primary benefit of this model is to reduce the inefficiencies of traditional point-to-point integration strategies, instead offering a single point of integration allowing our clients' customers to navigate seamlessly across channels. We believe this is critical to FIs as their models shift from physical to digital, enabling the creation of a digital community in the image of their broader brands and aligned with their strategic objectives.

The Alkami Platform maintains over integrations to more than endpoints, as of year-end 2020. Our third-party partnerships and integrations are a crucial element of the Alkami Platform, enabling FIs to choose from, and connect with, a broad array of third-party service providers essential to the curation of a customized digital experience. This depth of product configurability and optionality is made possible by the software adapters we have built to standardize access to solutions offered by third-party vendors.

The Alkami Value Proposition

We have grown rapidly since 2009 by understanding our clients' objectives and pain points, including adding as of September 30, 2020 nearly 3.4 million registered users since year-end 2018. We have designed our solutions to improve our clients' ability to achieve their core objectives, including new client growth, customer engagement, increasing and holding deposits, making loans, facilitating money movement and lowering overall operating costs. Importantly, we make our clients more competitive against the megabanks, challenger banks and other technology-enabled competitors.

The technology that powers our platform is foundational to our success and ability to deliver a distinct value proposition to our clients, characterized by the following:

- **Premier user experience:** The Alkami Platform enables our clients to leverage technology to deliver a premier user experience. The experience we build, and that our clients deliver, is validated by our clients' market-leading app ratings, which are, on average, higher than each of our main competitors and reflect the level of customer satisfaction associated with leading technology brands.
- **Versatile platform:** Our product breadth, depth of integrations, partner network and configurability enable our clients to more precisely match our products to suit the objectives of their digital offering. For our clients, this allows a degree of flexibility that is critical to their pursuit of differentiation without the technical burden and higher cost of custom software. For our business, this approach is tremendously scalable, enabling us to serve large and smaller institutions alike from a single platform, with a full product suite across both retail and business banking operations.
- **Velocity of innovation:** Our ability to win and retain clients is a function of consistently striving to offer a platform with products and configurations that exceeds those of our competition. Our multi-tenant architecture, combined with continuous delivery, allows us to implement new and existing features in lockstep with our clients' evolving needs. This can be done with as little as a week's notice, as was demonstrated during COVID-19-related shelter-in-place restrictions, when we quickly implemented our skip-a-payment tool. Our technological infrastructure provides a speed-to-market advantage which often allows us to remain a step ahead of competitors who operate single-tenant or other legacy architecture.
- **Fraud mitigation:** Our clients seek to achieve a balance between convenience and safety that is required in a digital banking solution. Biometric and multi-factor authentication, combined with machine learning wrapped in a leading user experience, creates a more secure user experience. Platform security capabilities such as card management and true real-time alerts further help to mitigate fraud and develop a relationship of trust between our clients and their customers.

The Alkami Platform delivers tangible results to clients, including increased registered user growth, increased product usage, operational efficiencies and customer retention. Our clients grew their registered user bases at an annualized rate of 16% through the nine months ended September 30, 2020, roughly three times as fast as the 5% annualized growth rate achieved across the industry over the same period, according to data from FI Navigator.

Our Growth Strategies

We intend to continue to invest to grow our business and expand our addressable market by applying the following strategies:

- **Deepen existing client relationships:** We expect to continue to deepen our existing client relationships, increasing both the number of registered users and the number of products per client:
 - **Cross-sell:** We are constantly broadening our product set to address the needs of our client base. We offered nine products when we launched Alkami Business Banking in 2015, and as of September 30, 2020, 26 products were available through the Alkami Platform and our clients had purchased an average of nine products from us. We expect cross-sell to contribute meaningfully to our growth, particularly following the creation of a dedicated sales team focused on this effort in July 2019.
 - **Customer penetration:** While we recently surpassed 9.0 million registered users, we estimate this only represents 70% of our clients' total customers as of September 30, 2020. We

believe we have a substantial opportunity to grow our registered user base within our existing clients as we continuously enhance our value proposition and more consumers adopt digital banking solutions.

- **Win new clients:** We believe the market remains underserved by legacy solutions, which will allow Alkami to continue to gain market share. We are increasingly winning FIs with more sophisticated needs as we grow our market presence and product capabilities. As compared to the 2018 client cohort, our 2020 client cohort, on average, has more than twice as many registered users, has longer contract lengths and utilizes more products.
- **Broaden and enhance product suite:** We intend to invest to continue to enhance our product suite. In 2020 and 2019, we spent % and 44.5% of revenues on research and development, underlining our commitment to ongoing innovation. This includes maintaining a constant pulse on the evolving needs of our clients and designing products accordingly, both on a proprietary basis and in collaboration with our platform partner network.
- **Select acquisitions:** We intend to selectively pursue acquisitions and other strategic transactions that accelerate our strategic objectives. Our acquisition of ACH Alert, which was completed in the fourth quarter of 2020, exemplifies our acquisition strategy, bringing an additional fraud prevention tool to our product suite while also providing access to 95 new clients.

Our Solution

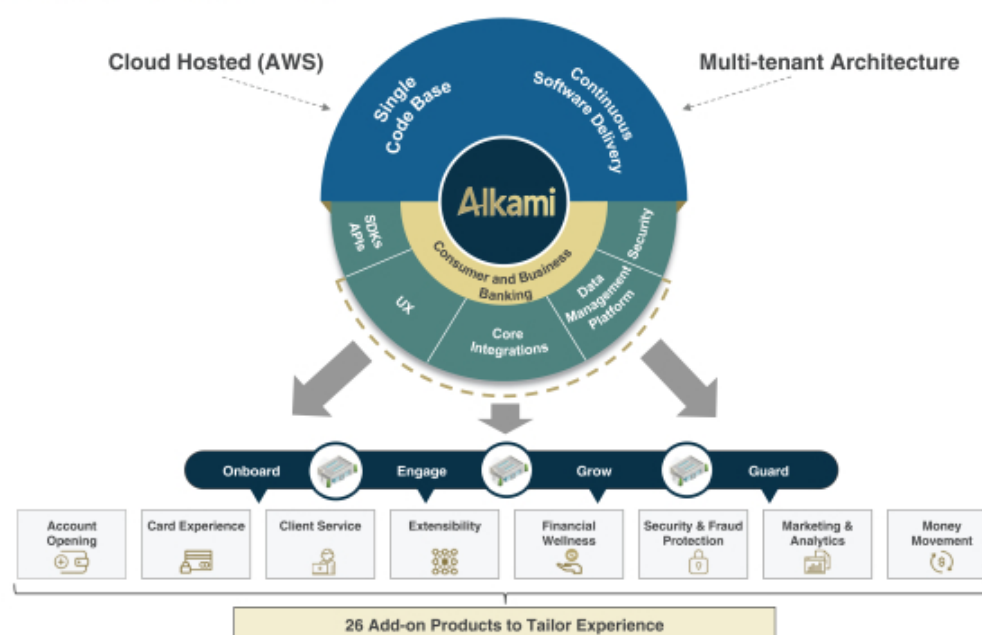

The Alkami Platform provides FIs with a complete digital banking solution designed to facilitate and meet the needs of both retail and business users. We deliver our platform through a purpose-built, true cloud SaaS solution, enabling our clients to avoid costly and disruptive system-wide maintenance windows as well as testing projects during upgrades, which is typical of single-tenant platform solutions that are currently prevalent in large parts of the industry.

Our clients choose the Alkami Platform to:

- **Onboard** new registered users efficiently
- **Engage** registered users with self-service functions, proactive alerting and financial insights
- **Grow** revenues and registered users through new product and service offerings
- **Guard** registered user data and interactions to mitigate fraud

The Alkami Platform

Complete Digital Banking Solution

We deliver this value proposition through the following eight product categories, encompassing 26 products as of September 30, 2020 and over integrations as of year-end 2020:

- **Account Opening:** Allows our clients' customers to create and manage deposit accounts, including checking, savings, debit/ATM cards and certain investment accounts. This offering enhances many of our clients' digital platforms and gives them the opportunity to digitize and replace many of the processes which formerly required a physical branch visit.
- **Card Experience:** Includes features that allow for cardholder alerts and control preferences as well as card account maintenance features for self-service.
- **Client Service:** Includes a suite of products digitizing and streamlining communications around largely administrative functions. Products range from basic SMS and push notification capabilities to digital authentication and chat and conversational tools, both digitally as well as by human interaction.
- **Extensibility:** Allows for platform extension without sacrificing continuous integration and delivery of the underlying Alkami Platform. This includes our SDK and application program interfaces ("APIs").
- **Financial Wellness:** Aggregates and synthesizes information that client customers need in order to make informed financial decisions. This includes basic account aggregation, credit score monitoring, transaction data enrichment and access to third-party financial management products. Users are able to make healthier financial decisions, while our FIs gain valuable insights, enabling them to drive targeted marketing and product origination.

- **Security & Fraud Protection:** Includes risk-based multi-factor authentication and suspicious transaction monitoring as well as multi-channel payment fraud prevention and information reporting tools. We recently enhanced this product category through our acquisition of ACH Alert in the fourth quarter of 2020.
- **Marketing & Analytics:** Enables our clients to build internal analytical tools and enables clients to deliver tailored, relevant and timely content via targeted marketing campaigns and educational outreaches to their customers.
- **Money Movement:** Includes fully integrated money movement tools to increase deposits and drive consistent user engagement. While most competitors currently provide third-party products via an intrusive, off-brand, sign-on screen, the Alkami Platform seamlessly integrates third-party services into a consistent digital banking experience that is portable across multiple user interfaces.

Our Technology and Architecture

Our platform is true cloud and entirely hosted and delivered on AWS. The benefits of this infrastructure include resiliency, reliability and increased security; we achieved an average of % uptime in the year ended December 31, 2020. True cloud infrastructure is also remarkably scalable, allowing us to pursue our growth objectives without technological limitation.

Our technology is predominantly differentiated by the speed-to-market with which we can deliver innovation on the back of a true cloud infrastructure with the combination of the following architectural pillars:

- **Multi-Tenant Architecture:** We built our platform from the ground up as multi-tenant. This enables our clients to share in economies of scale enjoyed by large FIs, optimizing for speed, efficiency, reliability and increased security. Importantly, this model also enables us to avoid a growth tax, or additional resource burdens arising from high growth upon a single-tenant platform. New clients can be efficiently on-boarded, new client customers can be seamlessly added and product upgrades and updates can be delivered quickly.
- **Single Code Base:** Our single code base is built upon a microservices architecture that leverages our multi-tenant model, compounding the efficiency of our infrastructure and software development lifecycle, regardless of the size, structure or complexity of the client. By maintaining a single code base, we are able to quickly and continuously deploy new code to our entire client base, supporting many platform releases per year. With a microservices architecture, we can support zero-downtime deployments, reduced testing complexity, automation and extensibility.
- **Continuous Delivery Model:** The combination of a multi-tenant architecture and single code base is made more powerful when combined with continuous software delivery, enabling us to update our entire client base at frequent intervals. This speed and execution enables our clients to confidently grow and compete with many of the most technologically advanced FIs in the world.

We synchronize, typically in real-time, the systems and modules into which we integrate while also accumulating a data warehouse that can be synthesized into actionable insights and business intelligence. FIs need access to accurate and complete data. These timely insights extend across administration, marketing and strategy, informing decision making for FIs and increasing user stickiness. For instance, our clients can identify users with a credit card or loan from another FI and

market targeted, competing products to these users. This granular level of insight allows Alkami clients to digitally and systematically drive growth through smarter marketing and forecasting.

The vast majority of our technology is invisible to our clients' customers; however, our premier user experience delivered in partnership with our clients is highly visible. This includes an ease of use and seamlessness that begins with on-boarding, and extends through general usage, such as balance inquiries, moving money, monitoring credit, managing cards and executing transactions such as deposits, loans and payments. Across our clients' customer base, the average registered user logged onto the digital application times per week, in 2020, providing our clients more opportunities to engage their customers than a physical branch-based relationship, further highlighting the motivation for our clients to promote client customer digital adoption.

Our security infrastructure combines security and services from AWS with our own security protocols and integrations. This includes network traffic inspection, endpoint detection and response and automated patching and encryption of data, both at rest and in transit. In a world where our clients receive hundreds of millions of access requests per month from unverified sources, our security infrastructure is a key element of our value proposition, particularly against new entrants.

While our products and solutions are highly configurable, in certain instances our clients will request custom development and other professional services which we provide. These are generally one-time in nature and involve unique, non-standard features, functions or integrations that are not as broadly desired across our client base.

Our Clients

As of December 31, 2020, we served over FI clients including community, regional and super-regional credit unions and banks across both retail and business banking, as well as additional fraud prevention clients through our ACH Alert acquisition. Our original product suite was retail focused. As we enhanced our product suite to include greater depth of functionality for business banking in particular, we significantly expanded our addressable market as FIs increasingly seek a single digital banking platform for all their retail and business banking needs.

Our target client base includes the top 2,000 FIs by assets, with the exception of the megabanks. We focus on this subsection of the broader market because we view this base as offering the greatest potential lifetime value, considering the cost and resources to acquire and service the relationship. Unlike the long tail of very small institutions, this target client base is also far more likely to grow organically and through acquisition.

Our typical FI relationship begins with a subset of the Alkami Platform as part of a SaaS subscription contract and had an average contract life since our inception of 69 months as of September 30, 2020. Over the course of a client relationship, we seek to expand the number of products our clients embed within their digital experience as well as the digital penetration of the clients' customer base.

No single client represented more than % of our total revenues in the year ended December 31, 2020.

Our Client Case Studies

FI Client A

With more than 280,000 registered users and \$4.3 billion in assets as of September 30, 2020, Client A has adopted a forward-thinking approach to providing digital users with a seamless experience across channels.

“As early as 2015, we set out to drive our digital users toward self-service and contactless interactions,” said Client A’s SVP, Digital Strategy and Delivery. “Back then, it was a very aspirational and optimistic approach to services delivery. We set an aggressive goal for 95% of our transactions to be contactless by 2020.”

Client A needed a provider that could match its own dedication to digital banking innovation and success, while also serving as a strong technology and services partner. After a rigorous audit of providers and platforms, the Alkami Platform quickly rose to the top as the provider that could best deliver on these goals.

Providing a robust digital platform has helped Client A fulfill customer needs to interact with products that drive their growth and revenue in critical ways. Largely a result of this bold digital vision, Client A has achieved significant growth between 2018 and 2020 in multiple key categories:

- On-balance sheet loan growth rate has increased 24%
- Deposit growth has increased 30%
- Logins have increased 21% per year
- Digital penetration growth has increased 9%

“One of the biggest improvements since implementing the Alkami Platform is that our Net Promoter Score (“NPS”) is higher than before, putting Client A in the top-tier digital banking NPS among our peers,” said Client A.

Client A has also hit its goal of transitioning 95% of all transactions to contactless, with an average of % as of December 31, 2020. For this client’s physical branch network, moving these low-effort or low-value transactions to digital channels has freed up teller and personnel staff to focus on more meaningful interactions with customers.

FI Client B

Client B, home to more than 99,000 customers as of September 30, 2020, was held back by a piecemeal digital solution that could no longer keep pace with modern banking demands. This resulted in a fragmented, disjointed experience for both customers and employees.

In selecting Alkami, Client B chose a digital banking partner that caters to its specific needs and a platform that allowed the client to help maintain its customers’ financial health in the midst of a global crisis. The Alkami Platform also effortlessly integrated with Client B’s upgraded core, providing a flexible foundation for addressing ever-changing customer needs.

“Alkami had previous experience conducting remote platform launches and provided us with a blueprint based on those other rollouts. They walked us through the process and answered all our questions. We were confident the migration would be a success and were dedicated to providing the highest quality digital product to every customer no matter what,” said Client B’s VP of Digital Services. The socially distanced launch of the new Alkami Platform took place in June 2020, and the client believed it was a resounding success.

Client B has already seen promising changes in customer ratings, conversions and utilization since migrating to the Alkami Platform:

- **Improved customer ratings:** Average mobile app rating rose from 3.5 (out of 5) pre-rollout to 4.5 (out of 5) post-rollout and, with the new digital banking solution, Client B doubled its NPS, which reached 67 as of June 2020.

- **Increase in new digital user conversions:** As of June 2020 Client B had converted 52,036 total users, and at the end of September 2020 that number had risen to 57,079, a 9.7% increase.
- **Steady increase in digital banking engagement:** Active digital banking utilization for the month of September 2020 ended at 38,275. Engagement rate (active user count/total user count) is now at 67%.

FI Client C

Client C articulated a vision to simply be available when and where users needed them. To enhance their day-to-day banking services, this client started with learning modern banking needs from users themselves to develop a sense of what banking technology they needed to provide.

Client C responded to their users' feedback by rolling out their Virtual Service Center ("VSC"), which went live in waves starting with 2,000 users in January 2019. By April 2019, all of Client C's nearly 400,000 customers could engage with the service. With the strength of Alkami's open API framework, Client C was able to extend their branch-of-the-future vision to meet users wherever they were—the Alkami Platform facilitated video chat via mobile as well.

Since Client C's vision of the branch of the future is a humanized digital experience, they measure their results in positive experiences and stories from their users. Since relying almost entirely on their VSC, Client C has received page after page of positive feedback from users, including these quotes:

- "What a great service. The app is so well done and streamlined. Very impressed with Client C. I will be banking with Client C for a long time."
- "This was a great service that I will continue to use. Thank you."
- "Client C hits another home run!"

Internally, the Client C team experienced increased efficiency and developed additional relationships with users when the VSC launched. Using their business banking capabilities and their VSC experience, Client C has grown in other areas by providing an as-close-to-in-person banking experience for small business users as well. Client C was able to add hundreds of new business accounts while helping them navigate the new Small Business Administration Paycheck Protection Program.

FI Client D

With \$2.9 billion in assets as of September 30, 2020, Client D had a platform that was not highly configurable and lacked significant features, and a user interface that did not easily lend itself to their current brand standards. They needed a new solution that would not only offer the latest self-service features that the digital banking marketplace had to offer, but a platform that would deliver existing website content in a manner that was aligned and integrated with a customer's digital banking journey.

"The Alkami Platform offered us the flexibility and feature set we were looking for. It allows us to serve up insights, products and services to customers as part of their digital banking experience. We could also deliver a consistently positive and cohesive experience on the Alkami mobile app, which means we could provide a single, fully integrated customer journey."

With Alkami as Client D's digital banking partner, they have not only increased online engagement, but can now better ensure customers are aware of the most relevant, value-added products and services they have to offer.

"Today, we have the best of both worlds—we provide helpful content and services within the environment our customers choose. Our customers are achieving more in less time, we are growing our business through a fully integrated digital banking experience and our customers now access almost everything they need through the Alkami digital banking platform."

As of September 2020, notable results since Client D's launch in July 2014 include:

- 5.5x deposit growth
- 2.5x online banking growth
- 4.8x loan growth

Our Go to Market / Sales and Marketing

Our sales team includes representatives focused on new platform sales, a cross-sell team and client success managers. This team is responsible for outbound lead generation, driving new business and helping to manage account relationships and renewals, further driving adoption of our solution within and across lines of business. These teams maintain close relationships with existing clients and act as an advisor to each FI to help identify and understand their unique needs, challenges, goals and opportunities.

In 2019, we created a dedicated team for driving additional adoption of products within existing clients. In addition to identifying opportunities to extend our relationship with clients within the current product suite, this cross-sell team is also responsible for identifying and addressing pain points with our existing solution and sourcing new ideas for additional product capabilities, whether developed internally or through partnership. For the year ended December 31, 2020, we increased revenues from cross-sell by % versus the year ended December 31, 2019, highlighting our significant continued opportunity to grow within our existing client base.

Our client success team is responsible for nurturing relationships holistically throughout the duration of the contract, ensuring that we understand their needs in real time and that our clients are deriving maximum value from the Alkami Platform. Importantly, this team supports retention and deepens the relationship with the client, providing us with the best opportunity to renew clients upon contract expiration, often coupled with an extension of the relationship to additional products. Over the two years ended December 31, 2020, our average ARR uplift upon renewal was %.

Our marketing team oversees all aspects of the Alkami brand including public relations, digital marketing, social media, product marketing, graphic design, conferences and events. Our marketing efforts are focused on promoting direct sales, inbound lead generation and brand building. We leverage online and offline marketing channels by sponsoring client conferences, participating in trade shows and through webinars, digital marketing and social media channels.

Intellectual Property

We rely on a combination of patent, trademark, trade secrets and copyright laws, as well as confidentiality procedures and contractual restrictions, to establish, maintain and protect our proprietary rights. Despite substantial investment in research and development activities, we have not focused on patents and patent applications historically. In addition to the intellectual property that we own, we license certain third-party technologies and intellectual property, which are incorporated into some of our solutions.

The efforts we have taken to protect our intellectual property rights may not be sufficient or effective. It may be possible for other parties to copy or otherwise obtain and use the content of our solutions or other technology without authorization. Failure to protect our intellectual property or proprietary rights adequately could significantly harm our competitive position and business, financial condition and results of operations. See “Risk Factors—General Risk Factors—Our intellectual property rights are valuable, and any inability to protect them could reduce the value of our products, services and brand.”

In addition, third parties may initiate litigation against us alleging infringement, misappropriation or other violation of their proprietary rights or declaring their non-infringement of our intellectual property rights. Companies in the internet and technology industries, and other patent and trademark holders seeking to profit from royalties in connection with grants of licenses, own large numbers of patents, copyrights, trademarks and trade secrets and frequently enter into litigation based on allegations of infringement or other violations of intellectual property rights. We have received in the past, and may in the future, receive notices that claim we have misappropriated or misused other parties’ intellectual property rights. There may be intellectual property rights held by others, including issued or pending patents and trademarks that cover significant aspects of our solutions. Any intellectual property claim against us, regardless of merit, could be time consuming and expensive to settle or litigate and could divert our management’s attention and other resources. These claims could also subject us to significant liability for damages and could result in our having to stop using solutions found to be in violation of another party’s rights. We might be required or may opt to seek a license for rights to intellectual property held by others, which may not be available on commercially reasonable terms, or at all. Even if a license is available, we could be required to pay significant royalties, which would increase our operating expenses. We may also be required to develop alternative non-infringing solutions, which could require significant effort and expense and which we may not be able to perform efficiently or at all. If we cannot license the intellectual property at issue or develop non-infringing solutions for any allegedly infringing aspect of our business, we may be unable to compete effectively. See “Risk Factors—General Risk Factors—Claims by others that we infringe, misappropriate or otherwise violate their proprietary technology or other rights could have a material and adverse effect on our business, financial condition and results of operations.”

Our Competition

The market for digital solutions for financial services providers is highly competitive. We compete with new and established point solution vendors, core processing vendors, as well as internally developed solutions. We believe that the comprehensive integration among our solution offerings and our clients’ internal and third-party systems, combined with our deep industry expertise, including our domain expertise in retail and business banking, reputation for consistent, high-quality client support, pace at which we bring innovation to market, and unified cloud-based digital banking and SaaS solutions distinguish us from the competition.

With respect to our digital banking platform, we compete against a number of companies, including NCR Corporation, Q2 Holdings, Inc. and Temenos AG in the online, consumer and small business banking space. We also compete with core processing vendors that also provide digital banking solutions such as Fiserv, Inc., Jack Henry and Associates, Inc. and Fidelity National Information Services, Inc.

Many of our competitors have significantly more financial, technical, marketing and other resources than we have, may devote greater resources to the promotion, sale and support of their systems than we can, have more extensive client bases and broader client relationships than we have and have longer operating histories and greater name recognition than we have. In addition, many of our competitors spend more funds on research and development.

Although we compete with digital banking vendors and core processing vendors, we also partner with some of these vendors for certain data and services utilized in our solutions and receive referrals from them. In addition, certain of our clients have or can obtain the ability to create their own in-house systems, and while many of these systems have difficulties scaling and providing an integrated platform, we still face challenges displacing in-house systems and retaining clients that choose to develop an in-house system.

We believe the principal competitive factors for our solutions in the financial services markets we serve include the following:

- alignment with the missions of our clients;
- ability to provide a single platform for our clients' consumer and commercial customers;
- full-feature functionality across digital channels;
- ability to integrate targeted offers for client customers across digital channels;
- ability to support FIs in acquiring deposits with open API technologies;
- SaaS delivery and pricing model;
- ability to support both internal and external developers to quickly integrate with third-party applications and systems utilizing a software development kit;
- design of the client customer experience, including modern, intuitive and touch-centric features;
- configurability and branding capabilities for clients;
- familiarity of workflows and terminology and feature-on-demand functionality;
- integrated multi-layered security and compliance of solutions with regulatory requirements;
- quality of implementation, integration and support services;
- domain expertise and innovation in financial services technology;
- price of solutions;
- ability to innovate and respond to client needs rapidly; and
- rate of development, deployment and enhancement of solutions.

We believe that we compete favorably with respect to these factors within the markets we serve, but we expect competition to continue and increase as existing competitors continue to evolve their offerings and as new companies enter our market. To remain competitive, we believe we must continue to invest in research and development, sales and marketing, client support and our business operations generally.

Human Resources

As of December 31, 2020, we had _____ employees. We consider our current relationship with our employees to be good. None of our employees are represented by a labor union or are a party to a collective bargaining agreement.

Since our inception, our culture has been manifested by how we think, act and interact, and is foundational to fulfilling our mission and vision. Our culture is expressed by our six Essential Culture Compounds, and are defined as follows:

Optimistic Perseverance <ul style="list-style-type: none">• Positive determination• Relentless, diligent and purposeful• Driven to achieve success	Courageous Innovation <ul style="list-style-type: none">• Encourage original thinking and ingenuity• Seek to identify emerging technologies or trends• Translate ideas into action	Caring Collaboration <ul style="list-style-type: none">• Care about success of others• Connect collectively to achieve goals• Empathize and assume positive intent
Transparent Communication <ul style="list-style-type: none">• Give and receive constructive feedback• Cascade information appropriately and timely• Communicate with integrity	Trusted Accountability <ul style="list-style-type: none">• Resolute in commitments and holds others to same• Do the right thing always• Share knowledge and learns incessantly	Real Fun! <ul style="list-style-type: none">• Take time to recognize successes and contributions• Celebrate important milestones• Serve our communities

We regularly conduct employee surveys to better understand the level of employee engagement and the effectiveness of our programs and initiatives. We believe the review of this feedback has served to help us promote and improve our culture across our organization and has led us to create, implement or enhance a host of programs and initiatives:

- learning and development programs that are designed to invest in the professional growth and continuous learning of employees and to cultivate leadership talent;
- performance feedback and talent review programs designed to assess and identify areas for continued learning and training opportunities for employees and succession bench for critical roles;
- wellness, benefits and flexible time-off programs designed to assist employees and their families with maintaining physical and emotional wellbeing while balancing the demands of being part of a high-growth company;
- internship and cohort programs that seek to identify and attract diverse talent and offer opportunities for professional learning and potential future employment opportunities with Alkami; and
- employee committees focused on embracing our culture, diversity and inclusion and charitable causes to help create opportunities for employees to join together to make a difference in the workplace and local communities.

We have received third-party recognition for our employee engagement. In 2020, for instance, we were recognized as a Best and Brightest Companies to Work For in Dallas and a Best and Brightest Companies to Work For in the Nation by the Best and Brightest Companies to Work For program.

Government Regulation

We are a technology service provider to FIs in the United States that are subject to regulation, supervision and examination by a number of regulatory agencies, including the Office of the

[Table of Contents](#)

Comptroller of the Currency (the “OCC”), the NCUA, the Board of Governors of the Federal Reserve System (the “Federal Reserve”), the Federal Deposit Insurance Corporation (the “FDIC”) and other federal or state agencies that regulate or supervise FIs in the United States.

We may be subject to periodic examination by banking regulators under federal, state and other laws that apply to us as a result of the services we provide to FIs and other entities they regulate. In particular, under the Bank Service Company Act, the OCC, the Federal Reserve and the FDIC have, as part of their safety and soundness mandate, statutory authority to supervise third-party service providers, like us, that enter into outsourcing agreements with FIs under their respective jurisdictions. In addition, while we are not currently under examination by the FFIEC, a formal interagency body empowered to prescribe uniform principles, standards and report forms for the examination of FIs, to make recommendations to promote uniformity in the supervision of FIs and to directly administer, coordinate, oversee and implement a supervisory program, known as the Multi-Regional Data Processing Services program, for the supervision and examination of the largest, systemically important third-party service providers to FIs, it is possible that we may become subject to FFIEC examination at some point in the future. FFIEC examinations of service providers to FIs may occur on a rotating basis and cover a wide variety of subjects, including management, acquisition and development activities, support and delivery, cybersecurity, IT audits and our disaster preparedness and business recovery planning. The federal banking regulators that make up the FFIEC have broad supervisory authority to remedy any shortcomings identified in an examination and, following any examination of us by the FFIEC, our FI clients may request an executive summary of the examination through their lead examination agency.

We are also currently registered as a CUSO, although our status as a CUSO may be subject to change in the future. As a CUSO, while we are not regulated by the NCUA, we are subject to disclosure, annual reporting and other requirements imposed by the NCUA.

In addition, the Dodd-Frank Act granted the Consumer Financial Protection Bureau (the “CFPB”) authority to promulgate rules and interpret certain federal consumer financial protection laws, some of which apply to the solutions we offer to our clients. In certain circumstances, the CFPB also has examination and supervision powers with respect to service providers who provide a material service to an FI offering consumer financial products and services.

Our clients and prospects are subject to extensive and complex regulations and oversight by federal, state and other regulatory authorities. These laws and regulations are constantly evolving, increasing in number and affect the conduct of our clients' operations and, as a result, our business. Our solutions must enable our clients to comply with applicable legal and regulatory requirements, including, without limitation, those under the following laws and regulations:

- the Dodd-Frank Act;
- the Electronic Funds Transfer Act and Regulation E;
- the Electronic Signatures in Global and National Commerce Act;
- usury laws;
- the Gramm-Leach-Bliley Act;
- the Fair Credit Reporting Act;
- laws and regulations against unfair, deceptive or abusive acts or practices;
- the California Consumer Privacy Act of 2018 (“CCPA”), the California Privacy Rights Act (“CPRA”) and other federal, state and international data privacy, security and protection laws and regulations;

- the Privacy of Consumer Financial Information regulations;
- the Bank Secrecy Act and the USA PATRIOT Act of 2001;
- the FFIEC IT Handbook and related booklets, statements and guidance, including the Guidance on Supervision of Technology Services Providers and the Guidance on Outsourcing Technology Services promulgated by the FFIEC;
- the OCC's "Third-Party Relationships: Risk Management Guidance";
- the NCUA's Guidelines for Safekeeping of Member Information;
- the Federal Credit Union Act; and
- other federal, state and international laws and regulations.

The compliance of our solutions with these requirements depends on a variety of factors, including the functionality and design of our solutions, the classification of our clients, and the manner in which our clients and their customers utilize our solutions. In order to comply with our obligations under these laws, we are required to implement operating policies and procedures to protect the privacy and security of our clients' and their customers' information and to undergo periodic audits and examinations.

Privacy and Information Safeguard Laws

In the ordinary course of our business, we and our clients using our solutions access, collect, store, use transmit and otherwise process certain types of data, including PI, which subjects us and our clients to certain privacy and information security laws in the United States and internationally, including, for example, the CCPA, the CPRA and other state privacy regulations, and other laws, rules and regulations designed to regulate consumer information and data privacy, security and protection, and mitigate identity theft. These laws impose obligations with respect to the collection, processing, storage, disposal, use, transfer, retention and disclosure of PI, and require that financial services providers have in place policies regarding information privacy and security. In addition, under certain of these laws, we must provide notice to consumers of our policies and practices for sharing PI with third parties, provide advance notice of any changes to our policies and, with limited exceptions, give consumers the right to prevent use of their PI and disclosure of it to third parties. Further, all 50 states and the District of Columbia have adopted data breach notification laws that impose, in varying degrees, an obligation to notify affected individuals in the event of a data or security breach or compromise, including when their PI has or may have been accessed by an unauthorized person. These laws may also require us to notify relevant law enforcement, regulators or consumer reporting agencies in the event of a data breach. Some laws may also impose physical and electronic security requirements regarding the safeguarding of PI. In order to comply with the privacy and information security laws, we have confidentiality and information security standards and procedures in place for our business activities and our third-party vendors and service providers. Privacy and information security laws evolve regularly, and complying with these various laws, rules, regulations and standards, and with any new laws or regulations or changes to existing laws, could cause us to incur substantial costs that are likely to increase over time, requiring us to adjust our compliance program on an ongoing basis and presenting compliance challenges, change our business practices in a manner adverse to our business, divert resources from other initiatives and projects, and restrict the way products and services involving data are offered. See "Risk Factors—Risks Relating to Our Business and Industry—Privacy and data security concerns, data collection and transfer restrictions, contractual obligations and U.S. and foreign laws, regulations and industry standards related to data privacy, security and protection could limit the use and adoption of the Alkami Platform and materially and adversely affect our business, financial condition and results of operations."

Facilities

Our principal executive offices are located in Plano, Texas, where we lease approximately 125,468 square feet of office space under a lease with a term that expires on August 31, 2028 with the option to extend the lease for either two additional terms of five years each or one additional term of ten years. We also lease approximately 4,000 square feet of office space in Ooltewah, Tennessee under a lease with a term that commenced on October 4, 2020 and expires on October 3, 2021, with two automatic renewal terms of one year each.

Legal Proceedings

We have in the past and may in the future become involved in legal proceedings arising in the ordinary course of our business. We are not presently a party to any legal proceedings that, if determined adversely to us, would have a material adverse effect on us.

MANAGEMENT

The following table provides information regarding our executive officers and our board of directors:

Name	Age	Position
Michael Hansen	68	Chief Executive Officer and Director
Stephen Bohanon	44	Co-Founder, Chief Strategy and Sales Officer
W. Bryan Hill	54	Chief Financial Officer
Douglas A. Linebarger	50	Chief Legal Officer and Secretary
Brian R. Smith	55	Director and Chairperson
Todd Clark	53	Director
Charles “Chuck” Kane	63	Director
Gene Lockhart	71	Director
Steve Mitchell	50	Director
Gary Nelson	64	Director
Raphael Osnoss	34	Director
Merline Saintil	44	Director
Barbara Yastine	61	Director

Executive Officers

Michael Hansen has served as our President and Chief Executive Officer and as a member of our board of directors since April 2013. Prior to joining Alkami, Mr. Hansen served from 2005 to 2010 as the Chief Executive Officer and President of T-System Inc., a healthcare technology company. From 2000 to late 2004 Mr. Hansen served as the President/Chief Operating Officer and a director of Carreker Corporation (now Fiserv Corporation), a financial services software, services and advisory firm serving FIs in the United States, United Kingdom, South Africa and Australia. From 1991 to 2000, Mr. Hansen served in executive leadership roles in retail, commercial, international banking and enterprise technology and operations for KeyCorp and JPMorgan Chase & Co. Mr. Hansen also served on the board of the Retina Foundation of the Southwest and Interfaith Family Services and currently is on Southern Methodist University's Business Advisory Board of the School of Engineering Computer Science Department. Mr. Hansen holds a B.S. and M.B.A. from the University of South Dakota. As our President and Chief Executive Officer, we believe Mr. Hansen is qualified to serve on our board of directors due to his knowledge and experience across our business.

Stephen Bohanon co-founded Alkami Technology, Inc. in 2009 and currently serves as our Chief Strategy and Sales Officer, where he oversees Alkami's product direction, strategy and sales efforts. Prior to founding Alkami, Mr. Bohanon served in sales executive and executive management roles at a variety of companies in the fintech industry, including CCG Catalyst Consulting Group, a management consulting firm, ACI Worldwide Inc., a payment systems company, Custom Credit Systems, L.P., a provider of commercial loan automation and workflow software for FIs that now operates as Finastra, and Advanced Financial Solutions, Inc., an information services technology company that now operates as Fidelity National Information Services.

W. Bryan Hill has served as our Chief Financial Officer and Treasurer since April 2019. Prior to joining Alkami, from 2007 to 2019, Mr. Hill served in several accounting and finance roles at RealPage, Inc., a property management software company, with the most recent being Executive Vice President, Chief Financial Officer and Treasurer from May 2014 to February 2019. Mr. Hill previously served as Senior Vice President and Chief Accounting Officer of formerly publicly traded Dyncorp International, Inc. (acquired by Cerberus Capital Management in 2010), a provider of outsourced services to civilian

and military government agencies, from 2005 to 2007. From 2000 to 2005, Mr. Hill held the position of Vice President and Chief Accounting Officer and various other financial management positions at SourceHov LLC, a document and information outsourcing solution provider. Mr. Hill received his B.B.A. from Texas Christian University and has been a Certified Public Accountant in the state of Texas since 1996.

Douglas A. Linebarger has served as our Chief Legal Officer and Secretary since March 2018 and previously served as our Vice President, General Counsel and Secretary from April 2015 to March 2018. Prior to joining Alkami, from 2013 until 2015, Mr. Linebarger served as General Counsel and Secretary at One Network Enterprises, a global supply chain software company. From January 2007 until its acquisition by Dell Technologies Inc. in January 2013, Mr. Linebarger served as General Counsel and Secretary of Credant Technologies, a leading provider of data protection software solutions. Earlier in his career, Mr. Linebarger was an associate in the Corporate and Securities Section of the law firm Jenkins & Gilchrist, P.C. Mr. Linebarger holds a B.B.A. in Business from Baylor University and a J.D. from Baylor University School of Law.

Directors

Brian R. Smith has served on our board of directors since September 2011. Mr. Smith is the founder of S3 Ventures, a venture capital firm, and has served as its Managing Director since 2005. Previously, he founded and served as Chairman and Chief Executive Officer of Crossroads Systems, Inc. Mr. Smith currently serves on the boards of Liquibase, Inc., an enterprise software provider, Solace Therapeutics Inc., a medical device company, Tango Health Inc., a healthcare software company, and VUV Analytics, Inc., a spectroscopy provider. Mr. Smith earned a B.S. in electrical engineering with honors from the University of Cincinnati and an M.S. in electrical engineering from Purdue University. We believe Mr. Smith is qualified to serve on our board of directors because of his experience as an investor and as an executive and board director.

Todd Clark has served on our board of directors since September 2018. Mr. Clark has served as President and Chief Executive Officer of CU Cooperative Systems, Inc., a credit union solutions provider, since 2016. Prior to CU Cooperative Systems, Inc., Mr. Clark spent 22 years with First Data Corporation, a financial services company, where he last held the position of Senior Vice President/Head of STAR Network and Debit Processing. In this capacity, he was responsible for the business unit's profit/loss and led a team of more than 600 product, strategy, communications, strategic sales, technology, operations and support personnel. He also managed the Bank of America relationship as head of the financial institution group. Mr. Clark holds a B.A. in economics from the University of Texas at Austin. We believe Mr. Clark is qualified to serve on our board of directors because of his past leadership roles and financial services industry knowledge.

Charles "Chuck" Kane has served on our board of directors since October 2019. Mr. Kane is an adjunct professor of International Finance at the MIT Sloan Graduate Business School of Management at the Massachusetts Institute of Technology. Since November 2006, Mr. Kane has also been a Director and Strategic Advisor of One Laptop Per Child, a non-profit organization that provides computing and internet access for students in the developing world, for whom he served as President and Chief Operating Officer from 2008 until 2009. Mr. Kane served as Executive Vice President and Chief Administrative Officer of Global BPO Services Corp., from July 2007 until March 2008, and as Chief Financial Officer of Global BPO, from August 2007 until March 2008. Prior to joining Global BPO, he served as Chief Financial Officer of RSA Security Inc., from May 2006 until RSA was acquired by EMC Corporation in October 2006. From July 2003 until May 2006, he served as Chief Financial Officer of Aspen Technology, Inc.. Mr. Kane currently serves on the boards of Progress Software Corporation, a software company that specializes in the integration of business applications and

RealPage Inc., a property management software company. Mr. Kane previously served on the boards of Carbonite, Inc.; Demandware, Inc.; Borland Software Inc. Mr. Kane holds a B.B.A. in accounting from the University of Notre Dame and an M.B.A. in international finance from Babson College. We believe Mr. Kane is qualified to serve on our board of directors because of his background in finance and accounting and experience as an executive and a board director.

Gene Lockhart has served on our board of directors since December 2017. Since October 2014, Mr. Lockhart has been the founder, Chairman and Managing Partner of MissionOG LLC, a venture capital firm. He is also a Senior Adviser to Blackstone Group. Previously, he served as Special Adviser at General Atlantic LLC, a global growth investment firm, from 2012 to 2019. From 2002 until 2012, Mr. Lockhart was a venture partner at Oak Investment Partners, a venture capital firm. Mr. Lockhart's prior leadership positions include President of Global Retail Bank at Bank of America, President and Chief Executive Officer of MasterCard International, and CEO of Midland Bank plc. Mr. Lockhart has served on the board of Huron Consulting Group Inc., a management consulting firm, since 2006. Mr. Lockhart previously served on the boards of Metro Bank PLC, a public retail bank operating in the United Kingdom, First Republic Bank, a bank and wealth management company, IMS Health Incorporated, a healthcare technology company, RJR Nabisco, Inc., a food processing and tobacco company, Aaron's, Inc., a lease-to-own retailer of furnishings, electronics and appliances, and RadioShack Corporation, a retail seller of consumer electronic goods and services. Additionally, Mr. Lockhart has previously served on numerous philanthropic boards, including as Chair of the Thomas Jefferson Foundation (Monticello) and as the Chairman of the Darden School Foundation at the University of Virginia. Mr. Lockhart holds a B.S. and M.B.A. from the University of Virginia. We believe that Mr. Lockhart is qualified to serve on our board of directors because of his experience serving on boards of various corporations and understanding of the financial services industry.

Steve Mitchell has served on our board of directors since October 2014. Mr. Mitchell has served as the Chief Executive Officer of Argonaut Private Capital L.P., a private equity firm, since July 2016, prior to which he was the Managing Director of Argonaut Private Equity, LLC, since November 2004. Prior to joining Argonaut, Mr. Mitchell was a principal in both Radical Incubation and 2929 Entertainment. Mr. Mitchell serves on the board of Aspen Aerogels, Inc., an energy technology company, and StepStone Group, Inc., an investment firm. From 1996 to 1999, Mr. Mitchell was a corporate attorney at Gibson, Dunn & Crutcher LLP. Mr. Mitchell holds a B.B.A. in marketing from Baylor University and a J.D. from University of San Diego School of Law. We believe that Mr. Mitchell is qualified to serve on our board of directors because of his experience as an investment manager and a board director.

Gary Nelson has served on our board of directors since August 2011. Mr. Nelson has 39 years of senior and executive management experience in domestic and international business. Mr. Nelson is the Chairman at Every Tribe Every Nation and a co-founder of Alkami. Previously, he served as Alkami's Chief Executive Officer from 2009 to 2011 and Advanced Financial Solutions from 1995 to 2004. We believe Mr. Nelson is qualified to serve on our board of directors because of his management experience and knowledge of our company as a former executive.

Raphael Osnoss has served on our board of directors since December 2017. Mr. Osnoss is a Principal at General Atlantic and focuses on the firm's investments in the Financial Services sector. Before joining General Atlantic in 2014, he was an Associate with Berkshire Partners where he concentrated on investments across a number of sectors including business services, communications, healthcare and consumer. He began his career as an Analyst in the Investment Banking division of Goldman Sachs in the Leveraged Finance group. Mr. Osnoss holds a B.S. in economics from the University of Pennsylvania and an M.B.A. from Harvard Business School. We believe Mr. Osnoss is qualified to serve on our board of directors because of his knowledge of the financial services industry.

Merline Saintil has served on our board of directors since October 2020. From April 2019 to February 2020, Ms. Saintil was the Chief Operating Officer, R&D-IT at Change Healthcare, a

healthcare technology company. Prior to joining Change Healthcare, Ms. Saintil was a senior executive in the Product & Technology group at Intuit, a software company, from November 2014 to August 2018, where her core responsibilities included driving global strategic growth priorities, leading merger and acquisition integration and divestitures, and leading business operations for nearly half of Intuit's workforce. Prior to Intuit, Ms. Saintil served as Yahoo!'s (prior to its acquisition by Verizon Media) Head of Operations for Mobile & Emerging Products from January 2014 to November 2014. Ms. Saintil serves on the board of directors of Banner Corporation, a bank holding company, ShotSpotter, Inc., an acoustic gunshot detection and precision-policing solutions company, Lightspeed POS Inc., a cloud-based SaaS platform provider and Aequi Acquisition Corp., a blank check company. Ms. Saintil received a B.S. in Computer Science from Florida A&M University and an M.S. in Software Engineering Management from Carnegie Mellon University. We believe Ms. Saintil is qualified to serve on our board of directors because of her experience in the technology industry.

Barbara Yastine has served on our board of directors since October 2020. Ms. Yastine also serves on the board of directors of AXIS Capital Holdings Limited, an insurance holding company, Zions Bancorporation, N.A., a bank holding company and Primerica, Inc., an insurance and financial services sales company. Ms. Yastine served as Co-Chief Executive Officer of Lebenthal Holdings, a private asset management firm, from September 2015 to June 2016. She previously served as Chair, President and Chief Executive Officer of Ally Bank from March 2012 to September 2015 and as Chair of Ally Bank and Chief Administrative Officer of Ally Financial from May 2010 to March 2012. Prior to joining Ally Financial, she served as a Principal of Southgate Alternative Investments beginning in June 2007. She served as Chief Financial Officer for investment bank Credit Suisse First Boston from October 2002 to August 2004. From 1987 through 2002, Ms. Yastine worked at Citigroup and its predecessor companies. She served on the board of directors of First Data Corporation from September 2016 to July 2019. She received a B.A. in journalism and an M.B.A. from New York University. We believe Ms. Yastine is qualified to serve on our board of directors because of her experience as an executive and board director in the financial services and investment industries.

Involvement in Certain Legal Proceedings

Barbara Yastine, one of our directors, was the Co-Chief Executive Officer and a director of Lebenthal Holdings, LLC ("Lebenthal") for approximately nine months from September 2015 to June 2016. In November 2017, approximately 17 months after Ms. Yastine left that position, Lebenthal and certain of its subsidiaries filed voluntary petitions for bankruptcy under Chapter 7 of the United States Bankruptcy Code in the U.S. Bankruptcy Court for the Southern District of New York.

Family Relationships

There are no family relationships among any of our directors or executive officers.

Board Composition

Our board of directors currently consists of ten members. Our amended and restated certificate of incorporation and amended and restated bylaws will provide that the authorized number of directors shall be fixed from time to time by a resolution of the majority of our board of directors.

Director Independence

Our board of directors has determined that all of our directors, other than Mr. Hansen, qualify as "independent" as that term is defined under the applicable rules and regulations of the SEC and the

listing rules of (the “Listing Rules”). Mr. Hansen is not considered independent by virtue of his position as our Chief Executive Officer. In making these determinations, our board of directors considered the current and prior relationships that each non-employee director has had with our company and all other facts and circumstances our board of directors deemed relevant in determining their independence.

Classified Board of Directors

Upon the effectiveness of the registration statement of which this prospectus forms a part, our board of directors will be divided into three classes with staggered three-year terms. At each annual general meeting of stockholders, the successors to directors whose terms then expire will be elected to serve from the time of election and qualification until the third annual meeting following election. Our directors will be divided among the three classes as follows:

- The Class I directors will be , and , and their terms will expire at the annual meeting of stockholders to be held in 2022;
- The Class II directors will be , and , and their terms will expire at the annual meeting of stockholders to be held in 2023; and
- The Class III directors will be , , and , and their terms will expire at the annual meeting of stockholders to be held in 2024.

We expect that any additional directorships resulting from an increase in the number of directors will be distributed among the three classes so that, as nearly as possible, each class will consist of one-third of the directors. The division of our board of directors into three classes with staggered three-year terms may delay or prevent a change of our management or a change in control.

Voting Arrangements

The election of the members of our board of directors has been governed by an amended and restated voting agreement (the “Voting Agreement”) that we entered into with certain holders of our common and redeemable convertible preferred stock in September 2020, as amended in October 2020, and the related provisions of our existing amended and restated certificate of incorporation. Pursuant to the Voting Agreement, the following directors were designated as directors to our board of directors and elected by a majority of our stockholders:

- Messrs. Osnoss and Lockhart were designated by General Atlantic (AL), L.P.;
- Mr. Clark was designated by CU Cooperative Systems, Inc.;
- Mr. Smith and Ms. Saintil were designated by S3 Ventures Fund III, L.P.;
- Mr. Mitchell was designated by Argonaut Private Equity II, LLC;
- Mr. Hansen was designated as our Chief Executive Officer; and
- Messrs. Kane and Nelson and Ms. Yastine were designated as independent directors.

The holders of our common stock and redeemable convertible preferred stock who are parties to the Voting Agreement are obligated to vote for such designees indicated above. The Voting Agreement will terminate upon the completion of this offering and our existing amended and restated certificate of incorporation will be amended and restated, after which there will be no further contractual obligations or charter provisions regarding the election of our directors. Our directors hold office until their successors have been elected and qualified or appointed, or the earlier of their death, resignation or removal.

For more information, see “Certain Relationships and Related Party Transactions—Voting Agreement.”

Leadership Structure of the Board

Our amended and restated bylaws and corporate governance guidelines to be in place immediately prior to the completion of this offering will provide our board of directors with flexibility to combine or separate the positions of Chairperson of the board of directors and Chief Executive Officer and to implement a lead director in accordance with its determination regarding which structure would be in the best interests of our company.

Our board of directors has concluded that our current leadership structure is appropriate at this time. However, our board of directors will continue to periodically review our leadership structure and may make such changes in the future as it deems appropriate.

Role of Board in Risk Oversight Process

Risk assessment and oversight are an integral part of our governance and management processes. Our board of directors encourages management to promote a culture that incorporates risk management into our corporate strategy and day-to-day business operations. Management discusses strategic and operational risks at regular management meetings, and conducts specific strategic planning and review sessions during the year that include a focused discussion and analysis of the risks facing us. Throughout the year, senior management reviews these risks with the board of directors at regular board meetings as part of management presentations that focus on particular business functions, operations or strategies, and presents the steps taken by management to mitigate or eliminate such risks.

Our board of directors does not have a standing risk management committee, but rather administers this oversight function directly through our board of directors as a whole, as well as through various standing committees of our board of directors that address risks inherent in their respective areas of oversight. While our board of directors is responsible for monitoring and assessing strategic risk exposure, our audit committee is responsible for overseeing our major financial risk exposures and the steps our management has taken to monitor and control these exposures. The audit committee also approves or disapproves any related person transactions. Our nominating and corporate governance committee monitors the effectiveness of our corporate governance guidelines. Our compensation committee assesses and monitors whether any of our compensation policies and programs has the potential to encourage excessive risk-taking.

Board Committees

Our board of directors has established an audit committee, an information systems audit committee, a compensation committee and a nominating and corporate governance committee. Our board of directors may establish other committees to facilitate the management of our business. The composition and functions of each committee are described below. Members serve on these committees until their resignation or until otherwise determined by our board of directors. Each committee intends to adopt a written charter that satisfies the applicable rules and regulations of the SEC and the Listing Rules, which we will post on our website at www.alkami.com upon the completion of this offering.

Audit Committee

Our audit committee oversees our accounting and financial reporting process. Among other matters, the audit committee:

- appoints our independent registered public accounting firm;

- evaluates the independent registered public accounting firm's qualifications, independence and performance;
- determines the engagement of the independent registered public accounting firm;
- reviews and approves the scope of the annual audit and pre-approves the audit and non-audit fees and services;
- reviews and approves all related party transactions on an ongoing basis;
- establishes procedures for the receipt, retention and treatment of any complaints received by the Company regarding accounting, internal accounting controls or auditing matters;
- discusses with management and the independent registered public accounting firm the results of the annual audit and the review of our quarterly financial statements;
- approves the retention of the independent registered public accounting firm to perform any proposed permissible non-audit services;
- discusses on a periodic basis, and as appropriate, with management, the Company's policies and procedures with respect to risk assessment and risk management;
- is responsible for reviewing our financial statements and our management's discussion and analysis of financial condition and results of operations to be included in our annual and quarterly reports to be filed with the SEC;
- investigates any reports received through the ethics helpline and reports to the board of directors periodically with respect to any information received through the ethics helpline and any related investigations; and
- reviews the audit committee charter and the audit committee's performance on an annual basis.

Our audit committee consists of Mr. Clark, Mr. Kane, Mr. Lockhart, Mr. Osnoss and Mr. Smith. Our board of directors has determined that all members are independent under the Listing Rules and Rule 10A-3(b)(1) of the Exchange Act. The chair of our audit committee is Mr. Kane. Our board of directors has determined that and are each an "audit committee financial expert" as such term is currently defined in Item 407(d)(5) of Regulation S-K. Our board of directors has also determined that each member of our audit committee can read and understand fundamental consolidated financial statements, in accordance with applicable requirements.

Information Systems Audit Committee

Our information systems audit committee oversees information technology and data privacy security risks, reviews our cyber resilience program, reviews our business continuity planning and practices and disaster preparedness, advises the board of directors on operations-related compliance practices and associated compliance monitoring and testing programs and oversees our responses to and compliance with operations-related regulatory requirements, requests and orders. The information systems audit committee will review and evaluate, on an annual basis, the information systems audit committee charter and the information systems audit committee's performance. Our information audit committee consists of Mr. Clark, Mr. Lockhart, Mr. Nelson and Ms. Saintil. The chair of our information systems audit committee is Mr. Lockhart.

Compensation Committee

Our compensation committee oversees policies relating to compensation and benefits of our officers and employees. The compensation committee reviews and approves or recommends

corporate goals and objectives relevant to compensation of our executive officers (other than our Chief Executive Officer), evaluates the performance of these officers in light of those goals and objectives and approves the compensation of these officers based on such evaluations. The compensation committee also reviews and approves or makes recommendations to our board of directors regarding the issuance of stock options and other awards under our stock plans to our executive officers (other than our Chief Executive Officer). The compensation committee reviews the performance of our Chief Executive Officer and makes recommendations to our board of directors with respect to his compensation, and our board of directors retains the authority to make compensation decisions relative to our Chief Executive Officer. The compensation committee will review and evaluate, on an annual basis, the compensation committee charter and the compensation committee's performance. Our compensation committee consists of Mr. Nelson, Mr. Osnoss and Mr. Smith. Our board of directors has determined that all members are independent under the Listing Rules. The chair of our compensation committee is Mr. Osnoss.

Nominating and Corporate Governance Committee

The nominating and corporate governance committee is responsible for making recommendations to our board of directors regarding candidates for directorships and the size and composition of our board of directors. In addition, the nominating and corporate governance committee is responsible for overseeing our corporate governance policies and making recommendations to our board of directors concerning governance matters. Our nominating and corporate governance committee consists of Mr. Mitchell, Mr. Osnoss and Mr. Smith. Our board of directors has determined that all members are independent under the Listing Rules. The chair of our nominating and corporate governance committee is Mr. Smith.

Compensation Committee Interlocks and Insider Participation

None of the members of our compensation committee is currently, or has been at any time, one of our executive officers or employees. None of our executive officers currently serves, or has served during the last year, as a member of the board of directors or compensation committee of any entity that has one or more executive officers serving as a member of our board of directors or on our compensation committee.

Code of Business Conduct and Ethics

In connection with this offering, our board of directors intends to adopt a written code of business conduct and ethics that applies to all of our directors, officers and employees, including our principal executive officer, principal financial officer and principal accounting officer or controller, or persons performing similar functions, and agents and representatives. The full text of our code of business conduct and ethics will be posted on our website at www.alkami.com upon the completion of this offering. The nominating and corporate governance committee of our board of directors will be responsible for overseeing our code of business conduct and ethics and any waivers applicable to any director, executive officer or employee. We intend to disclose any future amendments to certain provisions of our code of business conduct and ethics, or waivers of such provisions applicable to our directors, officers and employees, including our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, and agents and representatives, on our website identified above or in public filings.

Limitation on Liability and Indemnification Matters

Our amended and restated certificate of incorporation and our amended and restated bylaws, both of which will become effective immediately prior to the completion of this offering, limit our

directors' liability, and provide that we may indemnify our directors and officers to the fullest extent permitted under Delaware General Corporation Law ("DGCL"). The DGCL provides that directors of a corporation will not be personally liable for monetary damages for breach of their fiduciary duties as directors, except for liability for any:

- transaction from which the director derives an improper personal benefit;
- act or omission not in good faith or that involves intentional misconduct or a knowing violation of law;
- unlawful payment of dividends or redemption of shares; or
- breach of a director's duty of loyalty to the corporation or its stockholders.

These limitations of liability do not apply to liabilities arising under federal securities laws and do not affect the availability of equitable remedies such as injunctive relief or recession.

The DGCL and our amended and restated bylaws provide that we will, in certain situations, indemnify our directors and officers and may indemnify other employees and other agents, to the fullest extent permitted by law. Any indemnified person is also entitled, subject to certain limitations, to advancement, direct payment or reimbursement of reasonable expenses (including attorneys' fees and disbursements) in advance of the final disposition of the proceeding.

In addition, we have entered, and intend to continue to enter, into separate indemnification agreements with our directors and officers. These indemnification agreements, among other things, require us to indemnify our directors and officers for certain expenses, including attorneys' fees, judgments, fines and settlement amounts incurred by a director or officer in any action or proceeding arising out of their services as a director or officer, or any other company or enterprise to which the person provides services at our request.

We maintain a directors' and officers' insurance policy pursuant to which our directors and officers are insured against liability for actions taken in their capacities as directors and officers. We believe that these provisions in our amended and restated certificate of incorporation and amended and restated bylaws and these indemnification agreements are necessary to attract and retain qualified persons as directors and officers.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or control persons, in the opinion of the SEC, such indemnification is against public policy, as expressed in the Securities Act and is therefore unenforceable.

EXECUTIVE AND DIRECTOR COMPENSATION

This section discusses the material components of the executive compensation program for our 2020 named executive officers. Our named executive officers for 2020 are:

- Michael Hansen, our Chief Executive Officer;
- W. Bryan Hill, our Chief Financial Officer;
- Stephen Bohanon, our Co-Founder and Chief Strategy and Sales Officer; and
- Douglas A. Linebarger, our Chief Legal Officer and Secretary.

This discussion may contain forward-looking statements that are based on our current plans, considerations, expectations and determinations regarding future compensation programs. Actual compensation programs that we adopt following the completion of this offering may differ materially from the currently planned programs summarized in this discussion. As an “emerging growth company” as defined in the JOBS Act, we are not required to include a Compensation Discussion and Analysis section and have elected to comply with the scaled disclosure requirements applicable to emerging growth companies.

2020 Summary Compensation Table

The following table sets forth information concerning the compensation of our named executive officers for 2020.

<u>Name and Principal Position</u>	<u>Year</u>	<u>Salary (\$)</u>	<u>Bonus (\$)</u>	<u>Option Awards \$(1)</u>	<u>Non-Equity Incentive Plan Compensation \$(2)</u>	<u>All Other Compensation \$(3)</u>	<u>Total (\$)</u>
Michael Hansen <i>Chief Executive Officer</i>	2020						
W. Bryan Hill <i>Chief Financial Officer</i>	2020						
Stephen Bohanon <i>Co-Founder and Chief Strategy and Sales Officer</i>	2020						
Douglas A. Linebarger <i>Chief Legal Officer and Secretary</i>	2020						

- (1) Amounts reported represent the aggregate grant date fair value of stock options granted to our named executive officers computed in accordance with FASB ASC Topic 718. Assumptions used in the calculation of these amounts are included in Note 2 and Note 9 to our consolidated financial statements included in this prospectus.
- (2) Represents bonuses earned under our annual bonus plan for 2020.
- (3) Represents Company matching contributions under our 401(k) plan and the value of monthly cell phone stipends.

Narrative to the Summary Compensation Table

2020 Annual Base Salaries

Our named executive officers each receive a base salary to compensate them for services rendered to our company. The base salary payable to each named executive officer is intended to

[Table of Contents](#)

provide a fixed component of compensation reflecting the executive's skill set, experience, role and responsibilities. For 2020, our named executive officers' annual base salaries were as follows: Mr. Hansen: \$; Mr. Hill: \$; Mr. Bohanon: \$; and Mr. Linebarger: \$.

Subject to the consummation of this offering, the annual base salaries for our named executive officers will be increased to the following amounts: Mr. Hansen: \$; Mr. Hill: \$; Mr. Bohanon: \$; and Mr. Linebarger: \$.

2020 Annual Performance Bonuses

We maintain an annual performance-based cash bonus program in which each of our named executive officers participated in 2020. Each named executive officer's target bonus is expressed as a percentage of base salary, and bonus payments are determined based on achievement of certain performance goals approved by our board of directors, subject to the recipient's service through time of payment. The 2020 annual bonuses were targeted at the following percentages of each named executive officer's annual base salary: Mr. Hansen: %; Mr. Hill: %; Mr. Bohanon: %; and Mr. Linebarger: %.

In , our board of directors reviewed corporate performance against pre-established goals relating to certain financial and operating metrics, and metrics specific to the success of particular business units, and determined overall achievement of our 2020 corporate goals to be % of target, and achievement of business unit goals to be % of target. Based on this determination and the determination of individual achievement to be % of target for each of Messrs. Hansen, Hill, Bohanon and Linebarger, our board of directors approved the 2020 annual bonus amounts set forth above in the Summary Compensation Table in the column titled "Non-Equity Incentive Plan Compensation."

In , in connection with and subject to the consummation of this offering, our board of directors approved increasing the target bonuses of our named executive officers for 2021 as a percentage of annual base salary as follows: Mr. Hansen: %; Mr. Hill: %; Mr. Bohanon: % and Mr. Linebarger: %.

Equity Compensation

We have granted stock options to our employees, including our named executive officers, in order to attract and retain them, as well as to align their interests with the interests of our stockholders. In order to provide a long-term incentive, these stock options generally vest over four or five years subject to continued service to our company.

In February 2020, we granted each of Messrs. Hansen, Bohanon and Linebarger an option to purchase 67,600 shares of our common stock. Each option vests monthly as to 1/48th of the original number of shares subject to the option measured from January 1, 2020, subject to continued service through the applicable vesting date.

In March 2020, we granted each of Mr. Hansen and Mr. Bohanon an option to purchase 50,000 shares of our common stock. Upon achievement of certain sales performance goals, 25% of the shares originally subject to the option vested on December 31, 2020, and 1/36th of the remaining 75% of the shares originally subject to the option vest monthly thereafter, subject to continued service through the applicable vesting date.

In connection with this offering, we will adopt the 2021 Plan in order to facilitate the grant of cash and equity incentives to directors, employees (including our named executive officers) and consultants

[Table of Contents](#)

of our company and certain of its affiliates and to enable us to obtain and retain services of these individuals, which is essential to our long-term success. The 2021 Plan will be effective on the date immediately prior to the date the registration statement relating to this offering becomes effective. For additional information about the 2021 Plan, please see the section titled "Equity Incentive Plans" below.

Other Elements of Compensation

Retirement Savings and Health and Welfare Benefits

We maintain a 401(k) retirement savings plan for our employees, including our named executive officers, who satisfy certain eligibility requirements. Our named executive officers are eligible to participate in the 401(k) plan on the same terms as other full-time employees. We match % of a participant's annual eligible contribution to the 401(k) plan, up to % of their annual base salary or up to the IRS limit, whichever is lower. We believe that providing a vehicle for tax-deferred retirement savings through our 401(k) plan adds to the overall desirability of our executive compensation package and further incentivizes our employees, including our named executive officers, in accordance with our compensation policies.

All of our full-time employees, including our named executive officers, are eligible to participate in our health and welfare plans. These health and welfare plans include medical, dental and vision benefits; short-term and long-term disability insurance; and supplemental life and AD&D insurance.

Perquisites and Other Personal Benefits

We determine perquisites on a case-by-case basis and will provide a perquisite to a named executive officer when we believe it is necessary to attract or retain the named executive officer.

Other than monthly cell phone stipends, we did not provide any perquisites or personal benefits to our named executive officers not otherwise made available to our other employees in 2020.

Outstanding Equity Awards at Year-End

The following table summarizes the number of shares of common stock underlying outstanding option awards for each named executive officer as of December 31, 2020.

Name and Principal Position	Grant Date	Vesting Start Date	Option Awards			
			Number of Securities Underlying Unexercised Options (#) (Exercisable)	Number of Securities Underlying Unexercised Options (#) (Un-exercisable)	Option Exercise Price (\$)	Option Expiration Date
Michael Hansen Chief Executive Officer						
W. Bryan Hill Chief Financial Officer						
Stephen Bohanon Co-Founder and Chief Strategy and Sales Officer						
Douglas A. Linebarger Chief Legal Officer and Secretary						

Executive Compensation Arrangements

Previous Employment Agreements

We previously entered into employment agreement with each of our named executive officers. These agreements set forth the terms and conditions of employment of each named executive officer, including initial base salary, target bonus opportunity, and equity grants and employee benefits eligibility.

Additionally, each employment agreement provides that if the executive's employment is terminated by the Company without "cause" or the executive resigns for "good reason" (each as defined in the agreement), the executive will be eligible to receive: (i) continued base salary payments over a period of 12 months; and (ii) if the termination date occurs within three months before or two years after a "change of control" of the Company (as defined in the agreement), the vesting of the executive's outstanding options shall fully accelerate. All such severance benefits are subject to the executive signing a general release of claims against the Company and its affiliates in a form acceptable to the Company. Additionally, if the Company undergoes a change of control transaction and the executive's options are not assumed, continued or substituted in the transaction, the vesting of the options will fully accelerate.

New Employment Agreements

In connection with this offering, we have entered into new employment agreements with each of our named executive officers, which will become effective as of immediately prior to the effectiveness of the registration statement relating to this offering and supersede in their entirety their previous employment agreements.

Equity Incentive Plans

The following summarizes the material terms of the 2021 Plan we intend to adopt in connection with this offering, in which our named executive officers will be eligible to participate following the consummation of this offering; our 2011 Plan, under which we have previously made periodic grants of equity awards to our named executive officers and other key employees; and the 2021 Employee Stock Purchase Plan we intend to adopt in connection with this offering to provide our employees an opportunity to purchase shares of our common stock at a discount to fair market value.

2021 Incentive Award Plan

We intend to adopt the 2021 Plan, which will be effective on the date immediately prior to the date our registration statement relating to this offering becomes effective. The principal purpose of the 2021 Plan is to attract, retain and motivate selected employees, consultants and directors through the granting of stock-based compensation awards and cash-based performance bonus awards. The material terms of the 2021 Plan, as it is currently contemplated, are summarized below.

Share Reserve. Under the 2021 Plan, shares of our common stock will be initially reserved for issuance pursuant to a variety of stock-based compensation awards, including stock options, stock appreciation rights, or SARs, restricted stock awards, restricted stock unit awards, performance bonus awards, performance stock unit awards, dividend equivalents, or other stock or cash based awards. The number of shares initially reserved for issuance or transfer pursuant to awards under the 2021 Plan will be increased by (i) the number of shares represented by awards outstanding under our 2011 Plan ("2011 Plan Awards") that become available for issuance under the counting provisions described below following the effective date and (ii) an annual increase on the first day of each fiscal year

beginning in 2022 and ending in 2031, equal to the lesser of (A) % of the shares of stock outstanding (on an as converted basis) on the last day of the immediately preceding year and (B) such smaller number of shares of stock as determined by our board of directors; provided, however, that no more than shares of stock may be issued upon the exercise of incentive stock options.

The following counting provisions will be in effect for the share reserve under the 2021 Plan:

- to the extent that an award (including a 2011 Plan Award) expires, lapses or is terminated, converted into an award in respect of shares of another entity in connection with a spin-off or other similar event, exchanged for cash, surrendered, repurchased, canceled, in any case, in a manner that results in the Company acquiring the underlying shares at a price not greater than the price paid by the participant or not issuing the underlying shares, such unused shares subject to the award at such time will be available for future grants under the 2021 Plan;
- to the extent shares are tendered or withheld to satisfy the grant, exercise price or tax withholding obligation with respect to any award under the 2021 Plan or 2011 Plan Award, such tendered or withheld shares will be available for future grants under the 2021 Plan;
- to the extent shares subject to stock appreciation rights are not issued in connection with the stock settlement of stock appreciation rights on exercise thereof, such shares will be available for future grants under the 2021 Plan;
- the payment of dividend equivalents in cash in conjunction with any outstanding awards or 2011 Plan Awards will not be counted against the shares available for issuance under the 2021 Plan; and
- shares issued in assumption of, or in substitution for, any outstanding awards of any entity acquired in any form of combination by us or any of our subsidiaries will not be counted against the shares available for issuance under the 2021 Plan.

In addition, the sum of the grant date fair value of all equity-based awards and the maximum that may become payable pursuant to a cash-based award to any individual for services as a non-employee director during any calendar year may not exceed \$1,000,000 for the individual's first year of service and \$700,000 for each year thereafter.

Administration. The compensation committee of our board of directors is expected to administer the 2021 Plan unless our board of directors assumes authority for administration. The board of directors may delegate its powers to a committee, which, to the extent required to comply with Rule 16b-3, is intended to be comprised of "non-employee directors" for purposes of Rule 16b-3 under the Exchange Act. The 2021 Plan provides that the board or compensation committee may delegate its authority to grant awards other than to individuals subject to Section 16 of the Exchange Act or officers or directors to whom authority to grant awards has been delegated.

Subject to the terms and conditions of the 2021 Plan, the administrator has the authority to select the persons to whom awards are to be made, to determine the number of shares to be subject to awards and the terms and conditions of awards, and to make all other determinations and to take all other actions necessary or advisable for the administration of the 2021 Plan. The administrator is also authorized to adopt, amend or rescind rules relating to administration of the 2021 Plan. Our board of directors may at any time remove the compensation committee as the administrator and reconstitute itself the authority to administer the 2021 Plan. The full board of directors will administer the 2021 Plan with respect to awards to non-employee directors.

Eligibility. Awards under the 2021 Plan may be granted to individuals who are then our officers, employees or consultants or are the officers, employees or consultants of certain of our subsidiaries.

Such awards also may be granted to our directors. However, only employees of our company or certain of our subsidiaries may be granted incentive stock options, or ISOs.

Awards. The 2021 Plan provides that the administrator may grant or issue stock options, SARs, restricted stock, restricted stock units, performance bonus awards, performance stock units, other stock- or cash-based awards and dividend equivalents, or any combination thereof. Each award will be set forth in a separate agreement with the person receiving the award and will indicate the type, terms and conditions of the award.

- *Nonstatutory Stock Options*, or NSOs, will provide for the right to purchase shares of our common stock at a specified price which may not be less than fair market value on the date of grant, and usually will become exercisable (at the discretion of the administrator) in one or more installments after the grant date, subject to the participant's continued employment or service with us and/or subject to the satisfaction of corporate performance targets and individual performance targets established by the administrator. NSOs may be granted for any term specified by the administrator that does not exceed ten years.
- *Incentive Stock Options*, or ISOs, will be designed in a manner intended to comply with the provisions of Section 422 of the Code and will be subject to specified restrictions contained in the Code. Among such restrictions, ISOs must have an exercise price of not less than the fair market value of a share of common stock on the date of grant, may only be granted to employees, and must not be exercisable after a period of ten years measured from the date of grant. In the case of an ISO granted to an individual who owns (or is deemed to own) at least 10% of the total combined voting power of all classes of our capital stock, the 2021 Plan provides that the exercise price must be at least 110% of the fair market value of a share of common stock on the date of grant and the ISO must not be exercisable after a period of five years measured from the date of grant.
- *Restricted Stock* may be granted to any eligible individual and made subject to such restrictions as may be determined by the administrator. Restricted stock, typically, may be forfeited for no consideration or repurchased by us at the original purchase price if the conditions or restrictions on vesting are not met. In general, restricted stock may not be sold or otherwise transferred until restrictions are removed or expire. Purchasers of restricted stock, unlike recipients of options, will have voting rights and will have the right to receive dividends, if any, prior to the time when the restrictions lapse, however, extraordinary dividends will generally be placed in escrow, and will not be released until restrictions are removed or expire.
- *Restricted Stock Units* may be awarded to any eligible individual, typically without payment of consideration, but subject to vesting conditions based on continued employment or service or on performance criteria established by the administrator. Like restricted stock, restricted stock units may not be sold, or otherwise transferred or hypothecated, until vesting conditions are removed or expire. Unlike restricted stock, stock underlying restricted stock units will not be issued until the restricted stock units have vested, and recipients of restricted stock units generally will have no voting or dividend rights prior to the time when vesting conditions are satisfied.
- *Stock Appreciation Rights*, or SARs, may be granted in connection with stock options or other awards, or separately. SARs granted in connection with stock options or other awards typically will provide for payments to the holder based upon increases in the price of our common stock over a set exercise price. The exercise price of any SAR granted under the 2021 Plan must be at least 100% of the fair market value of a share of our common stock on the date of grant. SARs under the 2021 Plan will be settled in cash or shares of our common stock, or in a combination of both, at the election of the administrator.

- *Performance Bonus Awards and Performance Stock Units* are denominated in cash or shares/unit equivalents, respectively, and may be linked to one or more performance or other criteria as determined by the administrator.
- *Other Stock or Cash Based Awards* are awards of cash, fully vested shares of our common stock and other awards valued wholly or partially by referring to, or otherwise based on, shares of our common stock. Other stock or cash based awards may be granted to participants and may also be available as a payment form in the settlement of other awards, as standalone payments and as payment in lieu of base salary, bonus, fees or other cash compensation otherwise payable to any individual who is eligible to receive awards. The administrator will determine the terms and conditions of other stock or cash based awards, which may include vesting conditions based on continued service, performance and/or other conditions.
- *Dividend Equivalents* represent the right to receive the equivalent value of dividends paid on shares of our common stock and may be granted alone or in tandem with awards other than stock options or SARs. Dividend equivalents are converted to cash or shares by such formula and such time as determined by the administrator. In addition, dividend equivalents with respect to an awards subject to vesting will either (i) to the extent permitted by applicable law, not be paid or credited or (ii) be accumulated and subject to vesting to the same extent as the related award.

Any award may be granted as a performance award, meaning that the award will be subject to vesting and/or payment based on the attainment of specified performance goals.

Change in Control. In the event of a change in control, unless the administrator elects to terminate an award in exchange for cash, rights or other property, or cause an award to accelerate in full prior to the change in control, such award will continue in effect or be assumed or substituted by the acquirer, provided that any performance-based portion of the award will be subject to the terms and conditions of the applicable award agreement. In the event the acquirer refuses to assume or replace awards granted, prior to the consummation of such transaction, awards issued under the 2021 Plan (other than any portion subject to performance-based vesting) will be subject to accelerated vesting such that 100% of such awards will become vested and exercisable or payable, as applicable. The administrator may also make appropriate adjustments to awards under the 2021 Plan and is authorized to provide for the acceleration, cash-out, termination, assumption, substitution or conversion of such awards in the event of a change in control or certain other unusual or nonrecurring events or transactions.

Adjustments of Awards. The administrator has broad discretion to take action under the 2021 Plan, as well as make adjustments to the terms and conditions of existing and future awards, to prevent the dilution or enlargement of intended benefits and facilitate necessary or desirable changes in the event of certain transactions and events affecting our common stock, such as stock dividends, stock splits, mergers, acquisitions, consolidations and other corporate transactions. In addition, in the event of certain non-reciprocal transactions with our stockholders known as “equity restructurings,” the administrator will make equitable adjustments to the 2021 Plan and outstanding awards.

Amendment and Termination. The administrator may terminate, amend or modify the 2021 Plan at any time and from time to time. However, we must generally obtain stockholder approval to the extent required by applicable law, rule or regulation (including any applicable stock exchange rule), and generally no amendment may materially and adversely affect any outstanding award without the affected participant's consent. Notwithstanding the foregoing, an option may be amended to reduce the per share exercise price below the per share exercise price of such option on the grant date and options may be granted in exchange for, or in connection with, the cancellation or surrender of options having a higher per share exercise price without receiving additional stockholder approval.

No incentive stock options may be granted pursuant to the 2021 Plan after the tenth anniversary of the effective date of the 2021 Plan, and no additional annual share increases to the 2021 Plan's aggregate share limit will occur from and after such anniversary. Any award that is outstanding on the termination date of the 2021 Plan will remain in force according to the terms of the 2021 Plan and the applicable award agreement.

2011 Long-Term Incentive Plan

Our board of directors adopted the 2011 Plan on August 22, 2011, and our stockholders approved it on August 23, 2011. The 2011 Plan was subsequently amended on multiple occasions to increase the number of shares issuable thereunder. The 2011 Plan provides for the grant of ISOs, NSOs, and, restricted stock. As of December 31, 2020, options to purchase _____ shares of our common stock at a weighted-average exercise price per share of \$ _____ remained outstanding under the 2011 Plan. Following this offering and in connection with the effectiveness of our 2021 Plan, the 2011 Plan will terminate and no further awards will be granted under the 2011 Plan. However, all outstanding awards under the 2011 Plan will continue to be governed by their existing terms under the 2011 Plan.

Administration. Our board of directors, or a committee thereof appointed by our board of directors, has the authority to administer the 2011 Plan and grant awards thereunder. The administrator's authority includes the authority to select the service providers to whom awards will be granted under the 2011 Plan, the number of shares to be subject to those awards, and the terms and conditions of those awards. In addition, the administrator has the authority to construe and interpret the 2011 Plan and to adopt rules for the administration, interpretation, and application of the 2011 Plan that are consistent with the terms of the 2011 Plan.

Awards. The 2011 Plan provides that the administrator may grant or issue options, including ISOs and NSOs, and restricted stock to employees, officers, directors, and consultants; provided that only employees may be granted ISOs.

- **Stock Options.** The 2011 Plan provides for the grant of options, including ISOs or NSOs. Each option grant will be governed by an option award agreement subject to the 2011 Plan. ISOs may be granted only to employees. NSOs may be granted to employees, officers, directors, and consultants. The exercise price of ISOs granted to employees who at the time of grant own stock representing more than 10% of the voting power of all classes of our common stock may not be less than 110% of the fair market value per share of our common stock on the date of grant, and the exercise price of ISOs granted to any other employees may not be less than 100% of the fair market value per share of our common stock on the date of grant. The exercise price of NSOs to employees, officers, directors or consultants may not be less than 100% of the fair market value per share of our common stock on the date of grant.
- **Restricted Stock Awards.** The 2011 Plan provides for the grant of restricted stock awards. Each restricted stock award will be governed by a restricted stock award agreement subject to the 2011 Plan, which will, among other things, detail the restrictions on transferability, risk of forfeiture and other restrictions the administrator approves. In general, restricted stock may not be sold, transferred, pledged, hypothecated, margined, or otherwise encumbered until restrictions are removed or expire. Holders of restricted stock, unlike recipients of other equity awards, will have voting rights and will have the right to receive dividends, if any, prior to the time when the restrictions lapse.

Adjustments of Awards. In the event of any change in or other event that occurs with respect to the common stock without receipt of consideration by the Company (through merger, consolidation,

reorganization, recapitalization, stock dividends, stock splits or other similar transactions), the administrator will make adjustments to the number and class of shares available for issuance under the 2011 Plan, the number and class of shares issuable pursuant to ISOs, and the number, class and price per share of outstanding awards.

Change in Control. In the event of certain corporate transactions, including the sale of substantially all of the Company's assets, a sale or disposition of 90% of the outstanding securities of the Company, and certain mergers, consolidations and similar transactions, unless otherwise stated in an award agreement, the administrator will provide for one or more of the following actions: assumption or substitution of outstanding awards; assignment of reacquisition or repurchase rights held by the Company; or cash-out of outstanding awards. Awards may also be subject to additional acceleration in connection with a change in control pursuant to an award agreement or other written agreement with the Company. In the event the acquirer refuses to assume or replace outstanding awards, prior to the consummation of such transaction, awards issued under the 2011 Plan and held by active service providers will be subject to accelerated vesting such that 100% of such awards will become vested and exercisable, and any repurchase rights thereon shall lapse.

Amendment and Termination. Our board of directors may amend, suspend or terminate the 2011 Plan at any time, but no amendment will impair the rights of a holder of an outstanding award without the holder's consent. Except with respect to certain capitalization adjustments, an amendment of the 2011 Plan shall be subject to the approval of our stockholders to the extent required by applicable law. Following this offering and in connection with the effectiveness of our 2021 Plan, the 2011 Plan will terminate and no further awards will be granted under the 2011 Plan.

2021 Employee Stock Purchase Plan

We intend to adopt the ESPP, which will be effective on the date immediately prior to the date the registration statement relating to this offering becomes effective. The ESPP is designed to allow our eligible employees to purchase shares of our common stock, at periodic intervals, with their accumulated payroll deductions. The ESPP is intended to qualify under Section 423 of the Code. The material terms of the ESPP, as it is currently contemplated, are summarized below.

Administration. Subject to the terms and conditions of the ESPP, our compensation committee will administer the ESPP. Our compensation committee can delegate administrative tasks under the ESPP to the services of an agent and/or employees to assist in the administration of the ESPP. The administrator will have the discretionary authority to administer and interpret the ESPP. Interpretations and constructions of the administrator of any provision of the ESPP or of any rights thereunder will be conclusive and binding on all persons. We will bear all expenses and liabilities incurred by the ESPP administrator.

Share Reserve. The maximum number of our shares of our common stock which will be authorized for sale under the ESPP is equal to the sum of (i) _____ shares of common stock and (ii) an annual increase on the first day of each fiscal year beginning in 2021 and ending in 2030, equal to the lesser of (A) _____ % of the shares of common stock outstanding (on an as converted basis) on the last day of the immediately preceding fiscal year and (B) such number of shares of common stock as determined by our board of directors; provided, however, no more than _____ shares of our common stock may be issued under the ESPP. The shares reserved for issuance under the ESPP may be authorized but unissued shares or reacquired shares.

Eligibility. Employees eligible to participate in the ESPP for a given offering period generally include employees who are employed by us or one of our subsidiaries on the first day of the offering period. Our employees (and, if applicable, any employees of our subsidiaries) who customarily work

[Table of Contents](#)

less than five months in a calendar year or are customarily scheduled to work less than 20 hours per week will not be eligible to participate in the ESPP. Finally, an employee who owns (or is deemed to own through attribution) 5% or more of the combined voting power or value of all our classes of stock or of one of our subsidiaries will not be allowed to participate in the ESPP.

Participation. Employees will enroll under the ESPP by completing a payroll deduction form permitting the deduction from their compensation of at least 1% of their compensation but not more than % of their compensation. Such payroll deductions may be expressed as either a whole number percentage or a fixed dollar amount, and the accumulated deductions will be applied to the purchase of shares on each purchase date. However, a participant may not purchase more than shares in each offering period and may not accrue the right to purchase shares of common stock at a rate that exceeds \$25,000 in fair market value of shares of our common stock (determined at the time the option is granted) for each calendar year the option is outstanding (as determined in accordance with Section 423 of the Code). The ESPP administrator has the authority to change these limitations for any subsequent offering period.

Offering. Under the ESPP, participants are offered the option to purchase shares of our common stock at a discount during a series of successive offering periods, the duration and timing of which will be determined by the ESPP administrator. However, in no event may an offering period be longer than 27 months in length.

The option purchase price will be the lower of 85% of the closing trading price per share of our common stock on the first trading date of an offering period in which a participant is enrolled or 85% of the closing trading price per share on the purchase date, which will occur on the last trading day of each offering period.

Unless a participant has previously canceled his or her participation in the ESPP before the purchase date, the participant will be deemed to have exercised his or her option in full as of each purchase date. Upon exercise, the participant will purchase the number of whole shares that his or her accumulated payroll deductions will buy at the option purchase price, subject to the participation limitations listed above.

A participant may cancel his or her payroll deduction authorization at any time prior to the end of the offering period. Upon cancellation, the participant will have the option to either (i) receive a refund of the participant's account balance in cash without interest or (ii) exercise the participant's option for the current offering period for the maximum number of shares of common stock on the applicable purchase date, with the remaining account balance refunded in cash without interest. Following at least one payroll deduction, a participant may also decrease (but not increase) his or her payroll deduction authorization once during any offering period. If a participant wants to increase or decrease the rate of payroll withholding, he or she may do so effective for the next offering period by submitting a new form before the offering period for which such change is to be effective.

A participant may not assign, transfer, pledge or otherwise dispose of (other than by will or the laws of descent and distribution) payroll deductions credited to a participant's account or any rights to exercise an option or to receive shares of our common stock under the ESPP, and during a participant's lifetime, options in the ESPP shall be exercisable only by such participant. Any such attempt at assignment, transfer, pledge or other disposition will not be given effect.

Adjustments upon Changes in Recapitalization, Dissolution, Liquidation, Merger or Asset Sale. In the event of any increase or decrease in the number of issued shares of our common stock resulting from a stock split, reverse stock split, stock dividend, combination or reclassification of the common stock, or any other increase or decrease in the number of shares of common stock effected

[Table of Contents](#)

without receipt of consideration by us, we will proportionately adjust the aggregate number of shares of our common stock offered under the ESPP, the number and price of shares which any participant has elected to purchase under the ESPP and the maximum number of shares which a participant may elect to purchase in any single offering period. If there is a proposal to dissolve or liquidate us, then the ESPP will terminate immediately prior to the consummation of such proposed dissolution or liquidation, and any offering period then in progress will be shortened by setting a new purchase date to take place before the date of our dissolution or liquidation. We will notify each participant of such change in writing at least 10 business days prior to the new exercise date. If we undergo a merger with or into another corporation or sell all or substantially all of our assets, each outstanding option will be assumed or an equivalent option substituted by the successor corporation or the parent or subsidiary of the successor corporation. If the successor corporation refuses to assume the outstanding options or substitute equivalent options, then any offering period then in progress will be shortened by setting a new purchase date to take place before the date of our proposed sale or merger. We will notify each participant of such change in writing at least 10 business days prior to the new exercise date.

Amendment and Termination. Our board of directors may amend, suspend or terminate the ESPP at any time. However, the board of directors may not amend the ESPP without obtaining stockholder approval within 12 months before or after such amendment to the extent required by applicable laws.

Director Compensation

We have not historically maintained a formal non-employee director compensation program. However, in 2020, we paid each of Charles “Chuck” Kane, Merline Saintil, and Barbara Yastine an annual retainer of \$ for their service to us. We also paid Mr. Kane an additional \$ retainer for his service as chair of our audit committee. In 2020, in connection with their commencement of service with us, we also granted stock options to Ms. Saintil and Ms. Yastine. Additionally we provide reimbursement to our non-employee directors for their reasonable expenses incurred in attending meetings of our board of directors and its committees. Mr. Hansen receives no additional compensation for his service as director. His compensation as our Chief Executive Officer is set forth in the Summary Compensation Table above.

2020 Director Compensation Table

The following table sets forth all of the compensation awarded to or earned by or paid to our non-employee directors during 2020.

Name	Fees Earned or Paid in Cash (\$)	Option Awards \$(1)	All Other Compensation (\$)	Total (\$)
Brian Smith				
Todd Clark				
Charles “Chuck” Kane				
Gene Lockhart				
Steve Mitchell				
Gary Nelson				
Raphael Osnoss				
Merline Saintil				
Barbara Yastine				

- (1) Amounts reported represent the aggregate grant date fair value of stock options granted to non-employee directors computed in accordance with FASB ASC Topic 718. Assumptions used

[Table of Contents](#)

in the calculation of these amounts are included in Note 2 and Note 9 to our consolidated financial statements included in this prospectus. As of December 31, 2020, our non-employee directors held the following outstanding options:

<u>Name</u>	<u>Options Outstanding at Year End</u>
Brian Smith	
Todd Clark	
Charles “Chuck” Kane	
Gene Lockhart	
Steve Mitchell	
Gary Nelson	
Raphael Osnoss	
Merline Saintil	
Barbara Yastine	

We intend to approve and implement a compensation program for our non-employee directors to be effective in connection with the consummation of this offering.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

The following includes a summary of transactions since January 1, 2018 and any currently proposed transactions to which we were or are expected to be a participant in which (1) the amount involved exceeded or will exceed \$120,000, and (2) any of our directors, executive officers or holders of more than 5% of our capital stock, or any affiliate or member of the immediate family of the foregoing persons, had or will have a direct or indirect material interest, other than compensation and other arrangements that are described under the section titled “Executive and Director Compensation.”

Redeemable Convertible Preferred Stock Financings

Series D Redeemable Convertible Preferred Stock Financing

In December 2017, we entered into a Series D redeemable convertible preferred stock purchase agreement with various investors, pursuant to which we issued in December 2017 and December 2018 an aggregate of 11,423,349 shares of Series D redeemable convertible preferred stock at \$6.1278 per share for gross proceeds of \$70.0 million.

The table below sets forth the number of shares of our Series D redeemable convertible preferred stock purchased by our executive officers, directors, holders of more than 5% of our capital stock and their affiliated entities or immediate family members.

Name	Series D Redeemable Convertible Preferred Stock (#)	Aggregate Cash Purchase Price (\$)
General Atlantic (AL), L.P.(1)	10,933,777	\$ 66,999,998.71

- (1) General Atlantic (AL), L.P. (“General Atlantic”) became a beneficial owner of more than 5% of our outstanding capital stock upon the initial closing of the Series D redeemable convertible preferred stock financing. For additional information regarding General Atlantic and its equity holdings, see “Principal Stockholders.” Mr. Raphael Osnoss and Mr. H. Eugene Lockhart are currently members of our board of directors and were designated to serve as members of our board of directors by General Atlantic. Mr. Osnoss is a principal at General Atlantic.

Series E Redeemable Convertible Preferred Stock Financing

Between May 2019 and September 2020, we entered into Series E redeemable convertible preferred stock purchase agreements with various investors, pursuant to which we issued an aggregate of 12,726,367 shares of Series E redeemable convertible preferred stock at \$8.50 per share for gross proceeds of \$108.2 million.

The table below sets forth the number of shares of our Series E redeemable convertible preferred stock purchased by our executive officers, directors, holders of more than 5% of our capital stock and their affiliated entities or immediate family members.

Name(1)	Series E Redeemable Convertible Preferred Stock (#)	Aggregate Cash Purchase Price (\$)
General Atlantic (AL), L.P.(2)	7,521,011	\$ 63,928,593.50
S3 Ventures Fund III, L.P.(3)	1,501,196	\$ 12,760,166.00
Argonaut Private Equity II, LLC(4)	1,520,763	\$ 12,926,485.50
Brian R. Smith(3)	137,215	\$ 1,166,327.50
Charles Plauche, Jr.(5)	11,764(6)	\$ 99,994.00

- (1) For additional information regarding these stockholders and their equity holdings, see “Principal Stockholders.”
- (2) General Atlantic beneficially owned more than 5% of our outstanding capital stock at the time of the Series E redeemable convertible preferred stock financing. Messrs. Osnoss and Lockhart are currently, and were at the time of the Series E redeemable convertible preferred stock financing, members of our board of directors. Messrs. Osnoss and Lockhart were designated to serve as members of our board of directors by General Atlantic. Mr. Osnoss is a principal at General Atlantic.
- (3) S3 Ventures Fund III, L.P. (“S3”) beneficially owned more than 5% of our outstanding capital stock at the time of the Series E redeemable convertible preferred stock financing. Mr. Brian R. Smith is currently, and was at the time of the Series E redeemable convertible preferred stock financing, a member of our board of directors. Mr. Smith was designated to serve as a member of our board of directors by S3. Mr. Smith is the founder and Managing Director at S3.
- (4) Argonaut Private Equity II, LLC (“Argonaut”) beneficially owned more than 5% of our outstanding capital stock at the time of the Series E redeemable convertible preferred stock financing. Mr. Steve Mitchell is currently, and was at the time of the Series E redeemable convertible preferred stock financing, a member of our board of directors. Mr. Mitchell was designated to serve as a member of our board of directors by Argonaut. Mr. Mitchell is the Chief Executive Officer of Argonaut.
- (5) Mr. Charles Plauche was at the time of the Series E redeemable convertible preferred stock financing a member of our board of directors. Mr. Plauche was designated to serve as a member of our board of directors by S3.
- (6) Of the shares listed, 5,106 are held in an IRA account in Mr. Plauche’s name.

Series F Redeemable Convertible Preferred Stock Financing

In September 2020, we entered into a Series F redeemable convertible preferred stock purchase agreement with various investors, pursuant to which we issued an aggregate of 8,750,000 shares of Series F redeemable convertible preferred stock at \$16.00 per share for gross proceeds of \$140.0 million.

The table below sets forth the number of shares of our Series F redeemable convertible preferred stock purchased by our executive officers, directors, holders of more than 5% of our capital stock and their affiliated entities or immediate family members.

<u>Name</u>	<u>Series F Redeemable Convertible Preferred Stock (#)</u>	<u>Aggregate Cash Purchase Price (\$)</u>
D1 Master Holdco I LLC(1)	4,375,000	\$ 70,000,000.00

- (1) D1 Master Holdco I LLC (“D1”) became a beneficial owner of more than 5% of our outstanding capital stock upon the closing of the Series F redeemable convertible preferred stock financing. For additional information regarding D1 and its equity holdings, see “Principal Stockholders.”

Series B Dividend

In connection with the completion of this offering, we plan to pay an aggregate of \$ million in accumulated dividends payable to holders of our Series B redeemable convertible preferred stock. As a result of the anticipated payment of the Series B Dividend, certain holders of 5% or more of our capital stock and their affiliated entities or immediate family members who are holders of our Series B redeemable convertible preferred stock are expected to receive approximately \$ million of the net proceeds of this offering. Mr. Todd Clark has served as President and Chief

Executive Officer of CU Cooperative since 2016, and is a member of our board of directors and was designated to serve as a member of our board of directors by CU Cooperative. CU Cooperative is a holder of our Series B redeemable convertible preferred stock and, as a result of the anticipated payment of the Series B Dividend, is expected to receive approximately \$ _____ million of the net proceeds of this offering.

Investors' Rights Agreement

We are party to an amended and restated investors' rights agreement (the "IRA") with certain holders of shares of our common stock issuable upon the conversion of our outstanding Series A, Series B, Series C, Series D, Series E and Series F redeemable convertible preferred stock and warrants to purchase shares of our redeemable convertible preferred stock (the "Registrable Securities"), including certain of our directors, holders of more than 5% of our capital stock and entities with which certain of our directors are affiliated.

Stockholders party to the IRA possess certain rights with respect to the registration of the Registrable Securities under the Securities Act. For a more detailed description of these registration rights, see "Description of Capital Stock—Registration Rights." Pursuant to the IRA, the stockholders party to the IRA also possess preemptive rights to purchase a number of our securities up to their proportionate interest of any new securities that we may issue, subject to certain exceptions. These preemptive rights will terminate in connection with the completion of this offering and will not apply with respect to the shares of common stock issued in this offering.

Voting Agreement

We are party to an amended and restated voting agreement (the "Voting Agreement") with the holders of shares of our common stock and common stock issuable upon the conversion of our outstanding Series A, Series B, Series C, Series D, Series E and Series F redeemable convertible preferred stock, including certain of our directors, holders of more than 5% of our capital stock and entities with which certain of our directors are affiliated.

Pursuant to the Voting Agreement, each of General Atlantic and S3 has the right to designate two members to be elected to our board of directors, and each of CU Cooperative Systems, Inc. and Argonaut has the right to designate one member to be elected to our board of directors. The Voting Agreement will terminate by its terms in connection with the completion of this offering and none of our stockholders will have any continuing rights regarding the election or designation of members of our board of directors following this offering.

First Refusal and Co-Sale Agreement

We are party to an amended and restated first refusal and co-sale agreement with certain holders of our common stock and redeemable convertible preferred stock, including certain of our directors and executive officers, holders of more than 5% of our capital stock and entities with which certain of our directors are affiliated. This agreement provides for rights of first refusal, rights of first offer and co-sale relating to our securities held by certain parties to the agreement. The amended and restated first refusal and co-sale agreement will terminate immediately prior to the completion of this offering.

Certain Transactions

A sales executive is the brother-in-law of Stephen Bohanon, our Co-Founder and Chief Strategy and Sales Officer. The sales executive's total compensation for 2018, 2019 and 2020 was in excess of \$120,000 each year.

For the years ended December 31, 2019 and 2020, CU Cooperative, an investor who is also a vendor, was paid fees of \$4.4 million and \$ million, which relates to services resold to Alkami clients. As of December 31, 2019 and 2020, accounts payable included amounts due to CU Cooperative of \$0.3 million and \$ million. Mr. Todd Clark, who has served as President and Chief Executive Officer of CU Cooperative since 2016, is a member of our board of directors and was designated to serve as a member of our board of directors by CU Cooperative Systems. CU Cooperative held 5% or more of our capital stock as of December 31, 2019.

Executive Officer and Director Compensation

Please see “Executive and Director Compensation” for information regarding the compensation of our directors and executive officers, including the grant of options.

Employment Agreements

We have entered into offer letter agreements with our executive officers that, among other things, provide for certain compensatory and change in control benefits, as well as severance benefits. For a description of these agreements with our named executive officers, see the section titled “Executive and Director Compensation—Executive Employment Agreements.”

Indemnification Agreements

We have entered into indemnification agreements with our current directors and certain of our executive officers, and intend to enter into new indemnification agreements with each of our current directors and executive officers before the completion of this offering. Our amended and restated certificate of incorporation and our amended and restated bylaws will provide that we will indemnify our directors and officers to the fullest extent permitted by applicable law. See the section titled “Management—Limitations on Liability and Indemnification Matters.”

Policies and Procedures for Related Party Transactions

Prior to the completion of this offering, our board of directors will adopt a written related person transaction policy, to be effective upon the completion of this offering, setting forth the policies and procedures for the review and approval or ratification of related person transactions. This policy will cover, with certain exceptions set forth in Item 404 of Regulation S-K under the Securities Act, any transaction, arrangement or relationship, or any series of similar transactions, arrangements or relationships in which we were or are to be a participant, where the amount involved exceeds \$120,000 and a related person had or will have a direct or indirect material interest, including, without limitation, purchases of goods or services by or from the related person or entities in which the related person has a material interest, indebtedness, guarantees of indebtedness and employment by us of a related person. In reviewing and approving any such transactions, our audit committee is tasked to consider all relevant facts and circumstances, including, but not limited to, whether the transaction is on terms comparable to those that could be obtained in an arm's length transaction with an unrelated third party and the extent of the related person's interest in the transaction. All of the transactions described in this section occurred prior to the adoption of this policy.

PRINCIPAL STOCKHOLDERS

The following table sets forth information with respect to the beneficial ownership of our common stock, as of 2020, and as adjusted to reflect our sale of common stock in this offering, by:

- each person or group of affiliated persons known by us to beneficially own more than 5% of our common stock;
- each of our named executive officers;
- each of our directors; and
- all of our executive officers and directors as a group.

The number of shares beneficially owned by each stockholder is determined under rules issued by the SEC. Under these rules, a person is deemed to be a “beneficial” owner of a security if that person has or shares voting power or investment power, which includes the power to dispose of or to direct the disposition of such security. Except as indicated in the footnotes below, we believe, based on the information furnished to us, that the individuals and entities named in the table below have sole voting and investment power with respect to all shares of our common stock beneficially owned by them, subject to any applicable community property laws.

Percentage ownership of our common stock before this offering is based on _____ shares of our common stock outstanding as of _____, 2020, after giving effect to the conversion of _____ shares of our redeemable convertible preferred stock into shares of our common stock immediately prior to the completion of this offering. Percentage ownership of our common stock after this offering is based on _____ shares of our common stock outstanding immediately after the completion of this offering, assuming no exercise of the underwriters’ option to purchase additional shares. In computing the number of shares beneficially owned by an individual or entity and the percentage ownership of that person, shares of our common stock subject to options, warrants or other rights held by such person that are currently exercisable or that will become exercisable within 60 days of _____, 2020 are considered outstanding, although these shares are not considered outstanding for purposes of computing the percentage ownership of any other person. Unless noted otherwise, the address of all listed stockholders is 5601 Granite Parkway, Suite 120, Plano, Texas 75024.

- (1) Consists of shares held by General Atlantic (AL), L.P. The limited partners that share beneficial ownership of the shares held by GA AL are the following General Atlantic investment funds (the "GA Funds"): General Atlantic Partners 100, L.P. ("GAP 100"), General Atlantic Partners (Bermuda) EU, L.P. ("GAP Bermuda EU"), General Atlantic Partners (Lux) SCSp ("GAP Lux"), GAP Coinvestments III, LLC ("GAPCO III"), GAP Coinvestments IV, LLC ("GAPCO IV"), GAP Coinvestments V, LLC ("GAPCO V") and GAP Coinvestments CDA, L.P. ("GAPCO CDA"). The general partner of GA AL is General Atlantic (SPV) GP, LLC ("GA SPV"). The general partner of GAP Lux is General Atlantic GenPar, (Lux) ScSp ("GA GenPar Lux") and the general partner of GA GenPar Lux is General Atlantic (Lux) S.à r.l. ("GA Lux"). The general partner of GAP Bermuda EU and the sole shareholder of GA Lux is General Atlantic GenPar (Bermuda), L.P. ("GenPar Bermuda"). GAP (Bermuda) Limited ("GAP (Bermuda) Limited") is the general partner of GenPar Bermuda. The general partner of GAP 100 is General Atlantic GenPar, L.P. ("GA GenPar") and the general partner of GA GenPar is General Atlantic LLC ("GA LLC"). GA LLC is the managing member of GAPCO III, GAPCO IV and GAPCO V, the general partner of GAPCO CDA and is the sole member of GA SPV. There are eight members of the Management Committee of GA LLC (the "GA Management Committee"). The members of the GA Management Committee are also the members of the management committee of GAP (Bermuda) Limited. GA LLC, GA GenPar, GAP (Bermuda) Limited, GenPar Bermuda, GA Lux, GA GenPar Lux, GA SPV and the GA Funds (collectively, the "GA Group") are a "group" within the meaning of Rule 13d-5 of the Securities Exchange Act of 1934, as amended. The mailing address of the foregoing General Atlantic entities (other than GAP Bermuda EU, GAP Lux, GA GenPar Lux, GA Lux, GenPar Bermuda and GAP (Bermuda) Limited) is c/o General Atlantic Service Company, L.P., 55 East 52nd Street, 33rd Floor, New York, NY 10055. The mailing address of GAP Bermuda EU, GenPar Bermuda, and GAP (Bermuda) Limited is c/o Conyers Client Services Limited, Clarendon House, 2 Church Street, Hamilton HM 11, Bermuda. The mailing address for GAP Lux, GA GenPar Lux and GA Lux is Luxembourg is 412F, Route d'Esch, L-2086 Luxembourg. Each of the members of the GA Management Committee disclaims beneficial ownership of the shares except to the extent that he has a pecuniary interest therein.
- (2) Consists of shares held by D1 Master Holdco I LLC. D1 Capital Partners L.P. is a registered investment adviser and serves as the investment manager of private investment vehicles and accounts, including D1 Capital Partners Master LP, the sole and managing member of D1 Master Holdco I LLC, and may be deemed to beneficially own the shares of common stock held by D1 Capital Partners Master LP and D1 Master Holdco I LLC. Daniel Sundheim indirectly controls D1 Capital Partners L.P. and may be deemed to beneficially own the shares of common stock held by D1 Capital Partners Master LP and D1 Master Holdco I LLC. The business address of each of D1 Capital Partners Master LP, D1 Master Holdco I LLC, D1 Capital Partners L.P. and Daniel Sundheim is 9 West 57th Street, 36th Floor, New York, New York 10019.
- (3) Mr. Osnoss disclaims beneficial ownership of all such shares except to the extent that he has a pecuniary interest therein.

DESCRIPTION OF CAPITAL STOCK

The following description of our capital stock and provisions of our amended and restated certificate of incorporation and amended and restated bylaws are summaries. You should also refer to the amended and restated certificate of incorporation, the amended and restated bylaws and the fourth amended and restated investors' rights agreement, which are filed as exhibits to the registration statement of which this prospectus is a part.

General

Upon the completion of this offering and the filing of our amended and restated certificate of incorporation, our authorized capital stock will consist of _____ shares of common stock, par value \$0.001 per share, and _____ shares of preferred stock, par value \$0.001 per share.

Common Stock

Outstanding Shares

As of December 31, 2020, we had _____ shares of common stock outstanding, held of record by _____ stockholders, assuming the conversion of all of our outstanding shares of redeemable convertible preferred stock into _____ shares of our common stock immediately prior to the completion of this offering. After giving effect to the issuance of _____ shares of our common stock in this offering, there will be _____ shares of our common stock outstanding upon the completion of this offering.

Voting Rights

Each holder of common stock is entitled to one vote for each share on all matters submitted to a vote of the stockholders, including the election of directors. Our stockholders do not have cumulative voting rights in the election of directors. Accordingly, holders of a majority of the voting shares are able to elect all of the directors.

Dividends

Subject to preferences that may be applicable to any then outstanding preferred stock, holders of our common stock are entitled to receive ratably any dividends that our board of directors may declare out of funds legally available.

Liquidation

In the event of our liquidation, dissolution or winding up, holders of our common stock will be entitled to share ratably in the net assets legally available for distribution to stockholders after the payment of all of our debts and other liabilities, subject to the satisfaction of any liquidation preference granted to the holders of any then outstanding shares of preferred stock.

Rights and Preferences

Holders of our common stock have no preemptive, conversion or subscription rights, and there are no redemption or sinking fund provisions applicable to our common stock. The rights, preferences and privileges of the holders of our common stock are subject to, and may be adversely affected by, the rights of the holders of shares of any series of our preferred stock that we may designate and issue in the future.

Preferred Stock

Upon the completion of this offering, all of our currently outstanding shares of redeemable convertible preferred stock will convert into common stock and we will not have any preferred shares outstanding. Immediately prior to the completion of this offering, our certificate of incorporation will be amended and restated to delete all references to such shares of redeemable convertible preferred stock. Under the amended and restated certificate of incorporation, our board of directors will have the authority, without further action by the stockholders, to issue up to _____ shares of preferred stock in one or more series, to establish from time to time the number of shares to be included in each such series, to fix the rights, preferences and privileges of the shares of each wholly unissued series and any qualifications, limitations or restrictions thereon and to increase or decrease the number of shares of any such series, but not below the number of shares of such series then outstanding.

Our board of directors may authorize the issuance of preferred stock with voting or conversion rights that could adversely affect the voting power or other rights of the holders of common stock. The issuance of preferred stock, while providing flexibility in connection with possible acquisitions and other corporate purposes, could, among other things, have the effect of delaying, deferring or preventing a change in control of our company that may otherwise benefit holders of our common stock and may adversely affect the market price of the common stock and the voting and other rights of the holders of common stock. We have no current plans to issue any shares of preferred stock.

Stock Options

As of December 31, 2020, _____ shares of our common stock were issuable upon the exercise of outstanding stock options, at a weighted-average exercise price of \$ _____ per share. For additional information regarding terms of our equity incentive plans, see the section titled “Executive and Director Compensation—Equity Incentive Plans.”

Warrants

The following table sets forth information about outstanding warrants to purchase shares of our stock as of December 31, 2020. Immediately prior to the completion of this offering, the warrants to purchase shares of our redeemable convertible preferred stock will convert into warrants to purchase shares of our common stock based on the applicable conversion ratio.

<u>Class of Stock Underlying</u>	<u>Issue Date</u>	<u>Number of Shares of Redeemable Convertible Preferred Stock Exercisable Prior to this Offering</u>	<u>Number of Shares of Common Stock Underlying Warrants on As-Converted Basis</u>	<u>Exercise Price Per Share</u>	<u>Expiration Date</u>

Registration Rights

Upon the completion of this offering and subject to the lock-up agreements entered into in connection with this offering and federal securities laws, certain holders of shares of our common stock, including those shares of our common stock that will be issued upon the conversion of our redeemable convertible preferred stock in connection with this offering, and holders of warrants to purchase shares of our redeemable convertible preferred stock that will be converted into shares of our common stock in connection with this offering will initially be entitled to certain rights with respect to registration of such shares under the Securities Act. These shares are referred to as registrable securities. The holders of these registrable securities possess registration rights pursuant to the terms of the IRA and are described in additional detail below. The registration of shares of our common stock pursuant to the exercise of the registration rights described below would enable the holders to trade these shares without restriction under the Securities Act when the applicable registration statement is declared effective. We will pay the registration expenses, other than underwriting discounts and commissions, of the shares registered pursuant to the demand, piggyback and Form S-3 registrations described below.

Generally, in an underwritten offering, the managing underwriter, if any, has the right, subject to specified conditions and limitations, to limit the number of shares the holders may include. The demand, piggyback and Form S-3 registration rights described below will terminate, with respect to each stockholder, on the date, on or after the completion of this offering, on which (i) all registrable shares held by such stockholder may be sold without volume or manner of sale limitations under Rule 144 of the Securities Act during any three-month period and (ii) we are subject to the reporting requirements of the Exchange Act.

Demand Registration Rights

Upon the completion of this offering, holders of up to _____ shares of our common stock issuable upon conversion of our outstanding redeemable convertible preferred stock will be entitled to certain demand registration rights. Beginning six months following the effectiveness of the registration statement of which this prospectus is a part, (i) General Atlantic and its affiliates, which hold shares of redeemable convertible preferred stock convertible into _____ shares of our common stock, may, on not more than one occasion request that we register all or a portion of its registrable securities, subject to certain specified exceptions, and (ii) investors holding a majority of the registrable securities (excluding any registrable securities held by General Atlantic in the event that General Atlantic does not join the request) may, on not more than three occasions, request that we register all or a portion of their shares, subject to certain specified exceptions, so long as either (A) at least 20% of the then outstanding registrable securities (excluding, in the case of (ii), any registrable securities held by General Atlantic) shall be included in the registration or (B) the aggregate offering price to the public, net of underwriting discounts and commissions, would exceed \$20.0 million. If such holders (including General Atlantic) exercise their demand registration rights, then holders of _____ shares of our common stock issuable upon conversion of our outstanding redeemable convertible preferred stock will be entitled to register their shares, subject to specified conditions and limitations in the corresponding offering.

Piggyback Registration Rights

In connection with this offering, holders of up to _____ shares of our common stock issuable upon conversion of our outstanding redeemable convertible preferred stock are entitled to their rights to notice of this offering and to include their shares of registrable securities in this offering. The requisite percentage of these stockholders are expected to waive all such stockholders' rights to notice of this offering and to include their shares of registrable securities in this offering. In the event that we propose

to register any of our securities under the Securities Act in another offering, either for our own account or for the account of other security holders, the holders of registrable securities will be entitled to certain “piggyback” registration rights allowing them to include their shares in such registration, subject to specified conditions and limitations.

S-3 Registration Rights

Upon the completion of this offering, the holders of up to _____ shares of our common stock issuable upon conversion of our outstanding redeemable convertible preferred stock will initially be entitled to certain Form S-3 registration rights. The holders of registrable securities may request that we register all or a portion of their shares on Form S-3 if we are qualified to file a registration statement on Form S-3, subject to specified exceptions. Such request for registration on Form S-3 must cover registrable securities with an aggregate price to the public, net of underwriting discounts and commissions, equal to or exceeding \$5.0 million. The right to have such shares registered on Form S-3 is further subject to other specified conditions and limitations.

Anti-Takeover Provisions of Delaware Law

Section 203 of the Delaware General Corporation Law

We are subject to Section 203 of the DGCL, which prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years after the date that such stockholder became an interested stockholder, with the following exceptions:

- before such date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon completion of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction began, excluding for purposes of determining the voting stock outstanding (but not the outstanding voting stock owned by the interested stockholder) those shares owned (i) by persons who are directors and also officers and (ii) employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or
- on or after such date, the business combination is approved by the board of directors and authorized at an annual or special meeting of the stockholders, and not by written consent, by the affirmative vote of at least 66 2/3% of the outstanding voting stock that is not owned by the interested stockholder.

In general, Section 203 defines a “business combination” to include the following:

- any merger or consolidation involving the corporation and the interested stockholder;
- any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested stockholder;
- subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder;
- any transaction involving the corporation that has the effect of increasing the proportionate share of the stock or any class or series of the corporation beneficially owned by the interested stockholder; and

- the receipt by the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits by or through the corporation.

In general, Section 203 defines an “interested stockholder” as an entity or person who, together with the person’s affiliates and associates, beneficially owns, or within three years prior to the time of determination of interested stockholder status did own, 15% or more of the outstanding voting stock of the corporation.

The statute could prohibit or delay mergers or other takeover or change in control attempts and, accordingly, may discourage attempts to acquire us even though such a transaction may offer our stockholders the opportunity to sell their stock at a price above the prevailing market price.

Anti-Takeover Provisions of Our Amended and Restated Certificate of Incorporation and Amended and Restated Bylaws

Our amended and restated certificate of incorporation and amended and restated bylaws, as they will be in effect immediately prior to the completion of this offering, will contain provisions that may delay, defer or discourage another party from acquiring control of us. We expect that these provisions, which are summarized below, will discourage coercive takeover practices or inadequate takeover bids. These provisions are also designed to encourage persons seeking to acquire control of us to first negotiate with our board of directors, which we believe may result in an improvement of the terms of any such acquisition in favor of our stockholders. However, they also give our board of directors the power to discourage acquisitions that some stockholders may favor. See “Risk Factors—Risks Related to This Offering and Ownership of Our Common Stock—Anti-takeover provisions contained in our charter documents and Delaware law could prevent a takeover that stockholders consider favorable and could also reduce the market price of our stock.”

Authorized but Unissued Shares

The authorized but unissued shares of our common stock and our preferred stock are available for future issuance without stockholder approval, subject to any limitations imposed by the listing standards of . These additional shares may be used for a variety of corporate finance transactions, acquisitions and employee benefit plans. The existence of authorized but unissued and unreserved common stock and preferred stock could make more difficult or discourage an attempt to obtain control of us by means of a proxy contest, tender offer, merger or otherwise.

Classified Board of Directors

Our amended and restated certificate of incorporation will provide that our board of directors will be divided into three classes, with the classes as nearly equal in number as possible and each class serving three-year staggered terms. Only one class of directors will be elected at each annual meeting of our stockholders, with the other classes continuing for the remainder of their respective three-year terms. Because our stockholders do not have cumulative voting rights, our stockholders holding a majority of the shares of our common stock outstanding will be able to elect all of our directors. Subject to the rights of any series of preferred stock to elect directors, directors may only be removed for cause, which removal may be effected, subject to any limitation imposed by law, by the holders of at least 66 2/3% of the voting power of all of our then-outstanding shares of the capital stock entitled to vote generally at an election of directors. The authorized number of directors may only be changed by resolution of our board of directors. All vacancies on our board of directors, including newly created directorships, may, except as required by law, be filled by the affirmative vote of a majority vote of directors then in office, even if less than a quorum. See “Management.” These provisions may have the effect of deferring, delaying or discouraging hostile takeovers or changes in control of us or our management.

Stockholder Action; Special Meeting of Stockholders

Our amended and restated certificate of incorporation will provide that our stockholders will not be able to take action by written consent for any matter and may only take action at annual or special meetings. As a result, a holder controlling a majority of our capital stock would not be able to amend our amended and restated bylaws or remove directors without holding a meeting of our stockholders called in accordance with our amended and restated bylaws, unless previously approved by our board of directors. Our amended and restated certificate of incorporation will further provide that special meetings of our stockholders may be called only by a majority of our board of directors, thus limiting the ability of a stockholder to call a special meeting. These provisions might delay the ability of our stockholders to force consideration of a proposal or for stockholders controlling a majority of our capital stock to take any action, including the removal of directors.

Advance Notice Requirements for Stockholder Proposals and Director Nominations

In addition, our amended and restated bylaws will establish an advance notice procedure for stockholder proposals to be brought before an annual meeting of stockholders, including proposed nominations of candidates for election to our board of directors. In order for any matter to be “properly brought” before a meeting, a stockholder will have to comply with advance notice and duration of ownership requirements and provide us with certain information. Stockholders at an annual meeting may only consider proposals or nominations specified in the notice of meeting or brought before the meeting by or at the direction of our board of directors or by a qualified stockholder of record on the record date for the meeting who is entitled to vote at the meeting and who has delivered timely written notice in proper form to our secretary of the stockholder’s intention to bring such business before the meeting. These provisions could have the effect of delaying stockholder actions that are favored by the holders of a majority of our outstanding voting securities until the next stockholder meeting.

Choice of Forum

Our amended and restated certificate of incorporation and our amended and restated bylaws will provide that: (i) unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if such court does not have subject matter jurisdiction thereof, the federal district court of the State of Delaware) will, to the fullest extent permitted by law, be the sole and exclusive forum for: (A) any derivative action or proceeding brought on behalf of the Company, (B) any action asserting a claim for or based on a breach of a fiduciary duty owed by any of our current or former director, officer, other employee, agent or stockholder to the Company or our stockholders, including without limitation a claim alleging the aiding and abetting of such a breach of fiduciary duty, (C) any action asserting a claim against the Company or any of our current or former director, officer, employee, agent or stockholder arising pursuant to any provision of the DGCL or our certificate of incorporation or bylaws or as to which the DGCL confers jurisdiction on the Court of Chancery of the State of Delaware, or (D) any action asserting a claim related to or involving the Company that is governed by the internal affairs doctrine; (ii) unless we consent in writing to the selection of an alternative forum, the federal district courts of the United States of America will, to the fullest extent permitted by law, be the sole and exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act and the rules and regulations promulgated thereunder; (iii) any person or entity purchasing or otherwise acquiring or holding any interest in shares of capital stock of the Company will be deemed to have notice of and consented to these provisions; and (iv) failure to enforce the foregoing provisions would cause us irreparable harm, and we will be entitled to equitable relief, including injunctive relief and specific performance, to enforce the foregoing provisions. Nothing in our amended and restated certificate of incorporation or amended and restated bylaws precludes stockholders that assert claims under the Exchange Act from bringing such claims in federal court to the extent that the Exchange Act confers exclusive federal jurisdiction over such claims, subject to applicable law.

Although our amended and restated certificate of incorporation and amended and restated bylaws will contain the choice of forum provision described above, it is possible that a court could find that such a provision is inapplicable for a particular claim or action or that such provision is unenforceable.

Limitation on Liability of Directors and Indemnification

Our amended and restated certificate of incorporation and amended and restated bylaws will limit our directors' and officers' liability to the fullest extent permitted under the DGCL. Specifically, our directors and officers will not be liable to us or our stockholders for monetary damages for any breach of fiduciary duty by a director or officer, except for liability:

- for any breach of the director's or officer's duty of loyalty to us or our stockholders;
- for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law;
- under Section 174 of the DGCL; or
- for any transaction from which a director or officer derives an improper personal benefit.

If the DGCL is amended to authorize corporate action further eliminating or limiting the personal liability of directors or officers, then the liability of our directors and officers shall be eliminated or limited to the fullest extent permitted by the DGCL, as so amended.

The provision regarding indemnification of our directors and officers in our amended and restated certificate of incorporation will generally not limit liability under state or federal securities laws.

Delaware law and our amended and restated certificate of incorporation and amended and restated bylaws will provide that we will, in certain situations, indemnify any person made or threatened to be made a party to a proceeding by reason of that person's former or present official capacity with our company against judgments, penalties, fines, settlements and reasonable expenses, including reasonable attorney's fees. Any person is also entitled, subject to certain limitations, to payment or reimbursement of reasonable expenses in advance of the final disposition of the proceeding. In addition, we are party to certain indemnification agreements pursuant to which we have agreed to indemnify the employees who are party thereto.

The limitation of liability and indemnification provisions in our amended and restated certificate of incorporation and amended and restated bylaws may discourage stockholders from bringing a lawsuit against directors for breach of their fiduciary duty. These provisions may also have the effect of reducing the likelihood of derivative litigation against directors and officers, even though such an action, if successful, might otherwise benefit us and our stockholders. In addition, your investment may be adversely affected to the extent that, in a class action or direct suit, we pay the costs of settlement and damage awards against directors and officers pursuant to these indemnification provisions.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock will be _____.

Listing

We intend to apply to list our common stock for trading on _____ under the symbol "ALKT."

SHARES ELIGIBLE FOR FUTURE SALE

Prior to this offering, there has been no public market for our common stock, and we cannot predict the effect, if any, that market sales of shares of our common stock or the availability of shares of our common stock for sale will have on the market price of our common stock prevailing from time to time. Future sales of our common stock in the public market, or the availability of such shares for sale in the public market, could adversely affect market prices prevailing from time to time. As described below, only a limited number of shares of our common stock will be available for sale shortly after this offering due to contractual and legal restrictions on resale. Nevertheless, sales of our common stock in the public market after such restrictions lapse, or the perception that those sales may occur, could adversely affect the prevailing market price at such time and our ability to raise equity capital in the future.

Lock-Up Agreements

All of our directors and executive officers and the holders of substantially all of our capital stock have entered or will enter into lock-up agreements under which they agree, subject to certain exceptions, not to sell, transfer or dispose of, directly or indirectly, any shares of our common stock or any securities convertible into or exercisable or exchangeable for shares of our common stock for a period of days after the date of this prospectus. Goldman Sachs & Co., LLC, J.P. Morgan Securities LLC and Barclays Capital Inc. may, in their sole discretion, permit our stockholders who are subject to these lock-up agreements to sell shares prior to the expiration of the lock-up agreements. See “Underwriting” for a description of these agreements.

Rule 144

In general, under Rule 144 as currently in effect, once we have been subject to the public company reporting requirements of Section 13 or Section 15(d) of the Exchange Act for at least 90 days, a person who is not deemed to have been one of our affiliates for purposes of the Securities Act at any time during the 90 days preceding a sale and who has beneficially owned the shares of our common stock proposed to be sold for at least six months is entitled to sell those shares without complying with the manner of sale, volume limitation or notice provisions of Rule 144, subject to compliance with the public information requirements of Rule 144. If such a person has beneficially owned the shares of our common stock proposed to be sold for at least one year, including the holding period of any prior owner other than our affiliates, then that person would be entitled to sell those shares of our common stock without complying with any of the requirements of Rule 144.

In general, under Rule 144, as currently in effect, our affiliates or persons selling shares of our common stock on behalf of our affiliates are entitled to sell upon expiration of the lock-up agreements described above, within any three-month period, a number of shares of our common stock that does not exceed the greater of:

- 1% of the number of shares of our common stock then outstanding, which will equal approximately _____ shares of our common stock immediately after this offering assuming no exercise of the underwriters' option to purchase additional shares; and
- the average weekly trading volume of our common stock during the four calendar weeks preceding the filing of a notice on Form 144 with respect to that sale.

Sales under Rule 144 by our affiliates or persons selling shares of our common stock on behalf of our affiliates are also subject to certain manner-of-sale provisions and notice requirements and to the availability of current public information about us.

Rule 701

Rule 701 generally allows a stockholder who purchased shares of our capital stock pursuant to a written compensatory plan or contract and who is not deemed to have been an affiliate of our company during the immediately preceding 90 days to sell these shares in reliance upon Rule 144, but without being required to comply with the public information, holding period, volume limitation or notice provisions of Rule 144. Rule 701 also permits affiliates of our company to sell their Rule 701 shares under Rule 144 without complying with the holding period requirements of Rule 144. All holders of Rule 701 shares, however, are required to wait until 90 days after the date of this prospectus before selling those shares pursuant to Rule 701. Moreover, all Rule 701 shares are subject to lock-up agreements with the underwriters as described above and in the section titled “Underwriting” and will not become eligible for sale until the expiration of those agreements.

Registration Rights

The stockholders party to the IRA, who will hold _____ shares of our common stock upon the completion of this offering, are entitled to certain rights with respect to the registration of those shares under the Securities Act. For a description of these registration rights, see “Description of Capital Stock—Registration Rights.” If these shares are registered, in most cases they will be freely tradable with restriction under the Securities Act, and a large number of shares may be sold into the public market.

Registration Statement on Form S-8

We intend to file a registration statement on Form S-8 under the Securities Act promptly after the completion of this offering to register shares of our common stock subject to options, as well as reserved for future issuance, under our equity compensation plans. The registration statement on Form S-8 is expected to become effective immediately upon filing, and shares of our common stock covered by the registration statement will then become eligible for sale in the public market, subject to the Rule 144 limitations applicable to affiliates, vesting restrictions and any applicable lock-up agreements.

MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES TO NON-U.S. HOLDERS

The following discussion is a summary of the material U.S. federal income tax consequences to Non-U.S. Holders (as defined below) of the purchase, ownership and disposition of our common stock issued pursuant to this offering, but does not purport to be a complete analysis of all potential tax effects. The effects of other U.S. federal tax laws, such as estate and gift tax laws, and any applicable state, local or non-U.S. tax laws are not discussed. This discussion is based on the Code, Treasury Regulations promulgated thereunder, judicial decisions, and published rulings and administrative pronouncements of the U.S. Internal Revenue Service, or the IRS, in each case in effect as of the date hereof. These authorities may change or be subject to differing interpretations. Any such change or differing interpretation may be applied retroactively in a manner that could adversely affect a Non-U.S. Holder. We have not sought and will not seek any rulings from the IRS regarding the matters discussed below. There can be no assurance the IRS or a court will not take a contrary position to that discussed below regarding the tax consequences of the purchase, ownership and disposition of our common stock.

This discussion is limited to Non-U.S. Holders that hold our common stock as a “capital asset” within the meaning of Section 1221 of the Code (generally, property held for investment). This discussion does not address all U.S. federal income tax consequences relevant to a Non-U.S. Holder’s particular circumstances, including the impact of the Medicare contribution tax on net investment income or the alternative minimum tax. In addition, it does not address consequences relevant to Non-U.S. Holders subject to special rules, including, without limitation:

- U.S. expatriates and former citizens or long-term residents of the United States;
- persons holding our common stock as part of a hedge, straddle or other risk reduction strategy or as part of a conversion transaction or other integrated investment;
- banks, insurance companies, and other financial institutions;
- brokers, dealers or traders in securities;
- “controlled foreign corporations,” “passive foreign investment companies,” and corporations that accumulate earnings to avoid U.S. federal income tax;
- partnerships or other entities or arrangements treated as partnerships for U.S. federal income tax purposes (and investors therein);
- tax-exempt organizations or governmental organizations;
- persons deemed to sell our common stock under the constructive sale provisions of the Code;
- persons who hold or receive our common stock pursuant to the exercise of any employee stock option or otherwise as compensation;
- tax-qualified retirement plans; and
- “qualified foreign pension funds” as defined in Section 897(l)(2) of the Code and entities all of the interests of which are held by qualified foreign pension funds.

If an entity treated as a partnership for U.S. federal income tax purposes holds our common stock, the tax treatment of a partner in the partnership will depend on the status of the partner, the activities of the partnership and certain determinations made at the partner level. Accordingly, partnerships holding our common stock and the partners in such partnerships should consult their tax advisors regarding the U.S. federal income tax consequences to them.

INVESTORS SHOULD CONSULT THEIR TAX ADVISORS WITH RESPECT TO THE APPLICATION OF THE U.S. FEDERAL INCOME TAX LAWS TO THEIR PARTICULAR SITUATIONS AS WELL AS

ANY TAX CONSEQUENCES OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF OUR COMMON STOCK ARISING UNDER THE U.S. FEDERAL ESTATE OR GIFT TAX LAWS OR UNDER THE LAWS OF ANY STATE, LOCAL OR NON-U.S. TAXING JURISDICTION OR UNDER ANY APPLICABLE INCOME TAX TREATY.

Definition of a Non-U.S. Holder

For purposes of this discussion, a “Non-U.S. Holder” is any beneficial owner of our common stock that is neither a “U.S. person” nor an entity treated as a partnership for U.S. federal income tax purposes. A U.S. person is any person that, for U.S. federal income tax purposes, is or is treated as any of the following:

- an individual who is a citizen or resident of the United States;
- a corporation created or organized under the laws of the United States, any state thereof, or the District of Columbia;
- an estate, the income of which is subject to U.S. federal income tax regardless of its source; or
- a trust that (1) is subject to the primary supervision of a U.S. court and one or more “United States persons” (within the meaning of Section 7701(a)(30) of the Code) have the authority to control substantial decisions of the trust, or (2) has a valid election in effect under applicable U.S. Treasury Regulations to be treated as a United States person for U.S. federal income tax purposes.

Distributions

As described in the section titled “Dividend Policy,” other than the Series B Dividend, we do not currently intend to pay any cash dividends on our capital stock for the foreseeable future. However, if we do make distributions of cash or property on our common stock, such distributions will constitute dividends for U.S. federal income tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. Amounts not treated as dividends for U.S. federal income tax purposes will constitute a return of capital and first be applied against and reduce a Non-U.S. Holder’s adjusted tax basis in its common stock, but not below zero. Any excess will be treated as capital gain and will be treated as described below under “—Sale or Other Taxable Disposition.”

Subject to the discussion below on effectively connected income, dividends paid to a Non-U.S. Holder will be subject to U.S. federal withholding tax at a rate of 30% of the gross amount of the dividends (or such lower rate specified by an applicable income tax treaty, provided the Non-U.S. Holder furnishes a valid IRS Form W-8BEN or W-8BEN-E (or other applicable documentation) certifying qualification for the lower treaty rate). A Non-U.S. Holder that does not timely furnish the required documentation, but that qualifies for a reduced treaty rate, may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS. Non-U.S. Holders should consult their tax advisors regarding their entitlement to benefits under any applicable income tax treaty.

If dividends paid to a Non-U.S. Holder are effectively connected with the Non-U.S. Holder’s conduct of a trade or business within the United States (and, if required by an applicable income tax treaty, the Non-U.S. Holder maintains a permanent establishment in the United States to which such dividends are attributable), the Non-U.S. Holder will be exempt from the U.S. federal withholding tax described above. To claim the exemption, the Non-U.S. Holder must furnish to the applicable withholding agent a valid IRS Form W-8ECI, certifying that the dividends are effectively connected with the Non-U.S. Holder’s conduct of a trade or business within the United States.

Any such effectively connected dividends will be subject to U.S. federal income tax on a net income basis at the rates applicable to United States persons. A Non-U.S. Holder that is a corporation also may be subject to a branch profits tax at a rate of 30% (or such lower rate specified by an applicable income tax treaty) on such effectively connected dividends, as adjusted for certain items. Non-U.S. Holders should consult their tax advisors regarding any applicable tax treaties that may provide for different rules.

Sale or Other Taxable Disposition

Subject to the discussion below regarding backup withholding, a Non-U.S. Holder generally will not be subject to U.S. federal income tax on any gain realized upon the sale or other taxable disposition of our common stock unless:

- the gain is effectively connected with the Non-U.S. Holder's conduct of a trade or business within the United States (and, if required by an applicable income tax treaty, the Non-U.S. Holder maintains a permanent establishment in the United States to which such gain is attributable);
- the Non-U.S. Holder is a nonresident alien individual present in the United States for 183 days or more during the taxable year of the disposition and certain other requirements are met; or
- our common stock constitutes a U.S. real property interest, or USRPI, by reason of our status as a U.S. real property holding corporation, or USRPHC, for U.S. federal income tax purposes at any time within the shorter of the five-year period preceding such disposition or such Non-U.S. Holder's holding period.

Gain described in the first bullet point above generally will be subject to U.S. federal income tax on a net income basis at the rates applicable to United States persons. A Non-U.S. Holder that is a corporation also may be subject to a branch profits tax at a rate of 30% (or such lower rate specified by an applicable income tax treaty) on such effectively connected gain, as adjusted for certain items.

A Non-U.S. Holder described in the second bullet point above will be subject to U.S. federal income tax at a rate of 30% (or such lower rate specified by an applicable income tax treaty) on gain realized upon the sale or other taxable disposition of our common stock, which may be offset by certain U.S.-source capital losses of the Non-U.S. Holder (even though the individual is not considered a resident of the United States), provided the Non-U.S. Holder has timely filed U.S. federal income tax returns with respect to such losses.

With respect to the third bullet point above, we believe we currently are not, and do not anticipate becoming, a USRPHC. Because the determination of whether we are a USRPHC depends, however, on the fair market value of our USRPIs relative to the fair market value of our non-U.S. real property interests and our other business assets, there can be no assurance we currently are not a USRPHC or will not become one in the future. Even if we are or were to become a USRPHC, gain arising from the sale or other taxable disposition of our common stock by a Non-U.S. Holder will not be subject to U.S. federal income tax if our common stock is "regularly traded," as defined by applicable Treasury Regulations, on an established securities market, and such Non-U.S. Holder owned, actually and constructively, 5% or less of our common stock throughout the shorter of the five-year period ending on the date of the sale or other taxable disposition or the Non-U.S. Holder's holding period.

Non-U.S. Holders should consult their tax advisors regarding potentially applicable income tax treaties that may provide for different rules.

Information Reporting and Backup Withholding

Payments of dividends on our common stock will not be subject to backup withholding, provided the Non-U.S. Holder certifies its non-U.S. status, such as by furnishing a valid IRS Form W-8BEN, W-8BEN-E or W-8ECI, or otherwise establishes an exemption. However, information returns are required to be filed with the IRS in connection with any distributions on our common stock paid to the Non-U.S. Holder, regardless of whether any tax was actually withheld. In addition, proceeds of the sale or other taxable disposition of our common stock within the United States or conducted through certain U.S.-related brokers generally will not be subject to backup withholding or information reporting if the applicable withholding agent receives the certification described above or the Non-U.S. Holder otherwise establishes an exemption. Proceeds of a disposition of our common stock conducted through a non-U.S. office of a non-U.S. broker that does not have certain enumerated relationships with the United States generally will not be subject to backup withholding or information reporting.

Copies of information returns that are filed with the IRS may also be made available under the provisions of an applicable treaty or agreement to the tax authorities of the country in which the Non-U.S. Holder resides or is established.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or a credit against a Non-U.S. Holder's U.S. federal income tax liability, provided the required information is timely furnished to the IRS.

Additional Withholding Tax on Payments Made to Foreign Accounts

Withholding taxes may be imposed under Sections 1471 to 1474 of the Code (such Sections commonly referred to as the Foreign Account Tax Compliance Act, or FATCA) on certain types of payments made to non-U.S. financial institutions and certain other non-U.S. entities. Specifically, a 30% withholding tax may be imposed on dividends on, or (subject to the proposed Treasury Regulations discussed below) gross proceeds from the sale or other disposition of, our common stock paid to a "foreign financial institution" or a "non-financial foreign entity" (each as defined in the Code), unless (1) the foreign financial institution undertakes certain diligence and reporting obligations, (2) the non-financial foreign entity either certifies it does not have any "substantial United States owners" (as defined in the Code) or furnishes identifying information regarding each substantial United States owner, or (3) the foreign financial institution or non-financial foreign entity otherwise qualifies for an exemption from these rules. If the payee is a foreign financial institution and is subject to the diligence and reporting requirements in (1) above, it must enter into an agreement with the U.S. Department of the Treasury requiring, among other things, that it undertake to identify accounts held by certain "specified United States persons" or "United States owned foreign entities" (each as defined in the Code), annually report certain information about such accounts, and withhold 30% on certain payments to non-compliant foreign financial institutions and certain other account holders. Foreign financial institutions located in jurisdictions that have an intergovernmental agreement with the United States governing FATCA may be subject to different rules.

Under the applicable Treasury Regulations and administrative guidance, withholding under FATCA generally applies to payments of dividends on our common stock. While withholding under FATCA would have applied also to payments of gross proceeds from the sale or other disposition of our common stock on or after January 1, 2019, proposed Treasury Regulations eliminate FATCA withholding on payments of gross proceeds entirely. Taxpayers generally may rely on these proposed Treasury Regulations until final Treasury Regulations are issued.

Prospective investors should consult their tax advisors regarding the potential application of withholding under FATCA to their investment in our common stock.

UNDERWRITING

The Company and the underwriters named below have entered into an underwriting agreement with respect to the shares being offered. Subject to certain conditions, each underwriter has severally agreed to purchase the number of shares indicated in the following table. Goldman Sachs & Co. LLC, J.P. Morgan Securities LLC and Barclays Capital Inc. are the representatives of the underwriters.

Underwriters	Number of Shares
Goldman Sachs & Co. LLC	
J.P. Morgan Securities LLC	
Barclays Capital Inc.	
Total	

The underwriters are committed to take and pay for all of the shares being offered, if any are taken, other than the shares covered by the option described below unless and until this option is exercised.

The underwriters have an option to buy up to an additional _____ shares from the Company to cover sales by the underwriters of a greater number of shares than the total number set forth in the table above. They may exercise that option for 30 days. If any shares are purchased pursuant to this option, the underwriters will severally purchase shares in approximately the same proportion as set forth in the table above.

The following tables show the per share and total underwriting discounts and commissions to be paid to the underwriters by the Company. Such amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase _____ additional shares.

Paid by the Company

	No Exercise	Full Exercise
Per Share	\$	\$
Total	\$	\$

Shares sold by the underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this prospectus. Any shares sold by the underwriters to securities dealers may be sold at a discount of up to \$ _____ per share from the initial public offering price. After the initial offering of the shares, the representatives may change the offering price and the other selling terms. The offering of the shares by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part.

The Company and its officers, directors, and holders of substantially all of the Company's common stock have agreed with the underwriters, subject to certain exceptions, not to dispose of or hedge any of their common stock or securities convertible into or exchangeable for shares of our common stock during the period from the date of this prospectus continuing through the date that is _____ days after the date of this prospectus, except with the prior written consent of the representatives, subject to certain exceptions. This agreement does not apply to any existing employee benefit plans. See "Shares Eligible for Future Sale" for a discussion of certain transfer restrictions.

Prior to the offering, there has been no public market for the shares. The initial public offering price has been negotiated among the Company and the representatives of the underwriters. Among the factors to be considered in determining the initial public offering price of the shares, in addition to prevailing market conditions, will be the Company's historical performance, estimates of the business potential and earnings prospects of the Company, an assessment of the Company's management and the consideration of the above factors in relation to market valuation of companies in related businesses.

We intend to apply to list our common stock for trading on _____ under the symbol “ALKT”.

In connection with the offering, the underwriters may purchase and sell shares of our common stock in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in the offering, and a short position represents the amount of such sales that have not been covered by subsequent purchases. A “covered short position” is a short position that is not greater than the amount of additional shares for which the underwriters’ option described above may be exercised. The underwriters may cover any covered short position by either exercising their option to purchase additional shares or purchasing shares in the open market. In determining the source of shares to cover the covered short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase additional shares pursuant to the option described above. “Naked” short sales are any short sales that create a short position greater than the amount of additional shares for which the option described above may be exercised. The underwriters must cover any such naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the common stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of common stock made by the underwriters in the open market prior to the completion of the offering.

The underwriters may also impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

Purchases to cover a short position and stabilizing transactions, as well as other purchases by the underwriters for their own accounts, may have the effect of preventing or retarding a decline in the market price of the Company’s stock, and together with the imposition of the penalty bid, may stabilize, maintain or otherwise affect the market price of the common stock. As a result, the price of the common stock may be higher than the price that otherwise might exist in the open market. The underwriters are not required to engage in these activities and may end any of these activities at any time. These transactions may be effected on _____, in the over-the-counter market or otherwise.

European Economic Area and United Kingdom

In relation to each Member State of the European Economic Area and the United Kingdom (each a “Relevant State”), no shares of our common stock have been offered or will be offered to the public in that Relevant State prior to the publication of a prospectus in relation to the shares of our common stock which has been approved by the competent authority in that Relevant State or, where appropriate, approved in another Relevant State and notified to the competent authority in that Relevant State, all in accordance with the Prospectus Regulation, except that it may make an offer to the public in that Relevant State of any shares of our common stock at any time under the following exemptions under the Prospectus Regulation:

- (a) to any legal entity which is a qualified investor as defined under the Prospectus Regulation;
- (b) to fewer than 150 natural or legal persons (other than qualified investors as defined under the Prospectus Regulation), subject to obtaining the prior consent of the representatives for any such offer; or
- (c) in any other circumstances falling within Article 1(4) of the Prospectus Regulation,

provided that no such offer of the shares of our common stock shall require the Issuer or any Manager to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation.

For the purposes of this provision, the expression an “offer to the public” in relation to the shares of our common stock in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and any shares of our common stock to be offered so as to enable an investor to decide to purchase or subscribe for any shares of our common stock, and the expression “Prospectus Regulation” means Regulation (EU) 2017/1129.

United Kingdom

This document is for distribution only to persons who (i) have professional experience in matters relating to investments and who qualify as investment professionals within the meaning of Article 19 (5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the “Financial Promotion Order”), (ii) are persons falling within Article 49(2)(a) to (d) “high net worth companies, unincorporated associations, etc.”) of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the Financial Services and Markets Act 2000, as amended (“FSMA”)) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”).

This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

Canada

The securities may be sold in Canada only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions, and Ongoing Registrant Obligations. Any resale of the securities must be made in accordance with an exemption form, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser’s province or territory of these rights or consult with a legal advisor.

Pursuant to section 3A.3 of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

Hong Kong

The shares may not be offered or sold in Hong Kong by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies

(Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32 of the Laws of Hong Kong) (“Companies (Winding Up and Miscellaneous Provisions) Ordinance”) or which do not constitute an invitation to the public within the meaning of the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong) (“Securities and Futures Ordinance”), or (ii) to “professional investors” as defined in the Securities and Futures Ordinance and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance, and no advertisement, invitation or document relating to the shares may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” in Hong Kong as defined in the Securities and Futures Ordinance and any rules made thereunder.

Singapore

This prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares may not be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act, Chapter 289 of Singapore (the “SFA”) pursuant to Section 274 of the SFA, (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A), and in accordance with the conditions specified in Section 275 of the SFA and (where applicable) Regulation 3 of the Securities and Futures (Class of Investors) Regulations 2018, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 of the SFA by a relevant person which is: (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, securities or securities-based derivatives contracts (each term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries’ rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the shares pursuant to an offer made under Section 275 of the SFA except:

- to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA;
- where no consideration is or will be given for the transfer;
- where the transfer is by operation of law;
- as specified in Section 276(7) of the SFA; or
- as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018.

Notification under Section 309B(1) of the SFA—The shares shall be prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and

Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Japan

The securities have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended) ("FIEA"). The securities may not be offered or sold, directly or indirectly, in Japan or to or for the benefit of any resident of Japan (including any person resident in Japan or any corporation or other entity organized under the laws of Japan) or to others for reoffering or resale, directly or indirectly, in Japan or to or for the benefit of any resident of Japan, except pursuant to an exemption from the registration requirements of the FIEA and otherwise in compliance with any relevant laws and regulations of Japan.

The Company estimates that its share of the total expenses of the offering, excluding underwriting discounts and commissions, will be approximately \$. The Company has agreed to reimburse the underwriters for expenses relating to clearance of this offering with the Financial Industry Regulatory Authority up to \$.

The Company has agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act of 1933.

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the underwriters and their respective affiliates have provided, and may in the future provide, a variety of these services to the issuer and to persons and entities with relationships with the issuer, for which they received or will receive customary fees and expenses.

In the ordinary course of their various business activities, the underwriters and their respective affiliates, officers, directors and employees may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of the issuer (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with the issuer. The underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

LEGAL MATTERS

The validity of the shares of common stock offered hereby will be passed upon for us by Latham & Watkins LLP. Certain legal matters in connection with this offering will be passed upon for the underwriters by Davis Polk & Wardwell LLP, Menlo Park, California.

EXPERTS

The consolidated financial statements of the Company at December 31, 2019 and for the year ended December 31, 2019 have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in its report thereon appearing elsewhere herein, and are included in reliance upon such report given on the authority of such firm as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act, with respect to the shares of common stock offered by this prospectus. This prospectus, which constitutes a part of the registration statement, does not contain all of the information set forth in the registration statement or the exhibits and schedules to the registration statement. Please refer to the registration statement and exhibits for further information with respect to the common stock offered by this prospectus. Statements contained in this prospectus regarding the contents of any contract or other document are only summaries. With respect to any contract or document that is filed as an exhibit to the registration statement, you should refer to the exhibit for a copy of the contract or document, and each statement in this prospectus regarding that contract or document is qualified by reference to the exhibit. The SEC maintains a website that contains reports, proxy and information statements and other information regarding issuers, like us, that file documents electronically with the SEC. The address of that website is www.sec.gov.

Upon completion of this offering, we will become subject to the information and reporting requirements of the Exchange Act, and, in accordance with this law, will be required to file periodic reports, proxy statements and other information with the SEC. These periodic reports, proxy statements and other information will be available for inspection and copying at the website of the SEC referred to above. We also maintain a website at www.alkami.com, at which you may access these materials free of charge as soon as reasonably practicable after they are electronically filed with, or furnished to, the SEC. The information contained on, or that can be accessed through, these websites is not a part of this prospectus. We have included these website addresses in this prospectus solely as an inactive textual reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Alkami Technology, Inc.

Opinion on the Financial Statements

We have audited the accompanying balance sheet of Alkami Technology, Inc. (the Company) as of December 31, 2019, the related statements of operations, changes in redeemable convertible preferred stock and stockholders' equity (deficit) and cash flows for the year then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2019, and the results of its operations and its cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2017.

ALKAMI TECHNOLOGY, INC.
NOTES TO FINANCIAL STATEMENTS
(In thousands, except per share data)

Note 1. Organization

Description of Business

Alkami Technology, Inc. (the "Company") is a cloud-based digital banking platform. The Company inspires and empowers community, regional and super-regional financial institutions ("FIs") to compete with large, technologically advanced and well resourced banks in the United States. The Company's solution, the Alkami Platform, allows FIs to onboard and engage new users, accelerate revenues and meaningfully improve operational efficiency, all with the support of a proprietary, true cloud based, multi-tenant architecture. The Company cultivates deep relationships with its clients through long-term, subscription based contractual arrangements, aligning its growth with its clients' success and generating an attractive unit economic model. The Company was incorporated in Delaware in August 2011, and its principal offices are located in Plano, Texas.

Note 2. Summary of Significant Accounting Policies

The accompanying financial statements reflect the application of significant accounting policies as described below.

Basis of Presentation

The financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("US GAAP") set by the Financial Accounting Standards Board ("FASB"). References to US GAAP issued by the FASB in these notes are to the FASB Accounting Standards Codification ("ASC").

The Company has no sources of other comprehensive income and accordingly, net loss presented is the same as comprehensive loss.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Significant estimates and assumptions include determining the timing and amount of revenue recognition, recoverability and amortization period related to costs to obtain and fulfill contracts, valuation of the Company's stock options, and tranche rights and warrants.

Fair Value of Financial Instruments

The Company's financial instruments consist primarily of cash and cash equivalents, accounts receivable, accounts payable and stock warrants and tranche rights. The carrying values of cash and cash equivalents, accounts receivable and accounts payable approximate their respective fair values due to the short-term nature of these instruments. Cash equivalents include amounts held in money market accounts that are measured at fair value using observable market prices. Warrant liabilities are valued using the Black-Scholes option pricing method and are presented at estimated fair value at the end of the reporting period. The assumptions used in preparing the Black-Scholes option pricing

[Table of Contents](#)

calculation include weighted average grant date fair value, volatility, risk-free interest rate, dividends, weighted average expected life in years and estimated forfeiture. The fair value of the warrant liabilities decreased by less than \$0.1 million during the year ended December 31, 2019. Tranche right fair values are estimated each period end using a hybrid, option pricing method within a risk-neutral framework. The assumptions used in preparing the hybrid, option pricing method include weighted average grant date fair value, volatility, risk-free interest rate, dividends, weighted average expected life in years and estimated forfeiture. The fair value of the tranche rights included in the balance sheet increased by \$0.3 million during the year ended December 31, 2019. Changes in the fair value of warrant and tranche rights are recognized as a gain or loss within net income.

The Company uses a three-tier fair value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value:

Level 1. Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2. Significant other inputs that are directly or indirectly observable in the marketplace.

Level 3. Significant unobservable inputs which are supported by little or no market activity.

The carrying amounts of cash and cash equivalents, accounts receivable and accounts payable approximate fair value as of December 31, 2019 because of the relatively short duration of these instruments.

The Company evaluated its financial assets and liabilities subject to fair value measurements on a recurring basis to determine the appropriate level in which to classify them for each reporting period. The following table summarizes the Company's financial assets measured at fair value as of December 31, 2019 and indicates the fair value hierarchy of the valuation:

	December 31, 2019	Fair Value at Reporting Date Using		
		Level 1	Level 2	Level 3
(in thousands)				
Assets:				
Money Market Accounts	\$ 11,008	\$ 11,008	\$ —	\$ —
Tranche rights	297	—	—	297
Total Assets	<u>11,305</u>	<u>11,008</u>	<u>—</u>	<u>297</u>
Liabilities:				
Warrant Liabilities	325	—	—	325
Total Liabilities	<u>\$ 325</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 325</u>

Cash and Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. At December 31, 2019, \$11.0 million was held in a cash equivalent money market account. The Company maintains its cash and cash equivalent balances at primarily one financial institution.

Accounts Receivable

Accounts receivable represents the trade receivables billed to clients and includes unbilled amounts earned and recognized as revenues prior to period end. Management analyzes historical trends of credits issued to clients, accounts receivable aging and specific invoices to estimate an allowance for disputed invoices and billing errors that may not be collectible. After all reasonable

attempts to collect a receivable have failed, the receivable is written off against the allowance. Accounts receivable are presented net of a reserve for estimated credits of \$0.5 million as of December 31, 2019.

Property and Equipment

Property and equipment are stated at cost, less accumulated depreciation and amortization, using the straight-line method based on estimated useful lives of the related assets. Leasehold improvements are stated at cost, less accumulated depreciation and amortization, using the straight-line method over the shorter of the lease term or the estimated useful lives of the related assets. Repairs and maintenance are charged to expense as incurred. Expenditures that increase the value or productive capacity of assets are capitalized. When property and equipment are retired, sold, or otherwise disposed of, the asset's carrying amount and related accumulated depreciation are removed from the accounts and any gain or loss is reflected in the statement of operations.

Impairment of Long-Lived Assets

The Company reviews long-lived assets, including property and equipment, for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Impairment would be recognized if the estimated undiscounted future cash flows were less than the carrying value of the related assets, the carrying amount of such assets is reduced to fair value. There were no impairment charges for the year ended December 31, 2019.

Contract Balances

Client contracts under which revenues have been recognized while the Company is not yet able to invoice results in contract assets. Generally, contract assets arise as a result of reallocating revenues when discounts are more heavily weighted in the early years of a multi-year contract or the client contract has substantive minimum fees that escalate over the term of the contract.

Contract liabilities are comprised of billings or payments received from the Company's clients in advance of performance under the contract and are included in deferred revenues. Consideration expected to be refunded to clients over the life of the contract due to customer satisfaction issues and service level agreements is estimated and recognized as a reduction of revenues ratably over the term of the contract.

Deferred costs to obtain client contracts

The Company capitalizes certain incremental costs of obtaining a client contract if the costs are deemed recoverable. Costs include commissions and bonuses earned by sales teams and leaders due to the execution of client contracts along with associated employer taxes. Capitalized amounts do not include commissions which are contingent on continued employment over a substantive service period. Contingent commissions are accrued as liabilities and expensed over the requisite employment service period. Deferred commissions are amortized over the benefit period of the client contract, which is typically between five and seven years. Determining the expected benefit period over which to amortize deferred commissions requires significant judgment. The Company determines the expected benefit period based upon initial contract lengths, expected renewals and the expected benefit of the underlying technology.

Deferred implementation costs

The Company capitalizes certain costs to fulfill client contracts such as employee salaries, benefits, stock-based compensation and associated payroll taxes that are directly related to the

implementation of its solutions and some third-party costs, such as third-party licenses and maintenance. The Company only capitalizes implementation costs that it anticipates will be recoverable under the contract. The Company begins amortizing deferred implementation costs ratably over the expected period of client benefit once access to the software-as-a-service ("SaaS") solution is transferred to the client. Deferred implementation costs are amortized over the benefit period of the client contract, which is typically between five and seven years. The Company determines the period of benefit by considering factors such as the length of the initial SaaS contract, the likelihood of renewal and the estimated useful life of the underlying technology.

Revenue Recognition

The Company adopted FASB ASC Topic 606, Revenue from Contracts with Customers ("Topic 606"), effective for the annual reporting period ending December 31, 2019 using the full retrospective transition method of adoption. As such, the financial statements present revenues in accordance with Topic 606 for the period presented.

The Company derives primarily all of its revenues from SaaS subscription services charged for the use of its digital banking solutions. Revenues are recognized net of the most likely amount of sales credits and allowances and presented net of sales and usage-based taxes collected from customers on behalf of governmental authorities. SaaS subscription services are generally recognized as revenue over the term of the contract as a series of distinct SaaS services bundled into a single performance obligation. Clients are typically charged a one-time, upfront implementation fee and recurring annual and monthly access fees for the use of the Company's digital banking solution. Implementation and integration of the digital banking platform is complex, and the Company has determined that the one-time, upfront services do not transfer a promised service to the client. As these services are not distinct, they are bundled into the SaaS series of services and the associated fees are recognized on a straight-line basis over the subscription term.

The Company's performance obligation for the SaaS series of services includes standing ready over the term of the contract to provide access to all of the clients' users and process any transactions initiated by those users. The Company invoices clients each month for the contracted minimum number of registered users with an additional amount for users in excess of those minimums. The Company recognizes variable consideration related to registered user counts in excess of the contractual minimum amounts each month. SaaS subscription revenues also includes annual and monthly charges for maintenance and support services which are recognized over the subscription term. Many customer contracts include a single performance obligation that consists of a series of distinct SaaS services transferred over time that are substantially the same each month. Standalone selling prices ("SSP") is not required to allocate revenue amongst the distinct services within the series. The Company uses an analysis of pricing and discounting objectives, expected volume of users and transactions, and customer characteristics to ensure the revenue standards' allocation objectives have been met. In limited circumstances, the Company is required to estimate volumes as a result of pricing variability within the contract in order to calculate revenue recognition. Changes in these judgments and estimates could have an impact on the revenue recognized in future periods.

As a part of its SaaS subscription services, the Company provides certain services within the SaaS platform using third-party applications. Contracts include monthly fees based on a minimum number of transactions and additional fees for transactions in excess of those minimums. Generally, minimum transaction fees are recognized on a straight-lined basis over the contract term. Variable consideration earned for transactions in excess of contractual minimums is recognized as revenue in the month the actual transactions are processed. For those services that are processed by third party applications, management evaluates whether the Company is acting as a principal or an agent based upon the transfer of control of the services to the customer. After evaluating each of the applications

used to provide SaaS services, the Company has determined that it is acting as the principal in these transactions and records the revenue on a gross basis.

During the term of the contract, clients may purchase additional professional services to modify or enhance their licensed SaaS solutions. These services are distinct performance obligations recognized when control of the enhancement is transferred to the client.

Cost of Revenues

The Company's cost of revenues is comprised primarily of salaries and other personnel-related costs, including employee benefits, bonuses, stock-based compensation, travel and related costs for employees supporting SaaS subscription, implementation and other services. This includes the costs of the implementation, client support and client success teams, development personnel responsible for maintaining and releasing updates to the platform, as well as, third-party cloud-based hosting services. Cost of revenues also includes the direct costs of bill-pay and other third-party intellectual property included in the Company's solutions, the amortization of acquired technology and depreciation.

Certain personnel costs directly related to the implementation of the Company's solutions are capitalized to the extent those costs are recoverable from future revenues. The costs for an implementation are amortized once revenue recognition commences. The amortization period is typically five to seven years, which represents the expected period of client benefit. Other costs not directly recoverable from future revenues are expensed in the period incurred.

Stock-Based Compensation

Stock options are accounted for using the grant date fair value method. Under this method, stock-based compensation expense is measured by the estimated fair value of the granted stock options at the date of grant using the Black-Scholes option pricing model and recognized over the vesting period with a corresponding increase to additional paid-in capital.

Determining the fair value of stock-based awards at the grant date requires significant judgement. The determination of the grant date fair value of stock-based awards using the Black-Scholes option-pricing model is affected by the Company's estimated common stock fair value as well as other subjective assumptions including the volatility, risk-free interest rate, dividends, weighted average expected life and estimated forfeiture rate. The assumptions used in the Company's option-pricing model represent management's best estimates. These assumptions and estimates are as follows:

Fair Value of Common Stock. Given the absence of an active market for the Company's shares of common stock prior to its initial public offering, the fair value of the shares of common stock underlying the Company's stock options was determined by the Company's board of directors (the "Board").

The Board intends all options to be exercisable at the fair value of its shares of common stock on the grant date. Such estimates will not be necessary once the underlying shares begin trading. The assumptions used in the valuation models were based on future expectations and management judgment. The Company used three methods to determine fair value of its common stock as follows:

- *Discounted Cash Flow Method:* the value of the business is estimated on the basis of forecasted cash flows, discounted to present value using an appropriate risk-adjusted discount rate.
- *Guideline Public Company Method:* the value of the business is estimated through the application of multiples observed for public companies engaged in businesses and/or industries that are considered comparable to the Company.

- **Recent Transactions Method:** the value of the business is estimated through the application of multiples observed for M&A transactions involving target companies engaged in businesses and/or industries that are considered comparable to the Company.

Under a hybrid method, the per share values calculated under each exit scenario are probability-weighted to determine the fair value of the Company's shares of common stock.

Volatility. As the Company does not have trading history for its common stock, the selected volatility used is representative of expected future volatility. The Company bases expected future volatility on the historical and implied volatility of comparable publicly traded companies over a similar expected term.

Risk-Free Interest Rate. The Company bases the risk-free interest rate on the rate for a U.S. Treasury zero-coupon issue with a term that closely approximates the expected life of the option grant at the date nearest the option grant date.

Dividends. The Company has never declared or paid any cash dividends and does not presently intend to pay cash dividends in the foreseeable future. As a result, the Company used a dividends assumption of zero.

Weighted Average Expected Life in Years. The expected term of employee stock options reflects the period for which the Company believes the option will remain outstanding. To determine the expected term, the Company applies the simplified approach in which the expected term of an award is presumed to be the mid-point between the vesting date and the expiration date of the award.

Estimated Forfeiture Rate. The Company's forfeiture rate is based on an analysis of its actual forfeitures. The Company will continue to evaluate the appropriateness of the forfeiture rate based on actual forfeiture experience, analysis of employee turnover and other factors.

Basic and Diluted Loss per Common Share

Basic loss per share is calculated by dividing the net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding for the period.

Diluted loss per share is calculated by giving effect to all potentially dilutive common stock, which is comprised of stock options and warrants, when determining the weighted-average number of common shares outstanding.

Redeemable Convertible Preferred Stock Warrants

The Company's warrants issued in connection with financing and other arrangements are classified as liabilities. The warrants issued by the Company do not require net cash settlement, however, as the warrants are for the purchase of conditionally redeemable convertible preferred stock, which could require the Company to transfer assets to the holder upon redemption, the Company has recorded the warrants as liabilities on the accompanying balance sheet. The fair value of these warrants are recorded on the balance sheet at issuance and marked to market at each reporting period. The change in the fair value of the warrants is recorded in the statement of operations as a non-cash gain (loss) and is estimated based on the fair value of the redeemable convertible preferred stock to which the warrants relate.

Research and Development

Research and development costs include salaries and other personnel-related costs, including employee benefits, bonuses, third-party contractor expenses, software development tools, and other related expenses incurred in product strategy, developing new solutions and upgrading and enhancing existing solutions. Research and development costs are expensed as incurred. The Company expects research and development costs to continue to increase as it develops new functionality and make improvements.

Sales and Marketing

Sales and marketing expenses consist primarily of personnel costs of the Company's sales, marketing and a portion of account management employees, including salaries, sales commissions (net of capitalization) and other incentive compensation, benefits and stock-based compensation expense, travel and related costs. Sales and marketing expenses also include outside consulting fees, marketing programs, including lead generation, costs of the Company's annual client conference, advertising, trade shows, other event expenses and amortization of acquired client relationships. Advertising costs are expensed when incurred and were not significant for the year ended December 31, 2019.

General and Administrative

General and administrative expenses consist primarily of salaries, benefits and stock-based compensation associated with executive, finance, legal, human resources, information technology, security and compliance as well as other administrative personnel. General and administrative expenses also include accounting, auditing and legal professional services fees, travel and other unallocated corporate-related expenses such as the cost of the Company's facilities, employee relations, corporate telecommunication and software.

Concentrations of Credit Risk

Significant concentrations of credit risk arise from the Company's revenues and accounts receivable. Management believes that its contract acceptance, billing, and collection policies are adequate to minimize potential credit risk. As of and for the year ended December 31, 2019, no client represented more than 10% of either accounts receivable or revenues.

At times cash held in financial institutions may exceed Federal Deposit Insurance Corporation ("FDIC") limits. Management periodically assesses the financial condition of the institutions to assess credit risk. To date the Company has not experienced such losses and believes it is not exposed to significant credit risk. As of December 31, 2019, cash exceeded FDIC limits by \$11.7 million.

Income Taxes

The Company recognizes deferred tax assets and liabilities based on the estimated future tax effects of differences between the financial statement basis and tax basis of assets and liabilities given the provisions of enacted tax law.

The Company evaluates uncertain tax positions with the presumption of audit detection and applies a "more likely than not" standard to evaluate the recognition of tax benefits or positions and the Company records a valuation allowance to reduce its deferred income tax assets to the amount that is believed to be realized. Management considers historical losses, future taxable income, and ongoing prudent and feasible tax planning strategies in assessing the need for a valuation allowance. Management is continuously assessing the ability to realize deferred tax assets.

Recently Adopted Accounting Pronouncements

In August 2016, the FASB issued Accounting Standards Update (“ASU”) 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments,” to clarify and provide specific guidance on eight cash flow classification issues that are not addressed by current GAAP and thereby reduce the current diversity in practice. The standard is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years and early adoption is permitted. The Company adopted this standard as of January 1, 2019, and its adoption did not have a material impact on its financial statements.

In August 2018, the FASB issued ASU 2018-15, “Intangibles—Goodwill and Other—Internal-use Software” which provides guidance for a client’s accounting for implementation costs incurred in a cloud computing arrangement that is a service contract. The Company has early adopted this ASU as of January 1, 2019 on a prospective method for all implementation costs incurred after January 1, 2019.

In May 2014, the FASB issued ASU 2014-09, which in addition to replacing the existing revenue recognition guidance, provides guidance on the recognition of costs related to obtaining client contracts. The Company has adopted Topic 606 for the annual period ended December 31, 2019 using the full retrospective transition method. Upon adoption, the Company has elected certain practical expedients. The Company has elected to not restate contracts that began and were completed within the same annual reporting period nor disclose the amount of transaction price allocated to remaining unsatisfied or partially unsatisfied performance obligations as of December 31, 2018. Contract modifications that occurred prior to the initial adoption date were not separately evaluated under the new guidance. The current contract and transaction prices were used to determine performance obligations and transaction price as of the transition date. The use of these expedients did not materially impact the financial statements upon adoption of the new standards. As a result of the adoption of ASU 2014-09, the Company recorded a net decrease of \$2.8 million to accumulated deficit on January 1, 2018.

Recent Accounting Pronouncements

In February 2016, the FASB issued ASU No. 2016-02, “Leases (Topic 842),” to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The standard is effective for non-public entities for fiscal years beginning after December 15, 2020, and interim period for the fiscal year beginning after December 15, 2021, and early application is permitted. The Company anticipates that the adoption of Topic 842 will impact its balance sheet as most of its operating lease commitments will be subject to the new standard and recognized as right-of-use assets and corresponding operating lease liabilities upon the adoption of ASU 2016-02. The Company expects to adopt the standard effective January 1, 2021 using the modified retrospective transition approach and continues to evaluate quantitative impacts that the adoption of this standard will have. The Company expects total assets and liabilities reported will increase relative to such amounts prior to adoption.

In June 2016, the FASB issued ASU 2016-13, “Financial Instruments—Credit Losses (Topic 326)” which modifies the measurement of expected credit losses of certain financial instruments with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The effective date for adoption of the new standard was delayed until calendar years beginning after December 15, 2022, with early adoption permitted. The Company plans to adopt ASU 2016-13 effective January 1, 2021 using the modified-retrospective approach prior to the issuance of its audited financial statements for the years ended December 31, 2021. This ASU is not expected to have a material impact on the Company’s financial statements.

[Table of Contents](#)

Note 3. Property and Equipment, Net

Depreciation expense, including amortization of assets held under capital leases, was \$2.2 million in 2019. Property and equipment include \$0.1 million of assets subject to a capital lease as of December 31, 2019.

	<u>Useful Life</u>	<u>December 31, 2019</u>
(in thousands)		
Software	1 to 3 years	\$ 722
Computers and equipment	3 years	3,244
Furniture and fixtures	5 years	3,583
Leasehold improvements	3 to 10 years	10,880
		<u>18,429</u>
Less: accumulated depreciation		(7,102)
Property and equipment, net		<u>\$ 11,327</u>

Note 4. Revenue and Deferred Costs

The Company derives the majority of its revenues from recurring monthly subscription fees charged for the use of its SaaS subscription services. Subscription revenues are generally recognized as revenue over the term of the contract as a series of distinct SaaS services bundled into a single performance obligation. Clients are usually charged a one-time, upfront implementation fee and recurring annual and monthly access fees for the use of the online digital relationship banking solution. Implementation and integration of the digital banking platform is complex, and the Company has determined that the one-time, upfront services do not transfer a promised service to the client. As these services are not distinct, they are bundled into the SaaS series of services and the associated fees are recognized on a straight-line basis over the subscription term.

The following table disaggregates the Company's revenues by major source:

	<u>Year Ended December 31, 2019</u>
(in thousands)	
SaaS subscription services	\$ 67,313
Implementation services	4,191
Other services	2,037
Total revenues	<u>\$ 73,541</u>

The Company recognized approximately \$4.3 million of revenue during the year ended December 31, 2019, which was included in deferred revenues in the accompanying balance sheet as of the beginning of the reporting period. For those contracts which were wholly or partially unsatisfied as of December 31, 2019, minimum contracted subscription revenues to be recognized in future periods total approximately \$396.8 million. The Company expects to recognize approximately 41% percent of this amount as subscription services are transferred to clients over the next 24 months, an additional 37% percent in the next 25 to 48 months, and the balance thereafter. This estimate does not include estimated consideration for excess user and transaction processing fees that the Company expects to earn under its subscription contracts.

Contract assets and contract liabilities

The value of client contracts under which revenue has been recognized while the Company is not yet able to invoice results is recorded as contract assets. Generally, contract assets arise as a result

[Table of Contents](#)

of reallocating revenues when discounts are more heavily weighted in the early years of a multi-year contract or the client contract has substantive minimum fees that escalate over the term of the contract. Contract assets totaled \$0.5 million as of December 31, 2019, which are included in other current assets and other assets in the accompanying balance sheet.

Contract liabilities are comprised of billings or payments received from its clients in advance of performance under the contract and are included in deferred revenue in the accompanying balance sheet. Contract liabilities as of December 31, 2019 also include an estimate of refunds to be provided to clients due to client satisfaction issues and service level agreements of \$1.2 million, which are included in accrued liabilities in the accompanying balance sheet.

Deferred cost recognition

The Company capitalized \$2.7 million in commissions costs during the year ended December 31, 2019, and recognized \$1.1 million of amortization during the year ended December 31, 2019. Amortization expense is included in sales and marketing expenses in the accompanying statement of operations.

The Company capitalized implementation costs of \$3.7 million, and recognized amortization of \$1.6 million during the year ended December 31, 2019. Amortization expense is included in cost of revenues in the accompanying statement of operations.

Deferred cost assets are reviewed for impairment annually or more frequently if circumstances indicate there may be an impairment. No impairment loss was recognized in relation to these capitalized costs for the year ended December 31, 2019.

Note 5. Accounts Receivable

Accounts receivable includes the following amounts at December 31, 2019:

	December 31, 2019
(in thousands)	
Trade accounts receivable	\$ 8,679
Unbilled receivables	1,623
Total receivables	10,302
Reserve for estimated credits	(495)
	<u>\$ 9,807</u>

Note 6. Accrued Liabilities

Accrued liabilities consisted of the following at December 31, 2019:

	December 31, 2019
(in thousands)	
Bonus accrual	\$ 5,126
Accrued vendor purchases	1,687
Commissions accrual	1,178
Accrued hosting services	1,583
Client refund liability	1,169
Accrued consulting and professional fees	280
Other accrued liabilities	813
	<u>\$ 11,836</u>

Note 7. Debt

Line of Credit

On July 21, 2018 the Company and Comerica Bank entered into the Amended and Restated Loan and Security Agreement (the "Agreement"). On June 28, 2019, the Agreement was amended to increase the revolving credit line and extend the maturity to June 30, 2021. The availability under the line of credit is up to \$20.0 million inclusive of the aggregate limits of corporate credit cards and letters of credit not to exceed \$1.0 million. Borrowings under the Agreement bear interest at Comerica's prime rate plus 1%, provided such rate is not less than daily adjusted LIBOR rate plus 2.25%. The Company has a standby letter of credit in the amount of \$0.9 million which serves as security under the lease relating to the Company's office space that expires in 2028. Borrowing capacity under the line of credit is based upon a multiple of eligible monthly recurring revenue and a percentage of the value of client contracts that are not yet live on the Company's platform. Access to the total borrowings available under the line of credit may also be restricted based upon covenants related to the Company's minimum liquidity and minimum cash balances. As of December 31, 2019, the Company's availability under the line of credit was \$19.1 million. The line of credit is secured by substantially all of the operating assets of the Company. At December 31, 2019, the Company had less than \$0.1 million outstanding on corporate credit cards, there was no outstanding balance on the line of credit.

Warrants

On June 28, 2019, in conjunction with the Agreement, the Company issued warrants to Comerica Bank for the purchase of approximately 29,412 shares of the Company's Series E redeemable convertible preferred stock at an exercise price of \$8.50 per share. The warrants expire on June 28, 2029. The warrants are subject to the same anti-dilution provisions to which the Series E redeemable convertible preferred stock is subject. The Company determined the fair value of the warrants to be less than \$0.1 million as of December 31, 2019.

On July 21, 2017, in conjunction with the Loan and Security Agreement entered into on July 2, 2014 by the Company and Comerica Bank (the "2014 Agreement"), the Company issued a warrant (the "Initial Warrant") to Comerica Bank for the purchase of 20,548 shares of the Company's Series C redeemable convertible preferred stock at an exercise price of \$3.65 per share. The Company also issued a warrant (the "Additional Warrant") to purchase Series C redeemable convertible preferred stock contingent upon certain loan conditions with the number of warrants to be issued based on the fair market value for the associated preferred shares. The conditions necessary for the Additional Warrant never arose and it has not become exercisable for equity securities. During 2018, the Company borrowed additional funds under the 2014 Agreement, whereupon the number of shares purchasable under the Initial Warrant increased to 34,246. These warrants expire on July 20, 2027. The warrants are subject to the same anti-dilution provisions to which the Series C redeemable convertible preferred stock is subject. The Company determined the fair value of the warrants to be less than \$0.1 million as of December 31, 2019.

In conjunction with the 2014 Agreement, on July 7, 2016, the Company issued warrants to Comerica Bank for the purchase of 46,875 shares of the Company's Series C redeemable convertible preferred stock at an exercise price of \$3.65 per share. The warrants expire on July 7, 2026, at which time any unexercised shares with a fair market value greater than the exercise price will automatically be converted to Series C redeemable convertible preferred stock. The warrants are subject to the same anti-dilution provisions to which the Series C redeemable convertible preferred stock is subject. The Company determined the fair value of the warrants to be less than \$0.1 million as of December 31, 2019.

In conjunction with the 2014 Agreement, on July 2, 2014, the Company issued warrants to Comerica Bank for the purchase of 61,875 shares of the Company's Series B redeemable convertible

preferred stock at an exercise price of \$1.60 per share. The warrants expire in September 2024 and July 2026, at which time any unexercised shares with a fair market value greater than the exercise price will automatically be converted to Series B redeemable convertible preferred stock. The warrants are subject to the same anti-dilution provisions to which the Series B redeemable convertible preferred stock is subject. The Company determined the fair value of the warrants to be approximately \$0.1 million as of December 31, 2019.

On December 10, 2012, the Company issued warrants to a financial institution, which the Company had a previous lending arrangement with, for the purchase of 40,000 shares of the Company's Series A redeemable convertible preferred stock at an exercise price of \$1.00 per share. The warrants expire in December 2022, at which time any unexercised shares with a fair market value greater than the exercise price will automatically be converted to Series A redeemable convertible preferred stock. The warrants are subject to the same anti-dilution provisions to which the Series A redeemable convertible preferred stock is subject. The Company determined the fair value of the warrants to be approximately \$0.1 million as of December 31, 2019.

Note 8. Redeemable Convertible Preferred Stock and Stockholders' Equity (Deficit)

The Company is authorized to issue six classes of stock: common stock, Series A redeemable convertible preferred stock, Series B redeemable convertible preferred stock, Series C redeemable convertible preferred stock, Series D redeemable convertible preferred stock and Series E redeemable convertible preferred stock. On May 9, 2019, the Board authorized an increase in the number of authorized shares of common stock to 76,000,000 shares; authorized an increase in preferred stock to 57,764,411 and created \$0.001 par value Series E redeemable convertible preferred stock consisting of 6,470,588 shares reserved for sale at \$8.50 per share. During 2019, the Company restricted 2,000,000 shares of common stock to satisfy anti-dilution requirements which may be triggered by employee purchases of common stock under the 2011 long-term incentive plan.

During 2019, the Company issued 3,540,834 shares of Series E redeemable convertible preferred stock in exchange for cash proceeds of \$30.1 million. As part of this financing transaction, the Series E purchasers received the right to purchase 2,929,754 additional shares of Series E redeemable convertible preferred stock in May 2020 at a purchase price of \$8.50 per share. The Series E share purchase commitment scheduled for May 2020 was determined to be a forward contract and required to be accounted for separately as an asset and marked to market. The fair value of the preferred tranche right of Series E shares was determined using a risk-neutral, hybrid approach. The tranche right value was \$0.3 million at closing and \$0.3 million as of December 31, 2019, respectively.

Voting

All classes of stock are entitled to vote. Series A redeemable convertible preferred, Series B redeemable convertible preferred, Series C redeemable convertible preferred, Series D redeemable convertible preferred, and Series E redeemable convertible preferred stockholders have the right to one vote for each share of common stock into which such holder's shares of Series A redeemable convertible preferred, Series B redeemable convertible preferred, Series C redeemable convertible preferred stock, Series D redeemable convertible preferred stock and Series E redeemable convertible preferred stock could then be converted.

Dividends

Series A, Series C, Series D and Series E redeemable convertible preferred stockholders are entitled to an 8% preferred dividend, when, as and if declared by the Board.

Series A, Series C, Series D and Series E preferred dividends are not cumulative. Series B redeemable convertible preferred stockholders are entitled to an 8% preferred return upon redemption or liquidation. The Series B preferred return is cumulative and totaled \$6.5 million as of December 31, 2019. This cumulative return is recorded in Redeemable Convertible Preferred Stock on the balance sheet. In the event the Series B redeemable convertible preferred stock is converted into common stock (at their option or upon a qualified IPO), the holders will be entitled to a 5% dividend on conversion, payable in either cash or common stock at the option of the Company. Common stockholders are also entitled to dividends, when, as and if declared by the Board. Declared and unpaid dividends for each series of redeemable convertible preferred stock are paid upon liquidation.

Conversion

Holders of Series A, Series B, Series C, Series D and Series E redeemable convertible preferred stock are entitled to convert their shares into shares of common stock, at the option of the holder, at a 1-for-1 conversion rate based on a conversion price of \$1.00, \$1.60, \$3.65, \$6.1278 and \$8.50 per share, respectively. The respective conversion rates are subject to anti-dilution clauses if additional shares of common stock are issued at a price per share below the applicable conversion price. As of December 31, 2019, no such anti-dilution events have occurred.

Liquidation

Upon a liquidation event, as defined by the Company's certificate of incorporation, including any voluntary or involuntary liquidation, dissolution, winding up or deemed liquidation event, and prior to the payment of other equity holders, liquidation funds, if any, are to be distributed to both Series E redeemable convertible preferred stockholders (entitled to a liquidation preference equal to \$8.50 per share plus declared and unpaid dividends) and Series D redeemable convertible preferred stockholders (entitled to a liquidation preference equal to \$6.1278 per share), on a pari passu basis. Thereafter, Series C redeemable convertible preferred stockholders are entitled to a liquidation preference equal to \$3.65 per share, after the payment in full of the liquidation preference of Series E and Series D redeemable convertible preferred stock. Thereafter, Series B redeemable convertible preferred stockholders are entitled to a liquidation preference, after the payment in full of the liquidation preference of the Series E, Series D and Series C redeemable convertible preferred stock, equal to \$1.60 per share plus an accruing amount of 3% per annum on the purchase price of Series B redeemable convertible preferred stock, plus all accrued (including the 5% accruing dividend) but unpaid and any declared but unpaid dividends. Thereafter, Series A redeemable convertible preferred stockholders are entitled to a liquidation preference, after the payment in full of the liquidation preference on all other redeemable convertible preferred stock, equal to \$1.00 per share plus any declared, but unpaid dividends. Remaining liquidation funds, if any, are then distributed to both common and Series A redeemable convertible preferred stockholders equally, as if the Series A redeemable convertible preferred stock had been converted to common stock.

Redemption

Holders of all classes of redeemable convertible preferred stock are entitled to require the Company to redeem preferred shares at any time on or after the fourth anniversary of the date the Company first issues Series E redeemable convertible preferred stock. Holders of Series A through C vote together, and Series D and E vote together, and, if at least a majority of either group vote in favor of redemption, the Company is required to redeem one-third of the then-outstanding shares of the applicable group within each series for cash equal to the Liquidation Amount, as defined by each series ("Initial Redemption Date"). Holders of Series A through C may so vote even if Series D and E do not, and Series D and E may so vote even if Series A through C do not. The Company will then make additional payments on the one-year and two-year anniversary of the Initial Redemption Date.

[Table of Contents](#)

In accordance with the SEC guidance on temporary equity, all redeemable convertible preferred stock is presented as mezzanine equity given the cash redemption right that is within the holder's control. The preferred shares are not currently redeemable, but it is probable the instruments will become redeemable. Therefore, the Company has elected to recognize changes in redemption value immediately as they occur, as a dividend, and adjust the carrying amount of the instrument so it equals the redemption value at the end of each reporting period.

As of December 31, 2019, the holders of redeemable convertible preferred stock have various rights and preferences as follows:

(in thousands)	Shares Authorized	Shares Outstanding	Redemption/ Liquidation Amounts
Series A Redeemable Convertible Preferred Stock	8,488,092	8,448,092	\$ 8,448
Series B Redeemable Convertible Preferred Stock	8,761,982	8,650,107	20,356
Series C Redeemable Convertible Preferred Stock	22,600,000	22,228,001	81,132
Series D Redeemable Convertible Preferred Stock	11,443,749	11,423,349	70,000
Series E Redeemable Convertible Preferred Stock	6,470,588	3,540,834	30,097
	<u>57,764,411</u>	<u>54,290,383</u>	<u>\$ 210,033</u>

Note 9. Equity Compensation Plan

In 2011, the Board established a long-term incentive plan under which shares of common stock are made available for grants to qualified consultants, directors, or employees of the Company. The vesting of the common stock options is determined by the Company and may be immediately vested in whole, or in part, or all portions may not be vested until a specific date.

Stock Options

The Company has the authority to grant options to purchase up to 17.1 million shares of common stock as of December 31, 2019, to qualified consultants, directors, or employees of the Company.

A summary of option activity is as follows:

(in thousands except share and per share amounts)	Shares Available for Grant	Options Outstanding Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Balances January 1, 2019	238,664	9,671,056	\$ 1.15		\$ 11,538
Authorized	3,500,000	—			—
Granted	(3,053,796)	3,053,796	2.34		—
Exercised	—	(357,675)	0.83		(539)
Forfeited	509,425	(509,425)	1.55		(405)
Balances December 31, 2019	<u>1,194,293</u>	<u>11,857,752</u>	\$ 1.45	7.6	\$ 10,594
Exercisable at December 31, 2019		<u>6,772,724</u>	\$ 1.12	6.8	\$ 8,285

[Table of Contents](#)

The following table summarizes the weighted-average grant date fair value of options and the assumptions used to develop their fair value using the Black-Scholes option pricing model:

	2019
Weighted average grant date fair value	\$0.83
Volatility	32.3%
Risk-free interest rate	2.0%
Dividends	—
Weighted average expected life in years	6.1
Estimated forfeiture rate	15.0%

The Black-Scholes option-pricing model requires the input of highly subjective assumptions. The Company continues to assess the assumptions and methodologies used to calculate the established fair value of stock-based compensation. Circumstances may change and additional data may become available over time, which could result in changes to these assumptions and methodologies, which could materially impact the fair value determinations.

The Company recorded \$1.3 million of stock-based compensation expense for the year ended December 31, 2019. The amount of stock-based compensation capitalized as part of deferred implementation costs was insignificant in 2019. Due to net operating losses, there was no tax expense or benefit recorded in connection with stock-based compensation expense. Stock-based compensation expense was included as follows:

	Year Ended December 31, 2019
(in thousands)	
Cost of revenues	\$ 219
Research and development	323
Sales and marketing	97
General and administrative	611
Total stock-based compensation expenses	\$ 1,250

The weighted average grant date fair value of options granted during the year ended December 31, 2019 was \$0.83. The aggregate intrinsic value of stock options exercised during the year ended December 31, 2019 was \$0.5 million. The total fair value of stock options vested during the year ended December 31, 2019 was \$1.1 million.

As of December 31, 2019, the total unrecognized stock-based compensation expense related to stock options was \$3.2 million which the Company expects to recognize over the next 3.1 years.

Certain stock option grants provide the option holder the right to exercise their stock options before they vest. As of December 31, 2019, 1.1 million stock options were exercisable that were not yet vested by the option holder at a weighted average exercise price of \$0.82 per share.

[Table of Contents](#)

A summary of the status of non-vested options is as follows:

	Number of Shares	Weighted Average Grant Date Fair Value Per Share
Non-vested options, January 1, 2019	5,442,275	\$ 0.59
Granted	3,053,796	0.83
Forfeited	(390,526)	0.65
Vested	(1,893,643)	0.56
Non-vested options, December 31, 2019	<u>6,211,902</u>	<u>\$ 0.72</u>

All non-vested stock options issued as of the date of the option holder's termination will be forfeited, except for certain non-vested stock options granted to executive management that have special vesting provisions upon involuntary termination or resignation. The special provisions call for the accelerated vesting of a portion of the options granted to the employee under certain circumstances.

Note 10. Income Taxes

The provision for income tax expense in the accompanying statement of operations for the year ended December 31, 2019 was \$0. The Company files franchise, business and income tax returns in several states and a US federal return. As a result of operating losses, no federal or state income taxes are owed.

A reconciliation of income taxes with the amounts computed at the statutory federal income tax rate follows:

	Year Ended December 31, 2019	
(in thousands)		
Computed tax at federal statutory rate applied to pre-tax loss	\$(8,792)	21.0%
State income tax, net of federal tax benefit	(940)	2.3%
Permanent differences, net	526	(1.3)%
Other	7	—%
Valuation allowance increase	<u>9,199</u>	<u>(22.0)%</u>
Total	<u>\$ —</u>	<u>—%</u>

[Table of Contents](#)

Significant components of the Company's net deferred tax assets and liabilities were as follows as of December 31, 2019:

	December 31, 2019
(in thousands)	
Deferred tax assets:	
Deferred revenue	\$ 4,762
Deferred rent	1,537
Accrued expenses	1,420
Stock option expense	59
Net operating loss carryforward (federal and state)	38,593
Reserve for customer credits	122
Other	245
Total deferred tax assets	46,738
Valuation allowance for deferred tax assets	(45,066)
Deferred tax assets, net of valuation allowance	1,672
Deferred tax liabilities:	
Amortization	(2)
Financial instruments, (loss) gain	(105)
Fixed assets	(598)
Deferred implementation costs	(967)
Total deferred tax liabilities	(1,672)
Deferred income tax assets, net of deferred tax liabilities	\$ —

The Company did not have any uncertain tax positions as of December 31, 2019. The Company's policy is to accrue interest and penalties related to uncertain tax positions as a component of income tax expense. For the year ended December 31, 2019, the Company did not recognize any interest or penalties.

At December 31, 2019, the Company had net operating loss carry forwards of \$160.0 million. Net operating loss carry forwards generated after December 31, 2017 are eligible to be carried forward indefinitely; those generated prior to 2018 may be carried forward 20 years subject to certain limitations. At December 31, 2019, the Company established a full valuation allowance for its net deferred tax assets as realization of the net asset is not reasonably assured based upon a more-likely-than-not threshold. The valuation allowance increased by \$9.3 million during 2019.

The Company files income tax returns in the U.S. federal jurisdiction and several state jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state or local income tax examinations by tax authorities for tax years before 2015. Operating losses generated in years prior to 2015 remain open to adjustment until the statute of limitations closes for the tax year in which the net operating losses are utilized. The tax years 2015 through 2019 remain open to examination by all the major taxing jurisdictions to which the Company is subject, though the Company is not currently under examination by any major taxing jurisdiction.

Note 11. Earnings Per Share

Net loss attributable to common stockholders used in computing basic and diluted earnings per share ("EPS") has been calculated as the net loss less cumulative dividends and adjustments to redeemable convertible preferred stock to the benefit of the Series B and E redeemable convertible preferred stock stockholders of \$1.2 million for the twelve months ended December 31, 2019. All of the

[Table of Contents](#)

Company's outstanding series of redeemable convertible preferred stock are considered to be participating securities. The holders of the Company's redeemable convertible preferred stock do not have a contractual obligation to share in the Company's losses; therefore, no amount of total undistributed loss is allocated to redeemable convertible preferred stock.

Basic net loss per share attributable to common stockholders is computed by dividing net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding for the period. Because the Company has reported a net loss for 2019, the number of shares used to calculate diluted net loss per share of common stock attributable to common stockholders is the same as the number of shares used to calculate basic net loss per share of common stock attributable to common stockholders for the period presented because the potentially dilutive shares would have been antidilutive if included in the calculation.

The computation of basic and diluted EPS is as follows:

	Year Ended December 31, 2019
(in thousands, except shares and per share amounts)	
Net loss	\$ (41,869)
Less: cumulative dividends and adjustments to redeemable convertible preferred stock	(1,212)
Net loss attributable to common stockholders	<u>\$ (43,081)</u>
Weighted average common shares outstanding—basic and diluted	<u>4,346,900</u>
Loss per common share—basic and diluted	<u>\$ (9.91)</u>

For the twelve months ended December 31, 2019, the following potential common shares were excluded from diluted EPS as the Company had a net loss in each period presented:

	December 31, 2019
(in thousands)	
Stock Options	11,857,752
Redeemable convertible preferred stock	54,290,383
Warrants	<u>198,561</u>
	<u>66,346,696</u>

Note 12. Commitments and Contingencies

Operating and Capital Lease Commitments

The Company leases office space under non-cancellable operating leases for its corporate headquarters in Plano, Texas pursuant to a 10 year lease agreement under which the Company leases approximately 125,000 square feet of office space with an initial term that expires on August 31, 2028, with the option to extend the lease for either two additional terms of five years each or one additional term of ten years. Rent expense under operating leases was \$3.8 million for the year ended December 31, 2019.

The Company entered into a capital lease arrangement to obtain equipment for its corporate operations. This agreement expired in February 2020 and the lease was secured by the underlying leased equipment.

[Table of Contents](#)

Future minimum payments required under operating and capital leases that have initial or remaining non-cancelable lease terms in excess of one year at December 31, 2019 were as follows:

Year ended December 31, (in thousands)	Capital Leases	Operating Leases
2020	\$ 11	\$ 3,124
2021	—	3,568
2022	—	3,710
2023	—	3,773
2024	—	3,835
Thereafter	—	14,595
Total minimum lease payments	\$ 11	\$ 32,605
Less current portion	11	
Capital lease obligations net of current portion	\$ —	

Deferred Rent and Tenant Allowances

Deferred rent and tenant allowances are amortized and applied against rental expense over the lease term on a straight-line basis. As of December 31, 2019, the Company had deferred rent and tenant allowance balances as follows:

(in thousands)	December 31, 2019
Deferred rent and tenant allowance	\$ 6,236
Less: current portion	(445)
Deferred rent and tenant allowance, net of current portion	\$ 5,791

Contractual Commitments

The Company has non-cancelable contractual commitments related to third-party products, hosting services and other service costs. The Company is party to several purchase commitments for third-party services that contain both a contractual minimum obligation and a variable obligation based upon usage or other factors which can change on a monthly basis. The estimated amounts for usage and other factors are not included within the table below. Future minimum contractual commitments that have initial or remaining non-cancelable terms in excess of one year were as follows:

Year ended December 31, (in thousands)	Contractual Commitments
2020	\$ 7,607
2021	7,806
2022	100
Total	\$ 15,513

Legal Proceedings

The Company may become party to various legal actions during the ordinary course of business. Defending such proceedings is costly and can impose a significant burden on management and employees, it may receive unfavorable preliminary or interim rulings in the course of litigation, and there can be no assurances that favorable final outcomes will be obtained. In addition, the Company's industry is characterized by the existence of a large number of patents, copyrights, trademarks, trade

secrets and other intellectual property and proprietary rights. Companies in its industry are often required to defend against litigation claims based on allegations of infringement or other violations of intellectual property rights. Furthermore, client agreements typically require the Company to indemnify clients against liabilities incurred in connection with claims alleging its solutions infringe the intellectual property rights of a third party. From time to time, the Company has been involved in disputes related to patent and other intellectual property rights of third parties, none of which have resulted in material liabilities. The Company expects these types of disputes may continue to arise in the future.

Note 13. Certain Relationships and Related Party Transactions

For the year ended December 31, 2019, CU Cooperative Systems, Inc. ("CU Cooperative"), an investor who is also a vendor, was paid fees of \$4.4 million, which relates to services resold to the Company's clients. As of December 31, 2019, accounts payable included amounts due to CU Cooperative of \$0.3 million. Mr. Todd Clark, who has served as President and Chief Executive Officer of CU Cooperative since 2016, is a member of the Board and was designated to serve as a member of the Board by CU Cooperative. CU Cooperative held 5% or more of the Company's capital stock as of December 31, 2019.

Note 14. Employee Benefit Plan

The Company sponsors a 401(k) savings plan that covers substantially all employees who have attained 21 years of age. Employees can defer a portion of their annual gross compensation up to limits established by the Internal Revenue Code. In 2019, the Company began matching employee contributions at 25% of employee contributions up to 8% of salary. Matching contributions vest 20% annually over 5 years. Prior to this change, the plan provided for employer contributions to be made only at the Company's discretion. Contributions for the year ended December 31, 2019, were \$0.8 million.

Note 15. Subsequent Events

The Company has evaluated events or transactions occurring after December 31, 2019, the balance sheet date, through December 11, 2020, the date these financial statements were available to be issued.

On May 4, 2020, the Company executed the 2020 Series E Preferred Stock Purchase Agreement allowing existing investors including certain clients to purchase an additional 5,882,353 shares of Series E redeemable convertible preferred stock at a price of \$8.50 per share. These securities have the same liquidation preference and terms as other Series E redeemable convertible preferred shares. The Agreement calls for future funding to occur on two mutually agreed closing dates in August 2020 and December 2020. On August 5, 2020, the Company sold 3,491,071 shares of Series E redeemable convertible preferred stock resulting in proceeds received of approximately \$29.7 million. Investors who are also clients purchased 600,026 Series E shares.

On September 23, 2020, the Board authorized an increase in the number of authorized shares of common stock to 101,671,156 shares; authorized an increase in preferred stock to 72,799,602 and created \$0.001 par value Series F redeemable convertible preferred stock consisting of 8,750,000 shares reserved for sale at \$16.00 per share.

On September 24, 2020, the Company sold 8,750,000 shares of Series F redeemable convertible preferred stock at \$16.00 per share for proceeds of \$140 million. Series F redeemable convertible preferred stock is convertible at any time into common stock at the election of the holder; is redeemable at the election of the holder beginning in May 2023; has a stated 8% dividend rate which is

not cumulative and payable only if, when and as declared by the Board; and, has a liquidation preference over the Series A redeemable convertible preferred, Series B redeemable convertible preferred, Series C redeemable convertible preferred and common stockholders. Series F redeemable convertible preferred stock also has voting rights equal to common stockholders and certain anti-dilution terms in the event of conversion.

Concurrent with the sale of Series F redeemable convertible preferred stock, the funding of the final December 2020 tranche under the 2020 Series E Stock Purchase Agreement was accelerated. On September 24, 2020, the Company sold 2,764,708 shares of Series E redeemable convertible preferred stock at \$8.50 per share resulting in proceeds of approximately \$23.5 million.

On October 4, 2020 the Company announced the acquisition of substantially all of the assets of ACH Alert for approximately \$25 million in cash consideration and \$4.9 million of additional proceeds in deposit with an escrow agent for satisfaction of contingent payments, as discussed below. The integrated set of assets and activities acquired from ACH Alert through the acquisition meet the definition of a business under ASC 805, as updated by ASU 2017-01. A term loan of \$25.0 million ("Term Loan") was borrowed on October 16, 2020 (as discussed further below). The proceeds of the Term Loan were used to partially fund the acquisition of ACH Alert.

The ACH Alert acquisition involves additional contingent payments, that is, payments to be made in the event certain future events occur or conditions are met. Specifically, subject to ordinary working capital adjustments and contingent on continued employment by one of the selling executives, \$2.5 million will be paid in October 2021 and \$2.4 million will be paid in October 2022.

On October 15, 2020, the Company offered to purchase for cash vested stock options or common stock representing up to 20% of each employee's holdings from employees employed on September 30, 2020. The expiration date of the tender offer was November 12, 2020 and 1.1 million of vested stock options and common stock were tendered resulting in a total net payments of \$16.7 million.

On October 16, 2020, the Company entered into a credit agreement with Silicon Valley Bank and KeyBank ("Credit Agreement"). The Credit Agreement replaced the prior credit facility provided by Comerica Bank. The Credit Agreement matures on October 16, 2023. In addition, the Credit Agreement includes the following:

Revolving Facility: The Credit Agreement provides \$25.0 million in aggregate commitments for secured revolving loans, with sub-limits of \$10.0 million for the issuance of letters of credit and \$7.5 million for swingline loans ("Revolving Facility").

Term Loan: A term loan of \$25.0 million was borrowed on the closing date of the Credit Agreement. The proceeds of the Term Loan were used to fund the acquisition of ACH Alert which closed on October 4, 2020.

Accordion Feature: The Credit Agreement also allows the Company, subject to certain conditions, to request additional revolving loan commitments in an aggregate principal amount of up to \$30.0 million.

Revolving Facility loans under the Credit Agreement may be voluntarily prepaid and re-borrowed. Principal payments on the Term Loan are due in quarterly installments equal to an initial amount of approximately \$0.3 million, which begin December 31, 2021 and continue through September 30, 2022 and increases to approximately \$0.6 million beginning on December 31, 2022 through the Credit Agreement maturity date. Once repaid or prepaid, the Term Loans may not be re-borrowed.

Borrowings under the Credit Agreement bear interest at a variable rate based upon, at the Company's option, either the LIBOR rate or the base rate (in each case, as customarily defined) plus an applicable margin. The applicable margin for LIBOR rate loans ranges, based on an applicable recurring revenue leverage ratio, from 3.00% to 3.50% per annum, and the applicable margin for base rate loans ranges from 2.00 to 2.50% per annum. The Company is required to pay a commitment fee of 0.30% per annum on the undrawn portion available under the Revolving Facility, and variable fees on outstanding letters of credit.

All outstanding principal and accrued but unpaid interest is due, and the commitments for the Revolving Facility terminate, on the maturity date. The Term Loans are subject to mandatory repayment requirements in the event of certain asset sales or if certain insurance or condemnation events occur, subject to customary reinvestment provisions. The Company may prepay the Term Loans in whole or in part at any time without premium or penalty.

The Credit Agreement contains customary affirmative and negative covenants, as well as (i) an annual recurring revenue growth covenant requiring the loan parties to have recurring revenues in any four consecutive fiscal quarter period in an amount that is 10% greater than the recurring revenues for the corresponding four consecutive quarter period in the previous year and (ii) a liquidity (defined as the aggregate amount of cash in bank accounts subject to a control agreement plus availability under the revolving credit facility) covenant, requiring the loan parties to have liquidity, tested on the last day of each calendar month, of \$10.0 million or more. The Credit Agreement also contains customary events of default, which if they occur, could result in the termination of commitments under the Credit Agreement, the declaration that all outstanding loans are immediately due and payable in whole or in part, and the requirement to maintain cash collateral deposits in respect of outstanding letters of credit.

Through and including , 2021 (the 25th day after the date of this prospectus), all dealers effecting transactions in these securities, whether or not participating in this offering, may be required to deliver a prospectus. This is in addition to the dealers' obligation to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

Item 14. Indemnification of Directors and Officers

Section 145(a) of the General Corporation Law of the State of Delaware provides, in general, that a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the corporation), because he or she is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by the person in connection with such action, suit or proceeding, if he or she acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful.

Section 145(b) of the General Corporation Law of the State of Delaware provides, in general, that a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation to procure a judgment in its favor because the person is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees) actually and reasonably incurred by the person in connection with the defense or settlement of such action or suit if he or she acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation, except that no indemnification shall be made with respect to any claim, issue or matter as to which he or she shall have been adjudged to be liable to the corporation unless and only to the extent that the Court of Chancery or other adjudicating court determines that, despite the adjudication of liability but in view of

all of the circumstances of the case, he or she is fairly and reasonably entitled to indemnity for such expenses which the Court of Chancery or other adjudicating court shall deem proper.

Section 145(g) of the General Corporation Law of the State of Delaware provides, in general, that a corporation may purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against any liability asserted against such person and incurred by such person in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify the person against such liability under Section 145 of the General Corporation Law of the State of Delaware.

In connection with the sale of common stock being registered hereby, we have entered into indemnification agreements with each of our directors and our executive officers. These agreements will provide that we will indemnify each of our directors and such officers to the fullest extent permitted by law and our amended and restated certificate of incorporation and bylaws.

We also maintain a general liability insurance policy which covers certain liabilities of directors and officers of our company arising out of claims based on acts or omissions in their capacities as directors or officers.

In any underwriting agreement we enter into in connection with the sale of common stock being registered hereby, the underwriters will agree to indemnify, under certain conditions, us, our directors, our officers and persons who control us within the meaning of the Securities Act of 1933, as amended, referred to herein as the "Securities Act," against certain liabilities.

Item 15. Recent Sales of Unregistered Securities

Since December 31, 2017, we have made the following sales of unregistered securities:

Equity Plan-Related Issuances

- (1) Since December 31, 2017, we have granted to our directors, employees and consultants options to purchase 8,451,378 shares of our common stock with per share exercise prices ranging from \$1.70 to \$10.20 under our 2011 Long-Term Incentive Plan ("2011 Plan").
- (2) Since December 31, 2017, we have issued to certain of our directors, employees and consultants an aggregate of 108,650 shares of our common stock at per share purchase prices ranging from \$1.70 to \$3.32 pursuant to exercises of options under the 2011 Plan for an aggregate purchase price of \$243,978.

Sales of Redeemable Convertible Preferred Stock and Warrants

- (3) In December 2018, we issued and sold an aggregate of 4,895,721 shares of Series D redeemable convertible preferred stock to 2 accredited investors at \$6.1278 per share for gross proceeds of \$30.0 million.
- (4) Between May 2019 and September 2020, we issued and sold an aggregate of 12,726,367 shares of Series E redeemable convertible preferred stock to 33 accredited investors at \$8.50 per share for gross proceeds of \$108.2 million.
- (5) In September 2020, we issued and sold an aggregate of 8,750,000 shares of Series F redeemable convertible preferred stock to 15 accredited investors at \$16.00 per share for gross proceeds of \$140.0 million.

- (6) In June 2019, we issued warrants to purchase an aggregate of 29,412 shares of Series E redeemable convertible preferred stock with an exercise price of \$8.50 per share to one accredited investor.

The offers, sales and issuances of the securities described in paragraphs (1) and (2) were deemed to be exempt from registration under Rule 701 promulgated under the Securities Act as transactions under compensatory benefit plans and contracts relating to compensation, or under Section 4(a)(2) of the Securities Act as a transaction by an issuer not involving a public offering. The recipients of such securities were our directors, employees or bona fide consultants and received the securities under our equity incentive plans. Appropriate legends were affixed to the securities issued in these transactions. Each of the recipients of securities in these transactions had adequate access, through employment, business or other relationships, to information about us.

The offers, sales and issuances of the securities described in paragraphs (3) through (6) were deemed to be exempt under Section 4(a)(2) of the Securities Act or Rule 506 of Regulation D under the Securities Act as a transaction by an issuer not involving a public offering. The recipients of securities in each of these transactions acquired the securities for investment only and not with a view to or for sale in connection with any distribution thereof and appropriate legends were affixed to the securities issued in these transactions. Each of the recipients of securities in these transactions was an accredited investor within the meaning of Rule 501 of Regulation D under the Securities Act and had adequate access to information about us. No underwriters were involved in these transactions.

Item 16. Exhibits and Financial Statement Schedules

(a) Exhibits

A list of exhibits required to be filed under this item is set forth on the Exhibit Index of this registration statement and is incorporated in this Item 16(a) by reference.

(b) Financial Statement Schedules.

Schedules not listed above have been omitted because the information required to be set forth therein is not applicable or is shown in the financial statements or notes thereto.

Item 17. Undertakings

The undersigned Registrant hereby undertakes to provide to the underwriter at the closing specified in the underwriting agreements certificates in such denominations and registered in such names as required by the underwriter to permit prompt delivery to each purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

The undersigned Registrant hereby undertakes that:

- (1) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this Registration Statement in reliance upon Rule 430A and contained in a form of prospectus filed by the Registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this Registration Statement as of the time it was declared effective.
- (2) For the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

INDEX TO EXHIBITS

The following exhibits are filed as part of this registration statement.
